American Railroad Journal.

Saturday, June 24, 1865.

Stock Exchange and Money Market.

The market has shown but little excitement since our last issue. Gold has risen several per cent, and on Tuesday went back for a time to nearly its old rate, having retreated from the 40s to the 30s, and this notwithstanding a considerable export. We have always been of the opinion that considerable amounts of money were employed in the street by friends of the Confederates and the Confederates themselves, to assist in keeping up the premium. The recent developments made public from official papers captured at Richmond and elsewhere, conclusively show that every effort, no matter how unjustifiable, was resorted to to injure the North during the contest, and there was every hope at the South that our financial power might successfully be overthrown. The New York Stock and Money Market was considered a good field for the employment of Southern funds, and that they were used here is now proved beyond all contradiction, or rather by the confessions of the agents who engaged to perform this part of the incendiarism in the programme. It having been proved before the military commission at Washington that $25,000 had been remitted to a sympathising editor of this city, and by such testimony as was not to be disputed, the transaction is now sought to be explained by a statement put forth as a defence, that the money was sent by the rebel commissioner in Canada who had $600,000 placed by Jefferson Davis at his disposal, to the editor here for the purpose of speculating in gold! The explanation is as bad as the charge, and shows that our suspicions of a traitorous attempt on the market had a good foundation. The truth which is said to lie at the bottom of the well, has come to the surface in a *wooden* bucket it is true, but it comes up at last. The amount of gold exported from this port whence almost the whole of our specie exports are made, have been since the 1st of January of the present year, about 5 months, $17,521,047. It is curious to compare this with the exports of previous years for the same number of months. We find the differences both greater and smaller than we might at first suppose.

Same time—			
1864	27,411,833	1857	20,056,996
1863	19,931,040	1856	12,236,930
1862	21,749,363	1855	15,696,472
1861	3,024,822	1854	14,364,938
1860	18,429,776	1853	7,918,836
1859	31,431,107	1852	10,518,262
1858	11,870,151		

Thus we see as far back as 1857 the export was two and a half millions or thereabouts more than during the present year; in 1859 nearly fourteen millions more; in 1862 four millions; in 1863 two millions and upwards; and last year about ten millions. And yet the country never seemed to be affected seriously or permanently by this large drain. Those therefore, who are predicting bankruptcy and "specie bankruptcy," especially from the present outgoes, do not seem to have profited by their experience of the past, and the fall in the premium after its late rise expected to keep on till the premium was 150, will have to wait a little longer to see their predictions verified. If this commodity of gold is so necessary abroad we are able to part with it. Our mountains are full of it, and its departure in large or small quantities will not retard our material progress. One cause of its recent rise is certainly legitimate, that of the increased travel to Europe the present season by individuals and families of means and wealth. The sums to be credited abroad to American travelers who have gone to Europe since the close of the rebellion would be found on examination to be very large, and will account for a good share of the late shipments. Our countrymen and countrywomen are fond of travel, and though many of the weaker sort are not much improved by it, we believe now that our country has so splendidly carried itself through a great and dangerous war, and so vindicated the power, indeed the superiority of our free institutions, that our countrymen will maintain their self-respect, and gain the good opinions of foreigners,

not by being their flatterers or imitators, but by bearing themselves as American citizens. In connection with this same subject we may remark that it is very evident our imports have been small during this same period already alluded to. The decrease of exports of British goods to the loyal States for example, during the month of May last is apparent from the official returns, and in the preceding month as appeared from the same authority, the exports from Liverpool in that direction were only £4,987,267, against £6,320,-827 for the same time in 1864, and £5,402,166 in 1863. A late Liverpool paper of June 6, remarks also in connection with the foregoing, that while the number of steamers to the United States is increased "the amount of cargo they obtain is trifling even at the reduced rates now current." And for our part we do not see why some cargoes come here at all. Take for example from the Liverpool customs entries of British goods shipped to New York on the 31st of May, the following items as a specimen: 116 bales of woollen *flock*, 1 case of leather, 3 cases wrought leather, 32 tons bar iron, 4 cases of sewing cotton, 1 cask of stationery. It seems to us that any importer who pays gold for these articles had better have saved himself the trouble and also the premium on gold by making his purchases of these articles at home.

On the 1st of June we also find shipped to this port from Liverpool 12½ cases of *essence of* lemon, 2 bundles of *beaver skins*, 1 case vulture feathers, 20 cases essential oil, 200 bags sago flour, 82 cases and 7 casks of glass beads, 12 chests of indigo, 1 box of otto of roses, 1 case of parchment, 13 cases window glass, magnesia, *gelatine*, dressed skins, alumina, *nickel*, &c. Commerce is certainly a splendid idea, but a commerce which brings all these things to us second hand, when the most of them can be had here in abundance more directly, looks very much like a farce, and is not being conducted on sound principles. But anything will sell in this prosperous country, and the foreign merchants and manufacturers understand this perfectly and profit by the knowledge. We should suppose that we might much easier and cheaper obtain lemons in any form, as fruit or essence, nearer home, and as to gelatine or the product of bones, and nickel, we presume it would be quite unnecessary to send to England for these.

We make from Maxwell's Liverpool *Price Current* of the 6th inst., the following quotations which may interest some of our readers:

Flour—		s. d.	s. d.
English, Irish, Spanish &			
French, superfine	per 280 lbs.	32 0	to 33 0
Ditto, extra superfine..	"	35 0	to 39 0

" new.....	"	26 0	to 27 6

The amount of bullion held by the Bank of France, June 1, inst., was in sterling £19,635,000, and in the same day by the Bank of England £15,838,000, and the rate of interest in France during the last year has been uniformly lower than in England. In both countries, however, there is now continual apprehension of something or other, indicative of the uncertainty of their financial and commercial future. The failure of a single native house in Bombay has actually caused a tremor in all the commercial circles of Great Britain. American business is certainly independent of and beyond the influence of any individual misfortune however great.

It is very natural with the circumstance of our having before us a large National debt, for which we are solely obliged to the mad and unjustifiable ambition, and the want of principle of a score of Southern politicians, that we should pay attention to the subject with reference to its final extinguishment, and the means with which to accomplish this. Thus we instinctively look over our great inventory of property, see when the day of payment falls due of the principal, and how the interest is to be provided for. Happily for us, the examination not like that of hopeless accounts, is perfectly reassuring.

Thus from time to time this JOURNAL has presented extracts from the Great Ledger, and our statistics have again and again shown that we are not only perfectly solvent, but that our earnings alone are amply sufficient to clear us from debt within a reasonable time. One fact we have recently seen stated which we have not hitherto noticed as it deserved. The annual production of the precious metals has been thoroughly tabulated and these tables are carefully studied all over the world. But how few are those who consider the annual value of the other mineral products of this country. The yield of our gold and silver mines is enormous, and is likely to increase, but who thinks of the other treasures that are being exhumed.

We find a recent statement which is worthy of notice. It is there said that we produce annually of

Coal 13,700,000 tons, value	$82,000,000
Iron 750,000 "	37,500,000
Petroleum 2,200,000 bbls	24,200,000
Total	$143,000,000

This throws gold and silver quite into the shade, as it is an element of great wealth and all the product of labor.

With regard to this National Debt, it seems however that while many, or rather the most of us desire to see it paid off as soon as possible, there are those who believe it best to retain it permanently. Therefore we were not surprised to meet the recent publication in support of this view of the subject from the house of Jay Cooke, the well known contractor for the Government 7-30s. The remarkable skill, energy and success with which he has managed his agency, are entirely without a parallel in the history of Finance, and completely throw into the shade any similar transactions in our time in any Bourse of Europe. Perhaps, becoming a little excited in the contemplation of what he has achieved, he has lost his way a little in the field of political economy, so that although he maintains with bold and dexterously arranged argument that our national debt is really a national blessing, we must totally dissent from that view of the subject. This question has been discussed over and over again by the best economists and the greatest financiers, and they have come to a very different conclusion. That a moderate national debt may be turned to good account when it gives opportunities of investment to those who desire perfect safety and little trouble, and when the security is so good that it is cash and capital at the pleasure of the holder; when it becomes a standard of value for other stocks, like the British Consols, it is not so much to be dreaded, but when it becomes a heavy and pressing mortgage, when it requires even for the payment of interest onerous and inquisatorial taxation, when it presses upon labor and takes from it earnings that are really wanted for subsistence even in the most moderate way, then it is anything but a blessing. It is no answer to say that the money is left in the country, or is returned in dividends Individuals may benefit by these last, but they are few compared with those who have to pay them. And if the principle was correct that the absorption of private capital, of income or earnings is not injurious to a country, then the whole might be taken without injury, which is absurd. The result soon would be bankruptcy, and the approach to this condition of things may be accurately calculated by the amounts thus taken from individuals, in proportion to their usual earnings.

The capital necessary to set industry in motion and enable it to bear taxation would be gone, and hopeless pauperism would follow. This is the received argument among the best European writers on the subject. The hundred and fifty millions now required to pay the interest on a debt of three thousand millions, added to the charges for supporting our army, navy and civil list, is just so much taken from the sweat of labor, from the pittance of the poor, from the limited incomes of the middle classes and these are together the vast majority of the most prosperous nation. We therefore disagree with Mr. Cooke in this matter, and so will all others except millionaires, contractors and the "new rich."

What we want is appreciation of our currency, so that a dollar bill may not at one time only buy 30 cents worth of an article and another 50 cents worth; a rapid reduction of the public debt; a diminution of taxation on the production of the principal necessaries of life, and greater simplicity in the selection of taxable articles, with increased duties and charges on all articles of luxury, which will properly fall on those who have made the most money out of this war. The increase of expenditure which the increase of money has enabled a large class of operators and speculators to make, is precisely the opportunity for the Government to increase its revenue in a just and unexceptionable manner, while it may lighten the burthen of taxation on the middle and poorer classes of people.

The railway market is quite unchanged from the preceding week; it may be pronounced dull and is in the hands of broker interests that operate from day to day for themselves alone. They do not care a farthing for the roads, or for transportation, or for dividends, or for investments. What they want is to make money in the quickest manner, indifferent as to how they do it, if it can only be done. The record of such a market is of no sort of value.

The money market is plentifully supplied, and loans are frequently made as low as 4 per cent. Foreign exchange is without much demand, and it is sold at about par. Government stocks are

firm and a foreign demand is springing up for the new 7-30s. One million was taken early in the week by a foreign house for its principals abroad.

It is the interest of the exchange houses to show there is no cotton in the Country to go forward, or at least very little, and those who believe so are welcome to pay any price they are asked. All the information we have is of a contrary character. Our imports are light and so of course will be our exports, for we are able to supply ourselves to a much greater extent than at any period of our history. We see nothing alarming in this. The aggregate value of these exports from this port for the week ending June 20, exclusive of specie was $2,455,906.

The balance in the Sub-Treasury on Tuesday was $48,494,193.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois War Loan, 95¾; Michigan 6s, 1878, 92½; New York 7s, 1867, 98¼; Illinois coupon bonds, 1879, 95; Tennessee 6s, 55½; N. Atlantic and Great Western Railway.

At a meeting of bond and debenture holders of this Company held in London on the 15th ult., Sir Thomas Peto in the chair, Thomas W. Kennard, Esq., the distinguished Engineer-in-Chief, reported the completion of the Main Line, including the extension to Cleveland, the Western Coal Fields, and Silver Creek Branches, with all the necessary stations, sidings, water tanks, etc. The total length now completed is—Main Line, Salamanca to Dayton, 386 miles; Cleveland Extension (broad gauge), 51 miles; Western Coal Fields Branch (Franklin to Oil City), 32 miles; Silver Creek (coal branch), 6 miles; total, 475 miles. Extensions partly constructed—Buffalo division, 70 miles; New Lisbon (coal branch), 30 miles; Erie and Niagara, Canada, 32 miles—132 miles; the company has also under lease for ninety-nine years the Mahoning Railway, 81 miles; total, 688 miles. The present position of the rolling stock is as follows: 91 locomotives in use; 35 ditto under construction; total, 126. Fifty-one passenger cars, 60 passengers each; 40 ditto under construction; total, 91. Sixteen baggage and mail cars, and 2,566 freight cars, carrying twelve tons each. The report was read to a large meeting of the English bond holders, with explanations from Mr. Kennard, who was present. Mr. Evans, the English Director of the Erie Railway was also present, and bore his testimony to the energy of Mr. Kennard and Mr. McHenry, and to the high character of Mr. L'Hommedieu, the American Chairman of the Company. A vote of thanks was passed to Mr. Kennard and Mr. McHenry, and on a subsequent occasion Mr. Kennard was honored with a banquet at the Palace Hotel, London, Sir Morton Peto, occupying the chair.

Russian Railways.

We learn from the Baltimore *Sun*, that Mr. Thomas Winans and his brothers, who for the past few years have been residing in the vicinity of London, have recently entered into a contract with the Emperor of Russia for the running and keeping in order the railroad between St. Petersburg and Moscow, one of the greatest works of the kind in Europe, and which was originally built and stocked by them. Since the retirement of these gentlemen from the management of the road, some years since, its affairs have been in the hands of a French company, but not giving entire satisfaction to the Russian Government, the Messrs. Winans have again been sought out to manage it. The new contract is for eight years, and they are to receive eight millions of roubles per annum for the work—a rouble being worth seventy-five cents in American currency.

☞ The following gentlemen have been elected directors of the Hudson River Railroad for the ensuing year: C. Vanderbilt, D. Thomas Vail, J. M. Tobin, Horace F. Clark, James H. Banker, Augustus Schell, Oliver Charlock, Smith Barker, Jr., Joseph Harkes, Dean Richmond, Wm. H. Vanderbilt, John Steward. At a subsequent meeting of the directors Cornelius Vanderbilt was elected President, and Wm. H. Vanderbilt Vice-President.

☞ The Chicago and Northwestern railway company have let the contract for extending the line of their road from Green Bay to Shawano. The Peninsula Railroad from that point to Marquette, on Lake Superior, is now completed and trains are making regular trips.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 2d week in June, 1865, were.. $78,225 14
Corresponding week of previous year.. 61,333 93

Increase $16,891 21

The earnings of the Chicago and Rock Island Railroad for the second week in June, 1865, were $70,908 00
Corresponding week of previous year.. 54,412 00

Increase..... $16,496 00

The Michigan Southern road earned the second week in June, 1865 ..... $87,929 00
Corresponding week of 1864 ..... 69,300 90

Increase $18,629 00

The earnings of the Chicago and Northwestern Railway for the 2d week of June, were. $159,250 00
Corresponding week of 1864 ..... 137,739 00

Increase $22,511 00

For two weeks from June 1st to 14th:

1864 ..... $267,183 00
1865 ..... 318,796 00

Increase $51,613 00

The earnings of the Marietta and Cincinnati Railroad for the second week in June, 1865, were:

	1864.	1865.
Passengers	$16,903 92	$7,137 37
Freight	10,298 99	9,235 87
Mail, express & telegraph	1,100 00	1,190 58
Total	$28,302 94	$17,563 82
Total this month to date	$46,096 94	$32,549 85
Total for the fiscal year commencing Jan. 1	$480,367 59	$423,264 07

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending June 14, were:

	1865.	1864.
Passengers	$2,660 54	$2,696 75
Freight	13,105 78	13,790 63
Express	162 80	104 16
Mail	296 58	296 58
Total	$16,225 70	$16,888 12
Previous week	$18,009 18	$16,104 69

Receipts from January 1 to June 14:

1865 ..... $245,427 90
1864 ..... 233,168 89

Increase $12,259 01

The traffic of the Great Western Railroad for the week ending June 16th, 1865, was as follows:

Passengers $31,021 03
Freight and live stock..... 23,446 17
Mails and sundries..... 2,734 44

Total $57,201 64
Corresponding week of 1864 ..... 56,620 52

Increase..... $581 12

The earnings of the Grand Trunk Railway for the week ending June 10, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers..... $48,994 00
Express, freight, mails and sundries.. 4,036 00
Freight and live stock..... 76,265 00

Total $129,295 00
Corresponding week, 1864 ..... 112,495 00

Increase..... $16,800 00

☞ The Petersburg (Va.) *News* says that the Southside Railroad is already in the hands of its officers, who are diligently and successfully engaged in making the most extensive repairs;

Railroad Earnings--Monthly.

The earnings of the Atlantic and Great Western Railway for May, 1865, were..... $460,422 00
Corresponding month of previous year 214,679 00

Increase..... $245,743 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for May, 1865, were . $177,625 10
Corresponding month of previous year 149,855 14

Increase..... $27,769 96

The earnings of the Housatonic Railroad for the month of May, 1865, were $38,044 50
Corresponding period of previous year. 30,615 18

Increase..... $7,429 32

Railroad from Vera Cruz to Mexico.

The Paris *Moniteur* of May 15th has the following dispatch, dated Mexico, April 11, 1865:

As the work on the railroad from Vera Cruz to the capital and on that from Mexico to Chalco goes on, other lines of no less importance are projected, and will soon be carried out. *The Official Gazette* has just published a decree by which it concedes to M. Louis Binel the line from Mexico to Tautitlan, passing by San Cosine, Popotla, Zacuba and Tlalnapantla, according to the plans, grades and tracings of the double track, which will be presented in the space of three months by M. Binel to the Minister of Public Works.

The State engages to cede gratuitously the ground that belongs to it, and to obtain from municipalities, at very low prices, the cession of those which they own. The materials for construction will, during the time of construction, be free of Customs duties and other imposts.

One of the two roads will be opened for traffic in the space of two years. The line may be prolonged to Arroyozarco, and across the rich country of Bajio.

The Pacific Railroad.

The excitement of the war and the startling events which mark its close have almost entirely withdrawn attention from the progress of the great enterprise which is to unite the Atlantic and the Pacific in iron bonds. The work on the eastern division, commencing at Omaha, Nebraska, and striking due west for the passes of the Rocky mountains, is so far advanced that 100 miles of the road will be in running order in December next.

The heavy work on the first division of 100 miles is all confined to the first section, between Omaha and Elkhorn River, a distance (by the line of the road) of about 26 miles. Commencing at the Missouri River, at the foot of Farnham street, the first five miles of graduation is now nearly completely. It will be ready for the iron during the present month. This portion of the work is by far the heaviest on the first division of the road. By the first of July, the grade will be completed to a point 18 miles west of this city, and the remaining 8 miles (to the Elkhorn River) will be finished by the first day of August. From the Elkhorn River to Fremont, (37 miles west of Omaha,) much of the graduation is already completed. Between the Elkhorn and the Loup Fork of the Platte River, at Columbus, nearly 100 miles distant from Omaha by the line of the road, the work is very light. Two hundred men, with the aid of the patent excavators employed by the company on the work in the Platte Valley, will finish up at least one mile of grade per day from Fremont to Columbus. September and October will afford ample time to complete the graduation of the road to Loup Fork.

Between Omaha and Columbus there will be but three bridges—one over the Little Papillion, the second over the Big Papillion, and the third over the Elkhorn River. Howe trusses for these bridges are already completed at Chicago, and will be shipped to this point by rail and river in a few days. The masonry is under contract and progressing rapidly, and will be finished by the time the grade is completed to the respective streams.

About 40,000 hard-wood cross-ties have already been prepared, and will be delivered at Omaha before the first of June, at which time it is proposed to commence laying the track.

For the purpose of supplying additional ties as the track laying progresses, the company have provided themselves with four steam saw-mills. One of these has been in operation in Washington County (14 miles north of this city) for nearly 12 months, and it is at this mill that 40,000 ties above mentioned have been prepared. The machinery for the second mill is lying at our landing. Logs for this mill will be rafted down the Missouri River from the heavily timbered districts north of the city.

Two other saw-mills have been shipped from the East, and are expected to arrive within the next ten days.

Hard-wood timber being scarce in this portion of Nebraska, the company have determined to use cotton-wood for cross-ties until they reach the western portion of the Territory, where red cedar can be obtained in sufficient quantities. For the purpose of rendering these cotton-wood ties as durable as oak, (and that this can be done has long since been attested,) the company have determined to resort to the process of Burnetizing. This process is similar to that employed for many years to prevent rotting of wood, and known as kyanizing. It is simply the expelling of the sap from the wood, by immersing it in a chemical preparation which enters the pores of the wood, and protects it against either dry or wet rot—at the same time rendering it practically fire proof, and as durable as the best oak or other hard wood.

The machinery employed in the Burnetizing process is an iron cylinder, one hundred feet long—diameter of bore, five feet and one inch. One of these immense cylinders, weighing fifty-five tons, was brought to this city on Monday, on the steamer Sioux City, from St. Louis, and is now at the landing. It will be placed in position for business within two or three weeks. Ties enough for half a mile of iron can be prepared for use every twenty-four hours.

A contract for the delivery of one million of brick by the first day of July next was made by the company a short time ago. The buildings to be erected during the present summer and fall will require very nearly, if not quite, two million of brick; but there will be no difficulty in procuring all that may be needed.

About six hundred laborers are employed upon the graduation, and the work of constructing the road is being pushed forward, in every department, with commendable energy.

Three locomotives will arrive from the East by the first of June, and the iron has been purchased (for the first 100 miles) in Pennsylvania, and will begin to arrive within the next three weeks.

We confidently expect that the first division of the road will be completed (to the Loup Fork at Columbus) by the first day of December. Such is the purpose of those who have the great work in charge, and they are certainly no physical obstacles in the way of its accomplishments. The same energy which is now exhibited in the prosecution of the work will complete it as far west as Fort Kearney by the first of December of next year.

With the building of this great national thoroughfare no longer doubtful, the rapid growth and prosperity of Omaha are fully assured. Situated as it is, at the initial point of eastern terminus of the greatest railroad in the world—on the western bank of the first navigable stream which is reached in passing from the Pacific coast to the Atlantic, and nearly equidistant between the two oceans—600 miles from any important commercial city—with a rapidly improving mining country west of us, dependent for its supplies upon the most accessible point on the Missouri River, from which these supplies can be obtained most readily and cheaply—who can doubt that we shall, with the completion of the first division of this highway of commerce, enter upon a business which

will increase, as the line extends westward, into a trade which is destined to render our city the chief commercial emporium of the Missouri Valley?—*Omaha Republican.*

Commerce with Algeria.

The Chamber of Commerce of Liverpool has recently resolved to send a delegation to Algeria for the purpose of ascertaining whether British trade may not be profitably extended in that direction.

This circumstance has induced us to look into the subject a little, for the purpose of ascertaining whether there is not an opening also for a trade between that country and the United States, and whether our New York merchants might not send regularly to Algiers some of their vessels, with the certainty of full freights both ways and a profit on both.

In the days of the Greeks and Romans the commerce of Northern Africa was extensive and important, and it seems strange that in our day, with all our immense advance in commercial principles, navigation, telegraphs and the use of capital, we should not be able to trade with advantage in places where the Greeks and Romans did. This at least is an inquiry which has excited the Liverpool merchants, and they are seeking an answer for themselves. The French writers who have been treating of the relations between the Empire and its African Colony impute its slow progress to the circumstance that its Government is a military despotism, that the sword is the only law, and that civil privileges and civil functionaries are dominated by the military power. Thus far the experiment has not been a very successful one for the French, but much is expected from the recent visit of the Emperor. In the meantime we are able to form some opinion of its resources and of the actual value of its trade.

In 1858 the value of all the imports into Algeria was 21,296,081f.; in 1859, 25,165,692f.; but in 1860 it fell to 18,152,449f.; 1861, 17,043,292f.; 1862, 17,775,136f.; and in 1863, 17,033,819f.; and the value of the exports from the colony was—in 1858, 11,429,425f.; in 1859, 7,604,401f.; 1860, 8,300,907f.; 1861, 11,568,970f.; 1862, 10,872,462f.; 1863, 15,328,468f. The share of England in this trade in the year 1863 (there is no return of a later date,) was:—Imports into Algeria: Coal (19,433 tons,) 291,503f.; grain, 177,919f.; pig iron, iron and steel, 131,451f.; cotton tissues, 124,092f.; tobacco and cigars, 92,659f.; machinery, 48,649f.; articles in skin and leather, 36,559f.; gall nuts, 31,140f.; jute tissues, 26,134f.; building materials, 25,785f.; woollen tissues, 23,695f.; olive oil, 23,337f.; wines, 22,623f.; medicinal roots, 20,763f.; indigo, 17,930f.; tobacco in leaf, 15,490f.; other articles, 137,108f.; total, 1,246,837f. Exports from Algeria: Wool, 2,331,932f.; grain, 2,076,740f.; reeds and canes, 1,284,870f.; oxen, 351,400f.; wheat, 114,668f.; woollen tissues, 78,624f.; cotton tissues, 77,818f.; hair, 76,580f.; skins, 68,995f.; tobacco in leaf, 54,347f.; horses, 51,800f.; straw plait, 50,260f.; other articles, 234,346f.; total, 6,852,380f. Small as these totals are, they include the imports from and exports to Gibraltar and Malta, as well as England.

The agricultural products of the colony are various and valuable. Of grain there are now produced annually about 27,000,000 bushels, and large quantities of hay, lucerne, madder, oil, tobacco, fruits and vegetables. These last are beginning to be sent to France, and are said to reach even the Paris market. The Liverpool merchants would like to have some of these on their own tables, where variety is rare and dear. The production of wool has also increased and might be extended indefinitely. Silk might also be made a staple. The animals are excellent, the oxen are large, good workers and easily kept; the sheep are abundant and good. Asses, mules and goats abound. There are excellent mines of lead, copper and iron, the latter with a reputation equal to the Swedish. Cochineal, indigo and hops have been acclimated, and the forests contain timber suitable for ship building as hard as teak, and other kinds especially adapted to furniture. Marble is also abundant.

The principal imports into Algeria are cottons of English manufacture and shipped chiefly *via* Leghorn. Silks, spices, metals, hardware and earthen ware. The exports as entered upon the Custom House lists were in the form principally of oil, wax, hides, skins, ostrich feathers, coral, embroidered handkerchiefs, wool, rugs, corn and fruit. The chief ports under the control of the French besides Algiers, are Oran, Bona and Mostagan. The French system of weights and measures now prevails, and the money is similar, although the old piastre worth about 1 and 6d. sterling is yet common. To conquer Algeria cost a large expenditure of life and money during a fourteen years struggle. The revenues derived from the Colony have quadrupled from those of former years, but do not defray the expense of governing and retaining it.

There is but little doubt that our cottons, furniture, wooden and earthenware might be exchanged in considerable quantities for many articles saleable here. At all events if there be any of our readers looking about for a new scene of operations, we venture to suggest that Algeria may be worth trying.

Extension of the Atlantic & Great Western Railway to Buffalo and the Lakes.

A communication to the *N. Y. Times* dated Fort Erie, C. W., June 14, 1865, says: Quite an important work is now in progress here, to unite Buffalo with Lake Ontario by means of a tubular bridge and a broad-gauge railway from the terminus of the Buffalo extension of the Atlantic and Great Western railway. The "extension" starts from Randolph, Cattaraugus County, N. Y., (seventy miles), to Buffalo, thence across the Niagara River to Fort Erie, C. W., and thence by the Erie and Niagara railway, (thirty-two miles,) to the village of Niagara, on Lake Ontario, the whole of which is already graded and the iron being laid as rapidly as possible. The Erie and Niagara division is nearly complete, and as soon as finished will be equipped and operated with the rolling stock of the Great Western railway. The extension toward Randolph will be operated in like manner by the Atlantic and Great Western, which now forms an important link in the great chain of the broad-gauge lines from St. Louis to New York, via the Erie and the Ohio and Mississippi railways. The river is to be crossed by means of a tubular bridge, similar to the great Victoria Bridge at Montreal, (the charters having been obtained several years ago,) now to be worked into the grand scheme of connecting the oil and coal regions of Pennsylvania and the grain regions of the West with Lake Ontario, by the way of Buffalo and the Niagara.

While the work is progressing here, the representatives of the several connecting companies are now in England, where the bulk of the stock is owned, and negotiations are in progress by which, as it is supposed, the entire line, bridge and all, will be incorporated into the Atlantic and Great Western railway, and constitute its individual outlet, independent of the Erie, by which alone it now finds egress to the ocean.

The report made last month to the London directors of the Atlantic and Great Western railway says: "The engagement with the Erie railway to supply rolling stock to the extent of five millions of dollars, for the purpose of the through traffic between New York and Cincinnati is being faithfully and energetically fulfilled by that company." It is shown that the receipts per mile have more than doubled from January, 1864, to March, 1865, viz.: from $207,298 to $447,815; and the restoration of peace, it is believed, will materially increase this result. This new extension to the lakes will be a still further means of augmenting the receipts of this flourishing company, for it is already substantially one enterprise, and must soon be so in name as well as in fact.

Western Maryland R. R.

A large and enthusiastic meeting was held at Emmittsburg, Md., on the 15th inst., having for its object the extension of the Western Maryland railroad from its present terminus at Union Bridge, Carroll Co., to Hagarstown. The entire route to Hagarstown is now surveyed, and most of it permanently located. The company however have decided, in order to accommodate the people of Emmittsburg and of Mechanicstown, to leave the selection of the route from the West bank of the Monocacy to the South Mountain to those in either vicinity who may subscribe most liberally; or, in other words, who take the largest amount of stock. Assurances were given that the road would be put under contract and extended as soon as the requisite subscriptions were made. It is said that liberal amounts have been subscribed within the last few weeks by the people of Washington Co., who are evidently in earnest in their efforts to procure the proposed extension of the road.

☞ At the annual election of the Rome, Watertown and Ogdensburg Railroad Company the following gentlemen were elected directors for the ensuing year: William C. Pierrepont, Charles E. Bill, Samuel F. Phelps, John Ferguson, Marcellus Mussey, Edward Strong, H. Alexander, Jr., Springfield, Mass.; Calvert Comstock, Delos De Wolf, David Utley; Solon D. Hungerford, Adams; William Lord, Brownville; Talcott H. Camp.

☞ The St. Paul and Superior Railroad Company have deposited $20,000 in the State Treasury, to be forfeited unless they build 20 miles of their road the present year. The company intimate that they have the money provided to push the road to completion within three years.

☞ The Raleigh *Standard* states that the line of travel is now open from Weldon to Petersburg. Travelers can go from Raleigh to Petersburg in twenty-four hours, and from Raleigh to Baltimore in forty-eight hours, by the way of Petersburg and Fortress Monroe.

☞ The State Treasurer of Illinois has sent $93,000 to New York to meet the July interest on the State debt. Fifteen thousand dollars of this amount is paid in gold.

☞ The Jamestown Branch of the Cleveland road is now completed from Jamestown to Brownsville, a distance of twenty-four miles.

Central Pacific Railroad.

SAN FRANCISCO, June 18.—The cars of the Central Pacific Railroad are running up to Upper Gap, forty-three miles from Sacramento, and will probably go twenty miles further by the fall.

RAILROAD IRON.

1000 Tons, 56 lbs per Yard,

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITARY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 25 NASSAU STREET, CORNER OF CEDAR, May 2, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates, with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, their correspondents, together with Messrs. CULVER, PENN & CO., and their friends, being persons of well-known standing and large pecuniary means, have become the owners of its Capital Stock.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors, and will allow four per cent. interest to Banks and Bankers on their credit balances, rendering accounts current monthly.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents J. F. D. LANIER, President.
C. N. JORDAN, Cashier.

3m-19 HENRY A. SMYTHE, Esq., is the President.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER, and MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete and Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

United States Telegraph Company.

There is no one subject which interests the American people more than that of the Telegraph. For beyond all question its present success, as well as its origin, are due to American genius and enterprise. To Morse we owe the first practical measures to convert electricity into an active, obedient agent, and his simple yet efficient instruments have maintained their popularity all over the world. The needle system of Wheatstone is kept up in England from National prejudice, while on the continent Morse's is preferred. Here we use his instruments together with the pointing machine of House, and find full employment for both. All classes use the telegraph, and it is the medium alike of business, of friendship, and general information. It even performs the duties of Exchange, and assists in the operations of banking, not only between our great commercial cities, but the Atlantic and Pacific coasts. It will be perceived by an article in another part of this day's issue that Oceans do not prevent its use, and when the Atlantic cable is laid there will be a net work of telegraphs all over the best part of the civilized world. There are already in this Country thousands of miles of wire along which are every moment passing messages of every description, all the work of a few years. There are hundreds of stations, and many hundreds of operators as a part of the system, and some of the companies employ large capitals of millions and upwards in the prosecution of their business. The vastness of the telegraph system is only equalled by its utility. Competition is also stepping in to cheapen the cost of its use, and like cheap postage is contributing everywhere to the security and happiness of our people. This last circumstance is signally illustrated by the operations of the United States Telegraph Company. Within the year past several of the old companies, to secure greater uniformity of price, management, and organization, have consolidated themselves under this title, and now form one grand line. The arrangement was effected in August, 1864, and embraces the Independent Line from Portland to Washington; the United States Line, from New York to Milwaukee; the U. S. Extension and Inland Companies, which touched Baltimore, Pittsburg, Cincinnati, St. Louis, and other ports. These companies at the time united a capital stock of $2,800,000, and covered about 5,000 miles of route, and more than 14,000 miles of wire. The stock of the United States Telegraph Company is nominally $6,000,000, inclusive of the $2,800,000 issued for the purpose of the consolidated lines. This is held by more than two thousand stockholders, who bought it at subscription price when the lines were consolidated. They are generally active business men, and are scattered along the whole extent of the line.

Since August last nearly three thousand miles of new line have been constructed, and the number of miles of wire now exceeds twenty thousand. Contracts have been made with responsible parties to build a first class two-wire line to the Pacific, with connections throughout California and Nevada, including two branches from Fort Kearny, the one to St. Louis and the other to Chicago. This important commercial connection will be in working order within eighteen months. The extensions of the lines into the South, touching all important points, will have rapid progress, and the officers of the company are confident that within twenty-four months their lines will reach all important business points in the United States and Canada. In the month of August communication will be had with Atchison, Kansas, and in July with La Crosse and Prairie du Chien. The company are building a line to the copper regions, having the exclusive right of way on the military road. This line will connect Green Bay, Ontonagon and Copper Harbor. It will be completed by September 1. At this time the company transmits messages to all commercial points between Montreal and Portland on the North; Washington, South; St. Paul, in the Northwest, and Cincinnati, Louisville and St. Louis.

The earnings for the first four months of the present year, although several of the principal cities and towns of the West had not then been reached, were as follows:

January	$33,662
February	42,199
March	50,078
April	56,085

Taking the average of these earnings, they will be for the current six months $273,048, which is about 8 per cent. on $3,500,000, the amount of its stock placed, and which will complete its lines.

The main office of the company is in the large building, No. 117 Broadway, New York, which has been specially arranged for this business.

The list of officers and directors, which is given below, embraces some of the most eminent business and public men in the country.

President.—James McKaye, New York.

Vice-Presidents. { Lewis Roberts, New York. T. H. Wilson, Philadelphia.

Secretary.—Silas C. Hay, New York.

Treasurer.—Theo. F. Hay, "

Auditor.—J. D. Lawrence, "

Gen'l Sup't.—M. L. Wood, "

Directors.—James McKaye, Lewis Roberts, Samuel Munn, Chas. J. Martin, James S. Sturgis, S. C. Hay, New York; Hon. Freeman Clarke, G. W. Burbank, Rochester; Hon. Wm. B. Ogden, Chicago; Delos De Wolfe, Oswego; Chas. Macalaster, Thos. H. Willson, Jno. D. Taylor, John Hulme, Theo. Adams, Philadelphia; Josiah King, Pittsburg; Geo. P. Plant, St. Louis; Henry Morgan, Aurora; David Fleming, Harrisburg; Geo. F. Davis, Cincinnati; J. M. Schermerhorn, Homer.

☞ Northern capitalists are said to have bought the little village of West Point, Va., the eastern terminus of the Richmond and York River Railroad.

Marietta and Cincinnati Railroad.

OFFICE MARIETTA AND CINCINNATI R. R. Co.
Chillicothe, O., Feb., 15, 1865.

To the Stockholders:

The Board of Directors respectfully submit the following as the Fourth Annual Report for the fiscal year ending the 31st of December, 1864:

BALANCE SHEET DECEMBER 31, 1864.

Railway and equipment		$9,986,124 19
Union Railway purchase (on acct. of) in cash	$111,346 67	
Do. do. in bonds	50,971 91	
		162,318 58
Hillsboro' & Cincinnati Railway p'rchase (on account of), in cash.	$4,486 05	
Do. do. in shares	1,816,140 09	
		1,820,626 14
Scioto and Hocking Valley Railway purchase		800,000 00
Materials on hand		105,521 05
Cash due from Banks and Bankers.		466,012 42
Real Estate		297,524 79
Constr't'n—Main Line.	$1,236,648 37	
" Cin. extension	871,944 23	
Discount on 1st mortgage bonds	108,595 58	
		2,217,188 18
		$15,805,315 35
Capital Stock—

S. & H. V. R. R., bonds coupons, due 1st Nov., 1864	10,500 00	
		161,675 50
Rent of Little Miami Railroad Track		60,000 00
Federal taxes	$10,169 31	
State taxes	9,332 49	
		19,501 80
Interest on City of Baltimore Loan to U. R. R.		1,200 00
1st mort. bond scrip interest		146 47
New York office expenses		4,081 78
Balance		675,948 76
		$1,102,528 81
Balance December 31, 1863		$342,464 34
Net earnings year ending 31st Dec., 1864		427,405 14
Interest account balance year ending 31st Dec. 1864		45,879 58
Premiums derived from Sterling bonds sold		286,779 75
		$1,102,528 81

Construction Account.—The expenditures on this account are as follows:

From Aug. 15, 1860, to June 30, 1862	$157,623 98
From July 1, 1862, to June 30, 1863	119,017 02
From July 1, 1863, to Dec. 31, 1863.	245,120 00
From Jan. 1, 1864, to Dec. 31, 1864.	714,887 37
Total as charged construction acct.	$1,236,648 37
Cincinnati extension, from July 1, 1863, to Dec. 31, 1864	871,944 23
	$2,108,592 60

Revenue Account.—The revenue from traffic for the fiscal year amounted to | $1,038,165 25
Deduct working expenses | 610,760 11
Leaving as net earnings | $427,405 14

—which sum is carried to the credit of profit and loss.

Dividends—The board declared a cash dividend of three per cent. on the first preference shares, which was paid on the 10th of August last, and a stock dividend of three per cent. on the first and second preference shares, payable in kind, on the 10th March, to stockholders of record, on the 1st of January.

General Balance Sheet.—By this account it will be seen that the Company is free from floating debt. It has in hand funds sufficient to complete the work of the extension of its line so as to secure the benefit of its proposed entrance into the west end of the city of Cincinnati, enabling it to make close connections with the three great lines of railway extending from that city westward, and reaching all the great business centres of the States of Indiana, Illinois, Missouri, Iowa, &c.

It also affords a favorable location for freight and passenger traffic in this part of the city, and near the centre of business and population.

It appears by the balance sheet that the sum of $297,524 79 has been expended in the purchase of "real estate," the lands thus purchased are for purposes of rights of way, depot grounds, and materials for masonry and earth embankments.) It is expected that after the completion of the Cincinnati extension, upon which all this real estate is located, the lands, which will no longer be needed for the purposes of the Company, and which will be greatly enhanced in value by the railway, can be sold at prices which will reimburse the Company for a very large portion of this expenditure.

Completion of Main Line.—The work required to complete the main line has been prosecuted in the face of serious discouragements, arising from the scarcity of labor and the high prices of all kinds of supplies required for that purpose. Notwithstanding these difficulties the contractors, Messrs. Dodge, Balch & Co., have maintained a good force on their work, prosecuting it with great energy, and making considerable progress towards its completion. The aggregate length of trestling which has been filled under their contract amounts to two and four-tenth miles, embracing 764,239 yards of embankment. They have also built 2,651 yards of arch, 10,690 yards of bridge, and 2,778 yards of culvert masonry.

All the masonry and embankment required under their contract, west of Warren Station, except one culvert and about 1,000 feet of trestle yet to be filled, has been completed. Thus giving us a permanently built, substantial track from Loveland, eastward, for the distance of 140 miles. Considerable progress has also been made in filling up the trestles between Warren's and the Ohio river. The temporary grades, which have hitherto proved serious obstacles in working the road, have been, in many cases, removed.

The track from Harmar and Belpre, westward, to Tunnel Station, a distance of 15 miles, has been brought to a proper surface and well ballasted. There have been constructed since the re-organization of the company 3,008 lineal feet of new bridges.

Cincinnati Extension.—At the date of the last report, the grading, masonry and bridging on the new line from Loveland into the City of Cincinnati, had been placed in the hands of contractors. This work has encountered the difficulties in prosecution arising from the unsettled state of public affairs, and has also been retarded seriously by the unfavorable weather which has prevailed since the 1st of October last. Notwithstanding these embarrassments the work has been energetically prosecuted by the contractors, and so far advanced as to justify the commencement of track laying at Loveland.

The ties and timber for the superstructure must be transported for a considerable distance, thus requiring more than ordinary time for this work, but as soon as the weather will permit, a large force will be placed upon the line, and it is expected that at no point will the contractor's work delay the advance of the track.

Rails of the best quality have been provided and are now on the ground ready for laying down.

Seven miles north of the City Terminus we are offered a connection with the Dayton and Hamilton Railroad, at a point where the lines of the two railroads approach very nearly to each other.

A contract has been agreed upon with that company for the joint purchase and use of convenient grounds for exchange of traffic. We are thus brought into immediate and business working connection with the entire net-work of railways extending through western Ohio and central and southern Indian, affording good routes also to Indianapolis, Chicago and St. Louis.

The Dayton and Hamilton Company have also offered us the use of their line into the city to a point east of Mill Creek Bridge, where an easy connection with the tracks of Cincinnati and Indiana company will be effected.

In this way we shall enjoy the use and benefit of our central location on Pearl street, much earlier than can be obtained by the construction of the embankment upon our own line through Mill Creek Valley.

Ohio River Bridge.—A contract has been concluded with the Baltimore and Ohio Railroad Company, providing for the construction of a railroad bridge over the Ohio river at Parkersburg, so as to connect their road direct with this line.

The structure is planned for stone piers and abutments across the river, a stone viaduct on the eastern side and earth embankment on the west

side to connect the tracks of the respective roads.

The superstructure of the bridge will be of iron, and the whole structure built in accordance with the provisions of an act of Congress "To Regulate Post Roads," passed May, 1861.

Considerable progress has been made in stripping quarries and getting out stone for the piers and abutments. It is the intention of the parties to the contract to press the work forward with the utmost vigor during the coming season. The North-western Virginia road is now the property of the Baltimore and Ohio Company. Upon the completion of the bridge, their ownership will therefore extend to the west bank of the Ohio river, thus giving the best assurance for cordial co-operation in building up a traffic in what, to them will be the shortest route to Cincinnati, St. Louis and the South-west.

Shops at Zaleski.—The high price demanded for all kinds of machinery, together with the long delay experienced in securing either cars or locomotives at any of the manufacturing shops in the country, has induced the adoption of the policy of manufacturing our own machinery of all classes.

The buildings at Zaleski, designed originally for locomotive works and repairs, have been necessarily occupied as car-shops for several years, for want of proper structures adapted to that purpose.

It has been necessary, therefore, to erect new shops for car-works. One structure, 175 ft. long and 66 ft. in width, with engine house, steam dry house, and blacksmith shop adjacent, has been, during the past season, brought so near completion that it will be ready for use by the 1st of April. This will relieve the buildings originally designed for locomotive works, and enable us to place in them the proper machinery and tools for construction and economical repairs of engines.

The foundations for another car building of the same dimensions as the one completed, are laid, and it will be completed and brought into use as early in the season as practicable.

New Locomotives and Cars.—The following new locomotives have been purchased and placed on the road during the past year, viz:

4 ten-wheel freight, and 5 eight-wheel passenger locomotives.

At our own shops at Zaleski the following new cars have been built: 2 passenger, 4 box freight, and 68 platform cars.

In addition to the above there has been built at the Zaleski shops 39 eight-wheel cars, designed for the use of the contractors while engaged in filling up the trestles.

Revenue and its Sources.—The gross earnings of the road for the year 1864 amounts to $1,038,165 25, derived from the following sources:

Freight	$518,167 86
Passenger	466,913 74
Mail	23,970 82
Express	15,316 80
Telegraph	13,796 03
	$1,038,165 25

A classification of the freight earnings shows that there has been derived from the transportation of—

Agricultural products	$154,850 55
Merchandise	134,601 10
Minerals	162,799 87
Products of forests	22,154 75
Miscellaneous	43,761 59
	$518,167 86

Of the above amount it is also found that only $66,000 has been derived from what may be termed "Through Freight."

It is also found that barely 100 through passengers passed over the road, furnishing a revenue of $600.

These facts provoke an inquiry into the causes which have resulted in depriving this route of a full share of the business constantly tending between the seaboard and the interior. It cannot be the fault of its geographical position, for it connects important business centres by the shortest practicable route.

It cannot be the result of inadequate capacity for the traffic, for passengers and freight have been moved during the year with as much safety, comfort and promptness as has been afforded by other routes.

The main cause of this meagre result is found in the fact that since the commencement of the present war we have been practically deprived of any reliable railroad connection with the seaboard.

The Baltimore and Ohio Railroad, which is our only dependence, has been so frequently interrupted by the movements of hostile armies and depredations of guerilla bands that freights, as well as travel, have sought more satisfactory routes. The business which we have received of a through character has been pressed in this direction rather by the crowded condition of other and rival lines than from choice.

It has been deemed inexpedient to run more than one through passenger train per day, on account of the large amount of construction work in progress along the line. This train, having the distribution of the mail and express, has been necessarily a day train.

The trains of the Baltimore and Ohio Railroad have not run in connection with this train for nearly a year past, so that passengers have been compelled to lay over at Parkersburg.

The construction work is now so far advanced that we expect to add a night train early this season, to which will be attached sleeping cars, thus affording an attractive route to through passengers, and furnishing a most convenient and desirable accommodation for the business of a more local character. Passengers from either termini of the road may pass over the line at night—have a full day for the transaction of business, and return the following night—thus practically requiring but one day to transact business on any part of the line.

With this additional train upon the road, we are promised a close running connection with our passenger trains by the Baltimore and Ohio Railroad Company, without change of cars between Baltimore and Parkersburg.

Local Business.—For over three years the road has been sustained almost entirely by its local resources. This source of revenue is in every respect the most valuable. It is not subject to the misfortunes or policies of others.

Its extent and value is more dependent upon the skill and care with which it is developed, and is therefore a more reliable source upon which to calculate a permanent income.

Its constant increase from the first opening of the road to the present time is a matter of much gratification to the managers and owners of the road.

The gross receipts for the year 1857—then as now, mainly from local sources—were $386,000. We have now a gross amount of $1,038,165 25 of which $171,259 58 is from the Portsmouth Branch.

Notwithstanding this large increase, it is also true that the most valuable source of local revenues has as yet received only a very partial development. The minerals abounding along the route constitute its great wealth, and must forever give to this railroad property a security against fluctuations of value which cannot be enjoyed by any road traversing an agricultural district.

The revenue derived from the transportation of minerals in 1863 was about $58,000; in 1864 it was $162,799 87. This shows a handsome increase. But the result falls far short of the capacities of the country through which the road passes.

Expenses.—The balance sheet shows an aggregate of expenditure amounting to $610,760 11, leaving the sum of $427,405 14 as net receipts. This shows that a large per cent. of the earnings was absorbed by the increased current expenses. This has resulted from the large increase in the prices of labor and all the supplies needed for operating the road. This increase in all the departments of the service is about 100 per cent. over the prices prevailing before the war.

The following statement of the mileage of the trains and expenses and current expenses for several years will serve as an illustration of the comparative cost of operating the road:

In 1857 the mileage of all trains was	556,732 miles.
The gross expenses were	$328,745
In year ending June 30, '63, mileage	445,157 miles.
Expenses same time	$320,394
For the year 1864 the mileage was (except construction	456,408
Expenses same time	$610,760 11

Comparatively, it cost in 1857, 60 cents per mile for each mile run by the trains; in 1863, 72 cents; in 1864, $1.33.

It must also be borne in mind that the same trains passing daily over the road would have accommodated a large through traffic, with a very slight addition to the current expenses. While the peculiar position of this road, with reference to its sea board connections, has deprived it of through traffic, other lines have benefitted by the loss we have thus sustained. The restoration of peace, will secure public confidence in the Baltimore and Ohio road. This route will then have its proper share of patronage, so that a cessation of hostilities will not work any damage to this road.

An apprehension exists to some extent that railroad property will diminish in value upon the restoration of peace. A proper consideration of the greatly increased expenditures, as shown by the above statement, together with the stimulus given to all branches of production, by the distribution of so large an amount of capital, ought to quiet any fears as to the prosperity of railroads.

The price of labor must fall, by the return of so large a number from the army, to meet all the demands of industry. The price of supplies will sympathize with a decline in gold and an increased production of the articles. It is not a reasonable supposition that inaction and depression are to follow upon a state of assured peace, or that the immense supplies of capital which has been earned during the war, and is mainly in the hands of our own people, will either stagnate, or move sluggishly in the channels of enterprise.

The people will find themselves in possession o a currency that represents a solvent and powerful sovereignty. Wild and extravagant speculations may abound, the participators in many schemes may fail, and their money pass into the hands of wiser men, but the capital is not thus lost, and the distribution of so large a surplus must give life and energy to all industrial and commercial pursuits.

In no section of the country can be found a more inviting field for permanently profitable investments than in the mineral district of south-western Ohio, traversed by this railway.

In view of the great magnitude of the interests involved in a thorough development of the minerals along the route of this road, and for the purpose of presenting distinctly and in a convenient form their great value, as a basis of the future traffic of the road, a map has been prepared and published with this report, showing the exact position and extent of the coal, iron, ore, salt, oil, &c., which abound in southeastern Ohio, and which must find their way to market over this road. This map has been prepared under the supervision of Professor E. B. Andrews, of Marietta College, and is accompanied with his report on the minerals of this district. It is presented to the stockholders of the railroad and the public, as an accurate and reliable statement of the *mineral facts* now being eagerly sought for by enterprising capitalists. Large investments have already been made, and there is every reason to expect that the immense value of these mines of wealth will at length be thoroughly tested and successfully developed.

By order of the Board of Directors,
NOAH L. WILSON, President.

☞ It is expected that a railroad will be constructed from St. Paul Minnesota, to Lake Superior, within two years. The work will commence at once.

Law of Insurance.—Exception in Policy Construed.

It is quite usual for insurance companies to insert in a fire policy an exception that if loss should occur in any specified way, the company should not be answerable.

Much litigation has necessarily arisen upon these exceptions, and their construction by the Courts is a matter of no little interest to the mercantile and commercial community. One of these cases is Hayward *vs.* The Liverpool and London Fire and Life Insurance Company, decided by the Superior Court of this city. The action was upon a policy of insurance issued by the defendants whereby they insured the plaintiff against loss or damage by fire, to the amount of $10,000.

It is not necessary to state the pleadings further than to say, that they are sufficient to present the single question upon which the plaintiffs claim and the defense of the defendants depend, viz., whether the defendants are liable under the policy, for a loss by fire caused by the explosion of the boiler of a steam engine used in the building, and being itself a part of the property insured? The parts of the policy material to the question are as follows:

"The conditions and stipulations referred to in this policy!"

(Among these conditions and stipulations, which were thirteen in number, is the following:)

V. "That this company will not be answerable for any loss or damage by fire, occasioned by any invasion, foreign enemy, insurrection, civil commotion, riot or any military or usurped power whatsoever. Neither will this company be answerable for loss or damage to stock or goods, while undergoing any process in which the application of fire heat is necessary, nor for loss or damage by explosion of any k nd."

And endorsed on the policy is the following notice:

"Please to read your policy and the conditions."

By stipulation the following facts were admitted:

The making of the policy; the plaintiffs ownership of the property insured; the destruction, by fire, of property insured to the value of $84,573 39; that if the plaintiff is entitled to recover, such recovery should be for the full amount of the policy, and interest from November 28, 1857; that due proof of loss was furnished to the defendants. Also, 4th. "The said plaintiff admits that the said fire, by which said insured property and premises were destroyed, occurred on the morning of the 29th day of October, A. D., 1857, soon after, and originated from, and was caused by an explosion of one of the boilers of the steam engine, belonging to and used in said India Rubber Factory, and covered by said policy; a steam engine being necessary, and ordinarily used in the carrying on of an India Rubber Factory."

It was also proved that, "at Hayward factory, India Rubber boots and shoes are manufactured. After the shoes are formed they are put into a heater, and subjected to heat of from 250 to 280 degrees Fahrenheit, for the purpose of vulcanization. They are universally made so."

And the plaintiff read in evidence a circular, issued by the defendants, to show what they decided to be extra hazardous risk, of which an extract is as follows:

"Extra-hazardous risks—as livery stables, large hotels, book binders, printing offices, carpenters and cabinet makers, wholesale druggists, mills, machine shops, manufactories, &c., &c., and in general all establishments where fire is used for other purposes than warming the premises, or where large numbers of workmen are collected together you will in general decline."

The Judge found the facts in conformity with the foregoing statement and proofs, and thereupon stated, and decided as a conclusion of laws: That the fire which caused the loss, having originated from an explosion of a steam boiler, the case was within the exception in the policy, and the defendants were not liable for such loss.

"By the Court. WOODRUFF, J.—In St. John *vs.* The American Mutual Fire and Marine Insurance Company, (1 Duer., 371,) the defendants had insured the plaintiff's property against loss or damage by fire, and by one of the conditions annexed to the policy, had provided that they would not be liable "for any loss occasioned by the explosion of a steam boiler, or explosions arising from any other cause." A steam boiler, in the basement of the building, in the upper stories of which the insured property was contained, exploded; the walls of the building were mostly thrown down, and the fires in the boiler furnace, and in stoves, in various parts of the building were communicated to the frame and wood work of the building, and the insured property was burned. It was held in this Court, that the insurers were not liable for the loss, and that decision was affirmed in the Court of last resort. (1 Kern., 11 N. Y. R., 516.) Unless some discrimination, operating in favor of the plaintiff can be made, which shall distinguish the present case from the one referred to, this case was correctly decided and the judgment must be affirmed.

To our minds, whatever differences exist between the two cases, are strongly and decidedly favorable to the defendants claim to exoneration.

It is not and cannot be denied that the contract of insurance, like every other contract fairly and voluntarily made, is to be construed according to the plain and natural import of its language; nor that it is entirely competent for the parties to agree to any terms and conditions defining, limiting or apportioning the risk which they may think proper, or for their interest respectively.

When, therefore, the insurers consented to give to the plaintiff an indemnity against loss by fire, it was entirely competent for them, as a part of the contract, to define affirmatively the causes of fire, the consequences of which they would be responsible for, and to exclude fires arising from other causes, declaring that for the consequences of such fires they would not be responsible. In one form or another, this discrimination probably enters into every contract of insurance customarily made, and the varying premiums upon fire risks are adapted to the varying hazards assumed, while there are some causes of loss by fire which are rarely assumed at all by insurers.

In the present case, the defendants, in the very body of their policy, have declared—and the other party to the contract must be taken to have consented by accepting the policy—that the defendants "shall not be liable to make good any loss or damage by fire which shall happen or arise by any explosion." These terms are too plain to admit of doubt respecting their meaning; they create an exception to the general language of the previous clause, by which they promise to make good such loss or damage as shall be occasioned by fire to the property insured. It is as if the company had said, we will make good to you any loss which you may sustain to your building, goods, machinery, fixtures and steam engine, by fire, unless the fire is caused by the explosion of the boiler, or some other explosion.

Had this company in another department of their business, insured the life of the plaintiff, and provided that they would not be responsible, if he was drowned by being wrecked when on a voyage at sea, there would be no doubt we apprehend, of the validity and full effect of the exception.

The terms "any explosion" are comprehensive enough to embrace every kind of explosion, and in a policy which covers property in a building containing a steam boiler, and even covers the steam engine itself, would seem to be used with necessary and primary reference to the liability of the boiler to explosion, though not with such exclusive reference to that as to leave them liable for fires caused by other explosions.

It was argued that the very circumstances here mentioned, viz., that the steam engine was insured created an inconsistency in the policy itself, and therefore the subject of insurance, viz., the steam engine being named in writing, the exception, which was a printed portion of the policy, must be disregarded. That by insuring a steam engine against fire, the defendants necessarily assume the risk of a fire arising from the explosion thereof, and that an exception of fire arising from explosion is so repugnant to the defendants' undertaking, that it must be rejected. No such repugnancy exists. Fires arising in many ways might occur, and by the destruction of the building and property therein, so far injure the steam engine as to render it worthless except for the materials therein which were not consumed. As above suggested, the exception is simply saying, if the cause of the fire be the explosion of your steam boiler, we shall not be bound to make good the loss; and the plaintiff is to be deemed to say, as to the hazard of fire arising from that cause, I will bear the risk. So an insurer of life may insure the specific life generally, for a term of years, but provide that he shall not be liable if the insured die by violence, or by a particular specified disease or epidemic. This would create no repugnancy. The cases relied upon Harper *vs.* Albany Insurance Company, (17 N. Y. R., 194,) and Bryant *vs.* The Poughkeepsie Mutual Insurance Company (Id. 200,) do not appear to us in any degree to conflict with these views. They hold that an insurance of a particular trade or business, ex vi termini, imports a licenses to use those articles which are necessary or customary in that trade or business, for the usual and customary purposes thereof, and therefore, that when such an insurance is made, the prohibition of the use of those articles must be referred to the use of them for other purposes than such as are embraced within that license, and to the like effect is Harper *vs.* The City Insurance Company in this Court, (1 Bow., 520.) In the present case, it is expressly conceded to the plaintiffs that they may use a steam engine, but agreed that if the boiler explode and fire be caused thereby, the loss shall not be within the insurance. All parts of the policy are in harmony. To recur then to the case

of St. John *vs.* The American Mutual Insurance Company above cited. In that case the words of the condition under which the defendants were protected, were that the company should not be liable "for a loss occasioned by the explosion," &c., and the subject of contention was, whether this exempted the company from liability for a loss by a fire which was caused by the explosion. It was argued that the insurer was liable for all damage sustained by fire, however the fire was caused. That the fire and not the explosion, was the immediate cause of the loss, and that the exemption was only from a liability for a loss sustained by the mere *force* of the explosion. And this appears to have been the whole ground of contest, and this was the view taken by Mr. Justice Gardiner in his dissenting opinion. He insisted, that the fire was the proximate, and the explosion the remote cause of loss, and for the immediate cause of loss the defendants were liable. But the other judges of the Court of Appeals held, as this Court had held, that the clause ought to be construed as if the words had excepted a liability for "a loss by a fire occasioned by the explosion," while at the same time its greater generality would make it include any injury from explosion. Now in the case before us, as if the parties had before their minds the very doubt which led to the litigation in that case, they have employed to describe the exception, the very terms which, by construction, that policy was finally determined to include, viz., "any loss or damage by fire which shall arise or happen by any explosion," and this in the very body of the policy itself.

They did even more than this, they further declared in the body of the policy, that the agreement to indemnify was subject to the conditions and stipulations indorsed thereon, which constitute the basis of the insurance, and in one of those conditions, they declare that the company will not be answerable "for loss or damage by explosion of any kind." They have in the condition the very words which were held to exonerate the defendants in the case referred to; and they have in the body itself, adopted a form of exception which removes the only doubt which existed in that case. And to prevent any pretence of a design to entrap the insured by obscure conditions, they have indorsed on the policy a notice cautioning him to read both the policy and its conditions.

It is suggested, that in the case last mentioned, the steam engine was in the basement of the building, and was not covered by the policy. That may be true, but we are not able to see that that affects the question more favorably to the plaintiff. On the contrary, we have already said that to our minds, the fact that the engine in the case before us was insured, subject to the exception, would rather indicate that the company did not intend to protect the engine itself, nor any other property, against the consequences of the explosion of its boiler, and that the insurer bore that risk himself, whether it caused fire or did mischief.

We are unable to form any other conclusion than that this case is fully within the case of St. John *vs.* The American Mutual Insurance Company, and were we to dispose of the case uninfluenced by that decision, we must still say that the defendants are protected by the exception in the body of the policy, and the condition annexed thereto from any liability. The judgment should be affirmed.

New Jersey Railroads.

The following is a synopsis of the Annual Reports of the Railroad Companies of New Jersey, for the year 1864, presented to the Legislature:

CENTRAL RAILROAD COMPANY OF NEW JERSEY.

Capital stock, $6,500,000; first mortgage bonds, $1,400,000; second mortgage bonds, $600,000; quarterly dividend, 2½ per cent., due Jan. 16th, $159,117 50; interest accrued not yet due, $47,-883 33; accounts payable, $429,399 40; balance to credits of general fund, $628,254 87; value of road and appendages, $9,764,589 49; receipts, $2,537,184 45; expenses, $1,231,554 54; passengers carried, 698,808; passengers carried one mile, 19,397,115.

NORTH BRANCH RAILROAD COMPANY.

Work done to January 1st, under head of grading and construction account, $342,048 53; paid on account of right of way, $52,606 74; amount received on capital stock, $340,000. The road is leased at the annual rent of 6 per cent. on its capital stock to the Central Railroad Company, who have operated it since July last.

WARREN RAILROAD COMPANY.

Capital stock and actually paid in, $1,408,300; first mortgage bonds (1875) sold $600,000; earnings of the road, $209,022 04; expenses, $129,-512 12; passengers carried 76,306½.

THE JOINT COMPANIES.

Earnings of Railroad for 1864	$4,634,056 16
Earnings of Canal for 1864	1,065,024 26
	$5,699,980 42
Expenses of Railroad	$4,278,795 49
Expenses of Canal	280,397 29
Current net of Railroad	784,626 97
Current net of Canal	356,100 67
	$5,699,980 42

FREEHOLD AND JAMESBURG AGRICULTURAL R. R.

Capital stock, $230,840 80; cost of road and equipment, $230,100 37; receipts, $41,350 71; expenses, $27,719 76; dividends paid, $16,809 11; passengers carried, 61,284. The extension of the road to Dean's Pond has been commenced.

BELVIDERE DELAWARE RAILROAD.

Capital stock, $997,112 24; funded debt, $2,-193,000 00; special loans, $120,072 10; temporary loans, $182,512 43; cost of road and equipments, $3,386,285 27; receipts, $484,444 15; receipts from Flemington road, $501,885 48; expenses of working road, $367,057 64; expenses of working Flemington road, $16,913 95. No dividends.

RARITAN AND DELAWARE BAY R. R. COMPANY.

Capital stock, $2,360,700; first mortgage bonds, $1,000,000; second mortgage bonds, $250,000; convertible bonds, $140,000; Toms River (branch bonds) $39,900; other debts, $544,426 38; cost of road and equipment, $2,596,481 11; number of passengers carried, 171,929; receipts, $229,475 83; expenses, $256,275 18.

MORRIS CANAL AND BANKING COMPANY.

Capital stock, $2,202,000; funded debt $831,-279 28; cost of canal and appurtenances, $3,011,-262 64; paid for repairs past year, $130,719 93; cost of navigation and employees, $48,570 64; superintendence and management, $31,874 38; earnings, $597,004 71; dividends, $214,625.

ROCKY HILL RAILROAD COMPANY.

Capital stock, $43,495; funded debt none; other debts, $300; cost of road to date, $41,615 38. The road has been worked but a few weeks and no report is made of receipts and expenses.

BURLINGTON COUNTY RAILROAD COMPANY.

Capital stock actually paid in, $177,650; mortgage and other loans, $76,800; cost of road and equipments, $250,000; receipts, $57,925 89; disbursements, $61,967 20.

CAMDEN AND ATLANTIC RAILROAD COMPANY.

Capital stock paid in, $1,062,243 06; funded debt, $1,035,275 80; floating debt, $123,929 81; cost of road and equipment, $1,881,414 32; interest paid during year, $73,507 87; receipts, $231,-466 11; expenses, $160,359 95.

SALEM RAILROAD COMPANY.

Capital stock, $180,550; bonded debt, $100,000; cost of road and equipment, $250,777 85; receipts, $34,489 25; expenses, $27,826 98. A guaranteed dividend of three per cent. has been paid in cash.

CAPE MAY AND MILLVILLE COMPANY.

Capital stock, $300,000; bonded debt, $200,000; other debt, $124,064 20; cost of road and equipment, $622,746 01; receipts, $63,749 57; expenses, $42,591 52.

MILLVILLE AND GLASSBORO' COMPANY.

Capital stock, $168,198 36; funded debt, $8,-750; floating debt, $28; cost of road and equipment, $408,035 77. Paid one dividend of 8 per cent.

WEST JERSEY RAILROAD COMPANY.

Capital stock, $588,400; loaned at 6 per cent., $700,000; total cost of road, $1,068,685 12; other capital expenditures, $392,564; receipts, $207,-952 34; expenses, $116,408 17.

NEW JERSEY RAILROAD COMPANY.

Capital stock, $4,397,800; funded debt, $635,-000; floating debt, $145,000; profit and loss, surplus earnings represented by permanent improvements, $594,542 13; dividend paid, $219,887 50; cost of road and equipments, $4,271,809 30; receipts, $1,563,606 70; expenses, $785,980 28; passengers, 3,310,940½; passengers over whole line 78,387½; persons killed by accidents, 28.

MILLSTONE AND NEW BRUNSWICK COMPANY.

Capital stock and floating debt, $111,114; passengers carried 20,479; receipts, $12,511 46; expenses, $7,325 57.

PATERSON AND RAMAPO COMPANY.

Capital stock, $248,000; funded debt, $85,000; bonds redeemed, $15,000; cost of road and equipments, $350,000; income (rents from Erie Railroad,) $26,500; dividends paid, $18,640; expenses for contingencies, taxes, &c., $2,553 99; paid sinking fund to redeem bonds, $5,000; paid interest on bonds, $5,950.

MORRIS AND ESSEX RAILROAD COMPANY.

Capital stock, $3,041,950; funded debt, $1,164,-500; floating debt, $31,200; contingent fund, $299,266 07; cost of road and appendages, $4,057,-275 97; receipts, $570,764 03; expenses, $486,-569 37; dividends paid, $121,440 12; passengers, 1,032,978.

NEWARK AND BLOOMFIELD COMPANY.

Capital stock, $103,890; cost of road and equipment, $112,151 36; receipts, $31,499 38; expenses, $30,583 07; one dividend of five per cent. paid, $5,180; passengers, 155,650.

SUSSEX RAILROAD COMPANY.

Capital stock, $192,900; funded debt, $200,000; floating debt, $4,924 17; cost of road and equipment, $397,824 17; receipts, $45,325 50; expenses, $26,602 64; paid interest on debt, $18,-107 09. No dividends.

HACKENSACK AND NEW YORK RAILROAD COMPANY.

Capital stock, $94,600; funded debt, $40,000; paid on construction from receipts of 1862, $8,-508 66; in 1863, $3,688 89; receipts, $40,485 94; expenses, $36,842 77. No dividends.

☞ The bridge across the Hudson at Albany, for the Hudson River Railway, is commenced, under the charge of Mr. Julius W. Adams, C. E. The draw, to allow vessels to pass, is to swing upon a circular rail about 27 feet diameter, and will weigh about 200 tons. The masonry is in progress, and preparations for the iron work are well advanced.

American Railroad Journal.

Saturday, July 1, 1865.

Stock Exchange and Money Market.

Notwithstanding the predictions of "specie bankruptcy," which have been so oracularly put forth within the last few weeks in certain quarters, and the shipments of the previous week, it appears that the amount of coin in the Sub-Treasury and the City Banks is still upwards of forty-two millions of dollars. This metallic reserve appears to be a very constant one; it is like a well, which, though continually supplying large draughts upon it, keeps up to its usual level. No matter how often the supply is drawn from it, there remains the usual quantity. It is very much so with the Bank of England, which is the special reservoir of Great Britain. Enormous sums are continually taken from it for the East, and for Brazil in the West, but the average quantity is always about the same, and can be relied on in all commercial calculations. Meanwhile our accounts from California and the Pacific mines generally, are that the yield of the precious metals is not only large but on the increase. Certain it is that the actual amount of gold received at this port from California up to June 24, was $16,054,555, against $10,721,081 during the same period in 1863, while from the territories overland come millions more. That the world is now engaged in a conspiracy to break down the United States financially we do not believe, whatever political hopes it might have at one time cherished of this catastrophe. Even should our specie be called for in bulk and faster than it could be well supplied, we presume the operators would have to give something in exchange for it; and what and how much, depends considerably on the American merchants and importers. Our specie belongs to ourselves until we part with it. If we undertake to buy more than we can pay for, we should not only fail, but bring down the foreign houses which might sell to us, and when we are unable to pay, we doubt whether we shall be able to buy and ship gold if we were ever so willing.

The idea that the United States are entirely at the mercy of foreign merchants, and that these can do with us whatever they please, is one that we reject and do not believe in.

Besides, our last advices from Europe are that our National securities have taken another start upwards, the 5-20s being sold at 70½ sterling, and new orders have arrived here with the news of that advance. Promptly as the day arrives the interest in gold is paid on these securities; and the July interest of ten millions and upwards is at hand to demonstrate their value and their permanence. Now that the last of the rebellion has been seen, and false rumors can no longer be set afloat in London to damage our National credit; now when foreigners must see how rapidly our naval and military expenditures are diminishing, and our resources at the same time increasing, we do not see how our stocks can avoid becoming the favorites with foreign capitalists, a result, however, we confess we are not particularly anxious to see. Our countrymen have thus far been able to sustain the Government without appealing to foreign aid; and we hope all who hold these securities will continue to hold them, unless foreign capital pays a very liberal premium for them.

The plan of paying off the National debt has attracted great attention abroad. It was a proposition so American-like, so bold and patriotic, that it has convinced the people of Europe of our ability and of our disposition to fulfil our engagements even in advance of their maturity. Our Government has very frequently paid its interest before it was due, and by parity of reasoning it would not be an incredible thing if it should pay off the National debt long before it matured. Our country has always been restless under a National debt. Our people are too intelligent not to perceive the burthen it occasions. If we had been subjected to such a one at the beginning of this rebellion, our finances would have never been as manageable as they proved to be; and now that we are once more an united people, our Union gives new zeal and motive to our efforts to discharge our obligations.

As the recent publication of Jay Cooke has been widely circulated, and possibly under the impression that the Secretary of the Treasury in some measure inspired the publication, we take it upon ourselves with an entire knowledge of the facts, to say that the Secretary so far from inspiring that publication, dissents from its conclusions entirely; and that he has recently said it would be his hope and effort to prevent this National debt from becoming "a National calamity." Mr. McCulloch, like his namesake, the great English economist, is too familiar with finance to believe the proposition, that debt and taxation are desirable; his intention is to reduce them both, and to leave to labor the full fruit of its exertions. And it is to be hoped that in the changes and currents of politics if they are to continue, we may be permitted to enjoy for once at least, a practical and disinterested administration of the Treasury department, by that novelty at Washington an unambitious and conscientious Secretary. The Treasury department is now the most important of any in the State, and should be managed entirely without reference to politics. It is to be hoped that the President sees and understands this necessity. A Secretary of the Treasury, who only looks upon his subordinates as political agents, is unfit for his trust, and it is time that this truth was recognized and respected.

The relations between our imports and exports for the present as compared with the same period last year are favorable financially beyond all question. The total of imports since July 1864, to June 24, 1865, is $153,415,457, while for the year ending July 1863, it was $224,045,659. In other words, we have bought during the year 1864–'65, $70,639,292 less than during the year preceding. On the other hand, our exports which in 1863–'64, were $163,578,921 have become in 1864–'65, $199,939,723, showing an increase in our favor of $36,360,802. If we add this to the previous total, we have a numerical difference in our favor in this foreign trade of $106,991,004, or in other words, instead of being in debt that amount, we have saved it. If on the contrary we had still a hundred millions of dollars to pay abroad for our imports, it would be a serious difficulty in the way of resumption. Thus we see how in the natural course of events a prudent commercial people is wise above what is written, at least by ordinary observers and speculators on our financial condition. And happily for us we have a vast trade among ourselves, with all the advantages of traffic without the drawback of duties or tariffs. The interchange of the products and manufactures of so many different States, with differences of soil, climate, tastes and necessities, is of itself a source of never-ending employment and industry, their source and their reward. No other country on the globe possesses this advantage.

England is England and homogeneous in products and necessities, such is France. Exchange and commercial intercourse with them mean long sea voyages and foreign trade, with us they mean a vast domestic and increasing demand, without risk, and profits in hand, and a surplus when we are first satisfied, for foreign nations.

The price of gold has remained somewhat stationary the last week. The fact is that it has been made scarce in the streets, by the circumstance that about five millions of gold have been withdrawn by the large holders from borrowers except at an enormous daily interest, which perhaps is as profitable a mode of operating as any other. Any commodity which may be controlled by a few persons and is in demand, can be used in the same way to enhance the price.

We are pleased to learn that railway securities are in good repute and the market shows a decided improvement. There was quite a rise on Tuesday morning showing the tendency, sharply contested however, by the bears who gained an advantage of a fractional decline before the day was over. The fact is, however, patent that the earnings of the principal roads are on the increase, and a permanent advance must take place as soon as the present Government loan of 7-30s is filled. We may then expect to see shares and bonds at higher rates than at present.

Money is very abundant and is loaned in large amounts at 4 per cent. The semi-annual dividends payable on the 1st proximo, will swell the balances now accumulating. This plethora of money is very likely to be directed to mining, and a considerable number of companies is being organized accordingly.

The Petroleum business has received quite a shock by the recent developements of a company, that came before the public with a grand programme, and a great show of names. The explosion will be beneficial. The business is a good one and highly advantageous to the Country, and in many instances to the stockholders. With proper precautions, it can be made as safe as any other. It is the nature of all successful pursuits to draw after them fraudulent imitations, and experience alone will in these matters teach men wisdom.

The same danger is impending with regard to our gold and silver mining companies. Large speculations are going on in them. A few hundred feet of ground are made the basis of stock of immense capital. A few thousand dollars are made to swell into millions, and the most of the money made at the inception is not got at the mines, but in Wall street, and divided among those who go in, as the phrase is, "on first principles." Here scientific explanation, and faithful agencies are essential to real success, and they are wise who look to facts rather than representations.

A special commission is now in session at the Custom House, under appointment from the Treasury to revise our revenue system. It consists of gentlemen of reputation who are believed to be fully equal to their task. No doubt they will be able to propose many important and useful changes. Adam Smith lays down on this subject four great general maxims.

1. "The subjects of every State ought to contribute towards the support of the government as nearly as possible in proportion to their respective abilities; that is, in proportion to the revenue which they respectively gain under the protection of the State."

2. "The tax which each individual is bound to pay ought to be certain and not arbitrary. The time of payment, the manner of payment, and the quantity to be paid ought all to be clear and plain to the contributor and to every other person." If this rule is correct then our system is extremely defective.

3. "Every tax ought to be levied at the time or in the manner most likely to be convenient for the contributor to pay it."

4. "Every tax ought to be so contrived as both to take out and keep out of the pockets of the people as little as possible, over and above what it brings into the public treasury of the State."

The meaning of this last proposition is that all the State has an interest in, is the net produce of the tax, and therefore it is sound policy to reduce as far as possible the number of articles on which the taxes are chargeable, in order to reduce the expense of collection which does not go to the State, but the collectors. We propose at a more convenient opportunity to consider the subject in its general bearings, and particularly with regard to incomes and profits of business in which great inequalities exist and much injustice. It is to be hoped that the Commission have carefully studied it by the light of the most eminent authorities.

We notice in a cotemporary which has given the rebel cause all the support it could without encountering for a second time the interference of the Government, a disparaging statement with regard to the commerce of the United States as compared with that of foreign Countries which have not been engaged in putting down rebellion or carrying on any kind of war. If our commerce has declined, the fault lies with those who commenced the war, those who supported the confederates even at the North, and encouraged their piratical operations on the seas, so that the Ocean carrying trade fell into the hands of those countries, whose commerce the journal alluded to, takes such pleasure in exaggerating in contrast with our own. We really do not know what to think of such journalism, it is not American, it is not even respectable.

The conclusions we come to this week are favorable, since we can say, that our exports are on the increase, 8,000 bales of cotton are to be shipped immediately from this port, large amounts have been discovered on the Red river, and at Shrevesport the price is but 15 cents per lb., and it is believed the total number of bales available will be found very nearly two millions. Our stocks are rising abroad and in demand, and will before many months be above par. On the whole the week presents at its close a most favorable aspect. Exchange has necessarily fallen, and somebody must stand from under.

Government stocks are steady and in good demand. Our exports for the week ending June 27, exclusive of specie, were of the value of $2,023,471.

The balance in the Sub-Treasury on Tuesday was $45,213,697 97. Our usual tables will show among other things the gratifying and steady increase of the earnings of our principal railways.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Tennessee 5s, 57; Milwaukee and St. Paul 1st mort., 72; Stonington R. R., 113; Brooklyn Park Loan, 85½; Mariposa 1st mort., 40; Atlantic M. S. S. Co., 153; Cary Imp., 25½; Brunswick Land, 8; Nicaragua Transit, 5⅛; Smith and Parmalee Gold, 5; Wyoming Valley Coal, 31; Am. Ex. Bank, 114; 4th National Bank, 97½; Central Bank, 102, Ocean Bank, 85; Shoe and Leather Bank, 105; Phœnix Bank, 103.

Philadelphia.—Allegheny Co. 6s, 74½; Pitts-

burg 5s, 73; 10th and 11th streets R. R., 45; Fulton Coal, 5; Big Mt. Coal, 4⅜; Commercial Bank, 59; Bank of North America, 193; Philadelphia Bank, 132; Manuf. and Mechanics Bank, 30; Girard Bank, 51⅝; Consolidation Bank, 37½; Bank of Penn. Township, 46½; Atlas Oil, ⅛; Adamantine, 2; Big Tank, 1⅜; Bull Creek, ¾; Curtin, 4½; Caldwell, 2⅛; Cherry Run, 1¾; Corn Planter, 1⅞; Duncard, ⅞; Dalzell, 3⅞; Eldorado, ⅝; Hyde Farm, 2; Howe's Eddy, 1½; Junction, 3½; Maple Shade, 11⅜; Mingo, 2¼; McIlheny, 2; Oil Creek, 3⅞; Royal, ⅞; Ross, 2; St. Nicholas, 1¼; Tarr Home, 4; Wm. Pottstown and Boyerstown Railroad.

Efforts are now making, with every prospect of success, to build the Boyerstown and Pottstown Railroad, which was chartered several years ago. Of the 1000 shares (at $50 each) into which the capital stock was divided, 811 have been sold, leaving only 189 yet to be taken. Henry B. Rhoads, Esq., one of the corporators, has been authorized to dispose of the remaining shares, and the *Boyerstown Bauer* urges the people of the neighborhood to come forward and take them, and thereby insure the construction of an improvement so greatly to be desired.

Michigan Railroads.

We learn from the Kalamazoo *Gazette* that the railroad from Jackson to Lansing is nearly ready for the rails; and that the citizens of Jackson and the intermediate country are making great efforts to secure the construction of a railroad from Jackson to Grand Rapids. Efforts are also being made to get an extension of the Grand Trunk railway from Port Huron to Chicago—the favorite route being via Lansing, Hastings, Allegan and St. Joseph. It is reported that the work of extending the White Pigeon and Three Rivers Branch up to Schoolcraft is now progressing; and that the citizens on the line of the Grand Rapids and Indiana railroad have raised means nearly sufficient to build 50 miles of their road, extending from the Air Line to Brady, bringing it within 12 or 13 miles of Kalamazoo; and that the people South of Kalamazoo are intending to raise money enough to secure its construction to that village, without calling upon its citizens for any help, hoping that they will unite with the people of Grand Rapids, and secure the construction of that part of the line. "This railroad," says the *Gazette*, "has advantages which none of the others possess. In the first place, it has a grant of most valuable lands to an amount over a million acres; which, if properly managed will more than pay the entire cost of the road from Fort Wayne to Mackinaw. In the second place, a large amount of work has already been done on this line; and in the third place, its connections with all other roads, by crossing them at right angles, practically makes them effect it only as so many branches contributing to its business and usefulness."

St. Margaret Copper Mining Company.

We notice the removal of the St. Margaret Copper Mining Company to their new and elegant office, Globe Building, 64 and 66 Broadway, and 17 and 19 New street, Albert H. Nicolay, President, in the same office with King, Sutton & Co., near the New Stock Exchange on New street.

We also call attention of Capitalists to the Circular issued from their office relative to the St. Margaret Copper Mine (Canada East), as an investment that is certainly attractive, paying a dividend of at least 20 per cent. on the Capital Stock when the six lodes are in full operation, four of which are now partially developed. Further particulars will be given in our next issue descriptive of the Mine.

Tubular Bridge across the Niagara River at Buffalo.

We published last week a statement in relation to the projected improvement which is to connect the extension of the Atlantic and Great Western Railway from Randolph, Cattaraugus Co., N. Y., by means of a bridge across the Niagara River at Buffalo to Fort Erie, with the Erie and Niagara Railway to the village of Niagara on Lake Ontario. At a recent meeting held in London of the share and bondholders of the Buffalo and Lake Huron Railway Company, Mr. Brydges made some very interesting remarks with regard to the bridge which is very properly styled an International Work. It appears that the capital required for its construction was secured by subscription several months since, and the direction of the work secured for the Buffalo and Lake Huron Company. Engineers have been at work making the preliminary surveys and calculations, so that the work of construction may be commenced as soon as the financial arrangements are perfected. Of the success of these Mr. Brydges had no doubt. To secure this result without calling on the Buffalo and Lake Huron Company for any actual outlay of capital, Mr. Brydges proposed that the different companies interested in the use of the bridge shall pay a certain proportionable amount for that use and as tolls. The bridge will, he said, "be completed by the end of next year, or in the following spring; but it depends to a great extent upon the foundations of the piers. The current is very rapid, and until we get to work it will be impossibe to say with any degree of certainty. I believe, however, it will not be less than two seasons. The chairman reminds me that the arrangement which is in contemplation provides not only for the construction of the bridge, but also for the connection between the bridge and the American lines of the city of Buffalo. The bridge owing to the nature of the navigation, must be placed at such a distance above the town that it will be impossible to connect it with the existing lines of railway coming into Buffalo, without making six or seven miles of railway to join the bridge and the main lines of American railway. The arrangement contemplated includes not only the bridge,

but the line of railway, so that it will enable the traffic to be conducted in the most satisfactory and economical manner, and the amount that will be paid for the whole, the connecting railway and the bridge, will not be as much as it costs the Buffalo and Lake Huron company at the present time to maintain the very inadequate ferry across Buffalo river. I think the arrangement will be satisfactorily completed; and that in the course of two or three months from the present time we shall see the actual commencement of the work."

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in June, 1865, were.. $89,640 22
Corresponding week of previous year.. 60,583 50

Increase $29,056 72

The Michigan Southern road earned the third week in June, 1865 ..... $87,519 00
Corresponding week of 1864 ..... 70,553 00

Increase $16,966 90

The earnings of the Marietta and Cincinnati Railroad for the third week in June, 1865, were:

	1865.	1864.
Passengers	$14,852 20	$6,202 39
Freight	13,756 24	8,874 95
Mail, express & telegraph	1,100 00	1,190 58
Total	$29,708 44	$16,267 92
Total this month to date	$75,805 38	$48,817 77
Total for the fiscal year commencing Jan. 1	$510,076 03	$439,531 99

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending June 21, were:

	1865.	1864.
Passengers	$2,669 61	$2,809 03
Freight	17,250 74	11,816 07
Express	162 80	104 16
Mail	296 58	296 58
Total	$20,379 73	$15,023 84

Receipts from January 1 to June 21:

1865 ..... $265,807 63
1864 ..... 248,192 73

Increase $17,614 90

The traffic of the Great Western Railroad for the week ending June 23d, 1865, was as follows:

Passengers $28,296 73
Freight and live stock 23,528 33
Mails and sundries 4,915 84
Total $56,740 90
Corresponding week of 1864 ..... 45,488 15

Increase $11,252 75

The earnings of the Grand Trunk Railway for the week ending June 17, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers $45,785 00
Express, freight, mails and sundries.. 4,036 00
Freight and live stock 78,724 00
Total $128,545 00
Corresponding week, 1864 ..... 121,753 00

Increase $6,792 00

The earnings of the Chicago and Northwestern Railway for the third week in June, were:

	1864.	1865.
Passenger	$30,104 84	$47,756 40
Freight	94,330 11	127,992 65
Express	1,501 68	2,333 00
Mail	1,405 68	1,405 63
Total	$127,342 26	$179,487 68

Being an increase of 40 94-100 per cent. over last year.

Interest and Dividends.

The Pittsburg, Fort Wayne and Chicago Railway Company have declared a quarterly dividend of 2½ per cent. payable, free of government tax, on the 17th inst. The company also anticipate the dividend of 3½ on the third mortgage bonds due October 1, which will be paid, less the government tax, on the 17th inst. Both payable at the office of Winslow, Lanier & Co., 52 Wall street.

The Rome, Watertown and Ogdensburg Railroad Company have declared a dividend of five per cent., and the government tax, payable on the 15th of July at the Mercantile Bank.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of $3 per share, payable on the 10th inst. at the Union National Bank. The third and final installment in the new stock is paying on the 10th inst.

The Panama Railroad Company have declared a quarterly dividend of 5 per cent. payable July 5.

The Atlantic Mail Steamship Company have declared a dividend of Twenty-five dollars per share, payable five dollars per share in cash, and Twenty dollars per share to be indorsed upon the scrip certificates.

The Terre Haute and Richmond Railroad Company have declared a dividend of six per cent., free of government tax, payable July 5, at the office of the Farmer's Loan and Trust Company, New York.

The Northern Central Railway Company a dividend of 2 per cent. for the quarter ending June 30, clear of National and State taxes.

The New Bedford and Taunton Railroad a dividend of $4 per share, payable on and after June 30th.

The Boston and Providence Railroad Company a dividend of 5 per cent., payable July 1.

The Fitchburg Railroad Company a dividend of $3 per share, payable July 1.

The Granite Railway Company a dividend of $3 per share, payable July 1.

The George's Creek Coal and Iron Company a regular semi-annual dividend of three per cent., and an extra dividend of two per cent. payable July 3d. The City and State taxes paid by the Company.

Pottsville Passenger Railways.

The project of building a Citizens' Passenger Railway connecting this Borough with the boroughs of Palo Alto, Port Carbon, and St. Clair by one line, and with the Borough of Minersville by another line, is fairly under way, and should receive the liberal encouragement of all our citizens. The line to St. Clair has already been surveyed by Col. Pleasants, and is found to be practicable and of comparatively easy construction.

The Company, which has been fully organized, already propose to proceed at once to construct the route to St. Clair, if the citizens of this and neighboring boroughs will give it that practical encouragement and assistance which its importance demands. The people of this Borough, its merchants and business men, should especially be alive to the importance of its construction, as their own interests and the prosperity of the town would be greatly enhanced thereby. Liberal subscriptions for the bonds of the Company should be at once made and the stock taken, so that the Company may proceed at once to work.

We understand that the bonds proposed to be issued are six per cent. coupon bonds of one hundred dollars each, clear of all taxation, interest payable every six months, and secured by a first mortgage on the road, and its cars, fixtures, &c. —*Miners' Journal.*

Commerce of New York.

Foreign imports at New York in May.

	1864.	1865.
Entered for consumption	$7,531,300	$6,592,157

Submarine Cable.

The wonderful discovery of the Telegraph which we owe beyond all question to our countryman Morse to whom we perceive a statue is proposed to be erected in this city, is about to be applied for a second time to the connecting of Europe and America for the purpose of regular communication. The first trial unhappily proved abortive, and a large capital was sunk in the attempt. The second is to come off the next month, the cable being finished, the point of departure on the Irish coast being selected, the Great Western chartered to lay it down, and the agent already arrived at New Foundland to arrange for the American terminus. The indefatigable Mr. Field, who gained so much honor as one of the principal projectors, and agents in the first effort, has again given the present one his personal attention, and the new and the old world await the result with anxiety.

Nevertheless while every possible precaution in the manufacture, and general arrangements has been taken to secure success, there are still apprehensions as to the finality. The following interesting facts in relation to sub-marine cables are derived from tables recently prepared by Mr. Gisborne an eminent British Engineer, and are not assuring as we could wish.

The longest of these has so far proved successful, though not free from occasional interruptions. It is the Malta and Alexandria 1535 miles in length, and it was sent out under water in tanks fitted into the ships which carried it. The cable between Dover and Calais, iron covered, is 27 miles long and has been in use 13½ years. The first cable with a strand for the conductor, was that of New Foundland and Cape Breton. The first use of pure India rubber as an isolator was in a short three mile cable between Keyhaven and Hurst Castle. The first where the outer iron wires were protected against rust by hemp and bitumen was that laid down between England and the Isle of Man. The greatest depth of water in which any of these cables has been laid is between Corfu and Otranto, being from 300 to 1,000 fathoms. Between Dover and Calais the greatest depth is between 20 and 30 fathoms. The failures have been numerous and discouraging. The first ever laid, that between Dover and Calais was a gutta percha covered wire, and worked but for a single day. Between England and Holland four different cables laid at different times, have been so often broken by ship's anchors, that they were picked up and are now being made into one, to be used between Belfast and Scotland.

That between Holyhead in Wales, and Houth in Ireland worked very well for five years, and then gave out, as the iron wires rusted so completely as to make repairs impossible. Another between Spezzia in the duchy of Genoa, and connecting it with Corsica worked admirably for ten years, never being interrupted or costing anything for repairs, and yet during the last year it broke down. The causes of failure are not readily discovered. Mr. Gisborne says that some were too light for position, others were badly laid in narrow straits or chafed through by rocks. In one instance the outer covering of hemp was actually eaten away by shell-fish at a depth of 800 fathoms and upwards.

Of twenty-three submarine cables which were successful for some time, none are now in operation except a few which have been relaid. In nine instances there was a total failure when being laid down. In one instance on the Sardinian and African line, the conveying ship went out of her course, and the cable proved to be too short; in another the cable was cut to save the ship from being lost. These facts are not very encouraging, and it is idle not to expect mishaps in the present case, though everything that science, ingenuity and capital could provide has been brought to the present work. In all these characters our own Country has been well represented, and it is sincerely to be hoped that it will be successful. If the cable can be laid, if it can be maintained, and if it escapes corrosion and chafing, it will not only be a grand triumph over distance and time, but it will undoubtedly be profitable to the liberal and patriotic men who have risked so much reputation and money in the cagse of commerce, civilization and humanity.

Central Pacific Railroad.

The Central Pacific Railroad Company of California, having completed the first forty miles of their track, have received from the United States Treasury the amount of bonds authorized under the act of Congress of July 2, 1862, entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri river to the Pacific Ocean, and to secure to the Government the use of the same for postal, military and other purposes." The bonds are issued in denominations of $1000, and are payable thirty years after date, maturing January 16, 1895. The interest is at the rate of 6 per cent., payable half-yearly in lawful money. The issue and delivery to the Company of these bonds constitutes *ipso facto* a first mortgage on the whole line of the railroad and telegraph, together with the rolling stock, fixtures and property of every kind. And in the event of the refusal or failure of the Company to redeem said bonds when required so to do by the Secretary of the Treasury, in accordance with the provisions of the act of July 2, 1862, the road, with all the rights, functions, immunities and appurtenances thereto belonging, and also all lands granted to the Company by the United States, which, at the time of default, shall remain in the ownership of the said Company, may be taken possession of by the Secretary of the Treasury, for the use and benefit of the United States. So that the bonds have not only the ordinary guarantee of the United States securities, but have also the specific pledge of the largest railroad enterprise on the continent. They are, to all intents and purposes, a United States registered bond, to which the credit of the Government is unrestrictedly pledged; but they have what no other Government securities possess—the guarantee of a first class mortgage upon a valuable property. The amount at present issued is about $1,250,000, and the rate of future issue is likely to be at the rate of about $15,000,000 per annum. The whole amount authorized to be issued under act of Congress is $120,000,000.

☞ We are informed that the Old Creek Railroad has passed into the hands of the New York Central Railroad Company, who now have the exclusive control and management of its affairs. By this arrangement the Pennsylvania Railroad lose the right to use the third rail, which had been laid for their benefit.—*Titusville Herald.*

Atlantic Mail Steamship Company.

The Atlantic Mail Steamship Company was organized one year since by the purchase of the New York and Aspinwall line of steamers, and the dock property at Aspinwall of Mr. Cornelius Vanderbilt, on a capital of $4,000,000, dividend into 40,000 shares of $100 each, on which shares $50 was paid up. The line is known as the Atlantic branch of the original California steamship mail route between New York and San Francisco, running in connection with the Panama railroad and Pacific mail line of steamers. The first annual dividend now declared is 25 per cent. on the entire capital of $4,000,000, equal to 50 per cent. on the amount of capital paid in, or, one million of dollars net profit on the year's business. Of this dividend 20 per cent. or $800,000 is to be written off on the share capital, leaving this capital subject to only 30 in place of 50 per cent. future assessment. The other 5 per cent. is to be paid out in cash to the shareholders.

Eastern Shore Railroad.

The Somerset *Herald* says that the contract to build the road from Salisbury to Somers' Cove, on or before the 1st of April, 1866, has been ratified by the board of directors, and the work will commence forthwith. The *Herald* anticipates that cars will be running to Princess Ann this fall.

Cape Cod Railroad.

The grade of the Cape Cod Central Railroad is completed and the contract for the iron is about to be made. The probability is that the road will be completed and in running order by November. The road intersects the Cape Cod Branch Railroad at Yarmouthport and extends a distance of 19 miles, terminating at Orleans.

The construction of the road is in enterprising and able hands.

The Cape Cod Branch Railroad, under the superintendence of E. N. Winslow, never was in a better or more prosperous condition than at the present time.—*Boston Journal.*

☞ Three men are going out from Springfield to Russia to take charge of repairs on separate divisions of the great railroad from St. Petersburg to Moscow—Henry White, John McFetherns, and Mr. Whitehouse. F. S. Merrick and H. W. Eddy, also of Springfield go out as assistants.

☞ The Rensselaer and Saratoga Railroad Company, which some time ago took into its embrace the Saratoga and Whitehall Railroad Company, has now purchased the Rutland and Washington track, and wiped out the distinct name and existence of that company. The Rutland and Washington was originally a Vermont corporation, with part of its track laid in the State of New York, and for a few years several miles of its road was closed by injunction. During the short career of the Albany Northern Railroad it was the connecting link northward. Since then a portion of the Troy and Boston trains have run over it through a flourishing region of country.

☞ A corps of Engineers are now making a survey for a railroad from Snow Shoe, Clinton county, to Franklin, Venango county. They are now in the vicinity of Reynoldsville, and expect to reach Brookville in about ten days. The survey is made by the Atlantic and Great Western Railway Company, and the citizens along the proposed route are sanguine of its speedy completion.—*Pittsburg Chronicle, June 23.*

☞ Men who wish to get employment on a railroad will now find a good chance on the Grand Rapids and Indiana Railroad, between Sturgis and Brady. We learn that the contractor will make monthly cash payments to those employed on the road. Fifty thousand ties will be wanted between Sturgis and Brady. Those who have got timber along the line will have a good opportunity to sell it—*Kalamazoo Gazette.*

Pennsylvania Coal Trade.

The origin and gradual increase of the Anthracite Coal Trade of Pennsylvania, since 1820, is shown by the following table:

Years.	Aggregate.	Years.	Aggregate.
1820.....	365	1843.....	1,229,160
1821.....	1,073	1844.....	1,575,872
1822.....	3,720	1845.....	1,696,155
1823.....	6,951	1846.....	2,239,675

Finances of New Hampshire.

From the recent inaugural address of Gov. Symth, we have obtained the following in reference to the financial condition of this State:

Funded debts and trust funds.....	$1,623,873 44
Notes due the current year.....	2,355,000 00
Total debt, represented by loans.	$3,978,873 44
Interest due the current year.....	258,000 00
Total debt as represented by loans, with current interest.....	$4,236,873 44
Outstanding obligations estimated by the Auditor.....	706,000 00
He estimates the demands upon the treasury the current year, including floating debt, interest, outstanding claims and expenditures....	$3,575,050 00
Deduct estimated receipts.....	932,100 00
Leaves to be provided for the current year.....	$2,642,950 00

RAILROAD IRON.

1000 Tons, 56 lbs per Yard,
1000 " 50 " "

Shortly to arrrive, for sale by

FOWLE & CO.,
1m-23 No. 70 Broadway, New York.

John A. Iselin & Co.,

32 WALL STREET,
OLD U. S. TREASURY BUILDING.

Government Securities, Railway, Mining, and Oil Stocks, Bonds, Gold, Domestic and Foreign Exchange, bought and sold on commission.

JOHN A. ISELIN. GEO. A. SOPER. S. F. LOCKWOOD.

CHARLES D. GIBSON,

COMMISSION MERCHANT
AGENT FOR SALE OF
RAILWAY IRON
AND
EQUIPMENTS,
PERU IRON
AND
AMERICAN STEEL,
54 William st., NEW YORK.

KING, SUTTON & Co.,

BANKERS and BROKERS,

(GLOBE BUILDINGS,)

64 & 66 BROADWAY, near Wall Street,

AND 17 & 19 NEW STREET, NEW YORK.

GOVERNMENT SECURITIES, STOCKS, AND BONDS, Bought and Sold at the Board of Brokers.

Interest allowed on Deposits.

Petroleum and Mining Stocks receive special attention.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY CO., PITTSBURG, June 23, 1865.

DIVIDENDS.—Notice is hereby given that the regular DIVIDEND of TWO AND ONE-HALF (2½) PER CENT. on the Capital Stock of this Company for the quarter ending June 30, inst., has been declared by the Board of Directors payable, free of Government tax, on and after July 17, prox.

The DIVIDEND of THREE AND ONE-HALF (3½) PER CENT. due October 1, 1865, on the Third Mortgage Bonds, has also been ordered paid in anticipation, less Government tax, on and after July 17, prox.

Shareholders and Bondholders registered at New York will receive their dividends at the agency of the Company, Messrs. WINSLOW, LANIER & CO., No. 52 Wall st., and those registered at Pittsburgh from the Treasurer at that city.

The Transfer Books will close June 30, and will reopen July 18, prox. By order of the Board.

41-26 F. M. HUTCHINSON, Secretary.

J. B. JAMES'

Rosendale Cement Works,

MANUFACTURE a superior quality of ROSENDALE HYDRAULIC CEMENT. Address

J. B. JAMES,
29 Cedar Street, New York.

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,

STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, &c., can be obtained by mail or otherwise at our warehouse.

NEW YORK BELTING AND PACKING CO.,
JOHN H. CHEEVER, Treasurer,
Nos. 37 and 38 Park Row, New York.

THE CENTRAL NATIONAL BANK,

318 BROADWAY,

Is now paying its Second Annual Dividend of 7 per cent. free of Government tax. The Capital of the Bank is to be increased to three millions, the new subscriptions to which are now nearly completed. The deposits of the Bank on the morning of May 2, were nearly fifteen million dollars.

3m-19 HENRY A. SMYTHE, Esq., is the President.

W. R. Travers & Co.,

STOCK AND BOND

COMMISSION BROKERS,

19 WILLIAM ST.

WILLIAM R. TRAVERS. JOHN D. PRINCE.

THE

PHILLIPS PETROLEUM

COMPANY,

No. 18 Broad Street, New York.

OFFICERS:

THOMAS H. PHILLIPS, President.
DANIEL PACKER, Vice-President.
DAVID M. HUGHES, Treasurer.
THOS. B. LAWSON, Secretary.

This Company owns a large tract of land in the valley of **PITHOLE CREEK** in fee, covering admirable boring ground on the margin of that stream, for the distance of more than a mile; commencing about two miles below the great Fraser Well. Also Fifty acres in fee on Oil Creek about three-quarters of a mile above the celebrated **COQUETTE WELL.** Measures have been adopted by the Company to secure the prompt drilling of **TWENTY-TWO WELLS** on these lands. The present income is about **Seventy-five Barrels of Oil per day.** 3m-13

ESTABLISHED A.D. 1646.

Chas. Washburn & Son,

WORCESTER, MASS.

MANUFACTURERS OF

IRON WIRE

OF EVERY DESCRIPTION.

RIVET AND WIRE RODS,

Bar Iron & Blooms Rolled to order.

CHARLES WASHBURN. CHARLES F WASHBURN.

Warehouse, 45 Cliff Street, New York.

Grinnell & Nevers,

STOCK BROKERS,

No. 15 Broad street,

NEW YORK.

Government Securities, Railway Bonds, Stocks, &c., &c., bought and sold at the N. Y. Stock Exchange, exclusively on Commission.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of dry concrete and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

Taxes on Income Briefly Considered.

There is no form of taxation more difficult to adjust on equitable principles than that on income. The experiment of raising money in this way in this country was a necessity of the war, and has been submitted to with the grace which comes from intelligent loyalty. Yet nevertheless, it is one repugnant to the feelings of men, for it is of an inquisatorial character, and involves an exposure of private affairs both of the rich and poor which is often of the most injurious character to both. Certainly those who have incomes are better able to pay taxes than those who have none, those whose daily labor supplies them with their daily bread, and who find all their resources necessary to their subsistence. We have a commission now sitting at the New York Custom House, who are canvassing the whole subject of internal revenue; and without the intention of offering any advice, we propose briefly to consider some of the inequalities, uncertainties, and hardships of an income tax. Take the instance of a fixed income arising from rents of land or investments in public funds. This in one case will descend to the heirs or representatives of the owner and remains. On the other hand, where this income is derived from a laborious or uncertain profession, and which at the death of the possessor is extinguished, it is clear that though the amount of income may be the same in both cases, the basis of the tax is very different and the effect unequal. The one pays on what the payer and his family are sure of as a permanent support; the other on what is uncertain and transient. He is in fact taxed more in proportion to his real means than the other.

So in the case of rents of real estate differing in amount from locality, although the capital invested to produce them be the same. So too, in the cases of annuitants, for annuities are lately becoming a feature of investment in this country. Where one sinks his whole capital in this shape on the contingency of life, his income is larger and his tax consequently greater, while he who retains his capital and secures by investment only a small income in the shape of interest for a term of years, contributes but a smaller proportion as tax, though the capital in both cases is the same. The principle which is recognized as sound by political economists in relation to this, is that incomes arising from realized property should be taxed at a higher rate than the profits of trades and professions. Again there are the necessities "of trade, bad debts or deferred payments" which render the incomes of commercial and professional men very precarious. By the mass of taxpayers the exposure of their private affairs is considered very injurious; it affects their credit, and often their standing in society. Mercantile men from the fear of competition alone, says a writer on this subject, usually conceal the application of their capital, the rate of profit accruing, and the extent of their operations. All this exposure is unavoidable under our present system. The consequences are seen in the constant attempts to evade its payment even by those whose reputation for integrity in ordinary life is entirely indisputable. Our laws have attempted to meet those difficulties by allowing for many deductions. Thus rent of store, shop, or manufactory, insurance upon them, fuel consumed in the same, freight, wages of employees, and other actual and necessary expenses are allowed as deductions from the amount of income received from any trade, business or vocation. So too, repairs of fences, buildings, insurance, and interest on incumbrances may be deducted from the income received from lands and buildings. Again, hired labor and subsistence of laborers, repairs, insurance and interest on incumbrances may be deducted from the receipts of farming operations. From income from personal property of whatever kind, losses on sales of real property within the year, interest paid, national, states and local taxes, paid within the year, and amount actually paid for rent of homestead, together with the fixed sum of six hundred dollars may be deducted lawfully. Thus every effort is made by the law to reach only what is fairly taxable as income; but nevertheless the great difficulty of inequality remains with regard to fixed and uncertain incomes, and cannot well be avoided. If a man is saving money from his earnings, then the tax is levied on his accruing capital, which is so far a discouragement to industry and economy. Probably the result of present inquiries, with the diminution of the National expenditure will lead to extensive modifications of the existing system. Taxes upon expenditure and consumption, especially on articles of luxury may be made to take the place of those which now press on labor. They may be placed on fewer articles, and yet produce as much revenue. Thus an excise on domestic spirits, fermented liquors, and tobacco would be in fact a voluntary contribution by consumers, and yet the amounts would be very large, while the duties on costly wines, and other imported liquors, would be of the same character. The enormous incomes now returned by our prosperous merchants and manufacturers eventually fall into savings and investments, and come within reach of taxation, while those who can illy spare 5 per cent. out of their earnings would be greatly benefitted by a change in the present system.

Maps and Surveys of Western Railroads.

The Burlington and Missouri Railroad Company, of Iowa, have filed in the Interior Department a map of the survey and location of their road from the Missouri river to Fort Kearney in Nebraska.

The Union Pacific Railroad Company have filed a map of the survey and location of their road west from Omaha, Nebraska, for one hundred miles, and from that point a map designating the general route of the line of the road to Salt Lake City, Utah. The eastern division of the Union

Pacific Railroad have likewise filed a map designating the general route of the line of said road from Kansas City to the one hundredth meridian.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey present to the stockholders the following report, for the year ending December 31st, 1864. For convenience of comparison, many of the statements are made to cover the year 1863 as well as the past year.

SERVICE OF THE ROAD AND FERRY.

The service of the road has been as follows:

	1864.	1863.
Miles run by passenger trains	290,641	214,483
" " merchandise "	177,688	187,159
" " coal trains	315,740	383,451
Total by transportation trains	884,069	785,093
Miles run by wood trains	2,633	1,663
" " gravel and constr'ction trains	61,516	25,285
Total miles run by trains	948,218	812,041

The passenger trains also ran 40,768 miles on the New Jersey Railroad, between Jersey City and Elizabeth, drawn by the engines of that company, before this company's own road was opened, against 59,164 run last year.

During the year the boats have run 29,882 miles on the ferry between New York and Elizabethport, and 9,165 miles in carrying live stock to Fortieth street, making a service of 39,047 miles. In 1863 they ran 38,582 miles.

PASSENGERS, FREIGHT AND COAL.

A comparison of the passenger business of the year 1864 with the year 1863 gives the following results:

	1864.	1863.
Number of passengers	698,808	529,017
Miles traveled by pass	19,397,515	13,181,971
Equal to through pas'ngers	258,633	175,759

A comparison of the merchandise business of the two years, in tons of 2,000 lbs., (excluding iron,) gives the following results:

	1864.	1863.
Number of tons carried	272,266	263,625
Tons carried one mile	14,610,805	13,540,017
Equal to through tonnage.	194,811	180,534

A comparison of the iron tonnage of the two years, in tons of 2,240 pounds, gives the following results:

	1864.	1863.
Number of tons carried	69,225	80,853
Tons carried one mile	4,430,400	5,172,456
Equal to through tonnage .	69,225	80,820

A comparison of the coal business of the two years, in tons of 2,240 pounds, gives the following results, the through tonnage being calculated from Easton to Elizabethport:

	1864.	1863.
Number of tons carried	1,149,964	1,049,881
Tons carried one mile	62,372,269	56,795,557
Equal to through tonnage.	974,564	887,431

There was an increase in Lackawanna coal of 61,789 tons, and in Lehigh coal of 38,294 tons.

The coal tonnage over the road, since the transportation of coal was commenced, has been as follows:

	Lackawanna. Tons.	Lehigh. Tons.	Total. Tons.
1856	98,670	33,325	131,995
1857	209,950	84,841	294,791
1858	417,726	122,923	540,649
1859	455,681	183,277	638,958
1860	590,863	263,906	854,769
1861	568,869	254,345	823,214
1862	502,375	314,195	816,570
1863	613,954	435,927	1,049,881
1864	675,743	474,221	1,149,964
Total	4,133,831	2,166,960	6,300,791

EQUIPMENT.

The company own 59 engines, of which 21 burn wood and 38 hard-coal. Of these engines, 47 are narrow gauge and 12 broad gauge. Their condition is reported to be as follows: 30 in good order, 17 in fair order, 8 wanting general repairs, 2 in shops for repairs, and 2 not in use. Seven new locomotives have been placed on the road during the year, and six more are ordered but not yet delivered. About fifty engines are required for the ordinary daily service.

The equipment of cars is as follows: 30 first class passenger cars, 4 second class passenger cars, 7 baggage and mail cars, 4 smoking cars, 79 eight-wheel house freight cars, 12 four-wheel house freight cars, 20 eight-wheel cattle cars, 103 eight-wheel platform cars, 110 six-wheel platform cars, 15 six-wheel lime cars, 306 eight-wheel coal cars, 109 four-wheel coal cars, 142 four-wheel dirt cars, and 1 wrecking car.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses for the year 1864 compared with 1863:

	1864.	1863.
Receipts:		
Passengers	$448,223 94	$287,959 28
Merchandise	731,722 16	605,335 27
Coal	1,317,954 27	1,021,151 57
Mail	7,600 00	7,600 00
Express	22,604 17	11,992 29
Rents	2,223 47	1,175 35
Miscellaneous	6,856 44	6,762 70
Total receipts	$2,537,184 45	$1,941,976 46
Expenses:		
Running expenses	$239,431 00	$156,457 20
Wood consumed	66,114 84	61,708 30
Coal consumed	207,739 83	113,980 04
Repairs of road	175,913 92	136,518 83
Repairs of engines	63,464 40	53,193 22
Repairs pass'nger cars	28,834 16	15,492 08
Repairs freight cars	30,698 94	12,005 73
Repairs coal cars	19,848 28	8,109 61
Repairs docks, Elizabethport	14,814 14	19,281 37
Rep'rs bldings, br'ges	32,231 39	19,119 98
Repairs tools, mach'y	12,770 91	2,391 16
Expense account	41,697 69	32,470 87
Miscellan's expenses.	44,264 91	25,877 86
Ferry running expens	79,658 50	48,313 58
Ferry boat repairs	71,177 35	9,559 95
Ferry miscell. expens.	25,278 82	13,247 52
Car service	77,255 46	91,005 69
Total expenses	$1,231,554 54	$814,732 44
Balance net earn'gs.	$1,305,629 91	$1,127,244 02

The following table shows the receipts, expenses, and net earnings from the beginning of the annual reports to the Legislature to the present time:

	Receipts.	Expenses.	Net earnings.
1853.	$349,018	$197,629	$151,389, or 43 p. c.
1854.	378,145	197,349	180,796, or 48 "
1855.	393,729	208,856	184,873, or 47 "
1856.	553,479	258,308	295,171, or 53 "
1857.	682,314	340,502	341,812, or 51 "
1858.	836,934	345,614	491,320, or 58 "
1859.	971,702	385,716	585,986, or 61 "
1860.	1,185,848	475,457	710,391, or 60 "
1861.	1,201,895	522,452	679,443, or 57 "
1862.	1,397,586	623,245	774,341, or 56 "
1863.	1,941,976	814,732	1,127,244, or 58 "
1864.	2,537,185	1,231,554	1,305,631, or 51 "
Tot.	$12,429,811	$5,601,414	$6,828,397, or 55 p. c.

An increase in receipts is here shown of $595,207 99, or 31 per cent. The increase in passenger business was $160,264 66, or 56 per cent. In merchandise receipts, $126,386 89, or 21 per cent., distributed through every department. In coal receipts, $296,802 70, or 29 per cent.

The expenses show an increase of $416,822 10, or 51 per cent. There has been an increase in running expenses of $82,973 80; in fuel consumed of $98,166 33; in repairs of road of $39,395 09; in repairs of equipment of $59,045 19; in other repairs of $19,028 93; in general expenses of $27,974 37; in ferry accounts of $103,993 62; and in car service a decrease of $13,750 23.

The gross receipts per mile run have been as follows: From passenger trains, $1.54 against $1.47 in 1863; from merchandise trains, $4.12 against $3.23; from coal trains, $3.16 against $2.66. The average receipts per mile run from all trains has been $2.83, against $2.47 the previous year.

FINANCIAL CONDITION.

The following is a statement of the financial operations during the year:

	Cr.	Dr.
Gross earnings, as per statement	$2,537,184 45	
Capital, instalments paid on new st'k	1,879,840 00	
Cash and accounts receivable, decrease	251,066 21	
Total	$4,668,090 66	
Ordinary expenses, as per statement		$1,231,554 54
Grading, second track, extension, etc.		$158,580 16
Masonry		75,056 52
Railway superstructure.		212,784 94
Bridge superstructure		260,704 61
Engineering		5,105 82
		$716,231 55
Less credit to railroad		20,333 70
		*695,897 35
Communipaw filling and bulkheads.		233,513 42
Station houses		31,166 29
New ferry boats		247,192 63
Docks in New York		103,000 00
Engines		118,265 00
Passenger cars		31,950 00
Cars built in shops or purchased		155,322 55
Tools, machinery, miscellaneous property, increase		481,687 40
Sundry accounts, material, etc., increase		22,815 46
Extra dividend, 10 per cent, for '63.		515,000 00
Quarterly dividend for year, 10 p. c.		569,573 44
Interest account for year		155,133 71
State taxes for 1862, ½ per cent. on $4,904,668		26,416 75
United States taxes		49,601 62
Total	$4,668,090 66	

The profit and loss account has been credited with the gross earnings $2,537,184 45

It has been debited as follows:

Ordinary expenses	$1,231,554 54	
Interest account	155,133 71	
Taxes to State	26,416 75	
United States taxes	49,601 62	
Dividends, 10 per cent.	569,573 44	
		2,032,280 06
Balance equal to 8 per ct. on stock, transferred to renewal fund		$504,904 39
Add balance to credit of fund last year	$638,254 87	
Less extra dividend 10 per cent. for 1863	515,000 00	
		123,254 87
Total		$628,159 26

EXTENSION TO JERSEY CITY.

The extension of the road from Elizabeth to Jersey City was formally opened on the second of August, and the passenger trains have since run regularly over the new road. The permanent ferry slips on the New York side are building at the foot of Liberty and Cedar streets, just south of the Courtlandt street ferry. The new and magnificent ferry boats "Central," and "Commu-

* Expenditures on present road and second track, $239,927 60; on extension to Jersey City, $455,970 85.

nipaw," run from here to the ferry slips built on the Jersey shore south of Jersey City. Everything about the boats and slips has been planned for a large business calculated to increase rapidly; and provision has also been made for ferries to other points, from the Jersey terminus, when required. As the shoal water in which the terminus is located is known as Communipaw Cove, in honor of the well-known Dutch settlement of the same name on the shore of the mainland, the name of Communipaw Ferry has been adopted, to distinguish this from the other ferries across the Hudson. When the road was opened, as above, but little beyond a temporary slip and an uncovered platform had yet been prepared at this point. Since then comfortable buildings have been erected, or are in process of erection, two ferry slips have been completed, bulkheads about 1,200 feet in front along the river and extending back parallel to each other have been built, and the solid filling within them sufficiently advanced to give promise of an early ability to transfer to this point large portions of the freight business. Extensive wharves, basins, and warehouses, involving during a series of years the expenditure of large sums, are a part of the plans of the company at this point.

The track now used, on the extension, is in many places a temporary one laid at the side of the roadway, leaving room in the centre for the steam excavators to take out the cuts to the grade established for the permanent tracks. Two such "steam paddies" are at work, the material excavated being now used in filling up the trestle work, and when that is completed will be taken to Communipaw Bay. Double track has been laid wherever practicable. At present everything looks favorable for the rapid prosecution of all the work on the peninsula.

The Newark Bay Bridge—two miles long—is now entirely completed, except some stone filling still required in the cribs, and some additional oak fender piles, and is much admired. It has been tried by a very severe winter and stood the test remarkably well, fulfilling all the expectations of its friends. The movements of the heavy fields of ice have had very little effect upon it.

PORT JOHNSTON.

The new coal station to be established at Bergen Point, in what has been heretofore known as North East Harbor, has been commenced this spring, and will be pushed on as vigorously as possible. The want of this new outlet is keenly felt, and without it the coal trade cannot be materially increased; nor can that regularity be kept up, which is essential to the success and profit of the trade, till the additional facilities here to be provided begin to make themselves felt.

GENERAL CONSTRUCTION.

At the four large bridges, on the western end of the road, work has been steadily going on. The High Bridge is now so entirely filled up that the tracks rest on earth the entire distance, and the embankment has assumed its permanent character. The masonry of the Springtown Bridge is finished, that of the Bloomsbury Bridge is up to the spring of the arches, and the Green's Mills viaduct is also ready to turn the arches.

The same difficulty in procuring men having continued that was felt last year, aggravated by the high and rapidly advancing prices of all kind of materials, no work has been pressed that would bear delay. The urgent necessity for completing the extension, so far as to enable it to be opened, was also very much in the way of all other work.

SOUTH BRANCH RAILROAD.

This branch road, extending from Somerville to Flemington, 16 miles, and under lease to and run by the company, was opened for travel on the first July, thus supplying a New York outlet to a rich country heretofore comparatively shut off.

The business has been unexpectedly good, and is likely at once to make a return sufficient to pay interest and expenses, besides keeping up the road. The cost of the road and buildings on first January was $394,745 27.

WORKSHOPS AND ENGINE HOUSES.

Small shops, a turn table, and an engine house have been put up at Communipaw; some temporary accommodations at other points; and an engine house and turn table at Elizabeth. There is an urgent necessity for more repair shops, and large buildings for the purpose have been planned at Phillipsburg, which will be at once commenced. Much trouble was experienced from the deficiency in this respect, in keeping up the efficiency of the equipment during the past winter, when suffering from the unusual severity of the season; and at one time the business was carried on with extreme difficulty.

THROUGH TRADE WITH THE WEST.

Since the opening of the extension the through passenger business in connection with the Pennsylvania Railroad has been perfected by doubling the trains, and they are now running regularly with sleeping cars and every convenience. A large increase in travel has been the result, and the route has rapidly gained in favor.

CONCLUSION.

The brightening aspect of affairs and the hopes entertained that the war is actually drawing to a close, make it probable that much work which the company have been compelled to defer from inability to command labor can now be undertaken, and also that they can soon add largely to their equipment of all kinds at more reasonable prices than have prevailed.

BALANCE SHEET, January 1, 1865.

Railroad, 64 miles double track	$4,882,675 03	
Extension to Jersey City, 10 miles, in progress	686,336 27

President.—JOHN TAYLOR JOHNSTON.

Directors.—John Taylor Johnston, John C. Green, William E. Dodge, Adam Norrie, New York; Benjamin Williamson, Elizabeth; F. T. Frelinghuysen, Newark; Henry D. Maxwell, Easton, Pa.; Asa Packer, Mauch Chunk, Pa.

Secretary and Treasurer.—SAMUEL KNOX.

Engineer.—JAMES MOORE.

Superintendent.—JOSIAH O. STEARNS.

☞ Forty miles of the Union Pacific Railroad, running from Kansas City to Lawrence, Kansas, has been accepted by the United States Commissioners. This acceptance has placed in the hands of the company the means to purchase the iron for sixty miles of road, extending westward from Lawrence, and also for a branch road from the main stem to Leavenworth, thirty-five miles long.

Close of the Fiscal Year.—Large Gold Surplus in the Treasury.

The fiscal year closed on the 30th of June. Altogether the actual consumption of foreign merchandise, owing to the extravagant price of gold last summer and fall, is found to be about eighty million in gold value less than the previous year, while the customs in gold derived from this moderate consumption are only seventeen millions less than in 1864. The duties now average 44½ per cent. upon the invoice or appraised value of the goods entered for consumption. This rate, on a consumption of about $194,000,000, gives a customs revenue in gold of $86,000,000. Last year the duties averaged 37½ per cent., and gave $103,000,000 on a consumption of about $275,000,000.

The Secretary of the Treasury, in view of the effect last summer of the high price of gold, and consequent high rates of exchange on the consumption of foreign goods, estimated in his annual report in December, for only $72,000,000 of customs. The fall of gold, however, the close of the war, the flattering condition of the crops and the near prospect of a renewed regular, if not active, trade with the South, have all contributed to swell this source of revenue to $86,000,000.

As the wants of the Treasury in the way of gold to pay interest on the gold bearing funded debt were less than $60,000,000 in 1865, the Treasury comes into the new year with a surplus in gold and silver of about $35,000,000, including the appropriations made to pay the present July interest on the public debt and not yet called for.—*N. Y. Times.*

☞ The Montgomery and West Point Railroad is in running order from Chehaw to West Point on the upper section, and from Chehaw to Girard on the lower. Trains occasionally arrive at Girard, but the bridge being burned, there is no means of crossing over to Columbus. There is not running stock sufficient on the road to enable the company to run daily trains yet to both West Point and Girard.

Central Railroad of Georgia.

We learn that this company have completed a contract with Messrs. Spratt & Callahan for rebuilding forty six miles of their road, from Savannah to station 4½, on the Little Ogeechee river. The work will commence just as soon as tools and the requisite materials can be brought here. It is believed the contract will be completed inside of 30 days. The contractors are efficient, enterprising men, and will push the work to the full extent of their ability. This will be a great step towards the re-opening of railroad communications, and the company deserve credit for hastening the improvement. Mr. Wm. B. Johnson, of Macon, has been elected President of the Board of Directors. The Superintendent is Mr. George W. Adams.—*Savannah Herald, June 21.*

Richmond and Danville R. R.

The first train since the evacuation of Richmond, will leave Manchester this morning, and will proceed without interruption of communication to Danville. Passengers going to Lynchburg, however, take stages at Farmville, at Burkville Junction, between which points the distance is seventeen miles. On reaching Farmville they again find cars in readiness to carry them the remainder of the journey. — *Richmond Republic, June 24.*

☞ The Chattanooga *Gazette* states that the Western and Atlantic Railroad has been completed as far as Acworth, one hundred miles from Chattanooga, and thirty-eight miles from Atlanta. From Atlanta to the Chattahoochie River, a distance of seven miles, trains run regularly. The bridge over the Chattahoochie River was completed on the 20th ult., and it was expected that the entire road would be in running order by the 1st of July.

Milwaukee and St. Paul Railway.

At the annual meeting of the stockholders of this company, held at Milwaukee on the 28th of June, the following gentlemen were elected directors for the ensuing year: Russel Sage, Alex. Mitchell, Selah Chamberlain, N. A. Cowdry, F. P James, Horace Galpen, Washington Hunt, D. M. Hughes, W. S. Gurnee, S. S. Merrill, John W. Cary, C. B. Wesley, Daniel Wells, Jr.

At a subsequent meeting of the directors, Alex. Mitchell, Esq., was elected President, and S. S. Merrill, General Manager.

Pennsylvania Railroad.

The aggregate receipts of the company from the operations of its works, including the Philadelphia and Erie Railroad for the years 1863 and 1864, were as follows:

	1863.	1864.
Pennsylvania R. R.	$11,891,412 95	$14,759,057 66
Penn. Canals	287,156 52	308,615 23
Phila. & Erie R. R.	727,669 93	1,131,147 98
Total gross earn'gs.	$12,906,239 40	$16,198,820 87
Deduct expendit's.	7,795,826 66	12,133,707 40
Net earnings	$5,111,412 74	$4,065,113 47

The following exhibits the earnings and expenditures of the Pennsylvania Railroad and branches for the same years:

Earnings from—	1863.	1864.
1st class passengers.	$2,202,778 83	$3,239,990 77
Emigrant "	72,757 95	94,904 37
U. S. troops	514,693 18	511,773 88
U. S. mails	75,598 20	76,830 16
Regular express	75,735 00	75,900 00
Extra express	187,393 82	269,511 12
Freight	8,602,261 97	10,361,999 32
Miscellaneous	160,194 00	128,148 04
Gross earnings	$11,891,412 95	$14,759,057 66
Expenditures for—		
Conducting Transp.	$1,594,681 27	$2,624,916 58
New buildings and extensions	107,465 46	406,614 79
Motive power	1,642,878 91	2,536,666 79
New tools and machinery	10,493 57	105,693 56
New locomotives	557,665 54	613,691 97
Mainten'nce of road	1,311,497 15	2,057,547 85
New 2d track and sidings	244,870 42	191,220 28
Maintenance of cars	466,001 88	853,929 12
New cars added to stock	727,308 05	1,151,063 92
General expenses	117,137 98	152,599 33
Total expenses	$6,780,000 21	$10,693,944 19
Earnings less exp.	$5,111,412 74	$4,065,113 47

Of the expenses the following division is made:

Ordinary expenses	$5,132,197 17	$8,225,659 67
Extraordinary exp.	1,647,803 04	2,468,284 52
Total	$6,780,000 21	$10,693,944 19

The mileage of track in use on the road and branches, including sidings and second tracks at the commencement of the years respectively, was 882.10 / 942.40

Added during year	60.30	46.60
In use at end of year	942.40	989.00
—accounted for as follows:		
Main Line	781.30	807.20
Branches owned	38.60	38.60
" leased	104.20	123.10
Private sidings	18.30	20.10
Total length in miles	942.40	989.00

Of the main line between Philadelphia and Pittsburg there remains only 20½ miles to furnish with double track.

The number of locomotives on the road at the commencement of the year was 255 / 290
And at its termination 290 / 321

The condition of these was as follows:

In good order	153	158
In running order	73	86
In shops for slight repairs	19	25
" for general repairs	45	52
Total in all conditions	290	321

The mileage of engines in each year was as follows:

Passenger engine mileage.	1,260,657	1,370,347
Freight "	4,067,227	4,383,559
Distributing "	212,557	257,612
Total mileage	5,540,441	6,011,518

And the cost of repairs, &c., as follows:

Repairs	$507,894 85	$866,748 94
Fuel	391,791 34	552,932 86
Oil and waste	106,256 32	172,452 34
	$1,005,942 51	$1,592,134 14
—averaging per 100 miles run, for		
Repairs	$9.17	$14.41
Fuel	7.07	9.19
Stores	1.92	2.87
Total cost per 100 miles	$18.16	$26.47

The number of cars on the road at the end of the two years was as follows:

Passenger, baggage and express	178	225
Freight and coal	4,926	5,381
Other cars (in maintenance dept.)	497	548
Leased to Pittsburg and Columbus R. R. Co	119	...
Total	5,715	6,154
Of which are 8-wheel	5,190	5,612
And 4-wheel	525	542

The number and mileage of passengers carried were as follows:

Passengers	1,507,549	2,366,218
Miles traveled	110,297,136	146,873,005

The tons of freight and the miles each ton was carried were as follows:

Tons, through, eastward	348,957	322,497
" local "	1,231,896	1,482,647
" through, westward	127,160	147,972
" local "	557,400	632,263
" through, both ways.	476,117	470,469
" local, both ways	1,789,296	2,114,910
" of free goods	.....	179,497
Total tons carried	2,265,413	2,764,876
Tons carried one mile	393,746,258	420,627,222

COMPANY'S CANALS.

The earnings of the company's canals were:

	1864.	1863.
Susquehanna Div. 46 m.	$253,787 57	$242,146 92
Junction Division 127 m.	29,532 76	24,426 91
Western Division 73 m.	12,174 72	9,741 29
Miscellaneous sources	13,120 18	10,841 40
Total, 246 miles	$308,615 23	$287,156 52

The cost of maintaining, enlarging and operating was:

Susquehanna Division.	$153,794 93	$159,556 98
Junction "	126,560 02	162,420 83
Western*	30,200 37	40,396 51
Total expenses.	$310,555 32	$362,374 32
Loss on operating	$1,940 09	$75,217 80

The total tonnage transported on the canals was as follows:

Coal	629,820	633,961
Lumber	196,940	180,684
Grain	13,171	21,474
Other articles	212,413	211,873
Total tons transported	1,052,344	1,047,992

* Abandoned above Blairsville, and will be wholly abandoned on the completion of the Western Pennsylvania Railroad to the Allegheny Valley Railroad.

PHILADELPHIA AND ERIE RAILROAD.

The earnings of the Philadelphia and Erie Railroad for the years 1863 and 1864 compare as follows:

Earnings from—	1863.	1864.
Passengers	$275,604 20	$479,822 44
Troops	20,568 06	31,389 18
Freights	383,234 58	545,037 45
Express matter	11,800 53	16,345 16
Mails	13,324 99	14,390 03
Miscellaneous sources	23,137 62	44,163 72
Total earnings.	$727,669 93	$1,131,147 98

The operating expenses for the same years were

for—	1863.	1864.
Transportation	$109,624 28	$217,245 96
Motive power	87,835 84	234,698 75
Maintenance of way	127,379 33	354,163 21
" of cars	11,756 58	32,485 91
Total operating exp.	$336,596 03	$838,593 83
Thirty per cent. due on lease to meet interest on bonds, &c	218,300 96	335,708 95
	$554,896 99	$1,174,302 78
Net earnings	$172,772 94	$.....
Loss on operations	.....	43,154 80

The net earnings of 1863 are only apparent, being chargeable with interest on the rolling stock, shop machinery and their probable depreciation, estimated together at about 12½ per centum, or say $127,772 94; leaving the profits of the lease only $45,000.

This road was opened through on the 17th of October, 1864. It extends from Sunbury on the Susquehanna to Erie on the lake so called, a distance of 287.51 miles.

At the commencement of 1863 the road was in operation 180.10 miles, viz., the Eastern Division 114.60, and the Western Division 65.50 miles. During that year 36.40 miles further were brought into use, viz: Jan. 5, Warren to Sheffield, 12.80; Feb. 28, Grove to Sinnemahoning, 2.40; March 9, Sinnemahoning to Driftwood, 3.00; Sept. 9, Driftwood to Sterling, 9.00; and Dec. 19, Sterling to Emporium.

The year 1864 thus opened with a line of 216.50 miles—on the east, from Sunbury to Emporium a distance of 138.20 miles, and on the west from Erie to Sheffield 78.30 miles. On May 2, freight trains commenced to run to St. Mary's 20.85 miles west of Emporium, and Oct. 17, the whole line was in sufficient order to commence through operations, but leaving a vast work to be accomplished to perfect the line.

The road had at the end of 1864, 32.08 miles of siding, besides 2.98 miles belonging to individuals. A connection had been made with the Bald Eagle Valley Railroad at Lock Haven, and with the Shawmut Railroad at Ridgeway; also one with the Oil Creek Railroad at Corry, and one with the Buffalo and Erie Railroad, giving a temporary passage over the track of that road to the Union Passenger Station at Erie, a permanent track alongside the same being in progress.

The General Account showing the financial condition of the company, December 31, 1863 and 1864, presents the following balances:

	1863.	1864.
Capital stock	$13,430,250 00	$19,896,050 00
Funded debt (bonds,) viz:		
1st mort. 6 per cent. dollar, 1880	4,980,000 00	4,980,000 00
2d mort. 6 per cent. dollar, 1875	2,621,000 00	2,621,000 00
2d mort. 6 per cent. sterling, 1875	2,283,840 00	2,283,840 00
Bonds to State 5 per cent	6,900,000 00	6,800,000 00
Mortg'ges & ground rents	164,284 32	144,184 32
Total capital and funded debt	$30,379,374 32	$36,698,184 32
Accounts payable, includ'g pay rolls for Dec.	$1,102,805 05	$1,956,828 91
Bills payable		408,335 71
Dividends due and unpaid	26,583 00	28,296 00
Contingent fund	1,000,000 00	1,000,000 00
Balance	5,786,905 80	3,428,691 39
Total debit side	$38,295,668 17	$43,520,336 33
Cost of road and appurtenances	$16,788,248 46	$16,752,150 96
Columbia R.R. and State Canal	6,900,000 00	6,800,000 00
Equipment	3,543,484 21	3,385,315 15
Real Estate	2,523,637 74	3,769,706 52
Telegraph line	45,264 28	45,264 28
Extension of road to Pittsburg and Steubenville R.R.	231,168 34	685,249 33
Extension of road to Delaware Riv.	560,495 24	587,205 14
Total cost of roads, canals, &c.	$30,592,298 27	$31,024,891 38
Stock of Pittsburg, Fort Wayne and Chicago R.R. Co.	$821,299 00	$
1st mort. bonds of Pitts. & Steub. R. R. Co		353,000 00
Stg. bonds of Phila. & Erie R. R. Co. (1,555 of £200) exclusive of 1,244 b'ds in sinking fund purch'd under the lease	954,550 00	1,334,601 11
St'ck (8,939 shares) of Steub. and Indiana R. R. Co		130,696 00
Bonds (530) of Steub. & Indiana R. R. 6 per cent.		482,651 52
Bonds (775) of Steub. & Indiana R. R. 7 p. c.		775,000 00
Other bonds, and stocks of municipal and railroad companies	1,107,588 72	2,881,862 89
United States certificates of indebtedness	96,000 00	
Bills and accounts receivable	1,322,336 50	1,850,976 55
Due from other roads	144,071 98	192,054 52
Debit of sinking fund	1,451,315 12	1,615,754 79
Fuel and materials on hand	775,938 84	1,277,380 52
Advance to Phila. & Erie R. R. Co.		468,764 09
Balance in hands of agents	552,141 03	762,075 98
Balance in hands of Treasurer	478,128 71	870,626 98
Total credit side	$38,295,668 17	$43,520,336 33

The following summary exhibits the condition of the capital account for the past ten years embracing the whole period since the completion of the line:

Year end'g Dec. 31.	Share Capital.	Bonds and Mortgages.	Total Amount.	Cost of Property.
	$	$	$	$
1855	12,355,525	7,519,096	19,874,621	18,483,489
1856	12,646,625	8,516,841	21,163,466	19,048,968
1857	13,206,625	14,929,940	28,136,565	27,266,981
1858	13,240,225	16,094,451	29,334,676	27,670,672
1859	13,349,125	16,469,159	29,818,284	28,484,321
1860	13,261,960	16,680,804	29,942,764	28,846,442
1861	13,264,100	16,936,764	30,200,864	29,587,678
1862	13,274,100	16,696,764	29,970,864	29,888,552
1863	13,430,250	16,949,124	30,379,374	30,592,298
1864	19,896,060	16,802,124	36,698,184	31,024,891

In 1857, and since, the funded debt and cost of property includes the State Works purchased by the company for $7,500,000, which is payable in annual instalments, which diminish the amounts debited and credited to the State and company respectively.

The earnings and expenses of the railroad and dividends for the same years have been as follows:

Year end'g Dec. 31.	Gross Earnings.	Operating & Repairs.	Profits on operations.	Dividends.
1855	$4,270,070	$2,340,738	$1,829,277	6
1856	4,720,124	2,814,568	1,905,626	6
1857	4,855,659	3,000,743	1,854,926	3½
1858	5,185,331	3,021,885	2,163,446	5½
1859	5,362,355	3,130,738	2,231,617	6
1860	5,932,701	3,636,659	2,296,042	6
1861	7,300,001	3,653,063	3,646,938	6
1862	10,304,291	5,431,073	4,873,218	8
1863	11,891,413	6,780,000	5,111,413	9
1864	14,759,058	10,693,944	4,065,114	10
Stock dividend paid in May 1864				30

The earnings and expenses of the canals, not included in the above have been as follows:

Year ending Dec. 31.	Gross Earnings.	Operating Expenses.	Profits on operations.	Losses on operations.
1857 (5 mos.)	$92,434	$73,191	$19,243	$
1858	179,100	124,058	55,042	
1859	197,549	175,452	22,097	
1860	209,366	154,761	54,605	
1861	176,109	147,872	28,237	
1862	251,482	258,092		6,610
1863	287,156	362,374		75,218
1864	308,615	310,555		1,940

The company entered on possession of the Philadelphia and Erie Railroad on the 1st February, 1862, since which date the earnings and expenses thereof have been as follows:

Year ending Dec. 31.	Gross Earnings.	Operating and Repairs.	Earn'gs less Exp.	30 per cent. of Gross Earn'gs.*
	$	$	$	$
1862 (11 mos.)	425,687	226,647	199,040	122,697
1863	725,670	336,596	389,074	218,301
1864	1,131,148	838,594	292,554	335,709

☞ The value of real and personal estate in the city and county of New York, as assessed for the current year, is officially stated at $427,468,884 an increase over that of the year previous, of $16,712,199. The personal estate amounts to $181,423,471. Total real and personal, $608,785,355. Compared with 1864, there is a decrease of $46,410,591 in personal estate, which is accounted for by the fact that the Banks no longer pay taxes on the U. S. securities now owned by them.

* This amount (after all drawbacks) is set apart under the lease to pay interest on the bonds of the Philadelphia and Erie Railroad Company.

The Vulcanized Rubber Patent.

The Vulcanized Rubber Patent, known as the Goodyear, expired two days ago. In England the Hancock patent for the same process expired seven years since, and as it never had a legal existence, we believe, anywhere else, the great branch of industry, of so much importance to many manufacturing interests, ceases to be a monopoly, and is now open to the whole world. This patent has had 21 years existence in the United States, but the title of Mr. Goodyear, and those who held under him, was never established by the verdict of a jury. The monopoly has rested upon a decision made in equity by Judge Grier in a case against Horace H. Day, tried in New Jersey some years ago, but which never went to a jury on the evidence. At the last session of Congress the most strenuous efforts were made to obtain a special act for a renewal of the patent, but, mainly through the opposition of Mr. Day and the railroad companies, the application failed, never, we trust, to be renewed. It is estimated that over forty millions have been paid in profits by the people of this country alone on this patent, and that about one-fourth of this large sum was received by Charles Goodyear and his legal representatives in the course of business and in tariffs. The valuable patent of Nelson Goodyear on Hard Rubber, which has been extended recently by the Commissioners of Patents, still remains, we believe, in the Goodyear family, as the tariffs are paid to the heirs of Charles.—*N. Y. Tribune, June 17.*

Chartiers Valley Railroad.

The Pittsburg *Commercial* says that "a proposition is again on foot to finish the Chartiers Valley railroad. There is no projected line of railroad in which the people of Washington and Allegheny counties, and the merchants of Pittsburg, are more deeply interested than the Chartiers Valley railroad, which is to have its termini in Pittsburg and Washington, Pa. The railroad has been nearly all graded, and it is stated that a careful estimate has been made showing that the railway can be completed at an expense not exceeding eight hundred thousand dollars, and probably for a much less sum."

L'anse and Ontonagon Railway.

L. G. Emerson, C. E., is employed in the preliminary examination and surveys for this work. It is expected that a portion of the grubbing and grading will be done this season, and probably the first thirty miles of the road completed in 1866.

☞ The Pottsville *Miner's Journal* says that the People's Passenger Railway is about being placed under contract from Pottsville to St. Clair, and its construction commenced at an early day. In one month from the time work is commenced, the cars will be running to Palo Alto, and by the 1st of October it will be completed to St. Clair. The survey of the line to Minersville has been begun, and after the route is selected and located, it will also be put under contract and built without delay.

Buffalo and State Line Railroad.

The annual meeting of the stockholders of this company was held in Buffalo on the 27th ultimo, and the following gentlemen elected directors for the ensuing year: Dean Richmond, William Keep, Joseph Field, Alinson Robinson, Charles D. Lee, James C. Harrison, Henry D. Lansin, Milton Courtwright, George W. Patterson, John A. Tracy, Edwin Smith, William Williams, and Hamilton White.

At a subsequent meeting of the directors, Dean Richmond was unanimously elected President in place of Geo. Palmer, deceased.

American Railroad Journal.

Saturday, July 8, 1865.

Stock Exchange and Money Market.

The week's business was much impaired in volume by the observance of the 3d as well as the 4th as a National holiday by the Exchange Boards and principal banking offices. Instead of crowding their amusements and rejoicings into one day, the people took two, and thus the excursions, picnics and exhibitions incident to this holiday were more generally enjoyed than usual.

The news which excited the greatest interest was that brought by the China, of a reaction in the London market, in the 5-20s, which after having gone up to 71 and a fraction, receded to 70¾. This fall was based on the news taken out from New York by the Persia, of a slight advance of gold in this market.

We must now expect to see a concert of operations in our securities, between the speculators in London and New York, and between the two it is supposed a large profit will be realized. We are of the opinion that those who speculate for a permanent decline will be losers. Nothing can be more certain than the intrinsic value of these securities, nothing prompter than the payment of the interest, no fact better established than that the Treasury after all payments, begins the half year from July 1, with over thirty five millions of gold on hand, and the receipts at the Custom House, so far from falling off are on the increase. The revenue for the past year from this source is about eight millions more than was calculated. And notwithstanding the prediction of a "specie bankruptcy" insisted on with a most unaccountable error of judgment and perversion of facts in certain quarters, the country is better off in specie than it was when the rebellion began. This appears from the following statement:

The stock of gold and silver in New York on Dec. 1, 1860, was:

In Bank	$18,541,762
In Sub-Treasury	3,702,751
Total	$22,244,513
June 24, 1865, in bank	$15,906,314
June 30, '65, in Sub-Treas'y	28,589,128
	$44,495,442
Gain to stock of gold in New York	$22,250,929

GOLD MOVEMENT OF THE UNITED STATES THROUGH THE WAR.

Supply—

Total export 4 years and 7 months		$297,319,868
Resulting difference		20,540,962

* Estimated.

So that we may set down as puerile if not mischievous, all the attempts made to discr dit the country on this score. On the other hand, we give the following significant remarks in the last number of the London *Star* received at this office, taken from its financial article:

"The strong tendency of the English public to invest in American securities which is now being exhibited is the natural result of the reaction from the false and distorted views which were current during the war. The zeal of those who sought to damage the reputation of a great nation was overdone, and the public have now found that all those wild assertions of anarchy, collapse, exhaustion, tyranny, and every other woe which could befall a nation, existed only in the imaginations of the writers who gave them currency. The amount of misrepresentation to which respectable and leading journals lent themselves during the

war was positively revolting, and the sufferers were not the Americans but Englishmen who were so grossly misled in business affairs. We are quite aware that the large transactions in all descriptions of American stocks, and especially to-day in the Five-Twenty Bonds, are not entirely attributable to English demand. The Frankfort dealers have come in with considerable orders, and the Amsterdam houses also, after a short cessation, have again begun to take considerable quantities. Still there is a steady and growing demand for this description of security on the part of the general public, which will continue until the six per cent. bonds of the next most stable Government in the world to our own, reach a price more like their natural level."

When such views are entertained by the most intelligent of the English press, it is not unreasonable to suppose that our National stocks are to rise to this natural level, and that will be at least 25 per cent. higher than they are now. Connected with this specie question is an important fact that must have its weight here and abroad. For the year ending July 1st inst., our exports of specie were $18,054,437 less than they were for the same period the preceding year, while our exports of domestic products for the same period were increased $34,264,278. The amount of cotton for the week ending last Saturday received at this port was 9,523 bales, and the price of exchange felt the arrival, and sales were dull.

The last weekly bank statement shows an increase of $2,995,191 in loans, and $4,147,837 in net deposits. The legal tenders are increased $2,343,865, and the specie is decreased $51,824. The ratio of coin to net liabilities is 8.03 per cent. against 8.23 per cent. last week.

During the week ending July 1, 46 old and new banks organized under the National system. Their aggregate capital is $20,014,210, and this added to that previously organized makes $320,924,601, a total of $340,938,811. The total circulation of these on the 1st of July, was $146,927,975, not more than five dollars per capita for the present population of the United States. Calling the whole currency afloat of all kinds 900 millions, we have a circulation per capita nominally of $30, not so much, however practically, as hundreds of millions lie in deposit with an unchanged balance from month to month, in fact from year to year. This would not seem to be more money than might be usefully employed by so enterprising a people as our own, and seems to oppose many of the popular theories as to how much money can be safely used in the business of a Nation. We certainly have much yet to learn in finance before we shall be able to lay down some financial maxims as infallible truths. Even England in 1815 had a per capita circulation of 87 15-100 per cent. Nor would this seem a disproportionate sum for the exchange of the products of the manufactories of the country which in 1862-'63, were according to Dr. Elder, $1,642,789,880. Our agricultural products are not estimated in this sum. The greatest practical evil of this large currency is in the plentifulness of money, which invariably produces high prices, (whether it be in the shape of gold or paper,) and this evil has been most strikingly apparent at Bombay as we have shown in previous articles. Besides this plethora of cash is not universal, or it would not be of so much consequence what prices were; but fixed incomes, property obtained and realized under other standards, and in other times are comparatively depreciated and the holders actually suffer from diminished means. Government bonds are steady and holders are holding on and looking for an advance.

The Railway share market has been firm, and well it may be, as it is observable that the increase of earnings continues which is quite the reverse of an opinion which prevailed to some extent during the war. Large transactions have taken place in the leading companies, securities and scrips. The stocks are actually scarce and difficult of delivery, and a general advance is anticipated. The practice of lending customers' stocks, one which cannot be too much reprehended, has been broken in upon recently by the positive instructions of the owners against the practice. The operation has been a paying one for the Bankers, but is full of danger to their principals. Exchange at the beginning of the week was below par; we have already stated it was dull of sale.

The balance in the Sub-Treasury on Thursday was $39,375,422 29.

The great convention of the various Boards of Trade in the United States, and the British American Provinces is to assemble in Detroit on Tuesday next, and much is expected from its deliberations.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Central R. R. of New Jersey, 122½; New York State 6s, 1873, 95; Cary Imp. Co,, 24; Brunswick City Land Co., 8¼; Atlantic M. S. S. Co., 155½; Metropolitan Gas, 113; 4th National Bank, 98½; Central Bank, 102, Bank of Commerce, 110; Am. Ex. Bank, 112; Bank of Republic, 110; Pacific Bank, 165.

☞ The Delaware and Raritan Canal Company have reduced the rates of toll and tonnage 19 cents per ton on coal passing through their canal.

Free Labor for Tropical Products.

One of the theories on which the defenders of slavery have relied greatly for a vindication of the system, is that in tropical countries voluntary labor cannot be relied upon as means of production, that work must be compulsory, and to be compulsory there must be masters with all the rights and powers necessary to enforce absolute subjection. This has been the doctrine of the South, and not content with enforcing it over that unhappy race which has grown up in its soil, it proposed to extend it everywhere else in the new States and territories, and finally to extend the principle so far as to include in its application all the poor classes of whites, and finally to make labor and servitude synonimous. A document has recently been laid before the British Parliament which throws great light on this part of the subject, treating of the production of three great staples, cotton, coffee and sugar, hitherto supposed to be naturally the exclusive products of slave labor. It appears from this document that the quantity of cotton cultivated by free labor has increased about tenfold in the last twenty years within the British dominions.

In the year 1845 the whole quantity they produced and which was imported into Great Britain was 59,832,148 lbs., while in 1864, it was 549,960,880 lbs., about equal to one half the consumption of that country "in time of commercial activity."

The amount produced in Egypt, Turkey and other countries, by free labor is 300,000,000 lbs., so that the total of imports into Great Britain of free labor cotton in 1864 may be set down as upwards of 800,000,000 lbs. The Bahamas during this period of 20 years have supplied 25,515,168 lbs., and the Bermudas 16,612,096.

In the East Indies the supply has been on "an extraordinary scale of magnitude." In 1865 the whole import of cotton from the three Indian dependencies was but 58,255,306 lbs., while in 1864 it was upwards of five hundred millions of pounds as follows:

Bombay Presidency	....	400,181,376 lbs.
Madras "	....	47,245,296 "
Bengal "	....	54,815,040 "

This increase of production has been going on under all conditions of price. From the year 1845 to 1860 the price was moderate and sometimes very low, and the competition of the Americans supply unchecked. Yet the import from India in 1860 was full 200,000,000 lbs. Under the stimulus of high prices after the rebellion broke out, the production in India has been fourfold, and at the rate of about seventy-five millions of pounds per annum for four successive years.

No one can predict, however, what will be the increase for coming years, under the renewed production of the United States. British capitalists and operators appear to think that the American supply is dubious, that the price will not much decline abroad, and that the production in India will still go on in a large way. We are inclined to the opinion that it will go on under any circumstances, for its culture at almost any price hitherto known in the European market will give good wages to the ryots, who have now learned the value of money, and of increased comforts in living, and will not be likely to abandon these advantages. Cotton has become as important to the health and comfort of the world as food itself, and must continue to have a never-ceasing demand.

Coffee has also rapidly advanced in production by the aid of free labor. Thirty years ago, there was scarcely any of this raised in India and Ceylon. In 1845 the whole quantity was about 23,000,000 lbs., and in 1863 it was upwards of 90,000,000 lbs. This was entirely owing to abundant free labor directed by British capital and skill. With regard to free labor sugar in the British dominions, the product is stated to amount even now to 5,000,000 cwts annually, and is increasing notwithstanding the competition of Cuba and Brazil, where it is still the product of slave labor.

Thus it will be seen that free labor in tropical climates is competent to an increasing and profitable production. On the other hand, as the negroes are unquestionably particularly adapted to labor in those climates, we shall now have the immense advantage of stimulating their industry by the boon of freedom and the possession of their own earnings. As soon as they comprehend their advanced state and new privileges, they will undoubtedly become an industrious and thriving race, and with a genial soil and suitable climate they must add immensely to the products of the Southern States. We therefore look with confidence in a few years to an enormous increase of our sugar, cotton and rice under the advantage of free labor.

Lubricating Oil.

The discovery of petroleum has brought with it a train of useful consequences. We have in it an illuminating agent, a material for the most brilliant colors, and also the best lubricator for machinery. It is well known that the various kinds of oils hitherto used and also the compounds of green with black lead have been tried without fully answering expectation; petroleum of a certain description now comes in, and succeeds to admiration. The article in its best form is to be had at No. 92 Maiden Lane. See card in another column.

☞ Barstow & Edey, a young and enterprising firm, have commenced business as Brokers at 30 Broad street. Their former connection with most respectable houses is a guarantee for their standing and ability.

Atlantic and Great Western Railroad.

At the annual meeting of stockholders of the Atlantic and Great Western Railway Company in New York, held at Jamestown, May 22d, 1865, the following Directors were elected: S. S. L'Hommedieu, Cincinnati; S. Wann, A. M'Andrews, T. W. Kennard, Chas. Seyton, J. Larocque, S. L. M. Barlow, New York; G. Church, P. Church, J. J. Shyrock, William Thorp, Meadville; A. F. Allen, Jamestown; J. H. R. Rose, Cleveland.

Subsequently the Directors met and elected the following officers: S. S. L'Hommedieu, President; J. C. Calhoun, Secretary; J. M. Dick, Treasurer.

☞ The directors of the Western Railroad have voted to increase the capital stock of the corporation by the addition of 5,150 shares of the par value of $100 each, being one new share for every ten of stock held on the 20th ult. Present stockholders have the privilege of taking the new stock until August 1, after which the remainder will be disposed of at auction for the benefit of the corporation.

Interest and Dividends.

The New York, Providence and Boston Railroad Company (Stonington Railroad) has declared a quarterly dividend of 3 per cent., free of government tax, payable July 5.

The New York and New Haven Railroad pays a semi-annual dividend of 4 per cent. on the 17th.

The Lehigh Valley Railroad Company has declared a dividend of 2½ per cent., payable on the 10th inst.

The Norwich and Worcester Railroad Company has declared a semi-annual dividend of 4 per cent, free of tax.

The Delaware Railroad Company has declared a dividend of 3 per cent. for the last six months.

The Worcester and Nashua Railroad Company a dividend of 3 per cent.; Berkshire, 1½; Cape Cod, 3½; Concord and Portsmouth, 3½; Pittsfield and North Adams, 3; Providence and Worcester, 4½; Taunton Branch, 4; Paterson and Hudson River, 4; Paterson and Pamapo, 4; 10th and 11th streets railway, Philadelphia, $2 50 per share.

Orange and Alexandria Railroad.

The Board of Public Works of Virginia, as constituted at present, consists of the Governor, Auditor and Treasurer of the Commonwealth. They have appointed Mr. Phillip Quigley, of Delaware, and Andrew Jamieson, of Alexandria, commissioners to take charge of, repair and operate the Orange and Alexandria Railroad for the best interest of the Commonwealth and loyal stockholders, until the reorganization of the State and the further orders of the Board of Public Works. The repairs of the road will probably be completed within thirty days. Richmond will then be in direct communication with Alexandria via Central Railroad to Gordonsville, and thence by the Orange and Alexandria Railroad to Alexandria.

Toledo, Wabash and Western R. R.

Fort Wayne, July 2.—The stockholders of the Toledo and Wabash, Great Western of Illinois, Quincy and Toledo, and Illinois and Southern Iowa Railroad Companies have, by a nearly unanimous vote, ratified the articles of consolidation agreed to by the directors, and the roads will hereafter be operated under the name of the Toledo, Wabash and Western Railroad Company.

This consolidation forms one of the longest and most important trunk lines in the country, and is the only line between Lake Erie and the Mississippi under one organization and of uniform gauge. On Monday next trains will run through from Toledo to Quincy and Keokuk without change of cars. The directors of the new company met at Fort Wayne yesterday and organized by the election of the Hon. A. Boody as President.

☞ Three splendid cars has just been placed on the Providence Railroad from the Salem Car Manufactory, of which John Kinsman, Esq., for many years connected with the Eastern Railroad Company, is President. The cars will seat 60 persons each, cost $4,500 apiece, have all the modern improvements, raised roof, &c., and are beautifully finished.

☞ The London *Times* says a contract has just been completed for 18 powerful engines for the Great Eastern Railway Company, from the works at Creusot. These will be the first French locomotives that have contested for superiority on an English line.

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway for the week ending June 24, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$45,175 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	67,573 00
Total	$116,784 00
Corresponding week, 1864	112,649 00
Increase	$4,135 00

The earnings of the Chicago and Alton Railroad for the 3d week in June, 1865 $97,332 00
Corresponding week of previous year 57,002 00

Increase	$40,330 00

From June 1, to June 23:

1865	$259,367 00
1864	152,343 00
Increase	$107,024 00

The earnings of the Michigan Central Railroad for the 3d week in June, 1865, were $89,640 00
Corresponding week of previous year 60,583 00

Increase	$29,057 00

Journal of Railroad Law.

REDEMPTION OF ROAD FROM MORTGAGE—WHAT THE PURCHASER OF THE EQUITY TAKES.

Many of our great lines of railways run through different states, and from this circumstance, their rights and liabilities are frequently subject to different and diverse rules of law. Thus in the case of Wood *vs.* Goodwin in the Supreme Court of Maine, the question was whether, when a company, whose road lies in two different states, under charters from each of those states, mortgages the whole road and franchise, and their right to redeem in one state is sold on execution, the purchaser of the equity of redemption is entitled to redeem the *whole* road from the mortgage. The court held that he is so entitled. In this case, the bill alleges, that the Great Falls and South Berwick Branch Railroad Company, a corporation established by the laws of the State was seized, Sept. 1, 1854, in fee or otherwise, of a railroad lying within the County of York, and running to the line of the State of New Hampshire, and of the real estate upon which that railroad was located (a particular description of which is not necessary,) as trustees for the Eastern Railroad Company, the said railroad, with the franchise, real estate, easements, &c., to secure certain bonds, some over due, and some not yet due; that, on 1st day of June A. D. 1855, the plaintiff commenced an action against said G. F. & S. B. B. Railroad Company, which was, duly entered in court and such proceedings were had, that, on the sixth day of December A. D., 1857, he recovered judgment against said company for $22,101 damages and $484 58, cost of suit; upon which judgment execution was issued in due form of law, and was placed in the hands of the Sheriff of York County for service; and he seized on said execution all the right in equity which said corporation then had of redeeming said railroad and its franchise from said mortgage, and after due proceedings, sold and executed a deed of the same to the plaintiff, January 1858; that the respondents entered into possession of said railroad, &c., April 20, 1858, for the purpose of foreclosing said mortgage, and had ever since remained in possession; that, on the 20th day of November, 1860, he demanded of them a true account of the amount due on the mortgage, and of the receipts, &c., but that they had neglected and refused to render such account; that the plaintiff is ready to perform all the conditions of the mortgage, and he prays that he may be let in to redeem, that the respondents may be ordered to account, and that, on payment of the amount now due on the mortgage, he may be let into possession.

The answer alleges that the G. F. & S. B. B. R. R. Company, claiming to be the owners of a longer railroad than that described in the bill, extending from a point in Maine, to a point in New Hampshire, made the mortgage referred to in the bill, embracing the portion of the road lying in New Hampshire as well as that lying in Maine, and denies that any separate mortgage of the portion in Maine was ever made; that the respondents have no knowledge that the plaintiff commenced the action, obtained the judgment, or purchased the equity of redemption, as alleged in the bill, save from common report; that he did call upon them by letter for an account as alleged in the bill, and they had not rendered any to him, but that their books were constantly open for inspection, as he well knew; that they took actual possession of said railroad in both states, Dec. 29, 1857, for the purpose of foreclosing said mortgage and fulfilling the duties of their trust; that said possession was commenced, and held under judgments of the courts of Maine and New Hampshire, and that the foreclosure of said mortgage had become absolute long before the plaintiff called upon them for an account; and that they are lawfully in possession of railroad, under said judgments and foreclosure, for the purpose of fulfilling their trust duties; and that the plaintiff will not, upon the payment of what he proposes to pay, be entitled to disturb their possession. A copy of the mortgage, and of the judgments referred to, are annexed to the answer.

The judgment in New Hampshire was rendered by the Court of Common Pleas, holden at Dover in the County of Stafford, on the third Tuesday of August, A. D. 1857. Judgment as on mortgage. Execution issued by which the respondents were put in possession of the railroad, &c., Dec. 29th, 1857. The judgment in Maine was rendered by the Supreme Judicial Court, held at Alfred, in and for the County of York, on the first Tuesday of January, A. D. 1858. Judgment as on mortgage. Execution issued by which the respondents were put in possession of said railroad, April 20, 1858.

The provisions of the mortgage which embraced the road in Maine and New Hampshire, do not become material, except the provision that the mortgagees were to leave the possession and control of the railroad in the mortgagers until condition broken.

The plaintiff introduced attested copies of the judgment, execution, officers' return thereon, and the sheriff's deed to him which it is not necessary to recite, as no question was raised in regard to the regularity of these proceedings.

The opinion of the court was drawn up by DAVIS, J.—This is a bill in equity, to redeem the Great Falls and South Berwick Railroad from a mortgage to the defendants, in trust, to secure the payment of certain bonds. The mortgage was given Sept. 1, 1854. After the bonds first payable become due, the defendants, as trustees, took possession of the railroad for condition broken. The right of redemption was afterwards sold by the plaintiff, upon an execution in his favor against the railroad company; and having purchased the right of redemption himself he demanded an account of the trustees under the mortgage which they neglected to render.

If the special acts of Maine and New Hampshire, passed in 1848, had been fully accepted by the Great Falls and Conway Railroad Company, and the Great Falls and South Berwick Railroad Company, these two companies would have been merged in the new one, by the name of the Portsmouth, Great Falls and Conway Railroad Company. In that case there would be no valid mortgage and no equity of redemption. But as neither of the special acts appears to have been accepted according to its terms, we may assume that the Great Falls and South Berwick Railroad Company continued to exist, and that the mortgage is valid. Nor do we perceive any reason why the plaintiff, upon the case as stated and proved, is not entitled to redeem.

A part of the railroad is within this state, and the other part in New Hampshire. Whether there were two distinct corporations, or one only, under the charters granted by the two Legislatures there was but one mortgage, and that embraced the whole railroad. The plaintiff proceeded upon the assumption that the mortgage was valid. He cannot deny it. He has no claim if it was not, and the mortgage embracing the whole railroad, both in this State and in New Hampshire, the plaintiff must redeem the whole if any. And, in order to do so, he must provide for the whole debt secured by it. For the mortgagees have a lien upon every part of the railroad to secure every part of the debt. A part of the bonds secured by the mortgage are due; the rest have not yet matured. The trustees have taken possession.

It is contended for the plaintiff, that he may pay up the amount now due, and be entitled to take possession, and hold it until the condition shall again be broken by a non-payment of the bonds next maturing. But this is not the case. The trustees having taken possession for condition broken, are entitled under the mortgage, to retain possession until the whole debt is adequately provided for, without requiring them to rely upon the mortgage.

So long as any necessity appears for them to rely upon this security, they are entitled to possession. The plaintiff will not be permitted to eject them, without paying all that is due, and depositing money, or otherwise providing for the payment of the remainder as it shall become due.

But the plaintiff, by paying all that is now due, will save a forfeiture. He will thus be placed in the position of the mortgagers; and the right of redemption will not be foreclosed.

The trustees will be entitled to possession and must account for the earnings. And if the plaintiff shall pay them enough with the earnings to discharge all the bonds as they become due, he will then be entitled to possession. Whether the necessary proceedings have been had to give the plaintiff title to that part of railroad lying in New Hampshire, is a question which the Court in this Sate have no power in this case to determine. A master may be appointed to determine the amount

now due and payable, after deducting the earnings of the railroad since the defendants took possession.

Morris Canal and Banking Company.

We have the report of this company for the fiscal year ending February 28, 1865. From this we learn that the canal was opened for business on the 23d of March, and closed on the 10th of December, making a navigable season of 261 days; during which time there was no serious interruption of the navigation, and boats were seldom, from any cause, impeded in their progress.

The income of the company from tolls and other sources was $590,393 26

And the expenses were:

Repairs of canal & works	$159,995 69	
Operating canal	48,497 92	
Salaries, law and other expenses ...	$32,289 61	
Less gain in int.	2,669 16	
	25,294 94	
Transportation expenses .	2,669 16	
		236,457 71
Balance—profits of the business		$353,935 55
Balance at credit Feb. 29, 1864		16,490 94
		$370,426 49
Dividends on preferred stock		$117,500 00
" consolidated stock		102,500 00
Interest on mortgage bonds		45,330 00
United States taxes		11,902 96
Depreciation of boat stock		2,273 96
Balance surplus		90,919 57
		$370,426 49

The total tonnage on the canal, cleared during the season, amounted to 728,927 tons; exceeding the tonnage of any previous year, and being 5,408 tons more than that of 1863. There was a falling off in the coal trade from the Lehigh region, as compared with 1863, of 24,571 tons, and an increase of 4,988 tons from the Scranton region, making the coal tonnage received from the mines 19,583 tons less than in 1863. This was occasioned by the scarcity of boatmen, and consequent impossibility of keeping all the boats running. The ore tonnage was 32,257 tons in excess of that in 1863.

Two semi-annual dividends of five per cent. each, free from government tax, have been paid during the year on both the preferred and consolidated stocks of the company, and there is left a balance to the credit of profit and loss of $90,919 57 at the close of the fiscal year.

The current expenses have considerably exceeded those of previous years; this has been occasioned to some extent by a much larger amount of renewals of rails on the planes than has ever occurred before in any one year, and also by increased general repairs growing out of curtailment of repairs during the last two years, but mainly by the greatly enhanced prices of all labor and materials during the whole year.

Construction account has been increased during the year $29,175 78; of this amount the sum of $25,398 90 has been expended in enlarging the company's works at Jersey City.

It will be seen by the general statement that the company's works have cost $3,002,205 17, being $2,205 17 more than the sum total of the means provided therefor. It is thus evident that some further provision must be made for future additions and improvements, or else the cost of such additions and improvements must be paid for out of current earnings.

There is now included in the general statement, as a part of the cost of the company's works, $71,891 66 advances on boats and boating stock. As this is money continually being returned to the company in the form of rents collected for the use of the boats, and is constantly fluctuating, it it would be better that it should be represented by a boat loan. It is probable that the interests of the company may require this sum to be increased to $200,000. A distinct loan, to be known as a "Boat Loan," and represented by coupon bonds, having twenty years to run, bearing seven per cent. interest, payable semi-annually, with a sinking fund reserved out of the boat rents sufficient to meet the principal at maturity, would be a good and safe investment, which would undoubtedly be disposed of among the stockholders of the company. This would provide abundantly for increasing the boating capacity, and for improvements for several years to come.

The company's works are all in excellent order, not having sustained any damage by the recent severe freshets. The canal is now open and business being resumed, with the prospect of obtaining a fair proportion of the coal trade of the ensuing season.

President and Engineer.—WILLIAM H. TALCOTT.
Vice President.—JOHN D. WARD.
Secretary.—JOHN RODGERS.
Ass't Engineer and Sup't.—A. P. BERTHOUD.

Philadelphia and Erie Railroad.

The liens on this road comprise: A seven per cent. first mortgage on forty miles of road from Sunbury to Williamsport, for one million dollars.

A six per cent. first mortgage on two hundred and forty-eight miles of road from Williamsport to Erie, for five millions of dollars.

A second mortgage on the road, held by the State, and to bear interest from and after January 1, 1872, for four millions of dollars.

A third mortgage on the road bearing seven per cent. interest for three millions of dollars; whole amount of all the mortgages thirteen millions of dollars.

The third mortgage bonds at seventy-five per cent,, at which they have been contracted for by the Pennsylvania Railroad Company, will put the road in efficient condition to earn at no distant day sufficient to pay interest on loans and dividends on capital shares.—*U. S. R. R. & Mining Register.*

☞ A meeting was recently held at St. Louis to consider the subject of completing the projected railroad from St. Paul in Minnesota to that city. Resolutions were adopted in favor of the speedy construction of the line, and for the continuation of such roads as would be necessary to perfect commercial intercourse between St. Louis and the different parts of the State of Iowa.

☞ The Buenos Ayres *Standard* says the project started to connect Valparaiso, along the west coast of South America to Panama, thence to the United States, meets with much favor in the countries interested. R. E. Goldsborough is the Civil Engineer.

Cleveland and Erie Railroad.

The following gentlemen have been elected directors of this road for the ensuing year:

A. Stone, Jr., T. M. Kelly, S. Witt, Geo. B. Ely, H. B. Payne, William Collins, James Miles, J. W. Wetmore, Hamilton White, E. M. Gilbert, Henry E. Parsons, and Wm. Gibson. President—A. Stone, Jr. Vice-President—Sillman Witt. Secretary and Treasurer—George B. Ely. Superintendent—H. Nottingham.

☞ The General Land Office has received a list of lands selected at the land office at Marysville, Cal., by the agent of the Central Pacific Railroad Company, as inuring to said company, under the grant of July 1, 1862, and July 2, 1864, to aid in the construction of the Pacific Railroad, amounting to 55,259 acres. The selections were duly certified to by the register and receivers as free from conflicting claims and subject to selection under the grant, and that their fees had been paid and the other expenses of surveying, &c., duly deposited with the Assistant Treasurer at San Francisco, as required by the act of July 2, 1864.

☞ We are authorized to state that there will be no reduction in tolls and transportation on the Reading Railroad and Schuylkill Canal, on the 1st of July. The trade had hoped that the companies would have found it to their interest to have made a reduction for the months of July and August, but as they have decided otherwise, our operators must govern themselves accordingly.—*Miner's Journal, July* 1.

☞ At a meeting of the directors of the Rome, Watertown and Ogdensburg Railroad, held in New York on the 21st ult., Wm. C. Pierrepont, was re-elected President; Murcellus Massey, Vice President, and R. E. Hungerford, Secretary.

☞ The Richmond *Republic*, of the 27th ult., says the Virginia and Tennessee Railroad will be opened July 15, from Lynchburg to Bristol.

☞ The Government has taken possession of and will run for its own profit the railroad between Danville and Greensboro.

☞ Arrangements have been made for laying down a horse railroad in Quebec, and the rails for the first section of it have already been obtained. It is expected that the line will be in working order the present season.

☞ The Pittsburg *Post* says that a railroad from Oil City to Plumer has been put under contract and will be completed without delay.

☞ The funded debt of Washington is stated at $943,000. The floating debt is $257,000. This shows an increase of $26,000 since 1861.

☞ The Petersburg Railroad is now open through from Weldon to Petersburg. Thence to Richmond the road is in successful operation.

☞ It is expected that the road from Athens, on the Hudson, to Albany, 36 miles, will be completed by the first of September.

☞ The Somerset *Herald* says that the effort to pledge the remainder of the stock of the Eastern Shore Railroad is meeting encouraging success. The Board of Directors should be sustained and upheld in this enterprise.

☞ Capt. Richard Borden of Fall River, has been chosen President of the Cape Cod Railroad Co., in place of Col. Page, deceased.

Atchison and Pike's Peake Railroad.

The Central Branch of the Great Pacific Railroad is rapidly pushing to completion to the Republican river. Fifty miles are certain to be in running order on the 1st of November, and the whole road is to be fully finished to the junction with the south branch of the Pacific Railroad, on said river, within one year more. The road has been pushed forward without noise, but with surprising energy, backed by abundant means. Senator Pomeroy, of Kansas, is the President, and the accomplished engineer, O. B. Gunn, presides over its construction. Atchison is improving fast, and is destined to be a large city.—*Salt Lake Telegraph, May* 20.

Titusville and Union R. R.

At a meeting of the stockholders of this Company, held in Erie, on the 14th June, the following gentlemen were elected officers for the ensuing year: P. Metcalf, President; E. T. Parsons, Vice-President; Thomas A. Scott, W. S. Brown, W. A. Baldwin, J. E. Brown and M. W. Caughey, Directors.

J. B. JAMES'
Rosendale Cement Works,
MANUFACTURE a superior quality of ROSENDALE HYDRAULIC CEMENT. Address
J. B. JAMES,
39 Cedar Street, New York.

Solid Emery Vulcanite.
WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,
STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, &c., can be obtained by mail or otherwise at our warehouse.

NEW YORK BELTING AND PACKING CO.,
JOHN H. CHEEVER, Treasurer,

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete and Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), at all seasons of the year, thus avoiding all unnecessary handling.

The better condition, therefore in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

American Railroad Journal.

New York, Saturday, July 15, 1865.

A New Dodge.

In the first issue of "*The Commercial and Financial Chronicle*," published by WILLIAM B. DANA & Co., 60 William street, New York, dated July 1, 1865, will be found an exact copy of our Table of Railroad Earnings; our Table of Mining Stocks; Canal and Navigation Stocks; Preferred and Guarantied Railroad Stocks; City Passenger Railroad Share List; American Railroad Bond List, etc. These tables appear regularly in each issue of our paper, and are corrected as often as are able to procure data for that purpose.

hey have been prepared at a great cost of labor and money to us. They are peculiarly our own. Such wholesale appropriation of the effects of another, it has never before fallen to our lot to chronicle. We should not have been more surprised to have found our office denuded of its types, cases, imposing stones, etc., or our counting room of its furniture. Surely the Industrial, Financial and Commercial public, to which it appeals, will not countenance such an undertaking; or the Railroad, Banking and Insurance interests, after being duly apprised of the proceeding, contributed in any way to the support of such a publication. Honest competition we covet, but we brand this sheet as piratical, and unworthy of the respect of any community.

[From the New York Tribune.]

The United States Telegraph Company.

SIR:—The legal adviser of the United States Telegraph Company has, as you know, after repeated inquiry and nearly a week's delay, failed to obtain from you the name of a person who appended to an article in your issue of June 30, his signature as a "United States Stockholder," and who, throughout the article, assumes to be a stockholder of our company. It is in character that he should desire to conceal his name. Darkness rather than light is the natural preference of a libeler.

The special reference of his article is to a proposed extension of the United States Telegraph Company's lines, recently contracted for, to the Pacific; and it seeks to persuade the public that the Directors of this company, acting fraudulently, have made a contract for that extension injurious to the interests of the stockholders, but specially benefitting themselves and a selected few. It alleges further, against what it calls the "scheming managers" that, on the 1st of February last, they, pretending to pay a dividend from net profits, but having no net profits, did take from the capital stock of the company the sum necessary to pay such dividend; which sum is stated to be four per cent. on $3,500,000.

Inasmuch as this last accusation relates to facts of prior date to the other, it shall be first noticed.

Our company, in its present form, is of recent origin. It was organized on the 3d of August, 1864, under acts of the Legislature of the State of New York authorizing such corporations; and it forthwith united, by purchase, assignment and consolidation, the old United States line from New York to Milwaukee and the lines of several other telegraph companies. These had been in operation for various periods, from six months to two years, and had at the time about ten thousand miles of wire. Our company paid them in its shares; 19,000 in all; amounting, at par value, to $1,900,000.

On this stock, and on no other, the Directors deemed it just on the 1st day of last February (by which time about 12,000 miles of wire were up,) to pay a dividend out of part of the earnings of the line thus consolidated. These earnings were, specifically, as follows:

August, 1864	$27,724
September, 1864	31,111
October, 1864	28,666
November, 1864	29,993
December, 1864	27,700
January, 1865	33,662
Total, first six months	$178,856

The above is *nine and a third per cent.* on the stock in question, and the dividend declared was four per cent.

All this, of course, is of record on the books of the company, accessible, at all times, to any stock holder.

Compare, now, in this matter, the official facts with the allegations and insinuations of one who is not ashamed to confess that, instead of procuring authentic information in the office in which, had he really been a stockholder, he would have had a right to demand it he sought it in "other quarters," where he learned that "suspicion exists."

This anonymous scribbler asserts that out of $174,134 of gross receipts for six months (including one month in which the present company had no existence) the managers paid a semi-annual dividend of four per cent. on *three millions and a half of dollars*; that is $140,000, leaving $34,134 to pay expenses on *twenty thousand miles* of wire.

The exact facts, as above shown, are: that the managers paid out of $178,856 of gross receipts, a semi-annual dividend of four per cent., on *one million nine hundred thousand dollars*, that is $76,000; leaving $102,856, to pay expenses on from *ten to twelve thousand* miles of wire. In other words, *forty-two and a half per cent.* of the earnings was paid out in dividends on the stock which constituted the original purchase fund, and *fifty-seven and a half per cent.* was reserved for expenses. Older companies than ours estimate the expense of maintaining their lines at less than forty per cent.

The public will judge what value to put on mendacious assertions that the company "cannot pay a dividend from their earnings," and that the managers "go on making fortunes," while they "dole out to us" (meaning stockholders of the company) "dividends from the money we ourselves pay in."

But the animus of this affair is still more clearly indicated by the terms of the comparison instituted between our earnings and those of two rival companies. The statement is prefaced with the remark, that "the United States Telegraph Company's wires cover the same territory, substantially, as those of the Western Union and American Telegraph Companies" (the intended inference being, that our earnings and theirs ought to approximate in amount,) and then the article proceeds to show that the earnings of the two companies aforesaid had been, in the last six months of 1864, more than ten times as great as ours—say, $1,791,415 to $174,134. The figures are, as has been shown, incorrect; but the joint earnings of these two companies were, at that time, about ten dollars to our one.

It is but fair and proper here to state what amount of stock these two companies had issued

and were paying dividends on at the beginning of this year. Common report puts the amount of their joint stock at nearly thirty millions. Low's "Telegraph and Railroad Directory," however, states the stock of the Western Union (page 154) to be twenty-two millions, and that of the American Telegraph Company (page 150) to be two millions. Let us, then, suppose the entire stock of both companies, on which dividends were payable, to have been, in January last, twenty-four millions, it follows that their dividends were payable on more than *twelve and a half times* as much stock as ours. And it follows further, that their earnings for six months were less than *seven and a half per cent.* on their stock, while ours were *nine and a third per cent.* on our stock; that is, in each case, on the stock subject to dividend. If, following Lowe's Directory, we have over estimated the stock of the two companies, our statement is open to correction.

Our last six months' operations show regular progress; our gross receipts (with the current month [of July] estimated from trustworthy data) being:

February, 1865	$42,199
March, 1865	50,078
April, 1865	56,085
May, 1865	58,286
June, 1865, a trifle over	60,000
July, 1865, estimated	65,000
Total in six months	$331,648

The amount of stock that will have been expended in construction, up to the first of August next, will be about $3,500,000, and the above earnings amount to *nine and one-third* per cent. on that sum.

The object of our Directors, from the beginning, has been to meet the urgent public demand for increased telegraphic facilities, by constructing new lines and stretching many additional wires on lines already built. Having at the outset with a view to equalize the price of shares in the hands of all shareholders, fixed the original subscription price of shares at two-thirds of their par value, they found no difficulty in placing more than were required, and they have, at this time, at interest, a large amount of cash applicable to the construction of lines in progress. Their ultimate aim is to extend the lines of the company wherever, throughout our country, telegraphic business is to be done.

They were prepared for the obstructions which rival interests have thrown in the way. This last libel in print is a trifle compared to a thousand verbal ones daily repeated; compared too to the various injunctions sued out against our work in Illinois and Ohio, and the fruitless attempt made last Winter to prevent the passage in the Legislature of the latter State of a law granting us equal rights on the railroads.

Time elapsed before these impediments could be overcome, and they seriously retarded the completion of some of our lines. Thus, the line to St. Louis was completed only about three weeks since; while it is less than a week since we reached Cincinnati. Such delays, of course, have considerably diminished our earnings.

When one calls to mind the difficulties and drawbacks inseparable from the beginnings of an enterprise of such magnitude as ours, but more especially the persistent efforts certain to be interposed against it by monopolies unused to opposition, having almost unlimited command of capital, accustomed to control the entire field of operation, and to impose on the public their own conditions of service, without remedy or appeal; and when one finds, in spite of all such heavy drag chains on the wheels, a new company like ours, entering at once on a career of prosperity so steadily progressive, it would be difficult to find more practical or more conclusive evidence that the people of this country have no love for overgrown corporations or overshadowing exclusiveness in any business, but will lend a willing hand and extend a liberal share of encouragement to those who assert the right of competition, and pursue an independent course.

We feel fully assured that popular favor will sustain us in the future as in the past, even though we may just have given new cause of complaint by contracting, without the fear of monopoly before our eyes, with parties too responsible to fail us, for an extension of our lines to the Pacific. And this brings me to speak of the first charge set forth in this tirade against the management of our Company.

The imputation is of the gravest character. A circular had been issued to the Stockholders informing them that they had the right to take, at sixty-six and two-thirds dollars per share, one share of the Pacific Extension Stock for every two shares held by them in our Company. Without pretense of evidence, except suspicion based on the fact that this circular did not specify the cost of the proposed extension line, a charge of gross fraud is brought against our managers. It is alleged that "while Stockholders outside the 'ring' are expected to furnish all the money to build the line, a still larger amount of stock is to be issued to the members of the 'ring,' for which they are to pay nothing, or next to nothing." It is added that if all the Stockholders subscribe under the terms of the notice, it "will give the managers thirteen hundred and thirty odd thousand dollars in cash, while the line, at a most liberal estimate, will not cost so much by several hundred thousand dollars."

I reply that, whether our Stockholders subscribe one dollar or one million dollars to the Extension Stock, it will not give to the managers of the United States Telegraph Company one cent. That stock is to be purchased of the United States Pacific Telegraph Company, hereafter to be spoken of, and the purchase money is payable to them. I urge no one to subscribe for a single share of this stock. It is the privilege of our stockholders to do so, at the rate named, if they see fit; and it was my duty to inform them of the fact. Several have already subscribed from $50,000 to $250,000 each. But if every one of them had declined it would not have affected the interests of our Company in any way; except so far as it would influence the relative amount of stock held by our Stockholders proper, as compared with that to be held by the members of the Pacific Company aforesaid, in virtue of a contract with them hereafter to be noticed; in other words, it merely affected the preponderence of influence as between these two classes of stock. It was, indeed, with a view to retain the control in the hands of the original Shareholders that, in the above-mentioned contract, a provision was inserted securing to our Stockholders the privilege in question.

I reply further that, the slang term "ring," as employed above, has, in this case, absolutely no application whatever. Not a dollar of stock has been issued or is to be issued, whether to members of a "ring" or to any other selection of shareholders, either directly or indirectly, either in the present or prospectively, in virtue of, or in connection with, this Pacific Extension. If, at any time hereinafter, the condition of the Company shall afford legitimate reasons for declaring stock dividends (as other companies have done to a very large amount), these dividends will be declared in favor of *all* our Stockholders, without favor or exception. If the contract for the Pacific Extension is a good one, all Stockholders are equally the gainers; if a bad one, all lose in proportion to the amount of stock they hold.

In point of fact, the only practical question is whether that contract, as finally concluded, is, as regards its rates and its terms, just and advantageous, or the reverse.

The facts in regard to this contract are, briefly stated, as follows:

An extension of our lines to the Pacific was, from the time of our organization, a favorite object. We had secured to us, by act of Congress, a right of way and a grant of land, and of other privileges and franchises advantageous in the building of such a line. The first attempt to contract was made in the beginning of the present year. After several weeks' negotiations the basis of a contract submitted to the Board of Directors by a committee of their own appointment was, with trifling modifications, unanimously adopted and referred to the "Executive Committee," with instructions to conclude a contract in accordance therewith. Such a contract, after much deliberation, was drawn up and referred to the President for execution. But the proposed contractor, disappointed in expected support, failed us, and the negotiation fell through.

In the meantime, there was organized a company, mainly controlled by influential members of the firm of Wells, Fargo & Co., and of the Overland Mail Company, under the name of the "*United States Pacific Telegraph Company*," who had resolved to undertake the construction of such a line. They enjoyed facilities for the task equal or superior to any; and they had determined to prosecute their enterprise in any event, with or without connection with us.

After some negotiation, they offered us the same terms which the Board had already approved, and the contract was again referred to me for execution.

The advantage of contracting with such a Company, payable in our stock, if the contract could be effected on equitable terms, was apparent. Yet I held the matter for some time in consideration, and procured certain modifications in the contract, embodying important privileges, of very considerable value to the Stockholders, before I executed it, about two months ago.

To set forth in detail the terms and provisions of this contract would be manifestly out of place. It would be troubling you with a matter with which the public has no concern. Any of our Stockholders who choose to apply to the proper officers can obtain every particular they may desire, whether in regard to this contract or to the other matters above set forth.

After weeks of negotiation, and of earnest and anxious thought, I consider myself fully competent to say, and thoroughly justified in saying, that the extension contract, as it stands, is a bargain essentially equitable in its provisions, advantageous alike to ourselves and to the parties with whom we contracted, and so conditioned that, in its ultimate issue, neither class of stock is likely to bear an unfair relation to the other, while each party has the great advantage which consolidation, instead of rivalship, affords. It gives me much gratification to know that, among the numerous influential stockholders of our Company to whom I have already had opportunity to explain the particulars of this contract, there is not one who does not cordially approve it. It is due to myself to add that I have no interest to the extent of a single farthing, direct or indirect, immediate or remote, in the company with whom we have contracted. And, so far as I know or believe, the same was, at the time of the execution of the contract, strictly true to all the officers and directors of the company with the exception of the two gentlemen who frankly put their names to the document in question.

Our real offense is, not that we made a contract detrimental to the interests of our Stockholders, but that we made one highly beneficial to them—a contract that procures us a foothold in regions to which telegraphic competition had not yet penetrated, assuring us a first-class double-wire line, between 3,000 and 4,000 miles in length, starting from the cities of Chicago and Atchison, uniting at Fort Kearney, and proceeding thence, through the principal points in the rich mining districts of Colorado and Nevada, and the chief cities and towns of California, and giving us that connection with the Pacific, without which any great enterprise must be unsatisfactory, because incomplete. Rounding and perfecting our system of operations, it places us on an equality with our competitors. Hence these tears.

JAMES MCKAYE, President U. S. Telegraph Co.

New York, July 5, 1865.

P. S.—The authorship of the article, to which the above is a reply, may suggest itself to some of our friends when they are informed that the fol-

lowing was telegraphed over the lines of our neighbors, June 30, as *Associated Press news:*

"THE TRIBUNE this morning publishes an important expose by a Stockholder of the United States Telegraph concerning the proposed extension of that line to the Pacific, which is deeply interesting to capitalists and the public generally."

Railways in Switzerland.

It appears from a report of the Minister of the Interior of the Helvetic Confederation that, at the close of 1864, the total extent of the lines in operation in Switzerland was 818¾ miles. At the close of 1854, only 21⅞ miles were in working, so that, notwithstanding the natural difficulties with which the railway engineer has to contend in Switzerland, 796⅞ miles of the line have been opened up in the last ten years. At the close of 1864, 57½ miles more were also in course of construction. Railways in Switzerland have not, however, been on the whole economically successful.

Catawissa Railroad.

The gross earnings and expenditures of this road for the year ending December 31, 1863 and 1864, were as follows:

	1863.	1864.
Freight on merchandize	$214,222 79	$199,026 46
" on coal	85,493 53	52,957 85
Miscellaneous receipts	7,911 71	35,250 59
Travel	97,475 01	135,509 12
U. S. mail	11,900 00	12,691 66
Total receipts	$417,003 04	$435,435 68
Deduct rents of leased roads	88,413 82	63,392 93
Gross earnings	$328,589 22	$372,042 75
Transportation—freight	$31,141 62	$28,306 62
" passenger	12,007 60	16,795 23
Motive power	70.828 14	104,501 63
Maintenance of way	50,558 44	39.877 81
" of cars	17,126 25	22,444 92
General expenses	18,571 52	21,085 41
Working expenses	$200,233 57	$233,011 65
Earnings after expenses	$128,355 65	$139,031 10
Proceeds of securities, bonds, &c		120,051 39
Balance from 1863 after interest, &c.		57,921 28
		$317,003 77

Less the following amounts—

Coupons paid in 1864	$21,010 00	
Paid on ac't Cat., Williamsport and Erie R. R. Co.	6,656 95	
Dividend No. 1 on pref. st'k	60,795 00	
National tax on gross earnings	4,398 69	
Taxes on real estate	2,392 71	
	$95,253 35	
New work chargeable to construction, viz:		
Branch R. R. to coal mines	$25,051 65	
Roadway & appurtenances	116,647 78	
Equipm't: locomotives, &c.	78,929 03	
	$220,628 46	
		315,881 81
Balance to next account		$1,121 96

The earnings and expenses yearly since the reorganization of the company have been as follows:

Y'r ending Dec. 31.	Gross Earnings	Disbursements—Operat'g.	Rents.	Total.	Net Earnings.
1860 (4 mos.)	$123,142	$30,870	$27,352	$108,172	$14,970
1861	279,076	197,055	59,527	256,585	22,491
1862	414,911	354,003	126,545	480,553	(loss 65,408)
1863	417,003	200,233	83,414	288,647	128,356
1864	435,436	233,012	63,393	296,405	139,031

The falling off in merchandize and coal freight in 1864 is attributed to the great severity of the last months of the year and the consequent interruption of business, and by the suspension of the coal trade from the Lackawanna region.

The financial condition of the company as exhibited in general account is set forth as follows:

	1863.	1864.
Capital st'ck—comm'n	$876,200 00	$955,000 00
" preferred	2,100,400 00	2,131,150 00

First mortgage bonds	241,000 00	250,000 00
Total capital acc't	$3,251,600 00	$3,373,150 00
Debt of C., W. & Erie R. R. Co.	15,163 31	6,598 94
Pay rolls and bills for materials	33,372 88	50,074 57
Debts due connecting roads	17,795 56	29,937 39
Accrued interest	7,479 00	9,192 50
Fractional shares	152 47	234 80
Dividend No. 1 on preferred stock unpaid		2,341 50
Liabilities	$73,963 22	$98,379 70
Profit and loss	57,921 28	189,543 60
Total	$3,383,484 50	$3,661,073 30
Road, real estate and coal lands less stock not issued	$2,705,600 00	$2,815,150 00
Equipment	305,000 00	305,000 00
	$3,010,600 00	$3,120,150 00
Expended 1862-'63 & 1864	236,625 01	457,253 97
Construction & equipment	$3,247,225 51	$3,577,403 97
Cash on hand	$55,409 18	$9,246 46
Freight & toll bills due	10,948 88	10,390 58
Materials on hand	31,037 11	35,302 17
Debts due by connecting roads	20,805 03	1,724 75
Individual accounts (U. States, &c.)	14,388 79	9,387 90
Sinking fund	2,470 00	4,985 00
Car loan stock		12,632 47
Susq. R. N. & W. B. Telegr. Co.'s stock	1,200 00	
Assets	$136,258 99	$89,669 33
Total	$3,383,484 50	$3,661,073 30

The condition of the share capital account on December 31, 1864, was as follows:

	Total.	Issued.	Unissued.
Common stock	$1,150,000	$955,000	$195,000
Preferred "	2,200,000	2,131,150	68,850
Total	$3,350,000	$2,086,150	$263,850

The only dividend paid by the company since the re-organization was 3 per cent. on the preferred stock declared in August last. This dividend was made in pursuance of the policy adopted by the company to make the assets complete the necessary improvements on construction and equipment account, so as to leave the profits of the road for the immediate benefit of the stockholders. On this subject the last meeting—

"*Resolved:* That the Directors be and are hereby authorized to repay to the preferred stockholders, any amount of past earnings, which have been expended upon the property of the company, over and above the regular cost of operating and maintaining the same, whenever the net earnings of the road are adequate to regular dividends upon the capital so increased, the same to be paid by the issue of preferred stock, the consent of three-fourths in amount being obtained thereto."

The officers of the company for 1864-'65 are: T. Haskins Du Puy, President; M. P. Hutchinson, Vice President and Secretary; W. L. Gilroy, Treasurer; George Webb, Superintendent; and Samuel V. Merrick, M. P. Hutchinson, James S. Cox, Coffin Colket, of Philadelphia; J. Taylor Johnston of New York, and Charles R. Paxton of Bloomsburg, Pa., Directors.

Company's office No. 424 Walnut street, Phila.

The Pacific Railroad.

The Pacific Railroad is now being constructed through this county with a rapidity almost unparalleled in the history of railroad building. We had hardly begun to realize that the work had commenced east of Newcastle, before the steam horse was snorting on the hill tops at Clipper Gap, in the heart of the mountains, 43 miles from Sacramento and 1,800 feet above the sea. Soon his shrill whistle will be heard at Illinoistown. We learn that the Directors have fixed September 1st for that event, and if it can be accomplished in that time it is sure to be done. The work is heavy, but the force is strong and the zeal is irrepressible. A continuance of the energy now displayed will soon carry the road over the mountains, and then for a rapid race for Salt Lake. The heavy work on the line west of Salt Lake, is right here in Placer county, and is now being vigorously attacked by the company. We never imagined the work would be so heavy, or that it could be completed so rapidly. Persons who have never seen the line before the work commenced, or while it is in progress, can form no correct idea of the immense amount of labor required to construct the railroad over the mountains. But the company do their work well, and when finished it will be one of the greatest feats of railroad engineering in the world. Everything about the road is of the most substantial character. Travellers state that it is not excelled by any railroad in the Atlantic States.—*Auburn (Cal.) Stars and Stripes.*

Grand Rapids and Indiana Railroad.

We are informed, by Hon. T. D. Gilbert, that the work of completing that portion of the Grand Rapids and Indiana Railroad lying between Sturgis and Kalamazoo, has been let to a new and perfectly responsible party, and that quite a large force of workmen have already been placed upon the line. This road must and will be built, sooner or later, and the sooner it is commenced in this locality the better it will be for the Valley City. There is no public enterprise that, when completed, would in our opinion so materially enhance the value of property and permanently secure the rapid and continual growth of this city, as the building of this road. We presume our people are moving, through a committee of good men appointed some time since, in this work, and ere long we shall have a favorable report of what has been and is being done.—*Grand Rapids Eagle.*

Western and Atlantic Railroad.

Only five miles of the railroad between Chattanooga and Atlanta remain to be finished, and the workmen are using every exertion to complete the road, so that the cars can run through by the Fourth of July. Railroad communication from Atlanta to Columbus, Georgia, is now open *via* Opelika. Trains are also running between Opelika and Cheraw, Alabama, forming connection with stages to Montgomery. The railroad from Chattanooga will be completed during the coming week, when there will be direct communication with all parts of the South. The work of practical rehabilitation goes bravely on.—*Nashville Dispatch, July 4.*

Chesapeake and Ohio Canal.

The Board of Public Works of Maryland met at Annapolis, on the 6th inst., and elected for Chesapeake and Ohio Canal officers, the ensuing year, the following named gentlemen: For President, J. Snively, Hancock, Maryland. For Directors—Henry B. Cook, Lawrence Boyle, Lawrence Dawson, Charles Abert, E. F. Anderson, A. O. Green.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 30th ult., inclusive, during the years 1864 and 1865, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1864	224,100	5,628,300	1,737,100	137,700
1865	189,200	1,465,800	1,700,600	150,700
Dec.	31,400	4,183,000	36,500 Inc.	13,300

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 867,500 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of June ult., in the years indicated:

	1863.	1864.	1865.
Canal opened—	May 1.	May 1.	April 30.
Flour, bbls	402,100	224,100	189,200
Wheat, bush	5,635,800	5,628,300	1,465,800
Corn, bush	6,814,100	1,837,100	1,700,600
Barley, bush	55,700	107,000	150,700
Oats, bush	2,838,000	2,616,900	2,670,600
Rye, bush	91,200	64,500	90,500
Malt, bush	.....	.....	167,700
Beef, bbls	7,712	5,000	4,680
Pork, bbls	219,000	45,200	13,750
Bacon, lbs	3,002,800	559,300	1,090,900
Butter, lbs	38,400	23,600	40,000
Lard, lbs	16,270,400	694,300	1,423,200
Cheese, lbs	340,400	41,200	196,400
Wool	10,900	23,200	88,500

Journal of Railroad Law.

CONSTRUCTION OF RAILROAD.—DAMAGE TO HIGHWAY.—MEASURE OF DAMAGES.

The case of The inhabitants of Veazie against The Penobscot Railroad Company, very lately decided by the Supreme Court of Maine, contains some interesting points as to the liability of companies for negligent injury to a highway in the construction of the road. The action was to recover damages against the company for constructing their railroad across a highway which the plaintiffs are bound to keep in repair, in such a manner as to render such way unsafe and dangerous for travelers thereon.

The first ground of damages is, the amount which the town has been compelled to pay to one Phillips, and the cost and expenses of defending a suit instituted by him against the plaintiffs, as primarily liable for the injuries caused by the defect. The second ground of damages is, the injury sustained by the town by the digging down, and the cost of repairs of the highway.

The opinion of the Court was drawn up by

KENT, J.—The defendants insist, in the first place, that whatever was done was done in pursuance of their legal right by their charter §8 and by C. 81, §8, of R. S. of 1841.

By the provisions of those Acts, the railroad corporation had an unquestioned right to have their road pass over or under the highway; and for that purpose to raise or lower any part of it. But both by those statutes and by the principles of the common law, the defendants were bound to exercise that right so as not unnecessarily to injure others. Corporations as well as individuals are bound to observe that excellent and compact rule, which has for centuries stood as the guardian and protector of individuals, against the reckless, tyrannical, or careless exercise of admitted rights. When applied to a case like this, it requires that the act permitted should be done in such a manner that the use of the road should not be unnecessarily obstructed, and that reasonable care should be used by the erection of barriers, and otherwise to warn and protect the citizens from danger and injury. The right to make the cut did not give the right to do it without due regard to the public safety; and that required that all proper guards should be erected and continued whenever there was danger of injury to any person by reason of the cut. The charge in this case is, that the corporation made a deep cut partly across the road, which was not well guarded by sufficient railing against accident; and that one Phillips, traveling on the road in the evening, using due care, walked, or fell into the hole or cut so made, and was injured. These allegations, if legally established, bring the case within the rule before stated, and it is not necessary to decide whether the provisions of the Act of 1853, (R. S. of 1857, C. 51, §15,) are applicable to this case. Under that Act, if the crossing had been made without the consent and action of the County Commissioners, or city authorities, as therein set forth, it would have been a nuisance, and of course, an illegal and unjustifiable act. We have considered this point on the assumption that the act of cutting was legal. Lowell *vs.* Boston and Lowell Railroad, 23 Pick., 24; Drew *vs.* New River Co., 6 Carr. & P., 754.

It is further objected that this company is not liable for damages consequent upon the acts or neglects of the persons who had contracted with the corporation to do the work. It is contended that the contract is a legal one, and only authorized a legal act; and that, if the contractors performed this legal act in an illegal manner, the company is not responsible. This point, it would seem, must have been raised and determined when this case was before the Court, at a former term on a statement of evidence offered. The fact that this work was done by contractors, was distinctly stated in that report; and the Court by ordering the case to stand for trial, notwithstanding that fact necessarily determined, that it did not debar the plaintiffs from maintaining this suit.

We are not disposed to discuss at length the questions which have arisen in different Courts in England and in this country, in relation to the limits of the liability of individuals who have contracted with others to do certain work, and by the negligence or fault of such contractors during the progress of the work, injuries have arisen to others. The case on this subject are collected and commented upon very ably by Mr. Justice Thomas, in the case of Hilliard *vs.* Richardson, 3 Gray, 349. When applied to cases between individuals, not involving any question of public right, the rule, that if the injury occurred in the ordinary course of doing the work, and as part of it, the employer may be liable, but if from some irregularity of the contractor outside of his contract, he alone is responsible, may perhaps be the true and just one, where the relation is simply that of a contractor who is to perform his work without any interference or control, or direction by the party employing him. Where such right to direct or control exists, or where the relation is that of master and servant, a different and opposite rule may be enforced.

In the case before us, the company stipulate that the work is to be done "according to the plans and directions of the chief engineer of said company," who is "to be employed and paid by the company. See Wyman *vs.* Pen. & Ken. Railroad Company, 46 Maine, 162.

But we place the decision on this point on the well settled doctrine, that where the Legislature, as guardian of the rights of the public in a highway, permits a corporation or individual to use or interfere with the way, and to obstruct its use on condition, express or implied, that all requisite care is to be taken to protect others from injury, the right thus granted must be exercised by the party to whom it is granted, and cannot be assigned, so as to relieve the party from the faithful execution of the power. The company may doubtless make contracts for the performance of the work; but cannot avoid their obligation to protect the public against danger by the stipulations they may make. The grant of the Legislature is to a known and responsible company as it is to be presumed, over which the Legislature has more or less control. Important rights are to be affected, and it would be a dangerous as well as an unsound doctrine, to allow such a body to transfer their liabilities and obligations to the public and the individual citizens, to irresponsible or transient contractors. In the execution of such a trust or power, the company must be responsible whatever contracts they may make. Hilliard *vs.* Richardson, 3 Gray, 349; Bailey *vs.* Mayor, &c., New York, 3 Hill, 531.

It is settled by various decisions, that where railroads have the power to cut through and alter highways, and in so doing travelers sustain an injury without fault on their part, by reason of an illegal defect, the towns in which the highways are situated are primarily liable for such injuries. Irate *vs.* Gorham, 37 Maine, 451; Willard *vs.* Newbury, 22 Vt., 458; Currier *vs.* Lowell, 16 Pick., 170.

A town thus made liable may sustain an action for indemnity against the railway company, if that company was first and principally in fault, and the wrongful cause of the defect or neglect. The town is compelled by law and public policy to stand as guarantors, or in a position like that of surety for the company, that it shall not be guilty of neglect. When the wrong or neglect is altogether on the part of the company, the town may nevertheless be held to make good the injury to the individual. The liability of the railroad company is to indemnify the town fully for all the damages it has been compelled to pay, and for the costs and expenses reasonably and fairly incurred. Lowell *vs.* B. & L. R. R. Co., 23 Pick., before cited; Duxbury *vs.* Vermont Central Railroad, 26 Vt., 751; Hayden *vs.* Cabot, 17 Mass., 169.

The Judge in this case ruled that the evidence put in was sufficient to authorize a verdict for plaintiffs, and was conclusive upon the defendants as to the cause of the injury to said Phillips, and as to the extent of the damage. The principal point thus raised, is whether the judgment recovered by Phillips against the town, with the parol evidence, is conclusive upon defendants as to the cause and extent of the damage. The rule seems to be established, that when a person is responsible over to another, either by operation of law or by express contract, and he is notified of the

pendency of the suit, and requested to take upon himself the defence, he is not afterwards to be regarded as a stranger to the judgment that may be recovered; because he has a right to appear, and make as full a defence as if he were a party to the record. Coates *vs.* Roberts, 4 Rawle, 100. A judgment after such notice will be conclusive against him, whether he appeared or not; Jackson *vs.* Marsh, 5 Wend., 44; Thrasher *vs.* Haines, 2 N. H., 433.

It must be made to appear that the action is for a cause for which the defendant is liable. We think it does sufficiently appear in this case, that the injury sustained by Phillips for which he sued, was occasioned by the acts or neglects of the railroad company. The declaration in the writ Phillips *vs.* Veazie, sets out substantially, the same defect in the same place in the highway as the writ in this case, viz.—a cut partly across or into the highway, which was not well guarded by sufficient railing. The plaintiffs also introduced parol proof that the locus of the injury to Phillips was where the railroad, as located, crossed the highway, and that the cut was there made by the corporation or its agents.

The two declarations are identical. There is no cause for the injury set out in the first delaration which is not found in the one before us. With the connecting parol evidence, the identity of the cause of action upon which the recovery was had, with that in this case, is sufficiently established.

The defendants contend that they did not have sufficient notice of the pendency of the former suit and therefore are not concluded by it. The notice was given to the President, and to Mr. Wilson, a counsellor of this Court, and a director of the company, on the day before the trial commenced, and Mr. Wilson was present at the trial, and took notes, but no part in the trial. The notice certainly gave but little time for preparation. But the town, so far as it appears, had made all necessary preparations, and the cause was fully and fairly tried. If the company had desired further time for preparation, they should have moved the Court for a continuance, or have notified the town that they desired more time, or in some manner signified a wish for postponement. The fact that a director attended and took notes is important, and shows that that officer of the company had an opportunity to know how the trial was conducted.

The notice requested the company to assume the defence. If they had desired to do so, there was time sufficient to notify the town of that fact, before, or during the trial. No such notice was given, or desire expressed. We think they cannot now avoid their liability on this ground.

The defendants interpose the objection that both the claims sued for are barred by the limitation contained in §11, of C. 81, R. S. of 1841.

That limitation of actions to "one year after the causing of such obstruction," obviously refers to the right of action given in the preceding section, and is restricted to such actions as are brought by the town to recover damages done to the road itself, or for the amount expended by the town in putting the way in good repair after neglect of the corporation so to do. This construction covers the claim in this case, "for the repairs of the cut and road." The action not having been commenced within one year after the obstruction and these expenditures, the limitation applies, and the plaintiffs cannot recover for this item.

The other claim is not for an injury to or expenditures upon the road, but to recover damages from the railroad corporation for which the town was held liable, primarily, by a judgment of the Court. The town could not legally commence the action until the damages to the individual had been ascertained and fixed in some mode, and the plaintiffs held liable therefor. In the 11th section before referred to, the limitation is to one year after the obstruction is caused or created. But if an injury to an individual should happen by reason of such obstruction more than a year after its first creation, the right of action for such injury, against the town or corporation, would not be barred by this limitation of the statute. In this case, the action was commenced within a year after the liability of the town was ascertained and fixed. The right of action then first accrued, and the plaintiffs may recover for this item.

Judgment for plaintiffs for the amount paid to Phillips on his judgment against plaintiffs with interest thereon, to time of final judgment in this case; also for reasonable charges for counsel fees, witnesses, and expenses in defending said suit of Phillips, and interest thereon as above.

Toledo, Wabash and Western Railroad.

We have already announced the organization of this corporation, being a consolidation of the following companies, to wit: The Toledo and Wabash Company, from Toledo to the Illinois State line; the Great Western, from State line to Illinois River at Meredosia; the Toledo and Quincy, from Meredosia to Camp Point; and the Illinois and Southern Iowa, from Clayson (on the Toledo and Quincy) to Hamilton, opposite Keokuk. This consolidation of these companies went into effect on the 1st inst., and the onerous work of arranging and systematizing the operations of the new organization is being pushed forward with all the energy and skill for which its officers are distinguished. It may be some days before all the details of the new arrangement are reduced to complete order, but the delay will not seriously embarrass the traffic of the line.

From Camp Point to Quincy, the Toledo, Wabash and Western Railroad runs on the track of the Chicago, Burlington and Quincy road, in common with that company, and at Quincy connects directly with the Hannibal and St. Joseph road to the Missouri River. At Keokuk connection is made with the Keokuk and Des Moines road.

It is expected that an improved running connection will very soon be secured with the Chicago, Alton and St. Louis road at Springfield, whereby traffic between Toledo and St. Louis will be greatly facilitated. The distance between the two points by this route is only 458 miles, being 67 miles shorter than any other.

The distances from Toledo to the connecting points on the Mississippi River are as follows:

Toledo to Keokuk ..... 475 miles.
Toledo to Quincy ..... 489 miles.
Toledo to St. Louis ..... 468 miles.

The great importance of this arrangement will be appreciated by all who have any knowledge of railroad affairs in the West, and will be seen by any one upon examination of the map. We venture to say that it is not equaled in importance by any similar movement in the Western States. Opening a direct unbroken line from the most western point on Lake Erie to the Mississippi, a distance of four hundred and eighty-nine miles, of uniform gauge and without change of cars, it furnishes facilities for business between those waters far superior to any other route, and presents the longest continuous line of railroad under one management in the United States.

At Logansport, Ind., this trunk line has an important feeder, in the Toledo, Logansport and Burlington line, extending to the Mississippi at Burlington, a distance of 288 miles. An intimate running connection is secured on this route, and a heavy and increasing traffic is expected from it.

We may well congratulate Toledo upon the consummation of this important arrangement. Its bearing upon all the interests of our city can only be estimated now, and will not be appreciated until the increased facilities thereby furnished for trade and commerce between this point and the illimitable West are developed and felt.—*Toledo Blade.*

Atchison and Pike's Peak Railroad.

Under the late reorganization of the Atchison and Pike's Peak Railroad Company, embracing Wm. Osborn, of New York city, as contractor, the company is allowed to place a first mortgage lien on the road as fast as completed, and to use the money derived therefrom for contracting other portions of the work. The new organization has the following officers: General S. C. Pomeroy, President; Willis Gaylord, Vice-President; James Wadsworth, Secretary and Acting Treasurer; Chauncey Vibbard, Chairman of the Executive Committee; O. B. Gunn, Chief Engineer; and Judge Bonney and J. E. Williams, President Metropolitan Bank, New York city, Trustees of Bonds. The company has issued its bonds to the amount of $1,600,000, and Mr. Wheeler, an English gentleman, in connection with Chauncey Vibbard, are the agents for their sale. They are to be sold abroad. It is the determination of the company to push the road with energy.—*Atchison Champion, June 2.*

Virginia and Tennessee Railroad.

We learn that the trains run from Lynchburg, on the Tennessee Railroad, as far as Big Lick, seven miles east of Salem, in Roanoke county. The bridges over and along the line of the road most approximate to the Roanoke, the main stream of which is crossed three times by the railroad, and the south branch of the river once, are not finished. The bridge over New river, on the line of Pulaski and Mercer counties, is completed. We understand, also, that the road is in running order from Bristol to Marion, in Smyth county, and probably to Wytheville. The only repairs, then, to be made are between Big Lick, Roanoke county, and Wytheville. These repairs, it is said, can be effected in from three to four weeks, when the road will be entirely open from Lynchburg to Bristol. This region of country has been the source of large supplies of provisions to the city of Richmond, and the re-opening of this avenue of trade will be gratifying to the people of both localities.—*Richmond Whig, July 6.*

Chicago and Northwestern Railway Case.

Chicago, July 8, 1865.—Judge Davis, in the Supreme Court, gave a decision to-day in the case of Wadsworth against the Chicago and Northwestern Railway, refusing to grant an injunction and receiver, requiring the company to give bonds to protect the unexchanged Galena stock in case the Court should hereafter decide that holders thereof were entitled to recover the money value of the stock at the time of the consolidation, instead of taking shares of the Northwestern Company, as provided by the articles of consolidation.

The decision is considered by the officers of the road as a settlement of the question of consolidation, and reduces the suit to a litigation for the difference in value between the outstanding Galena stock and the present value of the Northwestern stock to be issued in exchange therefor, in accordance with the terms of consolidation, which difference does not exceed fifty thousand dollars.

☞ Cannel coal has been discovered near Grand Rapids Michigan, and the opinion is expressed that the quantity is inexhaustible.

American Railroad Journal.

Saturday, July 15, 1865.

Stock Exchange and Money Market.

We find the following in a late number of the Philadelphia *News*, a newspaper we always read with interest:

What we want is an appreciation of our currency, so that a dollar bill may not at any one time only buy thirty cents of an article and at another time fifty cents' worth; a rapid reduction of the public debt; a diminution of taxation, &c.—*American Railroad Journal.*

This is without doubt sound doctrine, and we are glad to welcome our able cotemporary back to the true church of those who believe that the more currency we have the cheaper it becomes, and, therefore, the less of the necessaries of life it will purchase. We remember very well when this was the uniform doctrine of the editor of the *American Railroad Journal*, and we regretted very much when we saw him some months since resisting the arguments of those who, like ourselves, sought to induce the Secretary of the Treasury to stand by his record, and begin the retirement of at least a portion of the existing volume of circulation.—[*News.*]

We think the *News* has mistaken the course of the RAILROAD JOURNAL, and we do not wish to be misunderstood. We are not aware that at any time we have advocated an undue expansion of our paper currency, but the contrary. No one who has studied the subject of finance in particular or political economy in general, at least to any good purpose, can advocate with justice an inflation of paper money. But we have defended with all sincerity the conduct of the Treasury in its financial policy, as a matter of pure necessity, always at the same time advocating the earliest possible return to a specie basis. We have always asserted that considering the peril the country was in from the rebellion, the hostility to our republican cause entertained by Foreign Governments, the want of faith in the stability of our institutions in the minds of foreign capitalists and bankers, that we were compelled to look to ourselves, and our own resources and credit, for the means of sustaining ourselves. Therefore, it was we approved of Mr. CHASE'S bold policy, without which we could never have sustained our armies and navy as splendidly as we have done. True, it is the Banking interest clamored for conducting the war on the specie basis, a plan entirely impracticable, for the reason that the banks had never been able to sustain themselves even in an ordinary commercial panic in time of peace, and would have been utterly unable to do so in a case of real pressure. Then too these banks would have been able even for their own bills, to have made their own terms as lenders to the Government even for the inconsiderable sums they would have been able and willing to lend it; and besides, after the Government had accepted their notes, in return for its securities, they would have been soon at a large discount, and finally the banks would not have been able to resume on their own issues at all. We have seen how the southern banks have been ruined by their connection with the rebel government, even before its final collapse. It is the opinion of such financiers as Thos. W. Olcott, whose opinions are always of high authority, that the Banks would have been utterly destroyed if a specie basis had been attempted by the government or themselves, and this we fully believe. It was far better to issue the promises of the government at once for the money it needed, and save the interest on the issue than to pay interest on the notes of the Banks which could not have been reduced in full at any time during or before the war, if an immediate demand for specie had been made upon them. It would indeed in our judgment have been better to have directly issued legal tenders for all the amounts the government wanted, to retain that character as ready and lawful money for a certain term of years, than to be only receivable after that term in payment of subscriptions to 5-20s or 7-30s as was deemed best. Our system of finance would then have been much more simple than it is now, and the Treasury would have largely saved in the Broker's commissions and the other outlays incident to an advertised loan. We should have had but one or two kinds of public loans, which it is true would have had the character of forced loans, but no more forced than taxes. But now that our war expenditures are dimished and diminishing, it is quite

different affair. The revenue for 1865 can not well be less than 350 millions which must be enough to pay the interest on the national debt, maintain the civil list, and support the navy and army in numbers sufficient for all possible contingencies. We see no need of keeping these much beyond the standard which existed before the war, for it is evident that the south has come to its senses, and is filled with bitter regret for its folly. And we think no foreign nation cares to involve itself in war with such a nation as we have proved ourselves to be. And if there be any southern leaders yet unsubdued and unchastised in spirit, they see clearly how utterly unable they would be to again engage in revolt, and how hopeless would be the attempt. The opinions we expressed in 1862 on the economic view of the contest entirely irrespective of all considerations of the question of slavery are those which must forever hereafter be the cool judgment of the American people, now no more to be divided.

We may therefore safely come down at once to the true finacial view of our condition, and hasten back as early as possible to a specie basis. Every fall in gold puts just so much money in the pockets of the holders of legal tenders or bank notes, and just so much increases the purchasing power of paper money. This return to specie payments is due to the morals of the country, which are impaired by the fluctuations in gold and paper as its exponent. Trades' people, all sellers of merchandize have still the excuse of overcharges, and of delays in the reduction of prices in consequence of these fluctuations, a temptation few can resist who have anything to sell.

We think we know Mr. McCulloch's views on these subjects. He was always a hard money banker, and carried the institution over which he presided through a panic of suspension, when other institutions than his own had to succumb, and we believe it is his policy as it is his wish, to come back to the old standard at the earliest opportunity. All his efforts are taking this direction, but first to occupy the position of an honest debtor and cancel all our outstanding engagements which is vital to the present and future credit and character of the government. We therefore may say to our Philadelphia cotemporary, that we do not as we see disagree; if at all, it is as to the past, and not to the present or the future.

The aggregate amount of exports (exclusive of specie) for the week ending July 10th, was $4,063,538, against $4,394,498 in 1864. Since Jan. 1, $84,757,260, against $97,142,440 in 1864.

The imports were $2,764,792 against $3,567,435 same week last year; and since Jan. 1, $82,307,012, against $132,878,470 in 1864.

The imports at Boston from Jan. 1, to July 7, were $11,497,377; and the exports $113,163.

Money is abundant at 5@6 per cent. on call, with occasional loans at lower rates. Exchange is quoted at 109@109½. The balance in the Sub-Treasury on Tuesday was $44,067,964. Gold, 142 @142¼.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Ohio and Miss. Pref. Cer., 60; Hannibal and St. Joseph L. G. bonds, 95; Indiana 2½ per cent. bonds, 75; Ohio 6s, 1881, 93½; Connecticut 6s, 95; Louisiana 6s, 62½; New York 7s, 1870, 101; Brooklyn Bank Loan, 80; Mariposa 1st mort., 40½; Brunswick City Land Co., 8⅞; Nicaragua Transit, 6; Western Union Telegraph 75@77½; Central Coal Co., 50; American Gold, 141; Smith and Parmalee Gold, 5; Bank of Republic, 109½; 4th National Bank, 99¾; Bank of America, 130; Importers and Traders Bank, 105½; Central Bank, 102, Am. Ex. Bank, 113½; Manhatten Bank, 138; 9th National Bank, 103.

U. S. 7-30 Notes.

These notes are a very popular investment, and within a few days large amounts have been bought up for German bankers. They are of three classes; the first issue of August 15, 1864, matures August 15, 1867; the second issue of June 15, 1865, matures June 15, 1868, and the third issue of July 15, 1865, matures July 15, 1868. These are all payable in currency at maturity, or are convertible into five-twenty bonds at the option of the holder. The July seven-thirty notes differ from the first and second series, in that they have the following condition printed in red ink across the face of the notes: "The Government reserves the right of paying in coin the interest on this note, at the rate of six per cent. per annum."

☞ Gov. Fletcher, of the Missouri, has issued his proclamation announcing the adoption of the new constitution for that State at the election held on the 6th of June. The total number of votes cast was 85,478, of which 43,670 were in favor of the constitution, and 41,808 against it, the majority by which it was adopted being thus 1,862. It went into operation on the 4th.

European and North American Railway.

The Bangor *Whig* says that "a bargain has been finally consummated between the two companies. The New Brunswick company raises $200,000 in subscriptions; secures the $10,000 per mile subsidy; creates a mortgage on its line for $2,000,000 for the benefit of the American company, which latter company contracts to build the line through from Bangor to St. John. Contractors stand ready to build the New Brunswick portion on the terms of the contract; work to commence as soon as the arrangements are perfected."

☞ The St. John (N. B.) *Journal* has the following in reference to the New Brunswick and Maine (European and North American Railway) companies:

The New Brunswick Company will take $200,000 in stock, paying the same down in cash as required. The Maine Company will find the balance of capital beyond this sum, and the government gift of $10,000 a mile, required to complete the New Brunswick portion of the road to the American frontier; that company having already secured the funds required for its own end of the line, conditionally on the entire line being carried through. The Maine Company will build the road of a character satisfactory to the New Brunswick government and company, and when it is completed they will accept a lease, which the New Brunswick company agrees to grant, of the road, the rent to be sufficient to cover the interest of the stock, minus the government gift of $10,000 a mile. Thus the government subsidy and the New Brunswick subscription list will enable the Maine company to obtain the capital for their line, while they in turn will reciprocate New Brunswick's co-operation, and with characteristic energy make the work a fixed fact.

The length of road to be built within the Province is 88 miles. The route has been surveyed by E. R. Burpee, Esq., C. E., who reports a very favorable line, with a maximum grade of 53 feet to the mile, and without a curve of less radius than 1,637 feet, and which he estimates can be built for $30,000 per mile—making a total cost of $2,640,000. The length of road to be built in Maine is 108 miles, estimated at cost $3,240,000. It is thought that the railway connecion between New Brunswick and Maine will be completed within three years. The promoters of this project are also understood to entertain the idea of constructing the line from Moncton or Schediac to Amherst, under the New Brunswick railway facilities act; so that as matters now stand there seems a probability of there being a direct railway communication established between Halifax and the United States, as soon as the Province of Nova Scotia can complete the line of its railway from Truro to Amherst.

Compound Interest Notes.

These notes are in considerable request for country investors. There are four different issues, and all have three years to run from the date stamped in red ink on their face. The first issue is dated June 10, 1864; the second issue, July 15, 1864; the third issue, August 15, 1864; the fourth issue, October 15, 1864; and the fifth issue, December 15, 1864. The compound interest notes are payable three years from these dates, at which time every $100 will be worth $119 40. Those of June are selling at 2@2½ per cent. premium, those of July at 1¼@1½, the August notes at 1@1⅜, and those of October at ¼@½. In September no compound interest notes were issued, and those of the later dates still pass as currency.

American Securities in Germany.

A letter in the *Evening Post*, dated Altona, near Hamburg, June 24, 1865, thus refers to American securities abroad:

It is highly gratifying to observe here a daily increase in the price and popularity of our stocks. While all other securities are depreciating, only United States stocks seem to gain ground. The largest amount of business done in these securities hitherto was last week—one person having bought the enormous amount of five hundred thousand dollars for himself, beside being a permanent holder to the amount of two hundred thousand dollars. The price on Thursday was the highest yet reached, being 73; they are now at 70, standing firm. Large investments are made in these stocks, and a very good reason for it, as at present rates they will pay about 8 per cent. interest—a price not to be had in any other equally safe investment.

The Germans are a thrifty and safe calculating people, ever choosing the safest and best markets for their products, whether money or goods, and they seem to be, now the war is over, perfectly satisfied to deposit their savings in American Securities. Money is very plentiful in Europe—never more so than at this moment, and at such low rates it is no wonder our bonds are so inviting. With the war over at home, and no difficulties in the way abroad, it is only a wonder that the gold premium should keep up so high as at this moment, as everybody knows there is no actual cause for it. *The best and staunchest men here think the gold premium will decline, and that by October or Christmas United States Stocks will rise to par.*

Patent Metallic Pens.

The advertisement of Messrs. JOSEPH GILLOTT & SONS, will be found in another portion of our present issue. Mr. Gillott respectfully invites the attention of the public to the following numbers of his Patent Metallic Pens, which for quality of material, easy action, and great durability, will ensure universal preference: For Ladies' Use for fine neat writing, especially on thick and highly finished papers. Nos. 1, 173, 303, 604. In extra fine points.—For General Use Nos. 2, 164, 166, 168, 604. In fine points.—For Bold Free Writing Nos. 3, 164, 166, 168, 604. In medium points.—For Gentlemen's Use for Large, Free, Bold Writing. The Black Swan Quill, Large Barrel Pen, No. 808. The Patent Magnum Bonum, No. 263. In medium and broad points.—For General Writing No. 263. In extra fine and fine points. No. 810. New Bank Pen. No. 262. In fine points. Small barrel. No. 840. The Autograph Pen.—For Commercial Purposes the celebrated Three-hole Correspondence Pen, No. 382. Do. Four-hole do. No. 202. The Public Pen, No. 292. Do., with bead, No. 404. Small Barrel Pens, fine and free, Nos. 392, 405, 603. Henry Owen, Sole Agent, 91 John street, New York.

☞ The Post-office Department has now become a paying institution. For the last six months of 1864, its net profits over all expenses were $732,230 60, or at the rate of a million and a half a year. But the profits of the first six months of 1865 will be yet larger. The postal receipts from the States in the Union in 1864 exceeded those of all States in 1861 by $2,972,000. All contracts for carrying the mails in New England and New York have expired, and the Postmaster-General will not enter into new contracts until some uniform system of charge shall have been adopted. At present some roads receive much greater compensation than others, and it is proposed to establish a uniformity of rates of which weight and value is the basis.

Cape Cod Railroad.

The nineteenth annual report of the Directors of this railroad shows that the receipts of the company from May 31 of last year to the same date of the present year were $161,047 10, and that the expenses were $87,926 28—making a net income of $73,120 82. After paying expenses, interest and State and National taxes, the balance was $58,183 94, which shows a decrease in net income of $14,964 50. The debt of the company on the 31st of last May was $92,458 05, being a reduction of the amount equal to $24,842 07. No accident has occurred to any passenger on the road during the year. The road and rolling stock are in good condition. A dividend of two dollars per share has been declared by the Directors.

New Orleans, Jackson and Great Northern Railroad.

MEMPHIS, July 10.—The Superintendent of the Jackson and Great Northern Railroad is now on the line, for the purpose of securing its successful re-opening, with all its former Northern and Western connection. All the money necessary for the repair and equipment of the road is said to have been subscribed, and confident hopes are entertained that by the middle of August it will again be in successful operation.

☞ We are requested to call attention to the letter in another column from Mr. James McKaye, president of the United States Telegraph Company, in which he refutes certain statements made concerning the affairs of the company in a morning journal.

☞ The card of Messrs. WARREN, KIDDER & Co., Bankers and Brokers, No. 4 Wall street, will be found in another column.

☞ The Baltimore and Ohio Railroad Company commenced locating the branch from Washington to Point of Rocks on the 10th inst. Richard Randolph, Esq., has charge of the survey. The length of the road will be about 40 miles.

☞ A large meeting was held at Frankfort, Indiana, on the 24th ult., to promote the building of the Indianapolis and Chicago Air Line Railroad.

☞ The survey of the proposed railroad from Springfield, Ill., to Pana has been completed. Its roadbed cost is estimated at $330,000, or a little over $8,000.

☞ Mr. J. M. DOUGLASS, of Chicago, has been elected President of the Illinois Central Railroad Company, *Vice* WM. H. OSBORN, Esq., who declined a re-election.

☞ D. W. Caldwell, Esq., has been appointed Superintendent of the Central Ohio Railroad.

☞ W. H. Burns, of the firm of L. P. Morton & Co., and W. P. Ellery, with Charles A. Meigs & Son, have been admitted at the Stock Exchange.

☞ Since it has been ascertained that the work upon the Cherango (N. Y.) Canal has fallen short some two hundred thousand dollars of the estimated cost, it has been decided to put the work for ten additional miles under contract.

☞ The railroad ordinance of Missouri was adopted by a majority of 18,167 at the recent constitutional election in that State. The official majority for the new constitution was only 1,862.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway for the week ending July 1, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$46,599 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	65,682 00
Total	$116,317 00
Corresponding week, 1864	112,879 00
Increase	$3,438 00

The earnings of the Chicago and Alton Railroad for the 4th week in June, 1865.. $84,618 00
Corresponding week of previous year. 46,674 00

Increase $37,944 00

The earnings of the Michigan Central Railroad for the 1st week in July, 1865, were.. $81,309 81
Corresponding week of previous year.. 60,642 28

Increase $20,667 53

The Detroit and Milwaukee Railroad traffic for the 1st week in July was $36,444 00
Corresponding week of previous year.. 23,985 00

Increase $12,459 00

The earnings of the Chicago and Rock Island Railroad for the first week in July, 1865, were $69,700 00
Corresponding week of previous year.. 47,302 00

Increase $22,398 00

The Michigan Southern road earned the first week in July, 1865 $73,372 00
Corresponding week of 1864 64,064 00

Increase $9,308 00

The earnings of the Chicago and Northwestern Railway for the 1st week of July were $153,381 43
Corresponding week of 1864 108,967 93

Increase $44,413 50

The traffic of the Great Western Railroad for the week ending June 30, 1865, was as follows:

Passengers	$29,632 63
Freight and live stock	21,003 31
Mails and sundries	1,438 43
Total	$52,074 87
Corresponding week of 1864	43,335 03
Increase	$8,739 84

The earnings of the Marietta and Cincinnati Railroad for the fourth week in June, 1865, were:

	1865.	1864.
Passengers	$17,500 72	$9,731 44
Freight	15,740 37	15,314 84
Mail, express & telegraph	1,139 14	1,191 11
Total	$34,380 23	$26,237 39
Total this month to date	$110,185 61	$75,055 16
Total for the fiscal year commencing Jan. 1	$544,456 26	$465,769 33

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending June 30, were:

	1865.	1864.
Passengers	$3,717 40	$3,951 05
Freight	23,225 23	15,749 39
Express	292 80	104 16
Mail	296 58	296 58
Total	$27,532 01	$20,101 18

Receipts from January 1 to June 30:

1865	$298,339 64
1864	268,293 91
Increase	$25,045 73

Railroad Earnings--Monthly.

The following is a statement of the business done by the Illinois Central Railroad for the month of June, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	7,219.42 for	$79,923 75
Acres Int. Fund Lands sold	127.80 for	2,481 88
Acres Free Lands sold..	1,342.77 for	15,915 24
Total sales during month of June, 1865	8,709.99 for	$98,320 87
To which add Town Lot Sales		1,480 00
Total of all		$99,800 87
Cash collected in June		$133,988 71

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$219,856 86
do.	Freight	349,845 80
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	10,000 00
Total Receipts in month of June, 1865.		$590,060 99
Total Receipts in month of June, 1864.		510,099 74

The earnings of the Marietta and Cincinnati Railroad for the month of June, 1865. $110,185 61
Corresponding month of previous year 78,696 92

Increase $31,488 69

The earnings of the Chicago and Northwestern Railroad in June 1865, were $727,192 73
Same period last year 565,145 40

Increase $162,047 33

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of June, 1865, were $402,122 00
Corresponding month of previous year 315,258 00

Increase $86,864 00

The earnings of the Chicago and Rock Island Railroad Company for the month of June, 1865, were $311,180 00
Corresponding month of previous year 243,178 00

Increase $68,002 00

The earnings of the Chicago and Alton Railroad for June, 1865, were $343,985 00
June, 1864 206,090 00

Increase $137,895 00

The earnings of the Michigan Central Railroad for the month of June, 1865, were $365,662 74
Corresponding month of previous year 265,780 35

Increase $99,882 39

☞ The Halifax *Reporter*, referring to the Nova Scotia and New Brunswick delegations to England, says: "It is now certain that the recent visit of Dr. Tupper to Frederickton was for the purpose of arranging joint action between these provinces in reference to the proposed railway from Truro to Moncton. The decision was then arrived at that the work could be much better arranged with the principals in London. Hence the delegation from these provinces. The negotiation for the sale of debentures of sufficient amount to complete the Pictou railway will also engage the attention of our delegates."

☞ The Nova Scotia Gold Mines for the quarter ending March 31, yielded 5102 ounces, 11 dwts., 8 qrs., something above the yield of the corresponding quarter in 1864. The whole number of men employed was 580, and the total number of mines worked. 53.

Interest and Dividends.

The Directors of the Illinois Central Railroad Company have declared a dividend of 10 per cent. in scrip and 5 per cent. in cash, payable on the 1st of August. The books close on the 15th inst., and reopen August 3.

The Cleveland, Columbus and Cincinnati Railroad Company have declared a dividend of five per cent., payable August 1, free of U. S. tax.

The Minehill Railroad Company will pay a semi-annual dividend of 4 per cent., clear of tax, on and after the 13th inst.

The Lehigh and Luzerne Railroad Company has declared a dividend of 3½ per cent., payable on the 17th inst.

The Chestnut and Walnut street Passenger Railway Company a dividend of $2 25 per share.

The Second and Third street Passenger Railway Compnny a semi-annual dividend of 5 per cent., payable on demand, clear of taxes.

The Green and Coates streets Railway Company will pay a dividend of $1 per share, free of tax, on the 21st inst.

The West Philadelphia Passenger Railway Co., a semi-annual dividend of 5 per cent., clear of taxes, payable on the 21st inst.

The Metropolitan Insurance Company have declared an interest dividend of five per cent. on their old stock. They also pay interest from May 25 to July 1, on their new stock, which is all taken, and raises their capital to $1,000,000.

Maine Central Railroad.

The earnings of this road for the year ending May 31, 1865, were:

From passengers	$298,902 35
" freight	170,375 88
" express, mail, etc	20,316 79
	$489,595 02
And the expenses were	270,393 93
Leaving net earnings	$219,201 09

Compared with the previous year, the gross earnings show an increase of $87,570 76, with an increase in expenses of $59,096 30—making the increase in net earnings $28,474 46.

The Directors state that many things have contributed to make the past year a very hard one for the successful management of the road. The price of labor and materials largely advanced, and yet it was found impracticable to advance the rates of fare and freights to meet the increased expense of running the road. The company also suffered from destructive fires on the line of the road, destroying much fence, and other property to a pretty large amount. In view of all the extraordinary obstacles the road has had to contend with, the show of net earnings is very favorable.

Care has been taken, regardless of the usual prices of material and labor, to keep the road in a safe condition, and the rolling stock and depots in proper repair. Quite a number of new cars have been added and others extensively repaired and improved. New depot buildings at Auburn have also been built. Great diligence and active care has been exercised in the management of the road, to maintain such friendly relations with all, as the best interest of all demanded, and the Directors are happy to state that improved relations have been established between their company and the Portland and Kennebec road, which controls, also, the Somerset and Kennebec road.

Committees of the two companies, consisting of the President and Superintendent of each road, were authorized to make an effort to agree on a tariff of fares and freights at competing points, and after a friendly discussion of the conflicting interests of the companies, arranged that the Superintendents, Messrs. Noyes and Morse, should adjust the conflicting interests, and they soon agreed upon a tariff accordingly, and the roads have for several months been running agreeably to such arrangement.

The European and North American Railway Company is moving vigorously for the building and early completion of that great enterprise, in which this State is deeply interested. Massachusetts has shown an interest in that work, and a disposition to aid the company in its efforts. The Federal Government, no doubt, will, directly or indirectly, lend material aid, to hasten forward a work which partakes so largely of a National character. The Directors say, "The stockholders of the Maine Central road cannot be indifferent to the early and complete success of that line of road, connecting as it will with the Maine Central at Bangor. The amount of business it must bring to this road when completed will be very large; as a matter then, of direct interest, we are appealed to render every aid in our power."

About the same amount of repairs have been made upon cars and engines as in the previous year, in addition to which fifteen covered and fifteen platform merchandise cars have been built, and seventeen changed to cattle cars. 18 hand cars and one derrick car have been built, also one large derrick.

Number of miles run by passenger trains within the year, 77,607. By freight trains, 76,833. By all other trains, 17,128. Total miles, 171,568. Tons of freight carried, 73,197. No. of passengers transported, 173,442.

These are about $18,000 due from the United States Government for transportation of troops, but only so much of the same has been included in the earnings as has been audited for payment.

The assets and liabilities of the company are as follows:

Liabilities:	
Bills payable and accounts	$113,548 20
Interest due on bonds and coupons, outstanding	4,700 00
	$118,248 20
Assets:	
Bills receivable and accounts	$22,877 82
Cash	12,787 72
Wood on hand	36,273 79
Materials for repairs	38,456 46
	$109,895 79

The following gentlemen have been elected Directors for the current year:—Ex-Governor A. P. Morrill, R. B. Dunn, J. H. Drummond, E. T. Little, G. K. Jewett of Bangor, M. G. Palmer of Portland, and F. W. Hill of Exeter. At a meeting of the Directors, Ex-Governor Morrill was chosen President, and E. T. Little, Clerk.

The stockholders voted to change the time of the annual meeting to the last Wednesday in February.

☞ Richmond papers announce that the Orange and Alexandria Railroad is in working order as far as Culpepper Court-house, and trains run daily between that place and Richmond.

Virginia Railroads.

ALEXANDRIA, VA., July 7.—The railroads connecting with Alexandria are in a hopeful condition, and it is expected that communication direct with Richmond will be opened by next Monday week. The Orange road unites Alexandria with Lynchburg, and by means of its connections with the Central Railroad, with Richmond, Weldon, &c., and by the Virginia and Tennessee Railroad with Bristol, Knoxville, Memphis and the Mississippi River. At present the road is divided into two parts—first, that south of the Rappahannock in charge of the old company of which J. S. Barbour, Esq., is President, and H. W. Vandegrift, General Superintendent; second, that north of the Rappahannock, in the hands of Messrs. Jamieson & Quigley, agents of the Virginia board of public works. The southern portion and a part of the northern section is already in operation, and it will not be long before the whole is in good running order; when this is accomplished the Alexandria and Washington Railroad is ready to unite a large portion of the State of Virginia with Baltimore and the North, by its connection with the Baltimore and Ohio Railroad. Passengers and freight may then be carried straight through to Richmond, and easy access be had with the most productive and wealthy section of the State.

The Manassas Gap Railroad is in a dreadful condition. The track is entirely gone this side of Strasburg, though the road bed is in tolerable good order, with many of the sleepers and ties remaining. At latest accounts, however, it was stated that the people of the neighborhood were collecting these, and using them for fuel. Owing to a want of finances, the road is beyond resuscitation at present. The directors met a week since, and found that they could do nothing. It was once proposed to unite this road with the Baltimore and Ohio Railroad, by a branch from Winchester to Strasburg.

Southside Railroad.

We understand that President Byrd, of the Southside Railroad, is pushing forward his repairs with all possible despatch, and in a very short time will have a train running from the Junction to the High bridge, and another from the High bridge to Lynchburg, thus forming uninterrupted communication with Richmond and Lynchburg, save the little gap caused by the destruction of the bridge, connection will be made very rapidly by light wagons and good teams. The Orange and Alexandria Railroad is nearly completed. Cars run now beyond Manassas, and it is expected that within ten days trains will be running through to Gordonsville.—*Richmond Republic, July 6.*

☞ An informal meeting was held at the office of J. A. Walters, Esq., in this village, on the evening of the third inst., at which Gen. Curtenius was chairman, and C. E. Miller, secretary. After a full and free discussion of the subject it was resolved that the township of Kalamazoo would do her part toward raising local aid to secure the construction of the division of the Grand Rapids and Indiana railroad between this and the city of Grand Rapids; and a committee of citizens was appointed to visit Grand Rapids for the purpose of agreeing on a plan by which the two places may make a united effort to secure the construction of this part of the road.

The division extending southward to the Airline Railroad is assuming a favorable position. We are informed that the citizens of La Grange and Wolcottville have notified the President of the company, that each has made up the amount required of it—one $40,000, and the other $15,000—which is now ready to be delivered in good individual bonds.—*Kalamazoo Gazette.*

☞ A recent circular from the Comptroller of this State decides that "the capital of the national banks cannot be taxed; but each stockholder in such bank is to be taxed for the amount of his stock as so much personal property at the place where the bank is located. Each bank is required by law to keep a correct list of its stockholders, with the amount of stock held by them respectively, and to exhibit the same to any assessor when requested to do so."

☞ Great satisfaction is expressed at the recent decision of Judge Nelson, of the United States Circuit Court, against the application of the tax of one-twentieth of one per cent. on sales of stocks to sales made by brokers, or other persons for themselves. Any one can sell his own stocks free of tax, but if he employ a broker he must pay the duty of one-twentieth per cent.

☞ Monday, 10th inst., was the day appointed for the departure of the Great Eastern with the Atlantic Telegraph cable on board. It is expected that the Great Eastern will accomplish her voyage in about 14 days, landing the American end of the cable at Trinity Bay about the 24th of this month.

☞ The Illinois Central railroad company have declared the usual half-yearly cash dividend of 5 per cent. on the capital stock, and an extra scrip dividend of 10 per cent. out of the proceeds of land department, to represent an equal sum of cancelled land mortgage bonds paid off with the cash proceeds of land sales since the previous scrip dividend. The official announcement will be found in our advertising columns.

☞ The Pacific Railroad is extending eastward from the shores of the great ocean from which it receives its name as fast as enterprise, energy, money and the combined labor of two thousand five hundred able-bodied men can force it. The road bed is now being constructed through the mountains of Placer county, California, and the locomotive has already reached a point forty-three miles from Sacramento, which is one thousand eight hundred feet above the sea. By September 1 the rails will be laid to Illinoistown.

☞ The overland telegraph line from Russia to America purposes to charge forty dollars for twenty-five words from New York to London, against the Atlantic Telegraph Company's charges, of $100 for twenty words.

☞ Private advices from London state that Nova Scotia railway bonds are now at par and held firmly. Parties in England desirous of purchasing could not get them without an advance on £100 stg.

☞ The surveyors of the Nicaragua route, under Capt. West, arrived at Panama recently and go home on the steamer. They say very little about the result of the surveys. The harbor of San Juan, at last accounts, continued entirely blocked up.

☞ The Fredericksburg *Ledger* says that the Piedmont Railroad, running from Danville, Virginia, to Greensboro', North Carolina, and built during the late war, was taken possession of by the United States authorities on the 24th ult., it being reputed to have been the property of the late Confederate Government

☞ The Schuylkill Valley Railroad between Pottsville and Tamaqua—16 miles—has been completed, and passenger trains commenced running through on the 10th inst. This connection has long been needed, and will be mutually advantageous to Tamaqua and Pottsville.

☞ Wm. A. Crocker has been re-elected President of the Taunton Branch Railroad, A. E. Swasey, Superintendent, and E. Pickering, Treasurer. The earnings of the road for the past year were $110,364 62, and the expenses $86,306 19; net earnings $24,058 43. The total property of the corporation is $309,786 38.

☞ The Pennsylvania Railroad Company are about to extend their branch road which now terminates at the City Gas Works, where they deliver gas coal mined west of the Allegheny mountain, to a point lower down the Schuylkill river, where protroleum is to be shipped in large quantities. They are also preparing to build a branch road direct to the Delaware river, about two miles below the Navy Yard.

AND

AMERICAN STEEL,

54 William st., NEW YORK.

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,

STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, &c., can be obtained by mail or otherwise at our warehouse.

NEW YORK BELTING AND PACKING CO.,
JOHN H. CHEEVER, Treasurer,
Nos. 37 and 38 Park Row. New York.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, July 11, 1865.

AT A MEETING of the Board of Directors of this Company, held this day, it was

Resolved, That a DIVIDEND of FIVE PER CENT. in cash, free of Government tax, be paid on the 1st day of August next, to the holders of the full paid shares registered on the 15th day of July, and that the transfer books be closed on the said 15th day of July, and opened on the 3d day of August.

Resolved, That in pursuance of the measure recommended by the Shareholders' Meeting, held May 31st, 1865, and in order that the lands sold may be represented by a corresponding issue of Capital Stock, in accordance with the policy heretofore pursued by the Company in the issue of Canceled Bonds Scrip, the outstanding shares of this Company be increased by the issue of one share for every ten now outstanding, and the same be distributed to the holders of shares registered on the Company's books, on the first day of August next, in the proportion of one share for every ten held by them.

Resolved, That where, in the distribution of such shares, a stockholder would be entitled to a fraction of a share, the Company will retain the right to such fractional part at par. THOMAS E. WALKER, Treasurer.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY CO., PITTSBURG, June 23, 1865.

DIVIDENDS.—Notice is hereby given that the regular DIVIDEND of TWO AND ONE-HALF (2½) PER CENT. on the Capital Stock of this Company for the quarter ending June 30, inst., has been declared by the Board of Directors payable, free of Government tax, on and after July 17, prox.

The DIVIDEND of THREE AND ONE-HALF (3½) PER CENT. due October 1, 1865, on the Third Mortgage Bonds, has also been ordered paid in anticipation, less Government tax, on and after July 17, prox.

Shareholders and Bondholders registered at New York will receive their dividends at the agency of the Company, Messrs. WINSLOW, LANIER & CO., No. 52 Wall st., and those registered at Pittsburgh from the Treasurer at that city.

The Transfer Books will close June 30, and will reopen July 18, prox By order of the Board.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER, and MARBLE DUST, all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Plaster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms and Insurance when required.

Atlantic and Great Western Railway.

A crowded and influential meeting of bond and debenture holders of the Atlantic and Great Western Railway was held on the 15th of May, at the London Tavern, for the purpose of hearing from Mr. Kennard, the engineer in chief, a statement of the progress, position, and prospects of the railway now just completed.

The chair was taken by Sir Samuel Morton Peto, Bart., M. P. (chairman of the London Board of Directors,) who rose and said—Gentlemen, Mr. Kennard, the engineer in chief of the Atlantic and Great Western Railway, having arrived in England, after its completion, for the purpose of consulting with the capitalists associated together in connection with that enterprise, as to its connection with other companies, as to rolling stock and other particulars, it was considered a suitable opportunity to give the bondholders and shareholders in the undertaking a means of receiving from Mr. Kennard all the information which it was in his power to give. I propose not to occupy your time by any prefatory remarks of my own. I shall ask for Mr. Kennard's report to the Board of Directors to be read by Mr. Satterthwaite. After he has read that report Mr. Kennard will present himself to you, and I can only say that the more questions you ask him the better. The anxious desire of every one in connection with the undertaking is that the earliest information should be afforded, and that you should know as much as any of us know ourselves.

Mr. Satterthwaite then read the following report of Mr. Kennard to the Board of Directors:

To the Directors in London of the Atlantic and Great Western Railway:

GENTLEMEN:—I have the satisfaction to report the completion of the main line of the Atlantic and Great Western Railway, including the extension to Cleveland, the Western Coal-fields and Silver Creek branches, with all necessary stations, sidings, water-tanks, &c.

The total length of the Atlantic and Great Western Railway now completed is—Main line, Salamanca to Dayton, 386 miles; Cleveland Extension (broad gauge) 51; Western Coal-field Branch (Franklin to Oil City,) 32; Silver Creek (Coal Branch,) 6—total, 475 miles. Extensions partially constructed; Buffalo Extension, 70 miles; New Lisbon (Coal Branch,) 30; Erie and Niagara, Canada, 32—total, 132 miles. The company has also, under lease for 99 years, the Mahoning Railway, 81 miles—grand total, 688 miles.

The present position of the rolling stock is as follows:—Locomotives in use, 91; do. under construction, 35; passenger cars, 90 passengers each, 51; do. under construction, 40; baggage and mail cars, 16; freight cars, carrying 12 tons each, 2,566.

The engagement with the Erie Railway, to supply rolling stock to the extent of $5,000,000, for the purpose of the through traffic between New York and Cincinnati, is being faithfully and energetically fulfilled by that company.

The receipts from traffic upon the portion of the line in operation have been as under:—

Year.	Miles worked.	Av. receipts per month in dollars.	Per mile per week.	In sterling at 4s. to the dollar.
1862.....	60	$16,295	$68	£13 12 0
"	127	47,190	93	18 12 0
1863.....	127	57,566	113	22 12 0
"	227	86,177	95	19 0 0
"	252	154,179	153	30 12 0
1864.....	322	309,164	240	48 0 0
1865.....	322	399,581	310	62 0 0

The receipts per mile having doubled from January, 1864, to March, 1865.

The through freight and passenger traffic to Cincinnati will be partially opened during the present month, when about 184 miles additional will be brought into active operation. Occasional freight trains have been running to Dayton for some weeks.

The receipts, though derived almost exclusively from local sources, are greatly in excess of my original estimates, which were based on a traffic to be expected from the whole system; and experience shows that these results, although great beyond all expectation, must be considered only as a bare indication of the progress of the railway when completely developed.

In considering the present and future revenue of the railway I may here refer to the subject in which the bondholders are particularly interested, viz., the sufficiency of the revenue to meet the interest upon the various obligations of the company. The following statements cannot fail to convince you that the most abundant security exists for the payment of interest, and that a large surplus must remain for dividends on shares:—

1. For the purpose of comparing the net revenue with the amount due for interest to the bondholders I will take the bonded debt at £7,000 per mile, and the amount representing the portion of the line in operation at £2,254,000 the interest upon which is £157,780. The earnings for the month of March last, the latest month for which completed returns have been received, although they were injuriously affected by unprecedented floods, were $449,815, or in sterling at the present rate of exchange, say 3s. to the dollar, £809,640 per annum; and deducting 60 per cent. for all expenses, the surplus, after payment of interest upon the debts of that portion of the line in operation, amounts to £164,550 per annum.

2. It is clear, therefore, that the present revenue, although derived from little more than half the mileage of the railway, and without the advantage of the through traffic, is sufficient to pay the interest on the whole debt of the entire line, with a surplus exceeding £30,000 per annum.

3. On completion of the whole system of the railway, and taking the traffic per mile, only as actually existing in March—

688 miles will produce per annum	$11,537,944
Deduct working expenses 60 per cent.	$6,919,766
Rent of Mahoning line	286,000
	7,205,766
Net earnings per annum	$4,327,178
Which, at an exchange of 3s. 4d. to the dollar, is	£721,196
Or at the ordinary exchange of 4s. is...	865,435
Estimating that the bonded or preference debts on completion of the works will reach £5,500,000, the interest at 7 per cent. will absorb	£385,000
Leaving for dividends on shares at an exchange of 3s. 4d	£336,196
Leaving for dividends on shares at an exchange of 4s.	£480,435

The extraordinary progress of the traffic may very easily be accounted for by reference to the

map, which shows that the Atlantic and Great Western Railway occupies the most prominent position on the continent of America, affording an unbroken gauge of 1,200 miles through the wealthiest districts of the United States, from New York on the Atlantic, to Cincinnati on the Ohio, and St. Louis on the Mississippi, in the southwest, and to Cleveland on Lake Erie, in the northwest, embracing practically the whole traffic of the country, and making connections with the following important railways:—.

At Salamanca, with the Erie Railway; at Corry, with the Oil Creek Railway and the Philadelphia and Erie Railway; at Meadville, with the Franklin and Oil City Branch of the Atlantic and Great Western Railway; at Cleveland, with the Cleveland and Toledo Railway; at Greenville, with the Erie and Pittsburg Railway; at Ravenna, with the Cleveland and Pittsburg Railway; at Akron, with the Cleveland, Zanesville and Cincinnati Railway; at Mansfield, with the Pittsburg, Fort Wayne and Chicago Railway, and the Sandusky, Mansfield and Newark Railway; at Galion and Marion, with the Cleveland, Columbus and Cincinnati Railway, and the Bellefontaine Railway; at Urbana, with the Great Central Railway and the Sandusky, Dayton and Cincinnati Railway; at Springfield, with the Springfield and Columbus Railway, Springfield, Mount Vernon and Pittsburg Railway, and the Sandusky, Dayton and Cincinnati Railway; at Dayton, with the Dayton and Michigan Railway and the Indiana Central and Dayton and Western Railway; at Cincinnati, with the Ohio and Mississippi Railway, Indianapolis and Cincinnati Railway, Kentucky Central Railway, and the Louisville, Memphis, and New Orleans steamers.

One most important feature, in considering the future prospects of the railway, has yet to be referred to. It has not yet benefitted by the intercourse which, under ordinary circumstances, exists between the Northern and Southern States of America, and its geographical position is such that it cannot fail to derive immense benefit from the traffic which must inevitably arise upon the restoration of peace.

The works over the whole railway, on which the maximum gradient is 1 in 100, with extremely easy curves, and no tunnels, have been executed in the most substantial manner, including permanent way, ballasting and fencing. The rolling stock is first class in every respect.

The railway was constructed in three divisions, having separate organizations, rendered necessary in consequence of the line passing through three States, having distinct laws. Now that it is completed, it is obviously advantageous that the railway should be amalgamated into one system. The necessary legislative measures have been obtained, and an issue of consolidated mortgage bonds of the whole undertaking can now be made. This will enable the directors to call in, for exchange into such consolidated bonds, the various classes of securities which have been from time to time created. It will, of course, be at the option of the holders of the existing bonds to concur in this arrangement, but the value of the measure is so great, both as regards economy in the management of the company's affairs and the marketability of the stock, that it cannot fail to be generally acted on.

I have only to add that the administration of your property in America is concentrated in the hands of Mr. S. S. L'Hommedieu, President, and Mr. Daniel M'Laren, Superintendent. No gentlemen in America stand higher in public or private estimation, or have had larger experience in railway business. I am, gentlemen, most faithfully yours,

THOMAS W. KENNARD, Engineer in Chief.

Mr. Kennard came forward, the Chairman saying—I have the pleasure of introducing to you Mr. Kennard, and I beg that you will ask him all the questions which strike your own minds, and use the utmost freedom in doing so; but I hope you will bear in mind that it is advisable that only one person should do so at a time, the object being to give the largest possible amount of information.

Mr. Kennard then said—Gentlemen, in presenting myself before you to-day, I do not come to make a speech. I am here simply to explain what I have done on the other side of the water, to show you where your property is, and to give my views as to its value—views in which I think you will agree with me. Mr. Kennard referred to a large map of the United States, and pointed out the route of the line and the principal towns with which it was connected, forming the most important grain growing and general agricultural districts of the continent. A person starting for New York, from any part of the Western States, must come over our railway or cross it. If he comes from Chicago, he may come by Mansfield or Cleveland; at either point he must strike the Atlantic and Great Western. You thus perceive that our railway connects and represents the most prominent position on the continent. Now, gentlemen, when I was called upon in the first instance to report on the Atlantic and Great Western Railway I went out perfectly determined to look at it in the most impartial way possible, and I was very careful not to make any statement which could in any way be considered an exaggeration. The first thing I did was to go over the country and see whether the representations that were made were correct, as to certain statements particularly. Therefore I went over the entire length of the line, and I saw that the statements which had been made were correct. I took upon myself to travel over all the railways of America bearing on the question. I then made myself acquainted with the amount of traffic which existed at that time in America, going east and west, and found that it amounted to a certain fixed sum per annum, which I put into sterling, and I said to myself, "If there exists at the present moment such an amount of traffic going east and west over these three lines, which then existed, if we should make another line which is more desirable in itself than any of these routes, at any rate we should get a fair share of the traffic." That, gentlemen, I put into figures, and I found that if our route, on completion, should derive its fair share only of the traffic which existed, the receipts per mile per week would be $200, or £40 per mile per week. That, gentlemen, is a pretty good traffic on a line of English railway; therefore I looked upon the thing as a sound enterprise, and I recommended it to my friends. I then started to work, and we built this road section by section. The first point of importance that we struck was called Corry. It was just at that point, and about that time, that the Pennsylvania oil region had been discovered; therefore I was particularly anxious to complete the line to Corry, because there we should intercept a large amount of the oil traffic. On completing the route to Corry we did get that oil traffic, and the receipts of the road came above my estimate. Having thus, gentlemen, proved one fact, we thought we would proceed further in the construction of the road towards the west. But I reported to Mr. M'Henry in England, and to other friends, that they must not be disappointed if they found that the receipts per mile per week on the section we then undertook should not be equal to the receipts on the first 60 miles, seeing that we had struck an unusual source of traffic in the oil. The next point we struck was Meadville, which is a small town of about 6,000 or 7,000 inhabitants in the State of Pennsylvania, where there was nothing particularly going on, and where there was no railway communication. It was merely a local town, and the centre of a district. But we found that no sooner did we open the line to that point than, so far from the traffic falling off, it actually increased. I don't know how it was, or where they came from, but the people began to travel, and the receipts—instead of being, as I expected, less—were more. Then we found on pushing on a few months afterwards, and forming a connection at Warren with a road called the Mahoning and Cleveland Railroad, a very important traffic. This road is principally used as a mineral line; and though there was a break of gauge it was still a very important point for us to reach, because it enabled us to form a connection with Cleveland, which is a most important feature in the railway system of that section of America. No sooner did we form a connection with that line than we found an immediate expansion of our receipts per mile. When I wrote to Mr. M'Henry about the traffic which we might expect on communicating with Cleveland, I said I thought we must get $30,000 per week. In the second week in March, we actually received $133,000 practically speaking on that mileage; so that you will see that my modest estimates were very much below the mark. That is the division we have been working now for about a year, from Salamanca to Akron and Cleveland. I should also mention that it was most important that we should throw our broad gauge into Cleveland; and therefore, after a considerable amount of negotiation with other railways, I succeeded in carrying my point, and threw the broad gauge into Cleveland, which again increased our receipts very much. The line would have been opened to Cincinnati several months since, but for an unfortunate fire which occurred at the works at Troy, where we were getting our passenger cars built. Thirty cars which we ought to have received in May, 1864, were destroyed, and the labor of the country being entirely absorbed in the war, I found it impossible to make contracts elsewhere, therefore it involved my engaging works, getting hands, and going in ourselves to build passenger cars. It is a very difficult thing, however, to find labor in America, and as a consequence there has been great delay. We have now just succeeded in getting enough cars to run one train for passengers to Cincinnati, and that only a mail train. But so great is the value of the passenger traffic that the last thing our superintendent told me was this, that for every passenger car put on the road he would undertake out of its earnings to pay in 30 days. These cars cost $7,000, so that you will see his ideas of traffic are very large.

I wish now to explain a question which has been named in my report, about the results of peace. You will perceive that we have certain fixed points on the Atlantic Central Railway, such as Cincinnati, Cleveland, and St. Louis. The ordinary route of travel of people from the South during the time of peace and tranquility is to the North, and Cincinnati was the chief point to which they made. Therefore, if our line is as satisfactory for passenger travel and freight from Cincinnati as other routes are, we shall get our fair proportion of the Southern business. When I tell you that the presidents of other lines come to us and say that if they go to New York, they and their families, they certainly should go by our line, you may well conceive that the general traveling public will do the same. They will be of that opinion, because in traveling by our line from Cincinnati you must take into consideration that there will be no delays such as occur on some of the other lines; therefore the majority of people will take our route. I should like to say a few words about the traffic which exists on these roads. The through business at present is principally done by the Lake Shore road—this line follows the shore of Lake Erie. It is rather a difficult thing for me to tell the exact amount of profits which that line makes, but I think—and gentlemen in this room will bear me out when I tell you—that the profits on that line are 30 per cent. per annum. That line is in close connection with the Cleveland, Columbus and Cincinnati, the dividends on which amount to 24 per cent. per annum. The mileage receipts on the Pennsylvania Central are in excess of either of these; but being a more expensive line to build, the remuneration to the shareholders is not so large. So also with the Baltimore and Ohio. We see, therefore, gentlemen, in looking at the question in all its bearings, that our route is certainly not less advantageously circumstanced than others which I have pointed out to you are the most profitable lines in the United States, all constructed at a greater cost than our own. All these lines have to come

to our railway to get their coals and a large proportion of their traffic practically comes from us, for we run through the coal regions, and they do not. The coal trade is a very important traffic in America, and one of the most profitable roads in America, the Reading Railway, is exclusively a coal line. It runs or rather carries the coal an average distance of 95 miles, and the profits are about $500 per train.

We have hardly commenced the coal carrying business on the Atlantic and Great Western, for we have found it impossible to obtain the necessary rolling stock; but, so far as I can make out from figures, our traffic equals a profit of $1,300 a train as against $500 on the Reading railway. Cleveland is a great centre as a seaport, or rather as a lake port, on the great interior waters of America. From Cleveland the coals are taken to Canada and to all points on Lake Erie and Lake Michigan, and this vast interior water communication opens an enormous district for the consumption of the coals of this region. You will easily see that this is a traffic which must last for all time, and for which no one can compete to take it away from us. I will now call your attention to the extensions which have been partially constructed. First, the extension to Buffalo, and the importance of that extension to the Atlantic and Great Western will be apparent when I explain the facts. Buffalo is a most important town in the United States. In the first place it is at the end of the Erie Canal, and at present it is not supplied with coal, the nearest coal-field being situate at a very considerable distance. It is contended by the citizens of Buffalo that on the completion of the route 500,000 tons of coal per annum will come over it; consequently, it will pay remarkably well simply as a coal route, whether connected with the Atlantic and Great Western Railway or not. But you will see the important bearing which it has on the Atlantic and Great Western from the circumstance that all who have to travel from Cincinnati to Canada must naturally go in the new direction, and you must bear in mind that one of the greatest objects of interest—the Niagara Falls—is immediately on the right, so that you could throw a biscuit from the Erie and Niagara Railway into the falls. There used before the war to be an enormous traffic to the Niagara Falls, because the Southern gentlemen used to go there annually and spend a very considerable time. There is every hope that the traffic will now be re-established, and that will be a very important point, because, if so, we shall not only get the traffic upon that short extension, but upon the entire length of the Atlantic and Great Western Railway. The other extensions I refer to are the Buffalo and Erie, and the New Lisbon Extension, which latter is an extension about 32 miles in length, and the object of constructing it is to increase the coal business. It runs through a great coal district, and I have no doubt will add largely to the general traffic on the line. The Erie Railway Company have acted towards us in a very much better spirit than it did at one time. I have reason to believe that they are now beginning to see the importance of the Atlantic and Great Western and that it is necessary that they should look out. The traffic at this moment upon the Erie Railway, since the construction of our line, is enormous, being $600 per week, which is double the estimate that I made as the earnings of our own, so that I think that estimate will be much within the mark. It must be apparent to all that when the line is finished, there can be no reason why the receipts of the Atlantic and Great Western Railway Company should not at any rate equal those of the Erie Company. If any gentleman wishes to ask any questions, I can assure him that I shall be most happy to answer him to the full extent of my power.

A Bondholder.—I observe you anticipate a large increase of traffic on the termination of the war. I wish to know whether it is or not the fact that, upon the close of the war, we shall not rather lose a large portion of the traffic occasioned by the conveyance of the munitions of war and he passage of troops? Another point upon which I wish to be informed is this:—the report states that a large surplus exists from revenue after payment of the interest upon the bonds, and I should like to know how that surplus has been disposed of?

Mr. Kennard—In answer to the first question I may say that it being apparent to all that as our route was not a finished through line, we could not secure any portion of the Government traffic; consequently, the traffic has not been swelled by the conveyance of any military stores whatever. I have been trying very much to get that traffic on the road, but I have never succeeded. With reference to the second question it is as I understand in what way the surplus, after the payment of the working expenses, and interest on the bonded debt, has been disposed of. I can answer that question by simply stating that during the period of time that our road has been under construction the exchange has been very much against the remittance of money from America to England; consequently, after having made provision for the payment of the interest, we have used the surplus in construction, in consequence of which the cost of the line has been so much less than it would otherwise have been. It has been a subject of consideration whether we should or should not send the money direct to England; and after a very full discussion of the whole subject it was determined that it was far better to use the money than to send it to England and then get it back again.

Mr. W. A. Thompson, of Buffalo, said that in his opinion there were some points in reference to this undertaking which the report does not very fully put forward. He had given a good deal of attention to the subject of this railway for some years past, and being much interested in the Erie and Niagara Railway, his connection with that gave him a general interest like the rest of the bondholders, and he was perfectly satisfied that the traffic which would be brought on this line would not only be very large, but that it would be of a most permanent character. With respect to the traffic from Cincinnati, he was fully able to endorse what Mr. Kennard had said. The population of that district, particularly that of the State of Ohio, was one of the best populations in America. The large number of towns which are already growing up on the length of the Atlantic and Great Western Railway showed the advantage which the people expected to derive from it. He had several influential friends who assured him that the traffic upon the road must increase progressively, and that it would become one of the very best lines in America. If Mr. Kennard had put the traffic on the Buffalo branch at 1,500,000 instead of 500,000 tons, he would, in his opinion, have come nearer the mark. It was notorious that the railways in that district were clogged with freight, the whole of which would be brought to Buffalo, and swept up by the Atlantic and Great Western, which on any account cannot fail to be one of the most profitable lines in the country.

Mr. Robinson inquired whether it was not a fact that the company had already more traffic offered to it than it was able to carry.

Mr. Kennard—I could answer that by producing letters upon the subject, but it is sufficient to say that last winter we could not carry one-fifth of the traffic which was offered to us. At present we are obligedto put advertisements in the papers stating that it is utterly impossible for us to receive the freight offered us. This, of course, will not be the case after we have had a little time to organize; but with respect to the question of freight, I may mention that not long ago the president of one railway wrote to another, not thinking that it would come to my notice, to the effect that he thought that the only way to get the traffic carried would be to put 10,000 tons of freight on the Atlantic and Great Western platforms, and to thunder at the doors till they carried it; and then perhaps the noise of that thunder would come across the Atlantic, and people here would see the importance of providing more rolling stock to convey it.

The Chairman—We have present Mr. Evans, one of the directors of the Erie Railway, who, I think, will be able to give us some very valuable information, and perhaps the meeting would be glad to hear him.

Mr. Evans said: Nothing can be more natural than that a director of the Erie Railway Company should try and do everything he can to support the Atlantic and Great Western, for that railway is really an extension and a more valuable aid or adjunct, or whatever you like to term it, to the railway of which I have the honor to be a director. I remember that when I had occasion to go to America in 1858 I had the good fortune to meet with one of the ablest and at the same time one of the finest minded men that I have been privileged to know—I mean Mr. Marsh, who is one of the trustees of the bonds of your railway, and in the course of conversation with me with reference to the important results which would be derived by the extension of the Erie Railway, he pointed out the route now occupied by the Atlantic and Great Western line, and said, if ever that line is completed, not only will it be a great profit and advantage to the Erie Railway, but it will become a most profitable investment for those who take a part in the undertaking. All persons agreed in the opinion that if the Atlantic and Great Western was made it would be one of the most prosperous undertakings ever established in America. The line would get a large share of the traffic of the Lake Shore Railway, and would have the advantage of running through the coal and iron and oil districts of which we have heard so much, and which advantages cannot be exaggerated when we are made aware of the fact that the oil traffic alone in that district is in amount equal to the whole value of the cotton crop 25 years ago. The Lake Shore Railway felt very safe, and happy, and comfortable, until our friends, Mr. M'Henry and Mr. Kennard came and dispelled their dreams. I am an old railway director, and have been for many years engaged as a railway director in England and Ireland, and I apply the ordinary tests of railway working, and estimate the advantages of this railway. First, taking the English railways into consideration, I find, without troubling you with statistics, that the expenses are three times as great as those upon the Atlantic and Great Western line. I happen to know that Mr. L'Hommedieu, our manager in America, is a man in whom you can repose entire confidence. I sincerely congratulate the bondholders and shareholders on the success of the undertaking, which I am satisfied will realise the most sanguine expectations which may have been formed with respect to it.

The Chairman said: You are aware, gentlemen, that this is a mere informal meeting to give information, and that there is no resolution to propose to you; but if you should like to ask any question which I can answer I shall be most happy to do so. If not, gentlemen, I have merely to call your attention to one or two points in the report, which I think particularly worthy of your attention. In the first place I wish to call your attention to the fact that at the present moment the bonded debt of the company is secured by its present receipts. I wish to point out in the next place that the report shows that, taking only the receipts at the present time arising from the local traffic only, and at present exchange, if extended over the the whole line, will give a surplus at the normal rate of exchange of £450,000, or at the present exceptional rate of exchange of £320,000 beyond the bond debt of the company. I have been asked by some of the large capitalists to take the presidency of the London board of direction, it being felt that it was absolutely necessary when so much capital was held here that there should be a representative action also—that we should not, however much confidence we might have in Mr. L'Hommedieu and the directors on the other side of the water, have entire dependence in their sole management, without the supervision of gentlemen residing here. I have accepted that office, but nothing would have induced me to do that without having first by a rigid examination of the position of the company satisfied myself that the bondholders were in a state of perfect security. I made it a condition of my acceptance that from

the time I took office that not a shilling from the receipts of the revenue of the road should be applied to its construction or in any other way than being transmitted direct to the three trustees of the bondholders. That condition has been acquiesced in, for it was felt that my request was a right one. It may be said that the rate of exchange, may be against such a thing being done at times. I cannot help the rates of exchange. I made a rigid determination that my rule of action should be that all money earned upon that road be remitted to the Trustees, Mr. Gurney, Mr. Mozeley, and Mr. Kennard, and the amount so received be notified in the public journals. I think you will feel that in taking this course I am doing that which is due to myself as a man of business and also to your interests. Another thing which I have to say is this. You know that I am a candidate for the representation of Bristol, and the moment that election is ove I intend to go to America myself; and, instead of taking my autumnal recreation in the Highlands of Scotland, I intend to spend the whole of that time upon your road. I cannot give you a better proof of the interest I take in the enterprise. I think I omitted to mention one circumstance connected with the position of the debenture-holders of this railway. They are, as you are aware, entitled to be paid off in full at the end of three years. I wish to explain that, on giving six months' notice before the expiry of the term, they will receive the full amount in cash, or, if they prefer it, they may receive in exchange for their present debentures the consolidated bonds, secured on the mortgage of the railway, having 20 years to run.

Mr. EVANS then proposed a vote of thanks to the chairman, which was carried by acclamation; and a similar compliment to Mr. Kennard and Mr. M'Henry closed the proceedings.

Mississippi and Missouri Railroad.

A statement has been printed for private circulation, of the bonded debt, past due coupons, convertible scrip, and interest due thereon, to July 1, 1865, of the Mississippi and Missouri Railroad Company, as shown by the books of the company in the Treasurer's office at New York. The figures are:

Of land grant mortgage	$3,612,000
Accrued interest to July 1	162,914
Prior mortg's and interest on 1st Div.	1,672,490
Second land grant	691,000
Oscaloosa first mortgage	688,556
Income bonds	253,300
Overdue coupons, &c	64,992
Total	$7,145,252
Other liabilities	118,000
Capital stock	3,452,300
Total present cost	$10,715,552

The gross traffic of the road—only partially completed—of 1864, was $403,209. For five months of 1865, $282,498. No sales of lands from the original Government Grant have yet been reported. About a million of dollars of the Land Grant Mortgage Bonds are in pledge to the Chicago and Rock Island Railroad Company, as security for the advance of $500,000 to the Road.

☞ An important decision has been rendered by the Supreme Court of New York in the case of Wilkins *vs.* Earle. The latter was proprietor of Earle's Hotel, New York City, and some time ago the plaintiff, Wilkins, put up there, as a transient guest, having with him the sum of $25,000. Seeing the usual hotel notices posted in his room, in regard to depositing money and valuables in the office safe, Wilkins took it there and delivered it to the clerk. When he called for it a day or two after, it was gone, and he has never obtained any portion of it. He thereupon brought an action to recover the whole amount of Mr. Earle. The case was tried before a jury, who found that plaintiff was entitled to recover $25,000. Defendant took an appeal to the General Term, and that Court has now reduced the amount to $1,000, on the ground that the last named sum was a reasonable amount for traveling expenses. The case is regarded as important, inasmuch as it defines the rights and liabilities of inn keepers under the statute of New York State.

Cincinnati, Hamilton and Dayton Railroad.

The income and expenses of this company for the years ending March 31, 1864 and 1865, were as follows:

Income:	1864.	1865.
From passengers	$457,162 85	$546,810 15
" freight	526,758 46	614,944 53
" mails and express	56,115 94	47,421 12
" rent of track, etc.	28,923 07	27,628 90
" " real estate	3,645 52	2,609 66
" interest, etc	10,722 63	2,442 35
	$1,083,328 47	$1,241,856 71
Expenses:		
Repairs of road	$71,649 50	$149,299 41
" bridges	6,805 80	3,770 68
" buildings, etc.	18,509 72	20,274 86
Passenger expenses	144,287 15	133,907 73
Freight "	199,139 14	191,889 31
Other trains "	11,429 21	19,360 51
Station "	12,620 05	101,332 08
Office "	15,506 11	23,724 80
Shop, etc. "	17,721 33	47,794 95
Watching bridges	6,100 40	6,472 49
Rent of D., X. & B. R.R.	10,725 00	10,725 00
Paid on account of collision, Jan. 5, 1864	17,432 18	.....
Miscellaneous	22,581 53	30,077 10
	$554,507 12	$738,628 92
Balance of earnings	$528,821 35	$503,227 79
From which deduct—		
Interest on bonds	$112,169 75	
Taxes—State	25,908 84	
" United States	29,453 45	
" on manufactures	2,993 85	
Insurance	4,074 00	
Paid on account of collision Jan. 5, 1864	26,138 54	
Fairmount land damage case	7,905 52	
Sewerage, etc., in Cincinnati	17,198 01	
		225,841 96
Net income for the year		$277,385 83
Dividend, Nov. 1, 1864, 5 per cent., and government tax on $25,000 shares	$131,578 94	
Dividend, May 15, 1865, 4 per cent., and government tax on 30,000 shares	126,315 78	
		257,894 72
Leaving a surplus of		$19,491 11
The amount to credit of surplus account, March 31, 1864		384,517 48
Add amount of coupons received from the Dayton and Michigan R. R. Co., as per contract of lease, since converted into a 3d mort. bond on that road		594,125 00
		$998,133 59
Deduct stock dividend of 20 per cent., Nov. 1, 1864		500,000 00
Leaving to credit of surplus account March 31, 1865		$498,133 59

Which amount, in part, with proceeds of bonds, as above, has been used in construction of the broad gauge track, new depots, equipment, real estate and other improvements.

The gross earnings for thirteen years ending March 31, 1865, have been as follows:

1853	$321,793 17	1860	$561,681 52
1854	463,021 45	1861	615,071 07
1855	483,629 48	1862	646,205 67
1856	471,885 70	1863	877,403 86
1857	518,333 95	1864	1,083,328 47
1858	487,421 27	1865	1,241,856 71
1859	489,437 92		

The earnings of the past show an increase over those of the preceding year of $158,528 24. The operation expenses also an increase of $184,121 80. The entire expenditures, including interest, taxes, etc., were $964,470 80. The balance of income after deducting all expenditures was $277,385 83. The gross earnings of the road per mile were $20,697 61, against $18,055 48 in 1863–'64. The per centage operating expenses was 59.59 per cent. The number of passengers carried during the year was 542,539, against 527,451, the previous year—an increase of 15,088. The President in his report, says:

It will be seen that the per centage of transportation expenses has been somewhat increased. This has been owing to the increase in the cost of labor and material, and to the fact that the rates charged for service by the company have not been correspondingly advanced.

The condition of the road, with its equipment, is better now than it was at the time of your last annual meeting; and it has been operated for the past year with entire freedom from accident to passengers, and with but little damage to property. The same may be said in reference to the Dayton and Michigan road, operated by this company under perpetual lease.

During the past year a passenger depot has been completed in Cincinnati, at a cost of one hundred and thirty-six thousand dollars. This building will compare favorably with the best in our country, and was a necessity.

There has also been completed, in Cincinnati, an additional freight depot, extending nearly from Fifth to Sixth streets, 66 by 440 feet, three stories high. The two upper stories are rented to commission merchants, who receive freights brought over the road which are not removed by consignees within the time allowed. These buildings have been charged to construction account.

The company have found it necessary, during the past year, to purchase additional real estate contiguous to their depot grounds in Cincinnati, for the purpose of accommodating the increasing traffic of the road. This was done in accordance with the recommendation of stockholders at their last annual meeting.

The amount expended in building the broad gauge track, and in providing additional depot facilities for the business to be derived from the Atlantic and Great Western, and from other connecting roads, has been largely in excess of what was at first expected, owing principally to the increased price of labor and material. The amount expended reaches nearly one and a half million of dollars. Thus far our company has derived but little advantage from this expenditure, the Atlantic and Great Western road not having been opened to Cincinnati for both passenger and freight business until the 8th day of the present May. It is confidently anticipated that from this time forward the Atlantic and Great Western road will make our investment remunerative.

To meet the expenditure of so large an amount as required for the construction of the Atlantic and Great Western broad gauge track, and for additional depot grounds and depots, with increased equipment, this company has disposed of $300,000 of its second mortgage bonds, and $344,000 of its capital stock. The remainder of the means has chiefly been derived from the sale of bonds, received from the Dayton and Michigan Company

in payment of their coupons due this company, under the lease of that road. It will, therefore, be seen that whilst the sum of nearly one and a half millions of dollars has been expended, the capital stock and bonds, including the stock dividend to stockholders of $500,000 has only increased $1,144,000.

The earnings of the Dayton and Michigan road have exceeded the estimate of one million dollars for the past year by $69,186 97. After payment of transportation expenses, interest on bonds, taxes and insurance, there was left a profit of $120,204 45. This amount has been expended in the permanent improvement of the road, and in retiring $62,000 of their bonds, under the provisions of the mortgage creating the sinking fund of the company.

The contract between the Cincinnati, Hamilton and Dayton, and the Little Miami and Columbus and Xenia companies has been in operation five years, and has proved beneficial to the several parties. Our relations with all other railroad companies continue satisfactory.

The balance to credit of Dayton and Michigan Railroad March 31, 1864, was $13,804 60. The receipts from operation of the road during the year have been $1,069,186 97—making a total of $1,082,992 57. The expenditures were: operating expenses, renewals, mileage and use of machinery, $664,239 22; interest, taxes, etc., $284,743 30; construction, equipment, real estate, etc., $97,012 21; trustee sinking fund, $60,000; Town of Perrysburg bonds, $13,000—total, $1,118,994 73; leaving balance due C., H. and D. lessees, March 31, 1865, $36,002 16.

President.—S. S. L'HOMMEDIEU, Cincinnati.

Vice President.—JOHN W. HARTWELL, Cincinnati.

Directors.—John W. Ellis, John Young, Geo. H. Hill, William Beckett, George T. Stedman, William Goodman, A. M. Searles.

Secretary and Treasurer.—FREDERICK H. SHORT.

General Superintendent.—DANIEL MCLAREN.

Ass't Superintendent.—LEWIS WILLIAMS.

Dayton and Michigan Railroad.

The income of this company, for the fiscal year ending March 31, 1865, was as follows:

From passengers		$356,825 11
" freight		658,101 56
" mails and express		51,291 22
" rents, &c		2,969 08
		$1,069,186 97
Operating expenses, viz:		
Machine shop	$17,214 68	
Maintenance of way	156,327 76	
Locomotive power	162,551 57	
Train expenses	156,925 79	
Station "	69,142 57	
Office "	30,820 71	
Rents to other roads	8,158 32	
Mileage of cars & mach'ry	15,588 88	
Miscellaneous expenses	20,476 45	
		637,206 73
		$431,980 24
Applied as follows:		
Interest on bonds	$252,813 73	
General interest account	2,029 97	
Taxes, State	19,600 30	
" National	27,168 38	
Insurance	2,816 00	
Filling trestle work at Sidney	14,681 04	
Renewals and extraordinary expenses	31,150 35	
		350,159 77
Leaving as net earnings		$81,820 47
Add increase of 2d mort. bonds	$50,000 00	
Less amount in hands of trustee	31,000 00	
		19,000 00
Makes		$100,820 47

This amount with other assets of the company have been applied as follows:

To equipment	$52,220 00
Construction	10,590 45
Right of way	2,273 80
Real estate	10,854 91
Toledo depot improvements	15,540 34
Town of Perrysburg bonds	13,000 00
	$104,379 50

The first mortgage bonds have been reduced $17,000 by exchange for same amount of second mortgage bonds due in 1881, $300,000 of which have been set apart for that purpose, and the interest thereon being guaranteed by the Cincinnati, Hamilton and Dayton Railroad Company as lessees, makes them a first class security. Parties holding the first mortgage and wishing to make the exchange can do so on application to Joseph C. Butler, Trustee, at Cincinnati, or to the Secretary of the company.

The second mortgage bonds have been increased $50,000, as follows:

Exchanged for first mortgage bonds	$17,000 00
" funded interest	5,000 00
Amount sold	43,000 00
Amount placed in trust to redeem balance of funded interest bonds and past due coupons of first mortgage previous to lease of road	47,000 00
	$112,000 00
Less amount cancelled by trustee of sinking fund	62,000 00
Increase	$50,000 00

At the last annual meeting it was resolved to fund the unpaid coupons of the second mortgage, due prior to the lease—amounting with interest to about $650,000—by the issue of a third mortgage. This has been done to the amount of $642,000 and the amount before stated will cover those outstanding.

The Toledo depot bonds have been increased $90,500, by the purchase of additional grounds for depot purposes, which gives the company a front on the Bayou of about 2,600 feet and adds a value to the road far beyond the amount invested.

The funded interest bonds have been decreased $1,260, as follows:

Exchanged for first mortgage bonds	$5,000 00
Less amount of coupons on 1st mortgage funded	3,740 00
Decrease	$1,260 00

The capital stock (new) has been increased by exchange of old stock and interest on same and capital paid in $142,281 12.

The gross receipts of the road for the past four years have been as follows:

Year ending March 31, 1862	$400,168 37
" " 31, 1863	663,705 55
" " 31, 1864	768,246 20
" " 31, 1865	1,069,186 97

BALANCE SHEET.

Saturday, July 22, 1865.

Stock Exchange and Money Market.

At the close of the last week the Stock Market was strong, and Government securities were also in good demand, generally, notwithstanding the usual variations of the hour had a fractional effect, dependent on the feelings of the moment, and the caprices of the street. One or two per cent., or even a half per cent., is a great object with the operators; but these fluctuations actually prove nothing but the temper of the hour, and have no real relation to the values of the securities themselves. So that the political economist must look at the tendency of the current rather than the ripples on the surface. Money continues abundant at low rates, as might be expected from the large amounts necessarily disengaged from their former channels of employment, and from the volume still floating in the country in the shape of paper. This is a state of things at present without any remedy, and must remain so until we know the future policy of the Government to be determined by the balance struck by the Secretary of the Treasury, and the actual extent of the retrenchment effected by the Departments of the Navy and Army. We know that the President is determined to practice the greatest economy, and to bring the expenditures of the Government to the smallest dimensions practicable. The school in which he was trained was an economical one, and he understands its requirements. Too many of our statesmen in their desire for "splendid Government," have overlooked the necessity of economy in their desire to be brilliant; but the President has seen the rough side of public events, has learned the pressure of public burdens upon States, and the distress of the financial mistakes of public men. We may therefore feel assured that it will be only a natural disposition in him to retrench, and to contract our National expenditures. This is the character of the man, and it is adapted to the emergency. We may therfore count upon it, as a favorable circumstance in the financial prospects of the country.

It is asserted that the aggregate of the National debt is yet likely to prove as large as four or five thousand millions. We are not of that opinion; for if it were so, our former Secretaries of the Treasury must have been not only much in the dark, but have not acted with the intelligence and watchfulness demanded by their official position. How a thousand millions could be added to the sums already officially stated, without any conception of its probabilities, or the smallest anticipation of it, surpasses all understanding. When the careful, practical, and experienced Mr. McCulloch announces the fact, and lets us know how this monstrous discrepancy has arisen, we shall believe it, but not before. The present announcement comes from the same quarter from which came the cry of "specie bankruptcy," and the inaccuracies as to the annual receipts of gold into the country; and who do not seem to know that our specie reserves are larger now than they were before the war, and that our exports of the article have largely declined. We really must doubt all predictions or calculations from any such source at present.

The late decline in our 5-20s in London, while they are steady on the Continent, have given the Wall street operators a temporary opportunity to put gold up beyond the old rates. We foretold our readers that this game would be played by these people, both here and in London; and it is evidently begun. When the Frankfort market is steady and unmoved, the London Bourse is authority enough for our bulls and bears with British connections to guide them; when that kind of "wind blows, the cradle will rock," and that is all they care about. One absolute proof of the existence of this stock jobbing arrangement, is the low price of exchange. This has generally been below par for a long time past, and was again so last week, and dull of sale. If our commercial indebtedness abroad amounted to anything considerable or embarrassing, exchange, which is gold in one shape, would show it at once; but it indicates nothing at all of that sort, and therefor

it is a legitimate conclusion, that as regards our commercial relations abroad they are in a perfectly sound condition.

It is also to be remarked that the estimates of a considerable amount of cotton on hand, are being verified. Thirteen thousand bales have been added the past week to the stock previously received, and it is also ascertained that in Texas there is a large amount yet in hand; and that in North Alabama, which has always cherished a love for the Union, in contrast to the Southern portion of the State, has kept at work, and is actually raising a larger crop than ever before, by means of the paid and voluntary labor of the freedmen. We look therefore with certainty to an early resumption of the old cotton production of the South; and the sooner the cotton states fall into line, stop listening to the discontented leaders, who overthrown in the field, hope to rise by agitation that shall assume only the form of political opinion, the sooner will the people there recover from the effects of their great folly, and the misery they have brought on themselves.

The recent convention held at Detroit, and very largely attended by representative delegations from the various boards of Trade and Chambers of Commerce in the Northern and Western States, and the British North American Provinces, adjourned after a session of nearly four days, having pronounced its opinions on several important subjects connected with transit, commerce and finance. The official accounts of its proceedings made by the newspaper reporters, of whom there was a large number present, give no idea of the real state of the proceedings, beyond what appears on the face of them. It was very soon apparent to a close observer, that behind the question of reciprocity there lay many local questions of far more interest to some parties present, than any general and national one. The connection of the Mississippi with the Lakes by the Illinois Canal, was one; the Niagara Falls ship canal was another; the reduction of canal tolls and railroad charges was another; and the delegations did not hesitate to chaffer with each other for places on committees in order to secure favorable reports. Several times the convention was in the wildest disorder, the presiding officer was grossly insulted, and the Chicago delegation was at one time about to withdraw. But as all the various projects were finally adopted with the salient points rounded off, the whole were swallowed down. Chicago became pacified; Milwaukee withdrew its frowns; Oswego and Buffalo shook hands; and peace and harmony were restored. The reciprocity question was ably discussed in committee, which also acting on the compromise plan, approving the action of the Government in giving the notice, and then asking it to make a new treaty including the states and colonies on the Pacific coast; thus making the new arrangement wider than the old! The facts, the arrangements, the ability were all on the side of the *Reciprocals*, and never was a man more completely overthrown than ex-Vice-President Hamlin and another old fashioned lawyer from Maine, who were specially sent from Bangor, to protect the lumber speculators from Canadian competition. The great speech of Mr. Howe, of New Foundland, followed up the crushing arguments of the friends of the treaty who preceded him; and when the vote was taken on the adoption of the report of the committee, which it was supposed in the morning would be a very doubtful one, if not one decidedly opposed to the treaty, it turned out to be unanimous, in favor of a new one. Such a complete and sudden change of front was never before witnessed in a large deliberative assembly.

Another very important subject came up at the close of the session, and Mr. Bloodgood, of this city, not having time to make his remarks thereon, was given permission to print them as his speech, and have them adopted as a part of the proceedings. They referred to the construction of the ship canal between the St. Lawrence and the Hudson; a plan we have often, in the interest of the Great West, advocated in the JOURNAL. The remarks which were published in full in the Detroit papers, gave the history of the project; fully explains the result of the surveys; the probable cost; and shows that it will, by its construction, be the cheapest route to New York from the Lakes. Next to reciprocity it was the most important subject brought before the convention. We understand that it is the intention of the author to have these remarks re-published in pamphlet form for general circulation.

The aggregate amount of exports (exclusive of specie) for the week ending July 17th was $2,847,757, against $7,879,920 the same week in 1864, and $2,281,885 in 1863. Since January 1, $87,605,017, against $105,022,360 in 1864 and $101,602,165, in 1863. The imports were $3,687,174, against $3,923,437 same week in 1864, and $2,251,131 in 1863. Since January 1, $85,994,186, against $136,801,907 in 1864, and $96,453,789 in 1863.

The exports of merchandize in June were $8,246,644. In June, 1864, $19,354,422. In June, 1863, $15,127,519. Of specie and bullion, $5,199,472, $6,533,109, and $1,367,774 respectively. The imports were: In June, 1865, $16,855,321; June, 1864, $23,926,314: June, 1863, $12,597,426.

The customs revenue at New York in June was $7,835,075 84, against $3,311,148 43 in June, 1864, and $3,738,934 06, in June 1863. For the six months ending with June, $36,695,577 07, against $42,463,224 in 1864, and $23,843,077 79 in 1863. For the year ending June 30th, 1865, $61,169,479 80, against $77,506,201 43 in 1864, and $51,033,806 61 in 1863.

The exports for the year (exclusive of specie) were $202,872,785, against $168,925,776 in 1864, and $186,722,544 in 1863. The imports were $161,779,273, $234,967,045 and $180,607,865 respectively. The exports of specie were: In 1865, $39,589,259; in 1864, $58,274,222; in 1863, $52,092,637.

Call Loans are quoted 6@7 per cent. Sterling bills, 108¾. The balance in the sub-treasury on Tuesday was $49,299,107 85.

The Second Dodge.

We have before us the second issue of "*The Commercial and Financial Chronicle*," published by WILLIAM B. DANA & Co., 60 William street, New York, dated July 8, 1865, in which we find the identical tables mentioned in our last as having been taken from the pages of the AMERICAN RAILROAD JOURNAL, viz: our Table of Railroad Earnings; our table of Mining Stocks; Canal and Navigation Stocks; Preferred and Guaranteed Railroad Stocks; City Passenger Railroad Share List; American Railroad Bond List, etc. In all probability these tables of ours have undergone some manipulation since their transfer. One item in particular we notice: that of the Consolidated Mortgage Loan of the Camden and Amboy Railroad Company. The amount of this loan, as *Chronicled*, is $798,000. Where they obtained these figures we cannot imagine, unless they came by telegraph on Friday evening, at which time these tables of ours are corrected especially for "*The Chronicle*." We doubt if the *Industrial*, Commercial and Financial Public, be it ever so indulgent, or the Railroad, Banking and Insurance interest, to which it appeals for support, will long submit to such jugglery.

Cape Cod Central Railroad.

The Barnstable *Patriot* states that the work on this road is progressing finely. Laborers commenced putting down the rails last week. A large force will be employed, and about one and a half miles a week will be laid until the road is completed. At this rate the work may be so far done by the middle of September as to enable cars to be run to Harwich.

Railroad Earnings--Monthly.

The earnings of the Erie Railway for the month of June, 1865, were..... $1,225,528 10
Corresponding month last year..... 1,041,975 61

Increase..... $183,552 49

The earnings of the Atlantic and Great Western Railway for the month of June, 1865, were..... $521,174 00
Corresponding month of previous year 314,521 00

Increase..... $206,653 00

The earnings of the Housatonic Railroad for the month of June, 1865, were..... $35,287 98
Corresponding period of previous year. 31,588 61

Increase..... $3,699 37

The traffic receipts of the European and North American Railway for the month of June, 1865, compared with the corresponding month last year, is as follows:

	1865.	1864.
Passengers	$5,594 74	$6,094 07
Freight	5,110 14	5,981 67
Mails and Sundries	425 00	480 95
Total	$11,130 38	$12,556 69

The earnings of the Toledo and Wabash Railroad for the month of June, 1865..... $194,525 15
Corresponding month of 1864..... 156,337 72

Increase..... $38,187 43

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of June, 1865, were..... $224,838 45
Corresponding month of previous year 212,209 24

Increase..... $12,629 21

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of June, 1865, were..... $173,721 71
Corresponding month of previous year 155,730 51

Increase..... $17,991 20

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of June, compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$297,905 42	$327,239 84
Passengers	323,210 37	183,525 49
Express matter	13,073 00	5,200 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	1,214 17	2,037 17
Total	$650,311 29	$532,910 84
Increase		$117,400 45

Earnings from Jan. 1, to June 30:

1865..... $4,215,888 28
1864..... 3,005,928 57

Increase..... $1,209,959 63

☞ The Galva (Ill.) *Union* says that the Atlantic Central road is once more on its feet, with a prospect now of going ahead. The line, as projected, and upon which $700,000 have been expended in grading, &c., begins at New Boston, on the Mississippi, about midway between Burlington and Muscatine, and runs east through Galva, Lacon, and Kaukakee, to a connection with the Pittsburg, Fort Wayne and Chicago Railroad, at or near Fort Wayne.

☞ The first locomotive for the Union Pacific Railroad reached Omaha on the 9th inst. Track laying was to have commenced at that point on the 10th.

Southern Pennsylvania R. R.

PITTSBURG, July 18.—Judge Grier, in the U. S. Circuit Court, has given a decision in the case of Baltimore City *vs.* The Southern Pennsylvania railroad, involving the constitutionality of the act disfranchising the Pittsburg and Connellsville railroad. The Pennsylvania Legislature of 1864, it will be remembered passed an act transferring the rights and franchises of the Connellsville company to the Southern Pennsylvania road; and, as the city of Baltimore had a mortgage for one million dollars on the former road, which the transfer of its rights to another corporation would render worthless, in a measure, the matter was brought before the United States Court and argued at length, at Williamsport, Pa., in June last. Judge Grier has decided that the act of the Pennsylvania Legislature is unconstitutional, and has issued the injunction prayed for by the complainant. Thus securing to Pittsburg and the West another outlet to the East, and a direct route to Baltimore and Washington city, unless reversed by the U. S. Supreme Court.

Railroad from Phillipsburg to Franklin.

A corps of engineers are busily engaged locating a line for a railroad from Phillipsburg, in Centre County, to Franklin, in Venango County, and have already made the survey as far west as the town of Brookville. The Clarion *Banner* says: "There is some doubt about which route they will take—some advocating the line of down Piney Creek and up Deer or Beaver Creek; others, the crossing of the Clarion River at Mill Creek or the State road; or coming down the Clarion to this point and then up Toby Creek. Neither have we any definite information as to who are to build this road; but it is currently reported that it is the Atlantic and Great Western Railroad Company. We doubt, however, whether there is any arrangement completed for the construction of the line, though we have no doubt there is a fair prospect of it being built, as soon as it is established that a grade of not over forty feet to the mile can be found between Phillipsburg and Franklin. It may be this work of locating the road is only being done by parties who have a charter, with the expectation of selling out advantageously to the Atlantic and Great Western, or the Pennsylvania Central Railroad Companies."

Western Maryland Railroad.

The Baltimore *Sun* says that the project for constructing an independent line of the Western Maryland Railroad from that city, to connect with the present road near Owings' Mills, instead of using the Northern Central road thence to the junction, is about to be pushed with earnestness by the interests involved. A meeting of stockholders in the Western Maryland and those doing business along and over the line is to be held at Westminster on the 3d of August, with the view of furthering the enterprise. Surveys and estimates have heretofore been made for the new line.

Albany and Susquehanna Railroad.

We learn that trains have commenced running on this road to Worcester, Otsego Co., 60 miles. It is expected that the road will be opened to Oneonta by September, and perhaps to Unadilla before winter.

☞ A thousand tons of iron for the Rome and Oswego Railroad have arrived.

Journal of Railroad Law.

LIABILITY OF COMPANY FOR RUNNING OVER A HORSE.—DUTY TO GUARD ROAD.

The case of Brace *vs.* The New York Central Railroad Company, lately decided in the court of Appeals, was an action to recover the value of a horse killed by the defendant's locomotive, in the unincorporated village of Gasport, in the town of Royalton, Niagara County. At the trial, these facts appeared:

The village is some six miles east of Lockport, upon the Erie Canal, and the defendant's road passes through it. There is a highway or street called the "Town Line Road," running north and south across the railroad, the "state road," so called, and the canal, and it is the principal street or highway. The canal state road, and railroad run nearly east and west, the state road being some six or eight rods south of the canal, and the railroad some fifteen or sixteen rods south of the state road. The defendant's depot is some twenty-five rods east of the "Town Line Road," and immediately east of a north and south road or street, which is some forty rods in length; its south end is connected with the state road, by a road or street south of the railroad, at the crossing of the latter, some fifteen or sixteen rods. The village contained thirty-seven houses, and a population of between two and three hundred, a portion of which is on the north side of the canal. There was no cattle guard upon the east side of the Town Line Road. There had been one, but as it had been inconvenient for foot passengers, passing from the Town Line Road, along the railroad, to the depot, it had been filled up.

The plaintiff's horse broke out of a lot, some miles south of the crossing, and ran rapidly along the Town Line of road, and approached the crossing as the train was coming from the west, and being frightened, turned on to the railroad track, and was overtaken and killed, some six rods from the road or highway. The defendant offered to prove by a witness that he and two other men in the employment of the defendant were stationed at that crossing, for the purpose of preventing horses and cattle from going on to the track, and that they were at the crossing at the time the horse was killed, and endeavored to keep him back and prevent his going upon the track, but were unable to do so, on account of the great speed with which he approached the track. Upon objection the evidence was concluded, and the defendant excepted. The defendant offered to prove that complaints were made by the inhabitants of the village, that the cattle guard was a nuisance, and that in consequence of persons falling into it, and being injured while passing between the street and depot, the defendant caused it to be filled up. Upon objection this evidence was excluded, and the defendant excepted. The only ground upon which the plaintiff claimed to recover was, that the defendant was bound to construct and maintain a cattle guard at the crossing, at the east line of the Town Line, road or street. The court directed a verdict for the plaintiff, and the defendant excepted. Judgment was rendered on the verdict, and the defendant appealed to this court.

Marvin J.—By the statute, the defendant, was required to "construct and maintain cattle guards at all roads and crossings, suitable and sufficient to prevent cattle and animals from getting on the railroad," and it is declared, that until such cattle guards shall be duly made, the corporation and its agents shall be liable for all damages which shall be done by their agents or engineers to cattle, horses, or other animals thereon. (Sess Laws 1850, p. 233 § 44.)

The position of the defendant's counsel is, that the "Town Line Road" was a street, and that the statute has no application to a street in a city or village. No statutory exemption is referred to, but this is the construction sought to be maintained of the words "all road crossings."

The Town Line Road so called, was a highway and had existed as such in the language of one of the witnesses, as long as he could remember. It did not cease to be a highway when a small village grew up along its sides, nor when it crossed the canal, and extended on to other streets, opened for the use of the villagers. It was a highway, and, within the meaning of the statute, a road. The terms highway and road, are constantly used as synomymous. They are so used in the chapter of the Revised Statutes, "Of Highways" &c. But, if we should call the highway, at the place of the crossing in question, a street, the liability of the defendant would not be changed. It would still be a road within the meaning of the statute. Strictly a street is a paved way or road in a city or village. It is defined by Bouvier Law Dict.. "a road in a village or city," and see Webster's Dictionary. Thus a highway is a road, and as the statute requires railroad corporations to construct and maintain cattle guards at all road crossings, it includes streets in villages and cities. The defendant in this case did construct cattle guards at this crossing on each side of the road, and the one upon the west side still remained; but as the inhabitants residing upon the Town Line Road, were in the habit of passing from the road on to the railroad, and from thence along the railroad, to the depot, some twenty-five rods, and from the depot back to the road, upon the same route, they complained of the cattle guard as a nuisance, and the defendant caused it to be filled up. It is not necessary to say, that such cattle guard was not a nuisance. The law expressly required its construction and maintenance.

It way be well to call attention to the statute declaring that "it shall not be lawful for any person other than those connected with or employed upon the railroad, to work along the track or tracks of any railroad except where the same shall be laid along public roads or streets (§ 44)." The inhabitants had no right to walk along the track, and it was unlawful in them to do so.

The defendant's counsel refer to Vandekar *vs.* The Rensselaer and Saratoga Railroad Company. (13 Barb. 315.) In the former case, there was no "road crossing" and the question we are considering was not involved. The opinion was expressed, however that cattle guards in the streets of a city or village would be nuisances; in which opinion I fully concur, understanding that the cattle guard is constructed across a street which crosses another street in which the railroad is constructed. Such cattle guard would arrest all travel along the street across which it should be constructed. This would be very different from the construction of a cattle guard across the railroad and along the outer margin of the street, the railroad not being constructed along in a street. The opinion was also expressed, that the statute makes an obvious distinction between roads and streets, referring to the sections of the statute relating to the ringing of bells and putting up boards to give warning, in which both words are used. In the other case the question was fairly up as the railroad was not constructed along or upon a street where the cow was killed, but it crossed Washington street in the village of Saratoga Springs, and there were no cattle guards at this crossing. It was held that the general railroad act, requiring railroad companies to construct cattle guards at all railroad crossings, did not apply to streets in cities and villages, and that it was so decided in Vandekar *vs.* The Rensselaer and Saratoga Railroad Company, supra. In support of the position sections 39, and 40 of the general railroad act of 1850 are referred to as indicating the intention of the legislature to make a distinction between the words, streets and roads, and that it was not its intention to include streets by the words "all road crossings" as used in section 44. Section 39 relates to the ringing of a bell when the railroad shall cross any traveled public road or street or the sounding of a steam whistle at the place where the railroad shall cross any such road or street, except in cities, and section 40 relates to the placing of boards across each traveled public road or street, where the same is crossed by the railroad having upon them the words "Railroad crossing, look out for the cars." This section is not to apply to streets in cities and villages, unless the corporation shall be required to put up such boards, by the officers having charge of such streets. In my opinion no inference can be drawn from the word street, in these sections, that the legislature intended by the use of the words, all crossings in section 44, to make a distinction between a road and a street, and to exclude the latter from the requirement of the 44th section, touching cattle guards. As we have seen, a street is a road in a village or city; and a road in a village or city is usually and properly called a street, though in the act of 1847, (ch. 426,) "to provide for the incorporation of villages," the term road is generally used, instead of street (s. s. 45, 57, subd. 23; s. 58 subd. 3 and 5 &c.,) and the words, street and highway, are also used, meaning the same thing. If we consider the evil and danger against which the legislature intended to provide, I think we shall not hesitate to so construe the act as to include the crossing of roads or streets in villages. The object of the legislature, in the provisions relating to fences and cattle guards, was to exclude from the railroad all animals.

Experience had shown, that an animal upon the track is in great danger of being killed or maimed; and further as to most animals they greatly endanger not only the property of the railroad company, but the limbs and lives of passengers (see opinion of Denio, J. in Corwin *vs.* The New York and Erie R. R. Co., Kern 53). The purpose of cattle guards at road crossings is to prevent cattle and animals getting on the railroad, and they are quite as important in villages as they are in the open country, and, indeed, more so for, I apprehend that cattle and animals are more liable to be turned from the road or street, in a village, on the railroad, if there is no obstruction, than in the open country, where they are less liable to be

turned aside. These cattle guards are not in the street, or ought not to be. They do not, in the least encroach upon or obstruct the highway or road. They are constructed at the sides of the highway across the railroad bed, the rails spanning them, thus providing a way for the cars over them, and there are ditches or excavations of sufficient depth or width to prevent cattle or animals from getting on the railroad.

One of the positions of the counsel for the plaintiff is that Gasport was not a village, and that the Town Line road could, therefore, in no sense be styled a street. It is true that Gasport was not incorporated nor did it contain the requisite number of inhabitants (300) to authorize it to become incorporated, under the general act to provide for the incorporation of villages. But I prefer to put our decision upon a broader reading of the statute, as already indicated. The judgment should be affirmed.

All the rest of the Judges were for affirmance, but restricted their judgment to the case of cattle guards to be constructed within the limits of the railroad at the places where it crosses a street, being of the opinion that the statutes do not contemplate that where a railroad running along a street is crossed by another street, passage in the later is to be impeded by cattle guards running longitudinally along the railroad and across the street.

Judgment affirmed.

Milwaukee and St. Paul Railway.

At a recent meeting of the directors of this company the resignation of E. H. Goodrich, as manager, was finally accepted, and the vacancy filled by the appointment of S. S. Merrill, of this city. Mr. Merrill has signified his acceptance and entered upon the discharge of the duties of his office. No railroad man in Wisconsin is more favorably known than Mr. Merrill—he has the entire confidence of the business community. He is one of the few men who could fill the place of his predecessor. The management of such a corporation as the Milwaukee and St. Paul Railway is no sinecure. Few roads in the country exceed it in length and importance. Mr. A. Reasoner has recently been appointed Superintendent. Mr. R. D. Jennings re-appointed General Freight Agent, and J. P. Whaling, Auditor. As we have already announced, Mr. Alexander Mitchell has been elected President. These are all excellent appointments, and the business of the road will fare well in their hands.—*Milwaukee Wis.*

☞ Meetings are being held in the counties along the route of the proposed Iowa Central Railroad to complete that important link in the direct communication between St. Louis and St. Paul, *via* Oskaloosa and Cedar Falls. The North Missouri Railroad has made provision to extend its track from Macon City (junction with the Hannibal and St. Joseph) to the State line, a distance of sixty miles, and the condition of the whole route may be shown by the following table of distances:—

	Miles.
From St. Louis to Iowa State Line	251
From State Line to Cedar Falls	113
From Cedar Falls to Minnesota State Line.	96
From Minnesota State Line to St. Paul	126
Total number of miles	—589
ROAD ALREADY BUILT.	
From St. Louis to Macon City	170
From Cedar Falls to Waverly	15
From St. Paul south	70
Total miles completed	—255
Number of miles yet to build	334

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway for the week ending July 8, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$51,987 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	58,776 00
Total	$114,799 00
Corresponding week, 1864	105,293 00
Increase	$9,506 00

The Detroit and Milwaukee Railroad traffic for the 2nd week in July was $28,068 00
Corresponding week of previous year 21,983 00

Increase $6,085 00

The traffic of the Great Western Railroad for the week ending June 7, 1865, was as follows:

Passengers	$27,758 80
Freight and live stock	21,534 59
Mails and sundries	2,568 44
Total	$51,861 83
Corresponding week of 1864	44,055 24
Increase	$7,806 58

The earnings of the Marietta and Cincinnati Railroad for the first week in June, 1865, were:

	1865.	1864.
Passengers	$13,828 82	$7,478 53
Freight	8,297 53	11,747 60
Mail, express & telegraph	1,100 00	1,189 58
Total	$23,226 35	$20,415 71
Total this month to date	$	$
Total for the fiscal year commencing Jan. 1	$567,682 61	$486,158 09

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending July 7, were:

	1865.	1864.
Passengers	$5,888 59	$3,773 40
Freight	11,575 16	9,350 13
Express	162 80	104 16
Mail	296 58	296 58
Total	$17,923 13	$13,524 27

Receipts from January 1 to July 7:

1865	$311,262 77
1864	281,818 18
Increase	$29,444 59

The earnings of the Michigan Central Railroad for the 2d week in July, 1865, were $81,398 00
Corresponding week of previous year 60,642 00

Increase $20,756 00

The earnings of the Chicago and Rock Island Railroad for the second week in July, 1865, were $51,661 00
Corresponding week of previous year 48,252 00

Increase $3,409 00

New Castle and Beaver Valley Railroad.

The stockholders of the New Castle and Beaver Valley road at a meeting held in New Castle on the 29th ult., ratified the proposed lease to the Pittsburg, Fort Wayne and Chicago Railway Company for the term of ninety-nine years. We are not exactly posted as regards the terms, but are told they are favorable to the interests of the stockholders, and much more convenient for the traveling public, as it will save all the delay at Homewood, occasioned by the change of locomotives and the shifting of trains. The new order commenced on Monday of last week. This arrangement is only another evidence of the enterprise of the officers, and prosperity of the Pittsburg, Fort Wayne and Chicago Railway Company, who so admirably manage the mammoth corporation.—*Pittsburg Chronicle.*

Interest and Dividends.

The New Jersey Railroad and Transportation Company have declared a semi-annual dividend of five per cent., payable on and after the 1st of August next.

The Connecticut and Passumpsic Rivers Railroad Company has declared a dividend of 3 per cent., free of Government tax, payable July 24, to holders of preferred stock.

The Girard College Passenger Railway a semi-annual dividend of $1 per share, payable on demand, clear of all taxes.

The Winnisimmet Horse Railroad (Chelsea) a dividend of 2 per cent., free of Government tax, payable July 15.

The Delaware and Hudson Canal Company a semi-annual dividend of 10 per cent., payable August 1.

The Delaware and Raritan Canal and the Camden and Amboy Railroad Companies have declared a dividend of five per cent., free of tax, payable July 31st, in Philadelphia and New York.

The State Debt of Missouri.

The following is Governor Fletcher's official announcement of the adoption of the ordinance for the payment of the railroad and State indebtedness of Missouri, by which bondholders will see that the ordinance has become a part of the organic law of the State:

"I, Thomas C. Fletcher, Governor of the State of Missouri, in pursuance of authority in me vested by said ordinance, do by this my proclamation, make known, that upon an accurate casting up of said above mentioned returns, there appeared thirty-nine thousand and sixty-seven votes for: 'Shall the railroads pay their bonds? Yes,' and twenty thousand nine hundred votes for: 'Shall the railroads pay their bonds? No.'"

Troy and Greenbush R. R.

The Directors of this road for the current year are as follows: Jonas C. Heartt, John L. Thompson, George D. Carter, Jonathan Edwards, Hanford N. Lockwood, John B. Gale, Philander Wells, Stephen E. Warren, John H. Willard, Thomas W. Lockwood, Thomas Symonds, E. Thompson Gale, George H. Cramer.

☞ During the next session of the Canadian Parliament the Ottawa and Assinaboyne Railway Company will apply to be incorporated, and ask for permission to build a railway connecting Ottawa with Fort Garry. The proposed route is said to be via lakes Nipissing, Temiscanning and Neepigon. When the main route is completed the company propose building a branch from Smoke river to Lake Huron, and another from Neepigon Lake to Neepigon Bay, on Lake Superior.

☞ Much interest appears to be manifested in portions of this State in relation to the proposed Buffalo and Washington City Railroad, and it is probable that every encouragement will be given for its construction by those owning property in the vicinity of its contemplated route.

The locating committee and the engineer are now surveying the route of the New York Northern Central Railroad.—*N. Y. Herald, July* 1.

☞ The Orange and Alexandria Railroad has been re-opened for travel. The bridge over the Rappahannock has been completed, and a train will hereafter leave Washington at 7.30 A. M. daily, running through to Richmond.

☞ The railroad between Chattanooga and Atlanta has been completed, and trains can now run through to Augusta, Macon, Columbus, Montgomery, Mobile and all points South. The road is not yet in the best of order, but repairs are daily being made to it.

☞ The telegraph line between Chattanooga and Washington by way of Knoxville, Bristol, Lynchburg and Richmond, is now completed and in working order.

☞ The Pittsburg *Oil News* says that the latest accounts from Illinois "look to a new route down the White River Valley, and a new road to Chicago, shortening the distance in the through route about forty miles, that occupies a good share of public attention."

☞ The piers of the Suspension Bridge across the Ohio River at Cincinnati are nearly completed, and the wires will be suspended in a short time. The span of the bridge is one thousand and fifty-seven feet, the longest span in this country.

☞ The directors of the Georgetown and Washington Railroad have organized by re-electing George S. Gideon, President, William A. Darling, Vice-President, and W. C. Greenleaf, Secretary.

Car Covering or Roofing.

KINGMAN'S CEMENT WITH HEAVY CANVASS, used by many roads as a substitute for Car Duck. WILLIAMS & PAGE, Boston.
July 19th, 1865.

RICHMOND AND DANVILLE RAILROAD,
SUPERINTENDENT'S OFFICE,
Richmond, Va., July 12th, 1865.

NOTICE TO BRIDGE BUILDERS.—Proposals are invited by this Company for the rebuilding of 7 spans of their Bridge over James' River at Richmond. Spans 120 feet. Also for their Bridge of the Staunton River, 4 spans of 150 feet each, making an aggregate length in both Bridges of 1,440 feet, the masonry in both cases is uninjured, the original structures were on the Howe Truss plan, the Track Stringers sustained on the bottom chord. Proposals are invited for their rebuilding on the same plan, but proposals made for other plans will also be considered. Address the undersigned at Richmond, Va.
THOMAS DODAMEAD Superintendent.

Natural Lubricating Oil
FROM THE
HICKORY FARM OIL CO.'S
NEW WELL, NO. 2,
ON WEST HICKORY CREEK,
VENANGO COUNTY, PA.

This company are now receiving oil from the above well, of which they are exclusive owners, and are prepared to fill orders for delivery at this port or at the well.
The oil is of a specific gravity of 32 degrees Beaume, and has been pronounced, by all who have tested it, the best lubricator in the market.
Orders from railroad companies, jobbers and large manufacturers are solicited, and will receive prompt attention. Parties can at all times rely on a pure and uniform article.
Office of the Company, No. 92 Maiden Lane, New York. 3m-27

COMMISSION MERCHANT
AGENT FOR SALE OF
RAILWAY IRON
AND
EQUIPMENTS,
PERU IRON
AND
AMERICAN STEEL,
54 William st., NEW YORK.

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.
NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,
STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, &c., can be obtained by mail or otherwise at our warehouse.
NEW YORK BELTING AND PACKING CO.,
JOHN H. CHEEVER, Treasurer,
Nos. 37 and 38 Park Row, New York.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, July 11, 1865.

AT A MEETING of the Board of Directors of this Company, held this day, it was
Resolved, That a DIVIDEND of FIVE PER CENT. in cash, free of Government tax, be paid on the 1st day of August next, to the holders of the full paid shares registered on the 15th day of July, and that the transfer books be closed on the said 15th day of July, and opened on the 3d day of August.
Resolved, That in pursuance of the measure recommended by the Shareholders' Meeting, held May 31st, 1865, and in order that the lands sold may be represented by a corresponding issue of Capital Stock, in accordance with the policy heretofore pursued by the Company in the issue of Canceled Bonds Scrip, the outstanding shares of this Company be increased by the issue of one share for every ten now outstanding, and the same be distributed to the holders of shares registered on the Company's books, on the first day of August next, in the proportion of one share for every ten held by them.
Resolved, That where, in the distribution of such shares, a stockholder would be entitled to a fraction of a share, the Company will retain the right to such fractional part at par. THOMAS E. WALKER, Treasurer.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY CO., PITTSBURG, June 23, 1865.

DIVIDENDS.—Notice is hereby given that the regular DIVIDEND of TWO AND ONE-HALF (2½) PER CENT. on the Capital Stock of this Company for the quarter ending June 30, inst., has been declared by the Board of Directors payable, free of Government tax, on and after July 17, prox.
The DIVIDEND of THREE AND ONE-HALF (3½) PER CENT. due October 1, 1865, on the Third Mortgage Bonds, has also been ordered paid in anticipation, less Government tax, on and after July 17, prox.
Shareholders and Bondholders registered at New York will receive their dividends at the agency of the Company, Messrs. WINSLOW, LANIER & CO., No. 52 Wall st., and those registered at Pittsburgh from the Treasurer at that city.
The Transfer Books will close June 30, and will reopen July 18, prox By order of the Board.
4t-26 F. M. HUTCHINSON, Secretary.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight and of a fine and superior quality.
This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**
It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.
The better condition, therefore in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.
Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**
N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

Another View of a Commercial Question.

One of the most interesting questions now under discussion by commercial men is that of our trade with the British North American provinces, now about to change its character under the notice given by our Government of the termination of the Reciprocity treaty. At the late convention held at Detroit, the subject was fully and ably discussed both in and out of the Committees, and the final vote which was unanimous, recommended further negotiation of the Treaty, with an enlargment of the policy of reciprocity to the Pacific Coast.

That the provincials are exceedingly anxious to renew the treaty is very evident. Our own knowledge of the condition of the internal improvements, the railways and canals of Canada in particular, compels us to believe that without the continuance of the friendly interchange of our products with that province, their public works would be become almost valueless, and they are therefore not to be blamed for showing much anxiety for a continuance of that interchange. This view of the subject was evidently taken by the delegates of the American Boards of Trade at the Detroit convention and gave a tinge to much of the debate. Indeed some of these gentlemen evidently thought that we might press some new condition on the provinces with safety, as the price of a new reciprocity treaty.

The Philadelphia delegates intimated pretty plainly that the manufactures of their State ought also to be included in the Canadian free list as a part of the consideration, an idea wholly inadmissible for the reason that revenue is as essential to Canada as it is to the United States, and that if our manufactures were admitted free into the province those of the Mother country would also have to be admitted free.

Our present object is not, however, to combat this idea, but to show what may happen, if some new arrangement is not made. Certainly it is tbe part of Statesmen to look at all sides of the question and in time. In great commercial questions, mere local interests, personal feelings and political prejudices must be left out of view, if we would decide correctly as to their effect. We will suppose then that our present trade with the Provinces under the expiring treaty is finally discontinued in conformity with the notice. What then would their policy become?

Evidently it would be, to declare MONTREAL A FREE PORT, and to exempt from duties, tariffs, canal tolls and incidental charges all goods shipped from abroad, to that port *destined* for American ports on the lakes. For the six months of navigation the St. Lawrence would become the highway of the commerce of the northwest, and for the rest of the year the Inter-Colonial railway to Halifax would be in use for the same purpose. The Western and lake cities would import through Montreal, for the discrimination would be largely in their favor by that route against the present routes by Boston and New York. And although the usual revenue would be collected on these imports by our own Government, still the importers would find their advantage in these savings and in using the St. Lawrence route, and the free port of Montreal. But over a portion of 1,500 miles no cordon of custom house offices could be large enough or vigilant enough to prevent an immense contraband trade. No nation has ever yet been honest enough to resist the temptation of smuggling. It was openly avowed at Detroit by such men as Mr. Sabine of Boston, that even in the New England States smuggling was a business, and that he himself had been brought up to it. Mr. Howe of Nova Scotia one of its leading men admitted that even now, contraband goods from the United States were constantly brought into that province by the American fishermen, although the duties on the articles smuggled were comparatively trifling. What then would be the result if high duties were to remain under our existing tariff on foreign goods coming into the United States, while others, coming in free to Montreal were to be distributed along the shores of lakes thousands of miles in extent. What would be the effect on New York and Boston especially, if Chicago, Milwaukie, Detroit, Buffalo and Oswego should get their foreign goods hereafter by the way of Montreal, with the chance of a contraband trade which should defy the vigilance of our Government.

We see therefore that there are two sides to this question, both worth looking at, and that while the Provincials are evidently in a good spirit and may be brought to a friendly understanding, it is not worth while in the hope of driving a hard bargain with them, to ignore the alternative which they may use to our great disadvantage. There is no knowing what would be the effect of a free trade policy of this sort, upon our own canals and railways. We were told at the Detroit convention, that the northwest was fast assuming an Imperial power, that it would ere long control the commercial legislation of this country by its actual numerical strength in congress, and could and would insist upon justice towards its producing classes. Indeed even Dr. Elder has advocated a sectional Western policy with still greater boldness, if we understand him right, and in this temper, what would we have to expect from the northwest, if Canada should break down all the barriers of custom houses, and canal tolls in favor of lake commerce. What would New York and Boston think if these western merchants and grain shippers, should transfer their agencies to the free port of Montreal?

We make these suggestions in time, and for the consideration of those men who call themselves statesmen, and yet fail so frequently and lamentably in statesmanship. We put them forth with

the best intentions and hope they will have the attention they deserve.

Here is a ten years trade which has been apparently in our favor to the extent of upwards of one hundred millions of dollars. Shall we keep it or perhaps, not only lose it entirely, but see with the loss, a transfer to the provinces of a trade of equal amount, diverted from the old channels to the serious injury of our chief Atlantic Cities.

We should certainly consider well what we are about to do.

☞ Mr. John W. Garrett, President of the Baltimore and Ohio Railroad, has obtained an order from the Government to furnish the Southern Railroads with all the stock belonging to the United States Government, at a fair valuation, trusting the roads for the money, to be paid out of the receipts from business.

St. Louis, Alton and Terre Haute Railroad.

The earnings of this road for the years ending December 31, 1863 and 1864 have been as follows:

	1863.	1864.
From passengers....	$511,234 88	$655,446 85
" freight	969,886 15	1,324,396 12
" mails.....	21,391 00	21,398 00
" express.....	20,479 73	38,442 08
" miscellaneous .	31,921 38	44,391 27
	$1,554,913 14	$2,084,074 82

The expenses of 1864 were:

Repairs of roadway....	$447,457 50	
" bridges.....	31,657 73	
" buildings ...	25,910 53	
" locomotives .	53,238 15	
" cars.....	51,672 71	
" tools, etc....	9,312 79	
Fuel and preparing....	128,890 72	
Supply agent	217,571 35	
Car service	83,261 05	
General superintendence	26,353 86	
Agents and clerks.....	46,199 40	
Taxes and rents.....	62,436 89	
Damages & overcharges	33,860 15	
Stock killed, etc.....	18,622 40	
Office and station exp..	11,246 32	
Stationmen	37,183 42	
Porters, watch & switchmen	26,302 36	
Conductors, enginemen, etc	120,809 14	
Miscellaneous.....	47,607 82	
		1,429,603 79
		$654,470 53
Right of way and depot grounds	$1,050 00	
Fences	10,175 99	
Locomotives	52,388 50	
Cars.....	90,089 30	
		153,703 79
		$500,766 74

There were expended, and charged to operating expenses, the sum of $53,900 for new cars built in the company's shops; and $85,794 45 for permanent improvements—making a total of $139,-694 45. Deducting this sum from the amount given above, will leave $1,289,909 34, as the operating expenses for the year, including everything, except the amount expended on permanent improvements, and paid out for additional rolling stock, leaving a balance of earnings of $794,164 98; showing operating expenses to have been 61.8 per cent. of gross earnings. They were estimated in last year's report at 55 to 60 per cent., before the extraordinary advance in prices which followed the rise in gold in June, 1864.

During the past year, the advance in the wages of labor upon the road has not been less, on an average, than 33⅓ per cent. which would amount to about $139,000, making also due allowance for increase of business. In addition to this, our U. S. taxes for the year 1864 have been $25,820 66 more than for the year 1863. This is principally owing to the operation of the new law taking effect 1st July, 1864, whereby 2½ per cent. is assessed on the gross earnings, payable monthly, instead of three per cent. on the passenger receipts. These sums being deducted, for comparison, would reduce the operating expenses to $970,915 99 or to 46 6-10 per cent. of the gross earnings. Add to this that our rolling stock was inadequate to the business, and as a consequence that which we had was taxed beyond its capacity, thus adding materially to the expense of operating the road.

By reference to "Special Table" page 25, of last year's report of things to be provided in 1864, it will be seen that coal and flat cars were estimated to cost $500 each. The actual cost in 1864 has been $1,100 each. Locomotives which were estimated to cost $12,000 each, we have had to pay $26,000 and government tax for; and rails, which were estimated at $80 per ton, have cost us $130 per ton in New York.

The extraordinary rise in gold in June last produced this great advance in the cost of rolling stock; and there has been nearly or quite the same advance in the cost of supplies needed at our shops and other points on the road. This enhancement in prices, extending to all the necessaries of life, affected all classes of employees on the road; and a prudent hesitancy in acceding to their demands for increased compensation, together with the repeated drafts for men to fill our armies, added to the necessary disturbance resulting from our proximity to the scenes of war, necessarily produced much demoralization on ours, in common with other roads in the West.

A committee of the Board, consisting of Messrs. Thornton, Davis and Underwood, to whom was referred the subject of dividends, submitted their report to the Board, in which they remark:

"The business of the road also requires the addition of a considerable number of freight cars of the various classes, some of which should be immediately supplied. Outlays for these objects cannot be postponed without serious detriment and crippling the road. To this is to be added the outlay required to be made for certain permanent improvements, such as the Wabash River Bridge, and other work specified in the report of the Chief Engineer, and which does not admit of postponement. Prompt cash payment for all articles purchased for the use of the road is an indispensable element to maintain its credit; and no class of creditors would be more seriously damaged by a failure in this respect, than the holders of the common stock. It is obvious that if the business of the road can be maintained as at present, and the expenses of operating the same can be reduced by an improved condition of the road, and ample additions to its rolling stock, a strict adherence to the policy which the managers have, as they conceive, from necessity, adopted, will sooner or later ensure remunerating dividends on the common stock."

In concluding their report, they add:

"The committee regard with satisfaction the results of the operations of the road for the year just closed. They have been personally cognizant of the difficulties and embarrassments which have existed during the past year, growing out of the condition of public affairs—the prevailing discontent among employees and laborers—the effect of the impending drafts, and the general tendency to laxity and recklessness, and the difficulty of obtaining regular labor even at the exorbitant prices demanded."

The outlay during the year for permanent improvements, strictly chargeable to construction, has been limited to the most pressing objects, amounting in the aggregate to $97,020 44.

The same policy will govern in the expenditures to be made for similar purposes during the present year.

No progress has been made towards providing suitable accommodations for the business of the road at East St. Louis. The utter impossibility of obtaining labor and materials at reasonable rates, in addition to the want of adequate means, precluded any outlay at that point during the year. The cost of this work will be heavy, but it is unavoidable. It is contemplated to do the work gradually, within the means of the Company, and as the facilities for obtaining labor and materials improve.

It will be seen that we have laid down nearly 700 tons of new iron, partly for new work and partly to replace damaged rails, and about 1,600 tons of re-rolled iron.

A very careful examination has been made into the condition of the iron on the track, involving an inspection of each rail on the entire length of the road; the result of which shows, that from Belleville to East St. Louis, 4,088 yards, or 109 tons, of new iron are required. From East St. Louis to Terre Haute, including the Alton branch, 104,014 yards, or 2,786 tons; making 2,895 tons required to be re-rolled during the year 1865, if practicable. The estimate for 1864 was 3,000 tons, but of this we were only able to get about 1,600 tons re-rolled, at an average cost of about $45 per ton. The deficiency adds to the burden for the current year. To enable us to lay down three miles (286 tons) of new side track, and to furnish a margin to meet the difficulty of the delays in getting the work of re-rolling done at the mills as fast as needed, we should have 500 tons of new rails.

Mr. Ball estimates that if the above quantity of iron is supplied during the present year, an addition of 12½ per cent. per annum of the whole iron of the road will repair the depreciation and keep the track in order. This would amount to an average of 2,200 tons per annum to be re-rolled. This per centage will be gradually lessened to a minimum as the road-bed is made more perfect by ballasting it with gravel. As the price of iron is so fluctuating, no estimate of the cost is now made. The present price for re-rolling is about $52 per ton.

While the business has increased so much, the additions to the rolling stock and equipments of the road and its facilities for the transaction of so large a business, bear no proportion to it. These deficiencies are rendered more strikingly evident by the necessities which require them. It is impossible to conduct such a business, with reasonable economy and security, without ample and suitable facilities for it; and these must be provided as fast as they can be, to meet not only the present demand, but to invite and ensure future increase.

By reference to the table of audited accounts for the year, it will appear that the sum of $33,-261 85 was paid to other and connecting roads for car service during the year. This shows the deficiency of the Company in this department.

This deficiency in equipment has been repaired to some extent during the past year. Two first-class heavy freight engines and 125 cars of various kinds, chiefly coal and freight cars, were added, at a cost of $196,377 80 and paid for out of the earnings of the road. Still greater additions are needed, and will be supplied as the means of the Company will admit. Four new freight engines of the first-class have been recently purchased, two of which are now on there way to the road, and the other two will be on the road by the middle of April. A considerable addition to the number of cars will also be made this year. This will add materially to the effective power of the road for the current year, and relieve considerably the over-work of the rolling stock.

In view of all the facts and circumstances under which a very large and increasing business has been conducted, with limited means, it must be apparent that commendable economy and much skill and energy have been evinced in the operating department of the road.

It will be perceived that the business of the

road has increased since 1860, inclusive, to 1864, from a gross earning of $795,898 01 in the former, to $2,084,074 32 in the latter year.

It is, as it should be, the aim of the managers of this road to put it in good condition, and establish its character as a first-class road in all its appointments, as speedily as the means from its own earnings (the only means at their disposal) can be provided; and, in their judgment, by a strict adherence to this policy alone, can its future value be secured to the satisfaction of the holders, of all classes, of its securities, and the road itself be made instrumental of conferring the greatest benefit to the public.

The most direct and central line of communication between St. Louis and the eastern cities, both for freight and passengers, is over our road and the Terre Haute and Richmond Railroad to Indianapolis, at which latter point the distribution by other routes to New York, Philadelphia or Baltimore begins.

Important improvements have been made within the last two years on all the lines running East from Indianapolis, and the managers of those lines seem to be thoroughly impressed with the importance of the business coming to them from St. Louis. The through connection of passenger trains has been made as close as possible, in view of accommodating the public to the largest extent, while the freight trains, considering the number and variety of them, are sent forward with regularity and despatch.

By an arrangement recently made with the Department at Washington, the great through mail for St. Louis is now carried over the line of this road, for which we receive $150 per mile per annum, which will be increased to $200 per mile as soon as the bridge crossing the Ohio at Steubenville is finished.

While the cessation of the war will unquestionably check the movement of government transportation, both of freight and passengers, over the several western lines of railway, and our monthly returns will show the proportion of loss which our road bears, this will be compensated for, in a good degree, by the new developments and condition of business already secured, and which are being opened to us, the effects, in a great measure, of the war. Missouri now invites settlement as a free State, and St. Louis becomes the focus of an immense trade, drawn, not only from the West, but the Southwest and the Northwest. Three great lines of railroads now centre there—the North Missouri, the Pacific, (of Missouri,) and the Iron Mountain.

At the present session of the Missouri legislature, a bill was passed releasing the State lien upon the North Missouri Railroad, and authorizing the Company to create a first mortgage, and issue bonds for the purpose of providing means to complete their line from a point called Allen, westward, to Brunswick, on the Missouri River, and thence to a point opposite Kansas City. Also, for the extension of the line northward, from Macon City, where this road intersects the Hannibal and St. Joseph Road.

Measures have been adopted to secure the completion of the Pacific Railroad, (of Missouri,) from Warrensburgh, its present western terminus, to Kansas City, about sixty miles, by the first day of July next. At Kansas City it will connect with the Eastern Divison (so called) of the Union Pacific Railway Company, the first division of which is already finished and in successful operation, from Wyandotte and Kansas City to Lawrence, a distance of forty miles, and the work on the second division of forty miles, west from Lawrence, is in progress, and being prosecuted with great vigor. The direction of this Company is now composed of able and upright citizens of St. Louis, (John D. Perry, Esq., President,) who have made their arrangements for a speedy extension of it to Fort Riley, 160 miles from Kansas City, thus forming, at an early day, a continuous railroad line from St. Louis to Fort Riley. This will be the principal route for the trade and travel with Santa Fe and Colorado for some time to come; while it is believed that the local business between Lawrence and Fort Riley, now waiting the completion of the road, will, of itself, furnish remunerating employment as soon as the road is opened. The munificent grants made by Congress in aid of this division of the great Pacific Railroad render its rapid extension and completion to Fort Riley certain. While we may reasonably expect a large and constantly increasing business from St. Louis, we may regard with satisfaction the elements of support existing along the line of the road. The local business between St. Louis and Terre Haute is, at this time, only partially developed. Pains will be taken to encourge and foster this, as it will constitute the main and permanent reliance of the road.

The company had on the road at the close of the year 42 locomotives, 10 of which were coal burners. Of these 13 were too small for the business of the road; 25 were in good order; 13 in passable running order, but needing repairs; and 4 in shop undergoing repairs.

The rolling stock consisted of 23 1st class and 5 2d class passenger cars; 4 baggage, 5 mail, 20 caboose, 319 coal, 238 box, 81 compromise, 17 Blue Line, 94 stock, 12 lime and 165 platform—making a total of 983; of which 906 are in good order, 65 in running condition, and 12 in shops for repairs.

Income Account.

Balance December 31, 1863		$294,228 48
Earnings during the year		2,084,074 32
		$2,378,302 80
Transportation expenses, as above	$1,429,603 79	
Permanent improvements	153,703 79	
Coupons on bonds, dividends on preferred stock due May, 1864, including amount unpaid Jan. 1, 1865, and sinking fund	593,545 80	
Balance December 31, 1864	201,449 42	
		$2,378,302 80

The total cost of road and equipment has been $10,700,000, represented by: Capital stock $2,300,000; Preferred stock, $1,700,000; bonds, $6,700,000. For a description of the bonds, showing the several series and the time of payment of coupons, see American Railroad Journal Bond List, page 716 of this week's issue.

President.—Charles Butler, New York.

Directors.—Chas. Butler, Robert Bayard, Samuel J. Tilden, Jno. G. Richardson, Russell Sage, Wm. H. Underwood, Levi Davis, Jno. S. Hayward, Henry W. Phelphs, Anthony Thornton, E. B. Gage, Hiram Sandford, Carlos S. Greely.

Sec'y & Auditor.—James B. Ralston, St. Louis.

Gen'l Sup't.—Henry C. Moore, St. Louis.

Assistant Sup't.—J. L. Hinckley, Litchfield, Ill.

Chief Engineer.—William I. Ball, Terre Haute.

Boston, Hartford and Erie Railroad.

At a meeting of this Company, held in Boston on the 25th inst., it was voted to accept the act passed by the Rhode Island Legislature "to ratify and confirm the sale of the Hartford, Providence and Fishkill Railroad to the Boston, Hartford and Erie Railroad Company." The act of the Massachusetts Legislature concerning the securing of the bonds and indebtedness by a mortgage of franchise and property was laid on the table for the present. The President stated that a million of dollars were required to complete this great undertaking. A committee was appointed to examine the present condition and future wants of the corporation, and the meeting adjourned to the 8th of August.

☞ The Lawrence Railroad and Transportation Companies of Pennsylvania and Ohio have been consolidated. Their road, which is now in process of construction, is to extend from New Castle to Youngstown, opening a through route from the latter place to Pittsburg.

The Rights of City Railroads to the use of Public Highways.

Horse railroads have now become a permanent institution in nearly every city of moderate size. They are displacing in public esteem, the modes of conveyance formerly resorted to in large cities, and the Courts are being called upon in numerous cases, to decide upon their right and liabilities as corporations. They are usually constructed upon and along public highways, long dedicated to the use and enjoyment of the public, and they must, of course, more frequently interfere with the privileges incident to such highways than any other class of conveyances. They are a monopoly, and monopolies are odious, but we doubt if our cities could well dispense with the service they render the public. But while they constitute in large cities one of the greatest of modern conveniences, it must be admitted that to reconcile their indefinite multiplication with the safe and comfortable use of the streets over which they are laid out, is a different problem of State legislation and municipal regulation.

OWNERSHIP OF STREETS.

In this State there has been a great amount of litigation growing out of the right of the legislature to grant to a corporation the right to construct a railway in the streets of a city.

The last and perhaps the most notable of these cases was the matter of the Seventh Avenue and Broadway Railroad Company. In the year 1860 the Legislature of this State, authorized John Kerr and others to construct and operate a railroad through certain streets of New York City. They were authorized to acquire any real estate which they might need for the purposes of their road, either by grant or compulsory proceedings, for which they were to make just compensation. But the use of the streets for the purpose of the railroad is declared by the act to be a public use, consistent with the uses for which the Mayor, Aldermen and Commonalty hold such streets. After the passage of this act, and the incorporated company had broke ground, certain persons who were owners of lots lying upon the streets upon which the proposed railroad was to run brought an action to permanently enjoin the Mayor, Aldermen, &c., from giving their assent to such construction or doing any act in aid or furtherance thereof. This case then, (People *vs.* Kerr, 27 N. Y., 188,) involved the whole question of ownership of public highways, and whether the legislature has the right to grant such a use of them. The case in question has been decided by the highest tribunal of the State, and the opinions of the judges who decided it, have but lately been published. It is therefore decisive, and will put an end to the discussion in this State at least. To state the decision in the briefest compass, it is this: the fee of streets acquired by the City of New York is held by it in trust for the public use of all the people of the State, and not as a corporate or municipal property.

Such property being acquired by the exercise of the right of eminent domain, and the trust of the city being *publici juris*, it is under the unqualified control of the legislature of the State, and any appropriation of it to a public use by legislative authority is not a taking of private property for public use so as to require compensation to the city to render it constitutional.

The Court also decides that the possibility of a reverter to the owners of land abutting upon the street, after its public use shall have ceased is not such a *property* as is constitutionally exempt from unremunerated appropriation at the will of the Government. Its value, if any, is unappreciable. On the whole issue therefore the railroad company are successful. The State legislature has absolute power in respect to the use, as well of public streets and highways in the city as in the country. The power which the municipal corporation holds and exercises in controlling and regulating the use of streets in New York has been delegated to it by the State. It is a grant of governmental power for local purposes, subject to the control of the Supreme power of the State. The legislature may at any time resume the power delegated.

No consent or license of the city authorities or municipal corporation is therefore necessary to authorize the construction of a city railroad in which city passengers may be transported for hire.

EXCLUSIVE USE OF ROADWAY.

The power of the legislature to grant the use of the public streets, being thus definitely settled, it becomes interesting to inquire what is the extent of the privilege thus granted. The company may lay its track and run its cars, but has it the excluse right to a passage over the ground covered by its rails?

Horse railroads are becoming so numerous, it is important that the rights and duties of all persons in the community, having any relations with them should be distinctly known and understood, in order to accomplish all the benefits, and as far as practicable, avoid the inconveniences, arising from their use. This is important to the companies as well as to all persons who ride in their cars, and especially to all persons having occasion to use the ways through or across which these horse railroad cars may have occasion to pass.

Chief Justice SHAW, of Massachusetts, has in a very able opinion given his usually enlightened views upon the right of the company to the unrestricted use of its track. It was a case of indictment for unlawful obstruction by a drayman of the railroad track.

The defendant, with a heavily loaded team, was on the public street driving from Charlestown to Boston, with one of his wheels on the railroad track, when the cars came up behind him. The defendants' team was moving at the usual rate for teams of that class, but at a less rate of speed than the cars were in the habit of moving.

There was room outside the track for either vehicle to pass the other. When the cars came up, the conductor asked the defendant if he would remove his team from the track; he did not, but continued upon it at the same rate of speed, several hundred feet and then turned off. Several things are here to be observed. The cars could only pass on one precise line. The wagon could deviate to the right or to the left, within the limits of the traveled part of the road. The public, by the grant of the franchise, had granted the right to move on that precise line, and had given to all passengers the right to be carried on that line at the usual rate of speed at which passengers are carried by horses subject only to occasional necessary impediments. The cars cannot so move and the passengers cannot be so carried whilst the wagon moves on the track. No impediment is shown to prevent the wagon from turning out. The wagon therefore is for the time being, an unnecessary obstruction of the public travel, and therefore unlawful.

In the case of Wilbrand *vs.* The Eighth Avenue Railroad Company, 3 Bosworth, 314, decided by the Superior Court of this city, it was decided that the company is entitled to the unrestricted use of its rails for the progress of its cars, within that limit of speed which the law allows them, and the driver of any other vehicle, being unnecessarily on the track, is bound to exercise greater care than if upon the common pavement, to see that an approaching car is not impeded, and if through negligence or wilfulness in this respect, a collision ensues, he should not have damages against the company, even though the servants of the latter are also at fault.

The public have unquestionably the right to drive upon and across the track, but not so as to interfere with the proper business of the company, and if an individual sees fit to run his carriage or wagon on the rails, he is bound to exercise care to avoid a collision. Other vehicles may turn out to avoid him, coming or going either way, but a car can turn neither to the right nor to the left. A driver cannot therefore place himself in front of a car in motion, and wilfully slacken his own speed so as to delay the car, and impede its progress and restrict its speed within the time allowed by law. If this were possible the city railroad companies would be at the mercy of every obstinate or reckless driver.

The case of the Brooklyn Central Railroad Company *vs.* The Brooklyn City Railroad Company in the Supreme Court, (32 Barb., 358,) was another important case, where the rule was laid down that a railroad along the streets of a city does not become a part of the street so as to authorize the public at large or other railroad corporations, with the consent of the Common Council, to use the road with their rail cars or carriages for the transit of passengers in common with the owner of the franchise. (See also the same case in 33 Barb., 420.)

There are very many questions of interest growing out of city passenger railroads, which we shall endeavor to present at a future time.

☞ J. T. K. Hayward, Esq., hitherto General Superintendent of the Hannibal and St. Joseph Railroad, has been chosen President and Managing Director of the road, under the new organization. C. W. Mead, long and favorably known as the able assistant of the Chicago, Burlington and Quincy Railroad, has been appointed General Superintendent; George H. Nettleton, Assistant Superintendent, Hannibal; J. B. Watkins, Assistant Superintendent, Brookfield; H. H. Courtright, General Freight Agent; L. W. Towne, Master Mechanic. The road has $750,000 appropriated, together with all its earnings, to put the whole line in first rate running order at once.

☞ The whole number of passengers transported on the Washington and Georgetown Railroad during the year ending June 30, 1865, was 8,751,119, being an average of 28,702 each day. The company own 88 cars, employ 400 hands, and require for use 600 horses; the payments daily average $1,000.

Commerce of New York.

Do. exclusive of specie	168,925,776	202,872,785

☞ The Queen of Spain has granted to a Spanish Franco Company the right to lay down a submarine cable from the Island of Cuba to Porto Rico, and from Porto Rico to Saint Thomas, the coast of the United States, the Isthmus of Panama and Mexico.

Southern Railroad Improvements.

On both the Central and Gulf Railroads the work of reconstruction is being rapidly and vigorously pushed forward. It is probable the improvements will be completed quite as soon as was anticipated at the inception of the enterprises.

We have already announced the completion of the Western and Atlantic Railroad to Atlanta, making direct communication to Macon and Augusta from the North and West. We find that railroad enterprises all over the South are being revived.

The Macon and Brunswick Railroad is now repaired from the former place to the junction within eight miles of Hawkinsville. A line of hacks run from the railroad to that point.

The work of rebuilding the Wilmington and Manchester Railroad is progressing rapidly. Trains of cars will pass from Kingsville (its junction with the South Carolina Railroad) to Wilmington, N. C., by August 13, 1865. From Wilmington north there is now daily connection, and trains are run on the road semi-weekly.

The Cheraw and Darlington Railroad is running through from Florence to Cheraw, and the Northeastern Railroad Company are now transporting passengers and freight the entire length of that road—that is, from Florence to Charleston.

The Grenada Motive learns that the Mississippi Central Road will be completed, without some unlooked for occurrence, by or before the first day of September next; also that the Mississippi and Tennessee Railroad will be completed and trains run through by the first of October. The two companies, it understands, will unite in rebuilding and using the bridge of the Central Road across the Yalobusha. And it hopes they will unite in building one depot at that place at once.

A force is at work repairing the Memphis and Charleston Railroad, between Corinth and Memphis, and the cars will be running to Corinth from Memphis in a short time. There are four bridges to build between Memphis and Corinth. The track was relaid and used by Gen. Hood last December, and is, we believe, in tolerably good order.

Were we not satisfied that the directors of the Central and Gulf Roads are doing all in their power, we should urge the greatest vigor on their part in the completion of their roads. They have had great obstacles to overcome, but have succeeded, and we believe will succeed in all they have undertaken.

A Hilton Head correspondent inquires in regard to Wilmington railroad connections. The answer is given above. In regard to an inquiry about the Savannah and Charleston Road, we can only say that it is in a very bad condition, and that there is little present prospect of its being rebuilt. —*Savannah Herald, July* 18.

Petersburg and Lynchburg (South Side) Railroad.

As this road is an important link in the connection between Richmond and the Southwest, some information about it and the progress the company is making in repairing it will be interesting to our readers.

In the retreat of the Confederate army the following bridges were burned: The bridge at Petersburg, three spans; four spans of the High Bridge; the bridge at Farmville, three spans; the bridge at Buffalo Creek, two spans; the bridge across the James River, seven miles below Lynchburg, six spans; and the bridge to the island at Lynchburg, four spans. All these were first class bridges, making an aggregate length of two thousand four hundred feet, and ranging from twenty-five to forty-five feet in height, except the portion of the High Bridge, which is one hundred feet high.

Besides this heavy loss of bridges, there were burnt or destroyed seventy-five freight cars, six passenger cars, three locomotives and all the buildings and fixtures at seven way stations.

Without any assistance, and with the military authorities working the most profitable part of their railroad (between City Point and Burkville,) the Board of Directors commenced the work of repairs as soon as they received permission from Government. Up to this time the bridge at Buffalo has been rebuilt; the bridge at Farmville will be completed this week, and the company has nearly timber enough got out to trestle up the four spans of the High Bridge. They have also two saw mills at work sawing the timber for the other bridges.

With their present means the company expects to be able to complete all their bridges and have the road in good running order by the first of September. At present the cars run between Farmville and James River, connecting by canal boat with Lynchburg. In the course of next week cars will be put on the road between Burkville and the High Bridge, to connect with the cars on the other side of that bridge, reducing the portage to half a mile, and enabling passengers to make the trip from Richmond to Lynchburg in fourteen to fifteen hours.—*Richmond Times, July* 14.

The North Carolina Railroads.

We are advised that the Wilmington, Charlotte and Rutherford Railroad will be fully repaired and opened for traffic from this city to its western terminus during the present, or early next week. The work has been prosecuted with commendable energy, and the re-opening of the road will throw into the hands of our merchants a large amount of produce that has for more than a year been awaiting a market, and so greatly stimulate the business of the town.

The Charleston papers contain an advertisement of the re-opening *to-day* of the Northeastern Railroad through its whole length.

The Wilmington and Manchester road, connecting with the above at Florence, and forming the old established through route between this city and the South, will be fully repaired and re-opened to the public in about thirty days. A very large force of workmen is employed upon this line, and no efforts are being spared to expedite its completion.

A note appears elsewhere in this paper calling a meeting of the stockholders of the Wilmington and Weldon Railroad Company, preparatory to putting themselves in a position to receive their line back from Government. We understand that the Government has signified its readiness to turn this road over to the company whenever the company shall be qualified, under the terms of the amnesty proclamation, to receive it.

Thus, probably within sixty days at the farthest, all our lines of travel will be re-established, and Wilmington will once more be upon the great highway from the North to the South, and on the line over which the great through mails are transported. Then will our business receive a new impetus, and prosperity indeed will dawn upon us.—*Wilmington Herald, July* 21.

☞ A meeting of the stockholders of the Memphis and Charleston Railroad was recently held at Huntsville, Ala., and directors elected to serve until the expiration of the annual term, September 21. From statements made to the meeting, we learn that the road will be turned over to the company in a short time, and that its reconstruction will be immediately commenced. No other road in the South has suffered more during the war. It has been in possession of both armies at different times, and nearly every mile of it has been fought over. All the bridges and trestles have been destroyed, the track mostly torn up, and station houses and ties burned.

☞ The Iowa Division of the Chicago and Northwestern Railway, is now open to Boonesborough, 32 miles west of Nevada, the previous terminus being 202 miles west of the Mississippi River. The distance uncompleted to the Missour River, is only 130 miles.

Saturday, July 29, 1865.

Stock Exchange and Money Market.

The Money Market exhibits considerable tameness. The spirit of speculation lives as unchanged in character or expectation as ever, but it is often sadly at a loss to know which way to move. The last Government loan is absorbed, and that opportunity is departed; it is eagerly asserted in some quarters that the Treasury is out of money, and will have to resort to new measures to supply itself, even before the meeting of the next Congress. Rumors are at the same time put afloat that claims against the Government are springing up in enormous amounts, and that we may yet see our National debt mounting to five thousand millions of dollars. We believe the Treasury department which is for the first in a long time conducted on the principle of liquidating and paying its debts without delay, has found the claims of the army and navy unexpectedly large; and if so, it is the fault of those departments alone if the amounts of their requisitions and estimates have not earlier been placed within the knowledge of the Treasury department, one of the circumstances unfavorable to its easy management, and one not generally sufficiently understood. Secretaries of War and of the Navy rarely consider where the money is to come from when they are desirous of being most efficient. It is the civil side of the Government on which the load of financial and permanent responsibility falls. It was one of the great anxieties of Mr. Chase that economy should prevail to the utmost possible extent in the associate departments, and if it does not, no human ability can tide over embarrassment and want of money. The legacy of immense expenditure has consequently descended to the present Secretary, and will task all his ability to get through with it. We must therefore make every allowance for difficulties such as no modern financier has ever before encountered.

Yet our confidence remains as strong as ever, that the way out of our difficulties will become clearer, and that we shall ere long arrive at a knowledge of the real balance for which the country has to provide. We notice that it is stated, almost officially, that notwithstanding the pressure of outstanding claims against the Government, the total of the public debt was on the 1st of this month, not more than two hundred millions or thereabouts beyond the previous recognized balance; although it was asserted it had almost doubled; and we are inclined to believe that the final result will be more favorable than the alarmists have lately predicted.

It is understood that the subscriptions to the third series of the 7-30 loan have been closed; the whole balance remaining over from the previous week having been taken. It will be remembered that great exception was taken, even in very friendly quarters, to the option which at the start, the Secretary reserved to himself of paying the interest in gold or currency under certain conditions. It was contended that by this course of conduct he had jeoparded the loan itself, and checked a liberal tendency in the people at a critical moment. Time has, however, fully justified Mr. McCulloch in his decision. He has saved both at the present time, and in the future a considerable amount of interest, and received the principal as fast as he could apply it to the wants of the Treasury. We imagine that the Secretary's experience and skill may be safely trusted in all cases where the form, tenor and spirit of the contract become material. Accustomed to the habits of capitalists, he may be considered a safe judge of their *instincts*.

The gold market continues to employ the attention of our political economists of the press, with various effect. The premium so called was about 42 for the week; and it is said that it was if possible, to be raised to 45, at which price the combination was to be satisfied, and to unload. It is generally understood that parties controlling five millions of coin have been operating for some time for a rise, and have had so much difficulty in the effort, that they are willing to close out with a small advance from the present rate. Generous men! who during a war of frightful extent

and character have employed their wealth to enhance the prices of the necessaries of life, to embarrass the Government in the prosecution of the war, and even now, when their cause and their hopes are overthrown by the just triumph of a just cause, continue their attacks on the National credit, assail the Government finance on every occasion, and whisper continued suspicions of the solvency of the Treasury, and the integrity of its administration. Of such are the latest movements in a morning cotemporary, which charge the Secretary with selling gold for the particular advantage of personal friends, and in order to keep down the rates. If it be true that the Treasury has disposed of any of its surplus gold, we are pleased to hear it. We always advocated this idea when Mr. Chase was Secretary; and the good effects of it were often witnessed. We are in favor of it now. If there is one function of more importance than another to be exercised by the Treasury, it is to steady its *own currency*. The legal tenders are its offspring, and should be looked after. On this principle if no other, the Secretary may enter the gold market and keep down the price. We observe that it is much discussed whether he has the right to do this, or that, and whether the law does not contemplate the application of his surplus to this or that object. We know this one fact, that every time gold goes up one per cent. in Wall street, the holders of our currency lose nine millions of dollars in the purchasing power of that currency; if two per cent. eighteen millions of dollars; and so on in proportion. On the speculative rise of gold, prices go up of all the necessaries of life, and avarice and fraud continue their work of gain at the expense of the laboring classes—of all who toil, economise and struggle. It is a frightful fact that every time the Wall street operators put up gold 2 or 3 per cent., no matter how, they wipe out of the pockets of the people the value of eighteen millions of dollars, and render them just so much the poorer for the time being. And just at this moment, when the Government is the chief absorber of gold through the Custom Houses, and has more on hand than it can disburse under any of its engagements, when it in fact is in some measure the cause of its advance, can any one doubt that it is its duty to interpose strongly against a fictitious and unprincipled rise in the premium. By keeping down this premium the legal tender money is kept up, its purchasing power is enlarged, the holders are protected, the Government honor is proportionably sustained, and above all labor is more nearly paid its value. What better task can the Treasury be engaged in than to keep up the value of its money, some day we trust to be redeemed dollar for dollar in gold, and while it has more of the article than it can possibly employ, use the accumulating surplus to sustain the value of the legal tenders by reducing the premium on gold. We confess we see not only no objections to this course, but every possible reason for it. Indeed if we were at the head of the Treasury department, we would try conclusions with the gold gamblers oftener than they would like; and it is to be hoped that the Secretary will not hesitate, when he has a clear indisputable surplus of gold on hand, beyond all contingency a surplus, that he will set it afloat, since by so doing he reduces the premium, enhances the value of the legal tenders, and adds just so much to the purchasing power of the currency, and the ability of consumers to purchase.

We have had enough of this clamor against the Treasury in times past to know what it means. If Mr. McCulloch can make his paper dollar worth from 5 to 10 cents more to-day than it was yesterday, and if he can keep it there by the judicious use of his accumulating and surplus gold, in the name of common sense let him do it. We shall not examine the sections of any act for the establishment of a sinking fund to see how it is to be initiated, if the Secretary will put his legal tender at par of gold, or even approach it within ten or fifteen per cent. What we want is good money, and we hope if by selling his surplus gold the Secretary can improve the value of the currency he will do so, whether the cavillers like the operation or not.

At the same time it is observable that the discontented have another great grievance to complain of. The demand for 5-20's continues from abroad, instead of the reverse. An avalanche of three hundred millions of our bonds, which was coming over a few week's since in a body for redemption (before they were due,) was predicted, and with it specie bankruptcy beyond all peradventure. Yet strange to say, we are still undisturbed, unruined, even unterrified. The last steamer brought further orders for the 5-20s, and the price has actually advanced. And it is only common sense to think that the foreign demand, instead of falling off, is more likely to increase as our financial arrangements become more simple, and our National progress is developed.

It has been suggested that the U. S. Government might derive a very large amount of gold by entering at once upon the business of mining in its prolific territories, and by a regular system of producing, and minting could work a thousand gold mines at once with absolute profit. That there is gold enough in Colorado alone to pay off the National debt no one doubts. The question is, whether a system could not be devised by which the Government could obtain it.

It appears from the recent advices from San Francisco up to the 1st of July, that the receipts of treasure from the interior and the North Coast for the month of June, were $5,300,000; and that the exports of specie from 1st January last up to July 1, were $21,050,613 23—showing a decrease from the amount exported the same time in 1864, of $7,943,098 04. It must, however, be remembered that the falling off in the production of the coast may be accounted for by the emigration to the territories which are paying better, and where the yield is rapidly increasing by far more than the above difference. The gold receipts at this port from California during the present year to date, have been of $9,897,933, against $6,603,011 same time last year—an excess of $3,294,922.

The most important foreign news, however, is that the crops of cereals abroad are ascertained to be almost a failure. In France the complaint is universal, and so on the continent. The probability is that we shall have an advance in our market of a very decided character, and if so the splendid yield of our own fields will be opportune and profitable.

The Money Market is considered to be more active than heretofore, yet the article is abundant. We are not disposed therefore to discuss as some do, what would happen if *there was* a tight market. When it comes we can attend to it.

Foreign exchange still remains dull, and virtually below par. This is absolute demonstration of the fact that commercially the U. S. is not a debtor Nation, whatever it may now be as a seller of securities.

Railway securities are dull, but in good repute. The earnings of the roads continue to look favorably and promise well. At the same time it will be advisable for parties studying these subjects not to be misled by the inaccurate reports which find their way into new and ambitious journals, the result of zeal without knowledge, at least in this department.

The balance in the Sub-Treasury on Tuesday was $55,128,693.

The aggregate value of the exports for the week ending July 25, exclusive of specie was $2,947,348.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Kentucky 6s, 96; Connecticut 6s, 96; Georgia 6s, 80; Illinois coupon bonds, 1862, 95; do., 1870, 95; Indiana 5s, 86; Ohio 6s, 1886, 97½; N. Y. 7s, Bounty Loan, 99; Jersey City Water Loan, 95; Indianapolis and Cincinnati 1st pref., 35; Brunswick City Land Co., 11; American Coal, 65; Bank of Commerce, 105; Central Bank, 104, Bank of America, 135; Bank of Commonwealth, 100; Am. Ex. Bank, 114; Metropolitan Bank, 120; 4th National Bank, 100½; Continental Bank, 94; Tradesman's Bank, 126.

Philadelphia.—Tioga R. R., 7s, 100; Westchester 7s, 100; Elmira and Williamsport 5s, 72; Allegheny Co. 5s, 72¼; Pittsburg 5s, 71; 13th and 15th streets R. R., 20; Fulton Coal, 5½; Big Mt. Coal, 4⅛; Mechanics Bank, 28½; Farmers and Mechanics Bank, 118; Big Tank Oil, 1; Corn Planter, 1½; Caldwell, 2; Curtin, 2¾; Dalzell, 3⅜; Duncard, ⅛; Excelsior, ⅜; Glen Rock, 5½; Junction, 3⅛; Krotzer, ¾; McClintock, 1¾; Mingo, 2⅛; Maple Shade, 10½; McIlheny, 1¾; Oil Creek and C. R., 1¼; Royal, ⅝; St. Nicholas, ⅞; Slippery Rock, 1½; Sugar Dale, 2; Tarr Farm, 1; Tarr Home, 2; Walnut Island, ¾. ☞ Hon. Edwin Noyes, one of the most active and efficient railroad officers in New England, has accepted the office of Superintendent of the Maine Central Railroad, and will at once enter upon its duties.

Hudson River Bridge.

The new bridge now building across the Hudson River, at Albany and Greenbush, is progressing very rapidly. All the piers are completed, and the work of construction of the bridge proper will be commenced without delay. It is located about a quarter of a mile up the river from the Boston and Albany depot on the east side, and its western terminus is in the New York Central Railroad yard in Albany. When completed, cars on the Boston, Hudson River and Harlem roads will be enabled to run to the starting point of the New York Central trains, and those loaded with freight, and perhaps passenger cars, will run through to Buffalo and the West.

Wants of Southern Railroads.

It is apparent that the people of the South are awakening to the necessity of re-establishing their system of railways and canals, almost destroyed by the recent effects of war. They are wise in this; and the sooner they get back to the former condition of business the better. We, here in the North, sympathise with our old friends, in their internal Improvements, and are ready to co-operate with them in renewing and restoring the former lines of communication, and the old bonds of Union. We are able to furnish all the material necessary to restore them to their former usefulness and value, and the attention of our engineers, machinists, contractors, etc., may be very properly directed southward at this moment with advantage to all parties.

We have before us a letter from Henry M. Doane, Esq., General Superintendent of the Wilmington and Manchester railroad, dated Wilmington, N. C., July 1, 1865, in which he says: "I desire to be put in communication with several first-class car builders; railroad supply agencies; builders of machinists tools; makers of car builders tools; and houses furnishing materials and supplies needed by railroads. If you have any friends in these lines it might be to their interest to communicate with me enclosing me cards, catalogues, or otherwise. We need much of this nature, and having been isolated for four years, do not now know who are still engaged in the above business. It occurred to me this letter might be of service to some friends of yours, you might be disposed to advise to communicate with me. At the same time you would be doing me a favor by informing me in this way as to who are now engaged in the above lines."

The letter was of course accompanied by a request to forward the Journal. Other letters of similar purport have preceded it, and more will follow. It is a necessity to those who are engaged in the construction or operation of railroads. In it will be found the address of many of our principal manufacturers and supply agents, to whom we take pleasure in referring our southern friends. It will not be long before the Journal, as before the war, will be found upon the desks of most if not all the superintendents of our southern roads. As a medium of advertising such articles as are required in the operation, maintenance and construction of railroads it has therefore no superior. And for the dissemination of useful information in reference to the condition of our railroad companies at the north, the American Railroad Journal stands first, and will continue to occupy the front rank, as heretofore.

The Russian Telegraph Expedition.

A dispatch from San Francisco says that the barque Golden Rule, the flag ship of the Russian Telegraph expedition, and the steamer G. S. Wright, with Col. Buckley, commander of the expedition, his staff and a number of employes, sailed on the 12th for the Gulf of Anadir and shores of Bhering's Straits. The land force of the expedition comprises about 1,500 men. Three other vessels are attached to the service, viz: the barque Palmetto, which recently sailed from Nanams with coal, the schooner Milton Badger, now loading at Nanams, and the barque Clara Bell, en route from New York to Sitka direct. The fleet is under the command of Captain C. W. Scammon of the revenue service. The vessels carry from two to six guns each. The Clara Bell carried the cable to be laid across Bhering's Straits and a small steamer for river exploration. Col. Buckley himself will examine the Gulf of Anadir for the best crossing place to Asia. It is 400 miles wide, with an island in the middle. The land work is to go on at once on the whole line from New Westminster to near the mouth of the Amoor River, a distance of 4,000 miles.

The Public Debt.

The Washington *Intelligencer* says at the close of the month the statement from the Treasury of the amount of the public debt will not much vary from the statement of the 1st June, except as increased by the issue of certificates of indebtedness, and by the last series of the seven-thirty loan. The amount of the debt on the 1st of August may be twenty-eight hundred millions, or a little more. It says—

"The authority for borrowing money on long loans will be exhausted with the last series of seven-thirties. There will be no new loan till Congress shall authorize one, and meanwhile, it is supposed that the Treasury can meet all demands upon it by the current revenue; and without calling too rapidly upon the National banks for the public deposits."

Richmond and Danville Railroad.

We learn that Mr. Dodamead, General Superintendent of this road, has already contracted with a large Baltimore firm for the speedy building of a substantial bridge over the Appomattox River. The company are now advertising for proposals for the rebuilding of the bridges over the James River at Richmond, and for their bridge of the Staunton River. The aggregate length of both bridges is 1,440 feet.

Railways in Mexico.

It is stated that several lines are being vigorously pushed forward in Mexico. The Government has just conceded to M. Arnoux the privilege of establishing in certain streets of the capital and on some roads leading to neighboring villages, railways after the American system. The works of a great line from Vera Cruz to Mexico are advancing rapidly. The English Company which has a concession of this undertaking has concluded an arrangement with French engineers for the execution of a very difficult section, that to Orizaba. There are 600 workmen employed a one point, Maltrata.

☞ The Kersey Oil and Mineral Company are canstructing a railroad between Oil City and Plummer, which will be completed and in running order in about three months. A. H. Gurney, Esq., is superintending the construction of the road.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railroad for the week ending July 14, 1865, was as follows:

Passengers	$27,932 66
Freight and live stock	22,212 02
Mails and sundries	1,433 57
Total	$51,578 25
Corresponding week of 1864	45,314 64
Increase	$6,263 61

The earnings of the Marietta and Cincinnati Railroad for the second week in July, 1865, were:

	1865.	1864.
Passengers	$10,836 27	$7,523 37
Freight	12,444 13	8,976 18
Mail, express & telegraph	1,100 00	1,189 58
Total	$24,380 40	$17,689 13
Total this month to date	47,606 75	38,104 84
Total for the fiscal year commencing Jan. 1	$592,063 01	$503,874 22

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending July 14, were:

	1865.	1864.
Passengers	$3,514 63	$2,501 52
Freight	13,193 88	10,142 03
Express	162 80	104 16
Mail	296 58	296 58
Total	$17,167 89	$13,044 29

Receipts from January 1 to July 14:

1865	$328,430 66
1864	294,862 47
Increase	$33,568 19

The earnings of the Chicago and Northwestern Railway for the second week in July, 1865 were $161,138 78
Corresponding week of previous year. 124,305 23

Increase 29.63 per cent	$36,833 55

The earnings of the Chicago and Rock Island Railroad for the third week in July, 1865, were $54,167 00
Corresponding week of previous year 50,999 00

Increase	$3,168 00

The Detroit and Milwaukee Railroad traffic for the 3d week in July was $30,187 00
Corresponding week of previous year 21,430 00

Increase	$8,707 00

The Michigan Southern road earned the 3d week in July, 1865 $60,737 00
Corresponding week of 1864 58,242 00

Increase	$2,495 00

The earnings of the Grand Trunk Railway for the week ending July 15, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$49,803 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	61,161 00
Total	$115,000 00
Corresponding week, 1864	113,927 00
Increase	$1,073 00

The earnings of the Michigan Central Railroad for the 2d week in July, 1865, were $72,952 55
Corresponding week of previous year 58,297 82

Increase	$14,654 73

The earnings of the Chicago and Alton Railroad for the 2nd week in July, 1865 $79,778 00
Corresponding week of previous year 55,971 00

Increase	$23,807 00

The earnings of the Chicago and Northwestern Railway for the 3d week of July were $164,046 64
Corresponding week of 1864 117,236 02

Increase 39.92 per cent	$46,810 62

Railroad Earnings--Monthly.

The earnings of the Hudson River Railroad for the month of June, 1865, were $310,049 00
Corresponding month of previous year 253,049 00

Increase	$57,000 00

Interest and Dividends.

The Erie Railway Company have declared a semi-annual dividend of 3½ per cent. on the preferred stock, and 4 per cent. on the common stock, both payable, less the government tax, on the 21st of August.

The Michigan Southern and Northern Indiana Railroad Company have declared a dividend of 5 per cent., less the Government tax, payable on the 1st day of August next, to the holders of the guaranteed stock of the company.

The Long Island Railroad Company will pay a quarterly dividend of two per cent., on and after August 2, 1865.

The Philadelphia and Trenton Railroad Company have declared a semi-annual dividend of 5 per cent., clear of taxes, payable on the 31st inst.

The Bellefontaine Railway Company have declared a semi-annual dividend of 3 per cent., free of government tax, payable on the 1st of August next.

The Hazleton Railroad Company a semi-annual dividend of 4 per cent., payable on the 7th of August.

The Thirteenth and Fifteenth street Passenger Railway Company, a semi-annual dividend of $1.50 per share, clear of taxes, payable on demand.

The Morris Canal and Banking Company has declared semi-annual dividends of five per cent. on preferred stock, and four per cent. on consolidated stock, payable August 1.

The Pennsylvania Coal Company will pay, August 1, a dividend of five per cent.

The Briggs Gold Company, have declared a dividend of three dollars per share, payable July 31st, 1865.

The August coupons on bonds of the Marietta and Cincinnati Railroad Company will be paid on and after 1st prox. at the American National Bank.

Northern Central Railway.

The Commissioners of Finance for Baltimore have disposed of the city's interest in the Northern Central Railroad Company, to James McDougall & Co., of Baltimore, for $1,050,000. The interest consists of debt and interest due by the railway company to the city by virtue of two mortgages; the one dated April 19, 1837, for $600,000, bearing interest at the rate of six per cent., payable quarterly until 1870, when the principal becomes payable; the other dated May 16, 1838, for $250,000, bearing interest at the rate of five per cent., payable quarterly until 1870, when the principle becomes payable. Also 4,000 shares of the capital stock and all interests or dividends claimed by the city; no part of the principal or interest of the above claims have yet been received by the city. The mortgage of the York and Cumberland Railroad Co. is not included. The sale of all the above claims and interests are without recourse to the city. The terms of sale are—one-fourth cash, one-fourth in sixty days, one-fourth four months and the balance on the 15th December, with interest on the credit payments, or cash, at the option of the successful bidder.

Right of Eminent Domain.

Marietta Ohio, July 19, 1865.

EDITOR RAILROAD JOURNAL:

DEAR SIR—I wish to inquire if you have any knowledge of any legal decision upon the following point:

When a railroad company acquires the right of way by usual deed, and afterwards discontinue their road and remove their track, does the land revert to the original owner of the property.

W. B. G.

In reply to our correspondent's query, we would say that there has been some question among lawyers as to what is the precise effect of a deed, in fee simple, to a railway company. It would seem on general principles that a party, having executed a deed of his land to the company, should be estopped from claiming any interest in the land. But it seems to be agreed in all the books that to the efficacy of a deed of land, it is requisite that the grantee be capable of taking the estate. And if the grantee be an alien or a corporation, incapable of holding such estate the deed is inoperative. Hence, says Judge Redfield, in his treatise on Railways, a just inference is drawn from the reasoning of the court in some cases, that a railway, by a deed in fee simple, acquires only a right of way, (Dean *vs.* Sullivan R. R. 2 Foster, 316; U. S. *vs.* Harris, 1 Sumner 2.)

The general course of decisions in this country coincides with the English common rule, in regard to the title acquired by the public by the exercise of the right of eminent domain, that is, that no more of the title is divested from the former owner than what is necessary for the public use, (Dovaston *vs.* Payne 2 H. Bl. 527; Rust *vs.* Low, 6 Mass. R. 90; Jackson *vs.* Rutland and Burlington Railway, 25 Vt. R. 151; 2 Rolle's Ab. 566, p. 1). In an important case (Barclay *vs.* Howell's Lessee, 6 Pet. R. 498) in the supreme court of the United States, involving questions of title in regard to the streets in the city of Pittsburgh Mr. Justice McLean thus sums up the general doctrine.

"By the common law, the fee in the soil remains in the original owner where a public road is established ever it; but the use of the road is in the public. The owner parts with this use only; for if the road shall be vacated by the public, he resumes the exclusive possession of the ground; and while it is used as a highway, he is entitled to the timber and grass which may grow upon the surface, and to all minerals which may be found below it. He may bring an action of trespass against any one who obstructs the road."

Some of the American cases seem to intimate a different rule from that which generally prevails in regard to highways, in regard to the title acquired by railway companies, (12 Barb. 227; 4 Comst. 349; 3 Zab. 227).

But in a late case in Massachusetts(2 Gray 574), the title seems to us to be explicitly and fully stated, and the only ground of distinction between Railways and common highways, as to the title of the land taken, very intelligibly pointed out. The

court here say, "The right acquired by the corporation, although technically an easement, yet requires for its enjoyment, a use of the land permanent in its nature and practically exclusive."

Hence it seems to be admitted that even in cases where the statute provides for the taking of the fee, upon the discontinuance of the public use, the land reverts to the former owner, (11 Barb. 26; 1 Sumner, 21). But where a special act authorizes a municipal corporation to hold the fee of the soil for the site of an almshouse, it was held that the original owner and his representatives could claim no exclusive interest therein; or any reversionary title thereto, after the removal of the almshouse to another site, (3 seld. 314).

The whole subject is discussed in *Redfield on Railways.*

European and North American Railway.

The annual meeting of the stockholders of this company was held in this city on the 19th inst. The stockholders authorized the Directors to unite with, or enter into contract with, the Maine Central Railroad in a union of the two lines, or for the running of the line by the Central road.

The contract with the New Brunswick Company was ratified and adopted, with authority to make one interest from Bangor to St. John.

The Act of the Legislature of Massachusetts, in aid of the construction of the road was accepted, and an issue of $1,000,000 in bonds authorized, secured on the line from Bangor to the boundary of Maine, subject only to the lien of the city of Bangor on the road to Lincoln, with the lands and timber granted by the State of Maine as collateral security in the hands of trustees.

The Directors were authorized to issue $2,300,000 bonds, secured on the entire line and its branches, with the claims of Maine and Massachusetts against the United States assigned to the company as collateral security therefor in the hands of trustees.

The President was authorized to enter into contracts for building the entire line from Bangor to St. John.

Arrangements are now made for commencing the work on the subscription of $500,000 of additional stock, and the completion of the line within four years from Bangor to St. John.

The choice of Directors was postponed to an adjourned meeting to be held on the 23d of August. Meanwhile the old board will take measures to raise subscriptions to the stock, and the election will be made by the existing stockholders.—*Bangor Whig.*

Milwaukee and St. Paul Railroad.

A special term of the U. S. Circuit Court, Judge S. F. Miller presiding, assisted by Judge A. G. Miller, has just closed. The question which has occupied the attention of the Court, has been the ownership of the eastern division and the rolling stock of the old La Crosse and Milwaukee Railroad. The case was argued by J. W. Cary, and W. P. Lynde, for the Milwaukee and St. Paul Company, and Mat. H. Carpenter and Hon. Caleb Cushing, for the Milwaukee and Minnesota Company.

The substance of the decision is that the application of the Milwaukee and Minnesota Company for an injunction against the Milwaukee and St. Paul, and transfer of custody of the rolling stock has been denied. The Milwaukee and St. Paul Company has also been ordered to pay over $360,000 which it has in its hands, but the company has taken an appeal to the Supreme Court on about $230,000 of this sum.—*Milwaukee Wis.*

☞ It is reported "that a Committee of Directors of the Rock Island Railroad has been appointed to confer with a committee representing the Mississippi and Missouri Railway, with a view to the consolidation of the two lines."

Placerville and Sacramento Valley R. R.

The Sacramento *Union* says that the track of the Placerville and Sacramento Valley Railroad is rapidly extending into the mountains. Some 26 miles of the road extending from Placerville to Shingle Springs have been in operation since the 10th of June. The trestle bridge at Big Gulch is 424 feet long, and 80 feet high in the centre, and is an imposing structure. It contains nine spans of 40 feet each, with approaches of 32 feet at each end. The only other trestle bridge on this section of the road is the Latrobe trestle, which is 40 feet high and 746 feet long. The two deepest cuts on the new portion of the road are Bryant's cut, 25 feet deep and 1,100 feet long, and another 22 feet deep and 400 feet long. The heaviest fills are 35 feet deep and 500 feet long; another 26 feet deep and 500 feet long, and a third 20 feet deep and 700 feet long. It is the design of the company to have the portion of the line between Shingle Springs and Mud Springs, a distance of six miles completed by the 1st of November. About 800 hands are employed upon the road. Shingle Springs is 1,432 feet above tide water. The freight depot at that place is about 1,000 feet long.

☞ On the 10th inst., J. Dutton Steele, Esq., Chief Engineer of the Reading Railroad, was relieved from the duties of that position by the Board of Directors. The cause of the change has not generally transpired, but it is well known that it was not on account of inefficiency or want of fidelity on the part of Mr. Steele to the interests of the company. He has been at the head of the Engineering Department, at Pottstown, for many years, and has managed the interests committed to his care with the greatest ability, honesty and faithfulness. As an Engineer and Railroad Manager, Mr. Steele has few, if any superiors, and no temporary displacement such as this, can take from him the high reputation he has won in his profession during some twenty-five years of hard labor. To the people of Pottstown, the removal of Mr. Steele is a matter of much surprise and regret, and the hope is generally entertained that he may still continue to reside here as a citizen.

No successor to Mr. Steele has been appointed, as yet, we believe. George Rice, Esq., Resident Engineer of the road, at Pottstown, is acting as Chief Engineer for the present. The position on such a railroad as the Philadelphia and Reading, with its numerous branches and extensions, is a very arduous and difficult one, requiring the person who holds it to bring to his aid not only long experience, but at same time the highest order of intellectual capacity, energy and enterprise.—*Pottstown Ledger.*

☞ A Cincinnati letter to a New York paper says: "The Mad River Railroad has purchased the right of way of the Tunnel Railroad at a large price, say about $150,000, but it pays for half of it in bonds, which cost it only about 20 cents on the dollar. Some very wealthy capitalists in Boston, New York, Philadelphia and Washington City, one of them closely allied to the United States Treasury, will be the chief owners of this new line. It will cost them less than any other railroad in Ohio."

☞ The Detroit papers state that Mr. W. K. Muir, Manager of the Detroit and Milwaukee Railway, left that city on the 15th inst., for a three months' trip to Europe. Before taking his departure he was waited upon by the President of the road and a number of influential gentlemen, who wished him a safe and happy voyage.

Virginia and Tennessee Road.

All the bridges on the Virginia and Tennessee road between Lynchburg and Bristol were burnt just before the close of the war, except four—two at Peak Creek and two at Lynchburg. They, however, have been all rebuilt. Forty miles of the track, exclusive of the bridges, were also torn up; but by using the material obtained from the sidings or turnouts, it has been relaid. Consequently the entire road between Lynchburg and Bristol, a distance of two hundred and five miles, is in complete running order. All the depots along the route were burned except two, but these have not been built; owing to the tightness of the money market. This is the longest road in the South.

Southern Minnesota Railroad.

The La Crosse *Republican* says that a contract has been closed for the delivery of iron enough to lay twenty miles of track in addition to the first ten miles already contracted for. Chairs for the first ten miles have also been purchased. The spikes were obtained from a line at St. Paul that has suspended work. Track laying was to have commenced on the 1st inst.

☞ We publish in another column the card of Messrs. Nichols & Strong, Bankers and Brokers, No. 26 New street. These gentlemen have each the advantage of long business experience, Mr Strong having been formerly for 15 years connected with the City Bank, and the latter the well known member of the firm of Graham & Nichols, both members of the New York Stock Exchange. They now propose the transaction of a general stock commission business, and will no doubt draw around them a host of friends and customers.

☞ The long talked of International bridge at Buffalo seems about to be realized. Two million five hundred thousand dollars has been pledged for the work, which will consist of a durable and elegant iron bridge to span the Niagara at that point, as well as for the construction of a grand union depot building, and the seven miles of railway around the city to connect the eastern lines with the bridge. The contract has been let.

☞ The new bridge across the Allegheny at Oil City will, when completed, be one of the finest in the West. It is to be a suspension bridge of two spans of three hundred and twenty-five feet each, and one of one hundred and sixty-two and a half feet, the latter on the Oil City side. The platform will be thirty-five feet above the level of the river, and will consist of double track for teams seventeen feet wide, and sidewalks between the track and suspenders, five feet higher than the track. The cables will be two in number, and the platform be attached to them by nine suspending rods.

☞ The whole quantity of salt inspected on the Onondaga (N. Y.) Salt Springs Reservation from January 1 to July 1, 1865, is 842,965 bushels. The whole quantity inspected during the same time in 1864, 1,596,140 bushels. Decrease, 753,175.

☞ The lake tunnel at Chicago has now reached a length of two thousand nine hundred feet, and is progressing at the rate of twelve feet per twenty-four hours. A contract has just been made for tunneling the Chicago river.

Railways in India.

The through line from Lahore to Mooltan, on the Indus, is opened. The branch line from the Great Bombay and Calcutta Railway, which pierces the cotton country to Nagpore, is making great progress. The contractors who have got the railway from Lahore or Uinritsir to Meerut and Delhi are hard at work. The only break which remains to be considered is that along the desert side of the Indus from Mooltan to Kotree, the terminus of the line from Kurrrachee, which will soon have to be filled up by iron links. Then Calcutta will be in direct communication with Kurrachee, 2,000 miles off; with Bombay, 1,600 miles off, and Nagpore, 1,100 miles off, by rail. Whether we look at the magnitude and solidity of the works, or at the distance which they traverse, the railways of India will far surpass those in most European countries. They will cover 5,000 miles, at a cost of seventy millions sterling.

☞ Coleman's San Francisco circular of June 16th says: "A further addition to our banking capital is anticipated at an early day from the establishment of the London and San Francisco Banking Company in this city, under the management of Mr. M. S. Latham, a gentleman of well-known intelligence and high standing, who is associated in this enterprise with some of the leading capitalists in Europe.

RENSSELAER POLYTECHNIC INSTITUTE, TROY, N. Y. The FORTY-SECOND ANNUAL SESSION of this well-known SCHOOL OF ENGINEERING AND NATURAL SCIENCE, will commence SEPT. 13TH, 1865. The NEW ANNUAL REGISTER, giving full information, may be obtained at D. APPLETON'S Bookstore, New York, or from
Prof. CHARLES DROWNE, Director, Troy, N. Y.

THE NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, Albany, July 21, 1865.

TWENTY-FOURTH SEMI-ANNUAL DIVIDEND. The Directors of this Company have declared a semi-annual Dividend of Three per Cent. on the capital stock thereof, free of the United States income tax, payable on the 21st day of August next.

Dividends in New York will be paid at the office of DUNCAN, SHERMAN & CO.; in Albany, at the Albany City Bank.

The transfer books will be closed at the close of business on MONDAY, the 31st day of July inst., and be reopened on the morn ng of THURSDAY, the 24th day of August next. JOHN V. L. PRUYN, Treasurer.

OFFICE OF THE ERIE RAILWAY COMPANY,
No. 187 WEST ST., NEW YORK, July 26, 1865.

DIVIDEND.—The Directors of this Company have declared a Semi-annual Dividend from the earnings of the road for six months ending June 30, of THREE AND ONE-HALF PER CENT. on the Preferred Stock.

Also, a Semi-annual Dividend of FOUR PER CENT. on the Common Capital Stock.

Both payable, less the government tax, on MONDAY, the 21st day of August next, at the Treasurer's Office, Erie-place, to the registered holders of stock at the closing of the books.

The transfer books of both classes of stock will be closed on the afternoon of Saturday the 5th, and be reopened on Wednesday, the 23d day of August.

30-4t HORATIO N. OTIS, Secretary.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, July 11, 1865.

AT A MEETING of the Board of Directors of this Company, held this day, it was

Resolved, That a DIVIDEND of FIVE PER CENT. in cash, free of Government tax, be paid on the 1st day of August next, to the holders of the full paid shares registered on the 15th day of July, and that the transfer books be closed on the said 15th day of July, and opened on the 3d day of August.

Resolved, That in pursuance of the measure recommended by the Shareholders' Meeting, held May 31st, 1865, and in order that the lands sold may be represented by a corresponding issue of Capital Stock, in accordance with the policy heretofore pursued by the Company in the issue of Canceled Bonds Scrip, the outstanding shares of this Company be increased by the issue of one share for every ten now outstanding, and the same be distributed to the holders of shares registered on the Company's books, on the first day of August next, in the proportion of one share for every ten held by them.

Resolved, That where, in the distribution of such shares, a stockholder would be entitled to a fraction of a share, the Company will retain the right to such fractional part at par. THOMAS E. WALKER, Treasurer.

Car Covering or Roofing.

KINGMAN'S CEMENT WITH HEAVY CANVASS, used by many roads as a substitute for Car Duck. WILLIAMS & PAGE, Boston.
July 19th, 1865.

RICHMOND AND DANVILLE RAILROAD,
SUPERINTENDENT'S OFFICE,
Richmond, Va., July 12th, 1865.

NOTICE TO BRIDGE BUILDERS.—Proposals are invited by this Company for the rebuilding of 7 spans of their Bridge over James' River at Richmond. Spans 120 feet. Also for their Bridge of the Staunton River, 4 spans of 150 feet each, making an aggregate length in both Bridges of 1,440 feet, the masonry in both cases is uninjured, the original structures were on the Howe Truss plan, the Track Stringers sustained on the bottom chord. Proposals are invited for their rebuilding on the same plan, but proposals made for other plans will also be considered. Address the undersigned at Richmond, Va.

THOMAS DODAMEAD Superintendent.

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,

STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, &c., can be obtained by mail or otherwise at our warehouse.

NEW YORK BELTING AND PACKING CO.,
JOHN H. CHEEVER, Treasurer,
Nos. 37 and 38 Park Row, New York.

Natural Lubricating Oil

FROM THE

HICKORY FARM OIL CO.'S

NEW WELL, NO. 2,

ON WEST HICKORY CREEK,

VENANGO COUNTY, PA.

This company are now receiving oil from the above well, of which they are exclusive owners, and are prepared to fill orders for delivery at this port or at the well.

The oil is of a specific gravity of 32 degrees Beaume, and has been pronounced, by all who have tested it, the best lubricator in the market.

Orders from railroad companies, jobbers and large manufacturers are solicited, and will receive prompt attention. Parties can at all times rely on a pure and uniform article.

Office of the Company, No. 92 Maiden Lane, New York. 3m-27

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dus ; and which if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

Official Experiments.

It is well known that during the whole war there has been a contest of opinion among experts as to the manner in which our national steamers have been constructed. The head of the department, Mr. Welles, is well known to have had neither the early education, nor the professional experience, necessary to qualify him to become of himself a designer, constructor, or even a judge of steam machinery. Mr. Fox, his assistant, who for some years previous to the war was an agent for a New England cotton factory, certainly did not bring to his place any official prestige; and the officers of the Navy have had but one opinion about his experience; so that after all, the responsibility of failures, and the glory of success, must belong to other parties. And they are forthcoming.

A Mr. Isherwood, a man of decided talent, and accustomed to push his way at Washington through many former and now justly forgotten administrations, has been really at the head of the the Bureau which "runs the machine;" and whatever of good or bad fortune has attended our steam marine, is chargeable to the plans, influence and direction of this gentleman, if we may believe what we have read, heard or know.

The most serious assaults made on Mr. Isherwood have been by Mr. Dickerson, an eminent, and enthusiastic and talented engineer of this city, and the contest has never yet been brought to a point. The war being over, Mr. Isherwoods plans, influence, and theories, amount to nothing in the future, and can hereafter put no money in any one's pocket; and on the other hand Mr. Dickerson and his friends, such as Mr. Fobes of Boston, will have only the glory of amateurs, and not the profits of contractors, no matter how well they succeed in establishing their principles.

Perhaps the truth will never be fully known, as to the merits or demerits of the contest which Messrs. Fox and Isherwood have so perseveringly maintained. It is to be hoped however that some competent authority will ventilate the subject sufficiently to let the public know what were the interests which prevailed, and who it was that was able to obtain contracts for vessels that never fulfilled their condition, theoretically or practically.

We make these brief remarks because we see the old controversy revived again on the part of Mr. Dickerson, who has challenged the Secretary of the Navy to compare the working of the steamer Algonquin with any similar vessel at the disposal of the Navy Department, in order to test their comparative excellence. The Navy Department has accepted the challenge, and submits the Winooski to the required test so far as this:

The two vessels, instead of running a trial trip to sea, and testing under all circumstances their effective service value, are to be tied up along side of a pier, so that they cannot move, and then the wise men of the Novelty and Dry Dock Works are to examine and report, how many times the wheels of these two steamers turn in a certain number of hours, the average number of revolutions, the quantity of coal burned, the pressure of steam, the amount of vacuum, and every other theoretical fact which engineers delight in questioning.

But the real superiority of the Algonquin to the Winooski will never be determined in this way. The movements of an engine, when a steamer is fastened to a dock, are no test of her power when in motion, as engineers well know; and as Mr. Renwick has recently explained in his card in the *Evening Post*. Nor is it practicable to work steam expansively under such conditions for obvious reasons.

We consider therefore the acceptance of the challenge by the Navy Department as a mere attempt to escape discomfiture, by a resort to technialities which will prove nothing at all.

We shall doubtless know how much coal the two steamers burned while lying still, how many times their wheels have turned, how high was the steam, and what was the average vacuum; but which on a voyage was the fastest, consumed the least coal, and came out in the best condition, we shall not know by this experiment, and it was never intended that we should know. To common sense people this trial is to be very similar to one which should be made to test the strength, speed and powers of endurance of two men, of really different frame, temperament, habits, circulation and appetite. To tie these men up to a stake, to fasten their legs, and then count the beats of their pulses, ascertain how much food they had consumed, and how much water, would give but very little idea of the endurance, speed or comparative powers of either. So a contest between two steam engines tied up to a wharf will give us no idea of what an exquisitely designed model, or splendid lines in the water will do when impelled by scientifically applied power. There are two systems at work, both different. They cannot be compared except by their difference and their opposites.

In short we consider these dock experiments utterly fallacious, and inconclusive, and tending to obscure and obfuscate the public mind, as no doubt it is intended. We are not trying wharves, or stationary engines, we are looking for fast steamers.

We consider the experiment about as useful and as satisfactory as if two steam saw mills were pitted against each other, to test the superiority of locomotives generally.

☞ At a Directors' meeting of the P., C. & B. V. R. R. Co., at Baraboo, Wis., Gen. A. W. Starks was chosen President of the company; Maj. Chas. H. Williams, Treasurer; A. A. Avery, Esq., Secretary, and L. J. Claude, Esq., Engineer.

☞ The annual meeting of the Belvidere Delaware Railroad Company, and the Flemington Railroad and Transportation Company was held at Trenton N. J., on the 26th ult., when the following directors were chosen for each corporation:

Belvidere Delaware Company.—Robert F. Stockton, Edwin A. Stevens, Richard Stockton, Ashbel Welch, Chas. Sitgraves, Chas. Bartles, Geo. M. Robeson, Lewis Perrine, Benjamin Fish.

Flemington Company.—Robert F. Stockton, Richard Stockton, Chas. Bartles, Jno. G. Reading, Edwin A. Stevens, Benjamin Fish, Alex. Wurts, Wm. P. Emery, Hugh Capner.

Chicago, Burlington and Quincy Railroad.

The earnings of this road for the year ending April 30, 1865, between Chicago and Burlington, Peoria and Galesburg: and Yates City and Lewiston, 300 miles, were:

From freight	$3,395,679 45
" passengers	1,158,596 21
" mails and miscellaneous	133,911 04
	$4,688,186 70

The operating expenses were:

Repairs of track	$709,273 68	
" bridges	43,992 15	
" buildings	67,270 26	
" fences	23,211 32	
" locomotives	318,766 69	
" cars	229,449 93	
Loss and damage	43,195 72

Distribution of stock	745,600 00	
Dividend Nov. 15, 1864.	519,600 00	
Transfer to sinking fund	102,664 86	
		2,304,362 04
Balance May 1, 1865		$988,401 03

The road of this Company consists of the line from Chicago through Galesburg to Burlington, 204 miles; from Galesburg to Quincy 100 miles; from Galesburg to Peoria, 53 miles; from Yates City to Lewiston, 30 miles, and that part of the old road from the Galena Junction to Aurora, 13 miles, making a total of 400 miles.

The expenditures made for construction and in the purchase of this 400 miles of road, including depot grounds and buildings in Chicago, but exclusive of the cost of equipment, has been	$12,472,407 44
For equipment	2,518,233 12
For Union Track in Chicago	64,612 31
Total cost of road, equipment and appurtenances	$15,055,252 87

The Capital Stock of the Company on the 30th of April was, $8,376,510.

The Funded Debt, exclusive of the Bonds canceled by the Sinking Fund, was as follows:

Chicago and Aurora and Central military tract bonds		$169,000 00
Chicago, Burlington and Quincy trust mortgage sinking fund, 8 per cent. bonds convertible		467,000 00
The same class of bonds, inconvert'e		3,167,000 00
Chicago, Burlington and Quincy trust mortgage 7 per cent. bonds, issued on road from Peoria to Burlington		680,000 00
Chicago, Burlington and Quincy second mortgage bonds, 4 and 4½ per cent., issued in exchange for bonds of Quincy and Chicago Railroad Company		941,000 00
Chicago, Burlington & Quincy scrip certificates issued for the same purpose as above, not bearing interest	$667,000 00	
Less scrip redeemed	196,031 25	
		500,968 75
Total bonds and scrip, average rate of interest 6.63 per cent.		$5,924,968 75
Capital stock		8,376,510 00
Total stock, bonds and scrip		$14,301,478 75

Excess of cost of road, equipment and appurtenances over stock and bonded debt, $758,774 12.

The other assets and liabilities of the Company, on the 30th day of April, were:

ASSETS.

Value of material on hand for the future use of the operating department		$500,212 19
Accounts, bills receivable, due from Agents and connecting roads		347,868 22
Deposits in New York, Boston and in Treasury		420,521 43
Steam Ferry Boat at Burlington		29,741 20
Chicago Teams (used for City Delivery of freight)		8,003 89
Total		$1,306,846 93

LIABILITIES.

Amount unclaimed div.	$1,353 00	
Accounts and pay rolls	83,763 34	
Due agents and connecting roads	440,142 55	
		525,258 89
Balance of Assets		$781,088 04
Add excess of cost of road, &c., over stock and bonded debt		753,774 12
Total		$1,534,862 16
Less payments for sinking fund		649,125 99
Balance		$885,736 17
Add for temporary purchase of bonds the past year for sinking fund not canceled, but yet included in bond account		102,664 86
Total		$988,401 03

The income and operating accounts of the Road, from Galesburg to Quincy, have not been transferred to this company, and consequently do not appear in this report.

The capital stock of the company has been increased the past year by the sale of 10,537 7/10 shares of stock to stockholders at par, as per circular of April 29th, 1864, and the distrition of 7,456 shares on account of surplus earnings of the road, and the issue of 30 shares in exchange for Chicago, Burlington and Quincy 1st mortgage convertable bonds, amounting in all to	$1,805,360 00
The bonded debt has been reduced.	203,062 50
Total increase of stock and bonded debt	$1,602,297 50

The expenditures during the same time for construction and equipment, including payments on account of purchase of road, have been as follows:

For new road from Chicago to Aurora		$252,242 57
For South Branch Dock Lands, tracks and improvements		33,376 29
For Land, Tracks, buildings and improvements for cattle yards, Chicago		210,339 70
For sundry other buildings at Chicago and on the line		9,399 20
For lands for depot at East Burlington, and grading levee and buildings thereon		41,159 09
For bridges and culverts and other improvements on the line from Peoria to Burlington		56,005 90
For depot grounds and buildings at Peoria		49,545 31
For union track, Chicago		17,812 30
For completion of telegraph line		4,961 48
For locomotive engines.	$37,880 00	
For passenger cars	59,038 03	
For freight cars	243,260 09	
		340,178 12
For on account of purchase of Quincy and Chicago road		178,365 74
Total expenditure		$1,193,385 70

The Treasurer's report shows the gross income of the 300 miles of road, the past year, to have been $4,688,186 70, being an increase over the previous year, of $1,597,975 67 or 51.7 per cent., over the earnings of last year.

This income has resulted in part from the use of the new line of road, since the 20th of May, instead of the thirty miles of the Galena road, previously used for the passage of our trains and business, for the use of which, since May 20th, this company would have paid that company, if the new line had not been built, about $236,000, in part from $55,000 local earnings of new line, and in part from an increase in business and from the higher rates charged for transportation, rendered necessary by the largely increased cost of operating and maintaining the road.

The road and equipment has been fully kept up and maintained, notwithstanding the high prices that have ruled, and are now in better condition than at any former period.

The operating expenses have been fifty-two per cent. of earnings, or about the same as the previous year. There has been added to the equipment of the line, the past year, 6 locomotive engines, besides one re-built nearly new and not included in report of last year, (four being for the Quincy and Chicago road,) 6 passenger cars, 1 mail and express car, 174 house, freight and cattle cars, 21 platform and coal cars, 1 paymaster's car and 1 tool car, also 6 passenger cars and 6 drovers' cars are nearly completed.

The equipment of the line now consists of: 105 locomotive engines, 46 passenger coaches, 25 baggage, express and mail cars, 1 paymasters' car, 1,508 house, freight and cattle cars, 422 platform and coal cars, 36 conductors and drovers cars, 1 wrecking, 1 tool and 1 piledriving car.

For a considerable portion of the time the past year, the equipment of the line was inadequate to meet the just demands of the business of the road. To meet this, and to provide to some extent, for future business, 7 locomotives engines and a large number of cars have been added and a further order for six locomotive engines has been made, to be delivered before the first of September, the time the pressure of fall business usually commences.

The new line of road from Chicago to its connection with the old line at Aurora, including the ten miles of double track extending from Chicago to Lyons, has been thoroughly and substantially built and completed, excepting a few miles of the ballasting of the double track, which is now being done. It became necessary to suspend this work last fall, all the rolling stock being required in the freight business of the road.

The advantages to this company of having an

independent line and road of their own, especially at its main terminus, which the building of this new line gives, have not been over estimated, as the present business, condition and operation of the road has and will continue to demonstrate.

This company has carried out their agreement with the South Branch Dock Company, by laying a track from their line of road to and along the north side of that company's property, so far as the same is required to transact business on the canals now ready for use. This track has been laid through Brown street, instead of west of Barber street, as originally contemplated, which has added something to the cost for the right to open and occupy this street. This expense however, will be largely compensated for in the increased value, in the using of that large and valuable property in connection with the business of the road, the track now connecting immediately at our depot and grounds instead of about one mile west of there.

The canal in front of this company's property and the dock one thousand feet in length has been completed, the necessary track laid and the property is now being used for the business of the company.

The work designed to place the road from Peoria to Burlington in proper condition for economical use has been continued, although at a considerable increase in cost. This expense so far as it could reasonably be charged as repairs or renewal of work has been charged to operating account, and the residue has been charged to account of cost of the road. Lands have been purchased at Peoria for depot purposes, a passenger house has been erected at this place for the joint use of this company, and the Toledo, Peoria and Warsaw Railroad Company.

A new engine house, water house, car repair shop and blacksmith shop, have been substantially built of brick. Coal houses and turntables have also been built, a freight house is yet to be constructed to complete the buildings at this place.

The grade and track extending over the Mississippi bottoms for a distance of six miles eastward from Burlington, has been raised some two feet above the highest known water mark.

The embankments have been protected from washing, and some thirty-five hundred feet of substantial pile bridging has been built to secure ample water-way for the passage of water in time of extensive floods. In arranging and providing a depot at East Burlington, that should be secure and above high water, it was found necessary to change the location to a point immediately south of and adjoining the old depot grounds. These additional grounds have been purchased, and a sufficient amount for ordinary purposes have been filled and graded and secured by levee and other protection. An engine house, turntable, water house and coal house have been erected, the necessary tracks laid, and a freight and passenger house is in course of erection.

These grounds and improvements have been located and arranged with reference to and in view of the location and building of a bridge at an early day over the river to connect with the Burlington and Missouri River Railroad, in the city of Burlington.

In the last annual report, it was stated that the company had "recently purchased, just within the city limits, adjoining the new line of their road, about forty acres of land, for the purpose of erecting stock-yards thereon." Some considerable expenditure has been made upon the lands, but the work upon them has been suspended, in consequence of an effort by several of the principal railroad companies, whose lines terminate in Chicago, to construct Union stock-yards, to which all can have easy access, and by means of which one general mart for the transaction of stock business can be established, which, it is thought, will conduce to the best interests of all parties concerned.

The Union Stock Yard Company purchase from this company its improvements, and the unused materials on hand, at cost, and it is believed the lands, or so much of them as are not required by the company for other purposes, can be sold for sufficient to fully reimburse this company for its outlay.

The cost of repairs on the Chicago, Burlington and Quincy and Quincy and Chicago line, 400 miles, is $384,257 28, less $66,323 42 for improvement—leaving $317,933 86 for repairs proper. The number of miles run by locomotives on the above named lines is 1,963,105: Cost per mile for engine repairs, 16.19 cents; for oil and waste, 1.79 cents; for fuel, 12.60 cents—total cost per mile run, 30.48 cents.

The number of passengers carried over the whole line during the year was 842,559; of these, 49,967 were through, and 792,492 way. Of the through passengers, 21,360 were carried east, and 28,707 west. Of the way passengers, 395,328 were carried east, and 397,164 west. Total carried east, 416,688; do., west, 425,871. Total mileage of passengers, 43,406,925—an increase over the previous year of 12,797,060.

The total number of tons moved over the whole line in 1864, was 809,674; in 1865, 737,511—a decrease of 72,163. Total tonnage east in 1865, 456,835; do., west, 280,676. Total number of tons moved one mile over the whole line in 1865, 107,579,360—a decrease of 9,174,148.

The earnings of the line for the fiscal years ending April 30, have been:

	1864.	1865.
Freight	$2,979,016 21	$3,919,859 83
Passengers	956,474 89	1,508,234 25
Mails, etc	104,431 71	153,758 14
	$4,039,922 81	$5,581,852 22

The directors chosen at the annual meeting, June 23, 1865, are as follows:

President.—JAMES F. JOY.

Directors.—Erastus Corning, James F. Joy, Chauncey S. Colton, John C. Green, Nathaniel Thayer, John M. Forbes, Sidney Bartlett, John W. Brooks, Robert S. Watson, William Boott, John N. Denison.

Chairman of Board.—JOHN N. DENISON.

General Superintendent.—ROBERT HARRIS.

Treasurer and Secretary.—AMOS T. HALL.

Richmond, Fredericksburg and Potomac Railroad.

The cars on this road, carrying passengers and freight, now run fifty-eight miles, or to within three miles of Fredericksburg. The through train starts for and from that point every day, and connects with Colonel Harman's line of stages, which conveys passengers to and from Potomac Creek, where, going north, they are received, and, coming south, they are landed by a line of steamers. The accommodation train between Richmond and Milford runs every day, except Sunday. A freight train leaves and arrives in Richmond every Thursday. It is confidently expected that the trains will go through to Fredericksburg in about two weeks from now, and to Acquia Creek by the middle of next September, at which time there will be placed on the Potomac a newly built line of steamers, to be under the management and control of the old Potomac Steamboat Company, of which Moncure Robinson is President. Work on a bridge, which is to be a permanent structure, was commenced yesterday at the Rappahannock River, under the immediate superintendence of Mr. E. D. T. Myers, Chief Engineer to the company, who has a large force employed. Another large force is engaged, under the superintendence of Mr. William M. Braggin, building bridges and relaying track between the Rappahannock and Acquia Creek. The rolling stock of the company is in complete order, and amply sufficient for present and prospective demands.—*Richmond Whig, July* 26.

Allegheny Valley Railroad.

The Armstrong *Democrat* says that the Allegheny Valley Railroad Company is now building ten miles of its road between Kittanning and Orrsville. From Orrsville to the mouth of Red Bank the road has also been located. This would make it ten miles more, and bring it to another great centre for the oil and iron business of the Clarion and Red Bank, as well as for the Brady's Bend Iron Works. Were it possible for the people of Clarion and of Brookville to build branches from their respective towns to the junction at the mouth of Red Bank, the finest mineral and agricultural country in any part of Pennsylvania would thus be opened up.

Bear Creek Railroad.

At a late meeting of the Bear Creek Railroad Company, the Chief Engineer, Mr. Brigdan, was instructed to locate twenty miles of the road at once and prepare it for letting early in August. The parties that have taken the construction of this road in hands are monied men, and state that they will push the road through without delay.

☞ The Pottsville *Miner's Journal* says: "The grading, laying the rails, etc., of the Passenger Railroad to St. Clair has been awarded to Judge Reilly of this Borough. The work will be commenced as soon as the requisite subscriptions to the stock and bonds are made by the merchants and business men of Pottsville. As the road when completed, will be worth many thousands of dollars to the trade of the Borough, nothing but disregard of their true interests will prevent our business men promptly subscribing."

Railroads of New York.

A tabular statement of the Railroads in the State, their capital and cost, length, earnings and expenses, dividends, etc., for the year ending 30th September, 1864.

(Compiled from the Annual Report of the State Engineer.)

Railroads (Marked * are double track.)	Capital Account. Share Capital.	Funded Debt.	Floating Debt.	Total Capital.	Cost of road and Equipm'nt.	Miles of Road.	Gross Earnings. Passenger.	Freight.	Mails, etc.	Total.	Operating and Repairs.	Earnings less Expenses.	Dividends. Am'nt.	Rate.

Ithaca and Towanda Railroad.

Pursuant to call, a large and enthusiastic meeting of persons interested in the construction of a railroad from Ithaca to Towanda, was held at Ithaca on the 19th ult. Hon E. Cornell was appointed President; C. L. Ward, of Towanda; D. M. Osborn, of Auburn; A. H. Miller, of Tioga, and C. F. Wells, of Athens, Vice-Presidents; and E. S. Van Liew, of Seneca; J. F. Means, of Towanda, and J. H. Selkreg, of Ithaca, Secretaries.

The meeting was addressed by the President, Hon. J. B. Williams, Colonel Piolet, of Wysox Valley; C. L. Ward and Colonel Mason, of Towanda; Colonel Wells, of Athens; E. M. Davis, of Philadelphia; Gaylord Willsey, of Van Etten; and C. L. Grant, A. B. Cornell, and J. H. Selkreg, of Ithaca.

The following resolutions, presented by Hon. J. B. Williams, were unanimously adopted:

Resolved, That the construction of a railway, connecting the great lines of Northern and Western New York, Canada and the West, with the vast lines of Pennsylvania and the Southern States, by a track of the same gauge, thereby connecting commercially and socially the vast districts embraced within their reach, is an object worthy of the earnest effort of all good citizens.

Resolved, That the increasing demand for the products of the coal fields of Pennsylvania throughout Northern and Western New York, the Canadas and the West, alone, demand that a speedy effort be made to open the shortest, cheapest and most available means of transit.

Resolved, That as the construction of a railway from the waters of the Cayuga Lake, at Ithaca, to the State line of Pennsylvania, at or near Waverly, (together with the already authorized extension down the Susquehanna,) will at once open the shortest and cheapest way through the lakes and large canals to the Canadas and the West, by which their growing demands may be satisfied. It is therefore resolved, that our efforts be immediately applied to effect the construction of this portion of the road, as the portion most important to the final accomplishment of the great objects under consideration.

Resolved, That a committee of eleven be appointed with authority to proceed to receive subscriptions, and to effect an organization of a company, under the general railroad laws of this State, to obtain propositions for right of way, and to do such other acts as may be necessary and proper, to effect the objects of this meeting.

The chair appointed as such committee, Hon. J. B. Williams, D. Boardman, L. L. Treman, A. B. Cornell, C. L. Grant, of Ithaca; J. A. Nichols and Lyman Bradly, of Spencer; R. D. Van Duzer and John L. Sawyer, of Waverly; and Gaylord Willsey, of Van Etten. On motion of C. L. Ward, Hon. E. Cornell was added to and made chairman of this committee.

Before the close of the meeting a sum in advance of the amount necessary to organize a company under the general railroad law, was subscribed and proper steps taken to push the enterprise forward with all possible speed.

☞ The Baltimore and Ohio Railroad Company, which obtained a charter for a road from Washington City to the Point of Rocks, has a competent force of engineers at work in making the actual survey for the road, a preliminary survey having been made some time since; and it is probable before the season closes the road will be well under way. The route will be from Point of Rocks passing between Sugar Loaf Mountain and the Potomac; thence south of the base of Pars Ridge to a point east of Rockville and down the valley of the Sligo to the District of Columbia line.

Pacific Railroad of Missouri.

Geo. R. Taylor, Esq., President of the Pacific Railroad, and Mr. McKissock, Superintendent, have returned from a visit to Kansas City and the Western end of the road, which they have been visiting in order to examine the progress made toward the completion of the work now rapidly hastening to its termination. At this time there remains unfinished a gap of 22 miles between Pleasant Hill and Independence. The road between Kansas City and the last named place has been completed for some time, and is now in operation. For the last eight or ten days continued heavy rains have interfered with work on the unfinished portion of it. But of that work there remains only the laying of the rails, which, with the force at hand, can be put down at the rate of half a mile a day in favorable weather. In a month and a half from this time it is probable that the last rail will be laid and the road will be in full operation through from St. Louis to Kansas City, the latter part of September. The directors of the road have finally made a long desired and advantageous arrangement with the corporate authorities of Kansas City, relative to the passage of the road through that city. Kansas City is but two miles from the eastern terminus of the Union Pacific road, and will soon be connected by rail with it. In no long time a road will come down to the same place from Leavenworth in Kansas. When, as must shortly be the case, Missouri shall recover the measure of her old prosperity, and have entered on the new career that is opening before it, our Pacific road, aided by its western connections, will command a business that will realize all anticipations of its promoters. —*St. Louis Republican.*

Taxable Property in Buffalo.

The following is the valuation of taxable property and the rate per cent. of the general city tax for the years 1864 and 1865. It will be seen that the valuation of the present year has been increased some $270,000 over last year, notwithstanding the valuation of personal property as assessed is $10,000 less. Something over $700,000 has been withdrawn from taxation by the banks alone, and it is the opinion of those best qualified to judge that not less than $2,000,000 has been invested by citizens and corporations in United States securities and thus placed beyond the reach of State or local taxation:

VALUATION OF TAXABLE PROPERTY IN 1865.

Real		$25,491,900
Personal		6,517,510
Aggregate		$32,009,410
Tax old territory	$513,995 16	P. c. 1.964—1,000
Tax new territory	67,135 81	P. c. 1.149—1,000
Lamp district, added to general fund tax	1,175 00	P. c. 0.094—1,000
Total	$582,305 97	
Per centage on gas valuations		114—1,000
Per centage on water valuations		074—1,000

VALUATION OF TAXABLE PROPERTY IN 1864.

Real		$25,210,815
Personal		6,528,045
Aggregate		$31,738,860
Tax old territory	$347,047 68	P. c. 1.330—1,000
Tax new territory	33,051 71	P. c. .583—1,000
Lamp district added to general fund tax	1,148 31	P. c. .097—1,000
Total	$381,247 70	
Per centage on gas valuations		097—1,000
Per centage on water valuations		073—1,000

American Railroad Journal.

Saturday, August 5, 1865.

Stock Exchange and Money Market.

If the Treasury has been called on to employ its whole resources, it is no wonder; for it is now ascertained at the proper office in Washington, that in April last there were upwards of a million of men on the pay rolls of the army. And full payment is being made them, and millions are being put in circulatien by these veterans as they return to their homes. We learn that notwithstanding this enormous disbursement, the Treasury is by no means impoverished. The receipts for customs are expected to average ten or eleven millions per month; those of July actually exceeding thirteen millions.

At the Sub-Treasury in this city the total balance on hand at the end of July was stated at $60,994,609 64. The following is an official statement of its transactions up to the 31st of July last, and our foreign readers will at a glance perceive from its examination, the magnitude and extent of the financial operations of the Government even at this one point, noting at the same time, the ease and precision with which such enormous sums are handled in this country.

RECEIPTS AND DISBURSEMENTS.

July 1, 1865, by balance		$6,990,899 16
Receipts during the month—		
On acc't of customs	$9,908,190 66

		3,755,395 59
Balance		$60,994,609 64

The Secretary of the Treasury receives general commendation for the business like way in which he is managing his department, and there is certainly in the commercial world a feeling of great confidence in his sagacity and general arrangements.

It is not singular that the department should find itself much occupied with its new sphere of duties, quite different from its former routine. Formerly the revenue was almost exclusively derived from customs' duties, and the consequence was that our secretaries were compelled to study our foreign relations with as much attention and for more practical purposes than even the secretaries of State. Alexander Hamilton gained his greatest reputation by his system of commercial regulations for the government of the Treasury, which have remained almost unchanged in principle and form from the first. Treasury documents have always had great importance in their foreign aspect, but it is now different. Our internal revenue is so important at this moment, as a financial resource, that there is real danger that commercial questions may not receive the attention they deserve. It is a well known fact that our commercial treaties at this moment generally require revision to make them more conformable to the necessities of commerce and the spirit of the age. Just before the war this view of the subject was taken at a public meeting of the most distinguished merchants of this city; an association for examining and revising the present system was organized, and committees were appointed to make reports on the condition of our trade with foreign nations. The war however put an end, at least for the time, to the deliberations of this body; but beyond all question they could be advantageously resumed, as trade is a permanent element of our prosperity, adapted to our geographical position, favored by our productions, and in harmony with the adventurous spirit of our people. We therefore hope that Mr. McCulloch will find time fully to investigate this subject, and be able to present to the country such suggestions as will enable the Government, in its future or existing foreign relations, to secure reciprocal advantages as far as may be practicable. Our foreign trade naturally enough appears to have decreased during the past year. Our imports from the 1st of July last, to 1st of July, were but $98,927,919, against $155,011,442 the same time the previous year, while the exports of domestic produce and miscellaneous goods were but $82,-542,561, against $115,415,483, for the same period the previous year. The exports of specie for the same time in 1865, from this port were $18,645,-504, against $31,013,830 the same period in the previous year. Nevertheless the amount of specie from California at this port at the same time, have been $10,019,817 against only $6,502,187 in 1864 for the same time. All these facts are interesting, since they show the tendency of business to adjust itself to its wants and requirements, forever contradicting the expectations of mere theorists. Abuses, corruption, waste are all injurious to the people, and the economy of American Government has hitherto been its distinguishing characteristic. To this state of things we must return, if we would be prosperous and happy. We look forward with interest, to the statements of the Treasury department for some vindication of its future policy, which we doubt not will be in accordance with public expectation. The first turn towards a sound condition of things will be eagerly welcomed. And the first palpable improvement must be in the currency. This is the pivot of the future.

It is well understood that a large class of operators, many of them in foreign interests, are expecting that gold will again be quoted at a large premium.

No revulsion has yet come on us even out of our enormous war expenditures; and failures so largely anticipated, and actually taking place abroad on a very large scale, have been quite exceptional here. So that we really may look our financial condition in the face without very serious apprehension.

The attempt made to accustom the people to a heavy public debt, as a load not only easy to bear, but a pleasant and beneficial one, is one which can have no aid from us. Debt and taxation always grind the faces of industry and labor, which are the condition of much the largest portion of men; and no Government that ever yet existed can be safely trusted with large expenditures of money.

We cannot conceive of a more disastrous state of things than any further enhancement of the price. It is absolutely distructive of all sound financial transactions, foreign or domestic; demoralising in effect, and sure to break down the real producing interests of the country, which cannot afford to expend all its earnings for mere subsistence, and in the payment of taxes—the condition of the majorities of the people of this country, under the effect of continued high prices for gold, and a depreciated currency. Even capital recoils from enterprise when uncertainty attends its operations; and ill fares the land where speculation is the great business or calculation of the population, or suddenly acquired wealth is the study and the object of life.

We should not forget that we must have an American policy more fixed than ever. No matter what foreign nations may now admit with regard to us, they are one and all inspired by the single wish to make all the money they can out of us, and they would not care, except so far as their own interests are concerned, whether or no the United States were to become insolvent tomorrow. On the contrary, many foreign powers would probably rejoice at such an event. The constant refutation of their old theories and systems, which our prosperity furnishes, rankles in their breasts; and what we have to do, is to take care that our policy shall survive and triumph, and that recognising a truth as old as the world—that debt is destruction—get rid of it as soon as possible, and all its subterfuges and contrivances.

And we have only to encourage this feeling, a feeling of high morality as well as interest, to succeed. We believe that if the American people, like those of England, were under the moral conviction that the public debt would never be paid, and never could be, they would give up in dispair; as ready to be "Cossack as Republican." The Press does nothing more than its duty, therefore, in urging economy, retrenchment, and the extinguishment of debt, as the basis of sound public as well as well as private morals.

We have from time to time noticed the arrivals of cotton at this port, always believing that a good deal of the article was yet to come into play. During one month of July the imports are given at 60,000 bales, and during the closing week of the month, the arrivals were 20,000 bales. Up to July 29, the total receipts for ten months were 340,015 bales according to the regular reports. The cash value of the cotton received here in July is considered to be nine millions of dollars, and at this rate the whole value realized during the year from the article in this city is about forty-five millions of dollars, a sum of large influence in our financial movements.

The very heavy balance remaining in the Sub-Treasury, upwards of sixty millions, has attracted attention, and even been made the excuse of an assault on the Treasury department in certain quarters. This is a most extraordinary course of conduct. One would think that the spectacle of a full Treasury would just now be of all others the most gratifying, showing that our resources were ample, and our readiness and ability to pay our obligations undeniable. It will be a most pleasing circumstance, in our opinion, when our means continue to accumulate in advance of our necessities; the precursor of our return to a sound condition. We hope it will be our good fortune henceforward, from week to week, to announce heavy balances in the Sub-Treasury; for we shall need them for sometime to come. There is certainly a want of fairness in regarding this state of things as cause for censure.

There has been a decline experienced in some of the leading railway securities, and an improvement in others not the subject of particular combinations. These differences are duly noted in our usual tables. Governments have varied under the influence of causes of no permanent character. Money continues to be plentiful, but the price keeps up pretty well as borrowers in a speculative market are never scarce. The foreign demand for our securities continues. The gold market remains about the same. There is no demand for export, but only for customs, where the receipts continue to be large, and likely to exceed the estimates very considerably. The balance in the Sub-Treasury on Tuesday was exactly $61,279,201, a sum larger than that held at its disposal in any other Government this day on the face of the globe.

Considerable anxiety is felt at the political condition of several of the States now in process of reconstruction. It would seem that there yet remains a class of agitators who will not accept the new state of things if they can help it; nevertheless, we are inclined to the opinion that it is a small one. It is the real interest of the Southern people to devote themselves henceforward to the arts of peace; war has been their worst enemy, and we have no doubt they will determine, from motives of self-interest alone, to apply themselves to industrial pursuits, and to a renewal of their trade and commerce with the North and West, which really retain no other than the old feeling of good will towards their misguided brethren. Geographically, physically, politically we are one people, and the sooner we settle down in this conviction the more prosperous we shall be. All the objects of Government, all the designs of law, all the efforts of trade and commerce, are but the working out of divine principles to make men virtuous and happy, life pleasant, and social life a brotherhood. It is the perversity of our nature which prevents us from seeing what is really our real good.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 1875, 95; New York State 6s, 1874, 98½; do., 6s, 1866, 98¾; Milwaukee and St. Paul 1st mort., 73; N. Y. Central Subscription bonds, 95; McGregor Western R. Schoharie Valley Railroad.

At a meeting of the directors of this company, held at Canajoharie on the 25th ult., it was resolved to take immediate action for the building of the road, and the proper officers were accordingly instructed to issue proposals for the grading of the track as far as Fox's Creek. It was also resolved to direct the engineer to make a permanent survey of the route at once, and complete his estimates for the construction of the road. Five per cent. of the amount of stock subscribed has been collected and the articles of association filed in the office of the Secretary of State. The proper committees have been duly chosen by the directors, and everything put in order for carrying the enterprise forward to a successful and early consummation.

☞ The proposed railway between Aleppo and the coast of Syria is now very likely to be carried out, the Porte having given a guarantee of eight per cent. on £1,300,000 on consideration of a port being formed at Seleucia, Pieria.

☞ Holders of the Bonds of the Mississippi and Missouri Road are requested to send their names and address, with amount and description of the bonds held by them, to the office of the Treasurer, George T. M. Davis, No. 47 Exchange-place.

The National Debt.

The official statement of the public debt, as appears from the books of the Treasury Department, on the 31st of July, shows the amount ontstanding to be $2,757,253,275, divided thus, viz:

THE DEBT.

The debt bearing interest in coin is	$1,108,662,641
On which the interest is	64,521,837
The debt bearing interest in lawful money is	1,289,156,645
On which the interest is	74,740,630
The debt on which interest has ceased is	1,527,120
The debt bearing no interest is	357,906,969
The total interest both in coin and lawful money is	139,262,468

The legal tender notes in circulations are as follows:

THE LEGAL TENDERS.

One and two years 5 per cent. notes.	$39,954,230
United States notes, old issue	472,603
United States notes, new issue	432,687,966
Compound interest notes, act of March 3, 1863	15,000,000
Compound interest notes, act of June 30, 1864	197,121,470
Total legal tenders in circulation	$685,236,269
The amount of fractional currency is	25,750,000
The uncalled for pay, requisitions and miscellaneous items of the War and Navy Departments amount to	15,736,000

MONEY IN THE TREASURY.

The amount of coin in the Treasury is	$35,338,000
And of currency	81,402,000
Total amount in Treasury	$116,739,632

The statement of the public debt, as appears by the returns and Treasury books on the 31st of July, as compared with that made on the 31st of May—two months ago—shows an increase of $122,000,000 during the intervening period, owing in part to the extraordinary sums required to pay the arrearages due to the army—the entire public debt being $2,635,205,753. The amount of legal tender notes now in circulation is $685,236,269, or an increase from the 31st of May of $26,075,700.

☞ The work of extending the horse railroad from East New York toward Jamaica, began last week. It will be in use as far as Union Course on or before the 1st of September next. We understand that it will be continued to Jamaica immediately, if the citizens will subscribe for a fair amount of the stock.

☞ The work on the east end of the Hoosick tunnel is progressing at the rate of sixteen feet per day. This enterprise, which was commenced about fifteen years ago, is likely to be accomplished, if the Massachusetts Legislature will continue its aid to the undertaking.

☞ The Morris and Essex Railroad Company are vigorously prosecuting the construction of the extension from Hackettstown to Phillipsburg, and hope to have it completed by November next, so as to allow the transportation of coal and other freight, together with passengers from the various stations on the route.

☞ The editor of the Portage city *Register* has seen a private letter which asserts that the road between Oshkosh and Ripon will be in running order before the first of June next, and also that the iron for the road will be purchased within the next thirty days. This gentleman is immediately connected with the enterprise and knows fully of what he speaks. And it urges the extension of the Road to that city.—*Milwaukee Wis.*

When the States came into the Union.

The following is a list of the States constituting the Union, with the dates of their admission. Colorado and Nebraska had authority, but refused to form State constitutions. The thirty-six stars in our national flag are, therefore, designated as under:

Delaware	Dec.	7, 1787
Pennsylvania	Dec.	12, 1787
New Jersey	Dec.	18, 1787
Georgia	Jan.	2, 1788
Connecticut	Jan.	9, 1788
Massachusetts	Feb.	6, 1788
Maryland	April	28, 1788
South Carolina	May	23, 1788
New Hampshire	June	21, 1788
Virginia	June	26, 1788
New York	July	26, 1788
North Carolina	Nov.	21, 1789
Rhode Island	May	29, 1790
Vermont	Mar.	4, 1791
Kentucky	June	1, 1792
Tennessee	June	1, 1796
Ohio	Nov.	29, 1802
Louisiana	April	8, 1812
Indiana	Dec.	11, 1816
Mississippi	Dec.	10, 1817
Illinois	Dec.	3, 1818
Alabama	Dec.	14, 1819
Maine	Mar.	15, 1820
Missouri	Aug.	10, 1821
Arkansas	June	15, 1836
Michigan	Jan.	26, 1837
Florida	Mar.	3, 1845
Texas	Dec.	29, 1845
Iowa	Dec.	28, 1846
Wisconsin	May	29, 1848
California	Sept.	9, 1850
Minnesota	Dec.	1857
Oregon	Dec.	1857
Kansas	Mar.	1862
West Virginia	Mar.	1863
Nevada	Oct.	1864

☞ The Allegheny River Bridge at Oil City is to be a suspension bridge of two spans of 825 feet each, and one semi-span of 162½ feet, the latter on the Oil City side. The platform will be thirty-five feet above the present level of the river, and will consist of a double track for teams, 17 feet wide, and sidewalks some five feet above the latter, and between the track and the suspenders. The platform is to be attached to the cable by nine suspending rods, without adjustments, and the cables, two in number, are to be composed of No. 10 hand-drawn charcoal iron wire, thoroughly wrapped throughout their whole length with annealed wire of a smaller size, by means of machinery, and made impervious to water by paint and other substances. They will be anchored into the abutments on the Oil City side, and with separate anchorage masses on the Latonia side.—*Oil City Register.*

☞ The aggregate amount disbursed in Boston on the 1st ult., on account of dividends and interest was $6,065,452. Of this sum $131,528 are from Insurance, Mining, Steamboat, Hotel and other companies; $2,866,871 from interest on bonds; $1,406,100 from Manufacturing Company dividends, and $1,660,953 from Railroad dividends. At the semi-annual period in January last the aggregate amount paid out was $7,945,095. A year ago the amount paid was $6,537,442, and the January preceding only $6,117,393. The aggregate of the dividends this time does not vary materially from July 1864, the reduction by railroad and manufacturing companies being made up by the largely increased payments on Government securities. The changes in railroads are a falling off in Boston and Lowell from 3½ to 2 per cent.; Boston and Worcester 5 to 4½; Fitchburg 4 to 3; Michigan Central 6 to 4 per cent. cash, but pays an additional stock dividend of 6 per cent., and Western 5 to 4 per cent. The following pass their dividends at this time: Cheshire, Lynn and Boston, Metropolitan, and Middlesex Railroads—the latter three horse roads. The horse railways it seems have been no more successful in Boston the past year than they were in other cities before the price of passage was made more nearly to correspond with the increased price of provender, wages, etc.

Journal of Railroad Law.

RIGHT OF RAILROAD COMPANIES TO EJECT COLORED PASSENGERS.—THE VIEWS OF A PHILADELPHIA JUDGE.

It is a well settled rule of law, as stated in a recent number of the JOURNAL, that Railroad Companies have the right to adopt and enforce all proper and reasonable rules for the regulation and conduct of their trains and of passengers riding thereon. A conductor may eject a passenger from the car, not only for misconduct, which is such as to disturb the peace and safety of the other passengers, but as well for noisy and disgraceful conduct, such as grossly profane or indecent language. But whether a conductor may eject a passenger on the sole ground of his color, is a question not so frequently discussed or so positively decided.

It appears, however, that the question has been brought before the courts in Philadelphia; and for the information of our readers we give the charge of Judge Allison to the Jury. The case is Derry *vs.* Lowry, and the plaintiff, who is a woman of color, sues the defendant, who is the conductor of a street passenger car, to recover damages for her forcible ejection from a car. The plaintiff alleged that she had been seated for a few minutes, when the conductor told her that no niggers were allowed to ride on that line, and that she must get out. Failing to comply with the conductor's command to get out, two men were called from the street, and the plaintiff was dragged out with great violence.

The conductor justified the ejection of the plaintiff by showing that the road had a rule that all colored people were to be excluded from the cars; that in obedience to this rule the defendant removed the plaintiff, on her refusal to go quietly.

ALLISON, J charged the jury as follows:

The important question involved in this action is the right claimed by conductors of city passenger railways to refuse passage to persons of color, and to eject such persons from the cars of which they have charge, when entrance to the same is obtained without their knowledge or consent.

In most instances the conductor in charge of the car shields himself under an alleged regulation of the company of which he is an employee or agent. This is the case here, although in fact there was no such regulation of the Lombard and South street Passenger Railroad; the attempt to set up the existence of such a rule, enacted by the directors of the Company, utterly failed; but for the purposes of the case now under trial, I instruct you as a principle of law that the existence of such a by-law or resolution of the company, would not avail the defendant as a justification for the wrong complained of in the plaintiff's declaration. It would be proper to allow proof of the existence of such a regulation, to be given to the jury in mitigation of damages, to show that the defendant did not of his own motion with wicked and malicious intention inflict personal violence upon the plaintiff, but that he was acting under the instruction of the company whose servant he was, in ejecting her from the car.

The principles of law which govern city passenger Railway Companies, in no respect I am aware of, differ from those applicable to common carriers in general. They are companies chartered to carry passengers along a certain defined route, and between established termini. They are chartered for the accommodation of the community generally, and to this end the uses of the public highway of the city, along and over which every person without distinction of age, or sex, or nationality or color has a right to free and unobstructed passage, is to the extent defined in the several acts of incorporation given to those companies for the construction of their roads. But these grants by the Legislature were not intended to divert the highways of the city from the purpose for which they were established; to some extent they change the mode of transit over said highway; but the object of the grant was in aid of this common right of passage upon and over the streets of the city; it was to render travel more easy and convenient to those to whom the right belonged, and this right is a common right, it belongs equally to the rich and to the poor, to the black man as much as to the white man. A company claiming to exercise the power which the defendant, acting for his principals, the Lombard and South street road, sought to enforce as against the plaintiff in this action must show the most clear legislative authority as a justification. The charter of this company has been put in evidence, and it is not pretended that such an express power is therein contained. Nor can it be reasonably argued that such a power is taken by implication; for its exercise is not in aid of that which is by the letter of the charter granted to the company, but in its practical application is a restriction of its general corporate authority in violation of its public duty, and at war with the purpose for which the body was created. The rule that lies at the foundation of all corporate right is that the power shall be strictly construed that corporations should be permitted to do only that which they take by express grant or that which by implication is conceded to them, when necessary to the existence of the body corporate or requisite to carry into effect the letter of the charter itself. Neither branch of the proposition which is one of the plainest axioms of the law has been established by the defence; on the contrary the act of defendant was a clear violation of the rights of the plaintiff when he put her out of the car, because her skin was a few shades darker than his own. The letter of the charter of this company did not authorize it; and the act, so far from being justified under the reserved or implied grant of authority was in itself a violation of the obligations, and duties of the company who as a common carrier, are bound to carry every individual who, paying the amount of fare charged to others, desires to travel on the road, and as against whom no reasonable or well founded objection can be made on personal grounds.

The true principle is that a corporation created for the carriage of passengers has no right to exclude any class of persons, as a class, from the benefits of its mode of transportation. It may for cause either by or without a regulation ex-

clude individuals. A corporation of this description might as well undertake to make nationality or religion a ground of exclusion, as color, it would not be difficult to determine in advance the legal force of a by law exeluding all Germans or Frenchmen, or Irishmen, or protestants, or catholics, Jews or Greeks as such from the passenger cars of the city; such an exclusion would not be tolerated by any intelligent tribunal; and yet in this the day of our corporative enlightenment, and freedom from a prejudice to which we were so long in bondage, a question can be seriously made before a court and jury, and practically enforced at the bar of public opinion, as to the right of an individual conductor or a company, to turn persons out of the passenger cars of the city with force and violence because of their complexion. Than this nothing can be more unreasonable; nothing in my opinion, is a clearer or grosser violation of the plainest principles of the law, and of the rights of individuals.

But it is asked, are these corporations powerless to protect themselves or the passengers whom they carry. By no means; they have a perfect right to exclude any one not a fit person to ride in their cars. Intoxication, profane or indecent language, the presence of one afflicted with an offensive or contageous disease, smoking in the cars, are but illustrations of the principle, because these are a reasonable offence to the travelling public; these of themselves constitute a ground for exclusion or removal; but the mere prejudice of one class against another, cannot be allowed to subvert or overthrow the cardinal doctrine of the equality of all before the law, in the maintenance of the sacred rights of power and of citizenship.

The argument which is used as a justification for the exclusion of people of color from the cars, would shut them out from and bar against them our courts of justice, forbid to them the use of public ferries, bridges and highways, and rests not upon the principle of legal or moral right, but upon bald naked prejudice alone. It is our duty, gentlemen, in the discharge of our duties, you, in your sphere and I in mine, to cast aside all prejudice, that the law may vindicate its just claim to strict and impartial justice. And if, by the action of courts and juries, wrong has been done to that class of citizens to which the plaintiff belongs, it is time that such errors shall be contradicted.

The logic of events for the past four years has in many respects cleared our vision and corrected our judgment, and no proposition has been more clearly wrought out by them, than that the men who have been deemed worthy to become the defenders of the country, to wear the uniforms of the soldier of the United States, should not be denied the rights common to humanity, and this not only without law, but against law and the plainest principles of right and justice. The judge further charged the jury that the instructions of a principal to a subordinate to do an illegal act, such as to commit an assault and battery upon the person of a citizen was no justification of a subordinate for so doing, that such a plan could not shield a conductor of a car from his accountability before the law, to the person injured.

He also instructed the jury upon the question of the violence inflicted by the plaintiff upon the defendant; that if such violence was used in defence of her person when assaulted by the defendant, and was no greater in degree than was necessary to defend herself against the attack made upon her person and rights, the law would justify her in the employment of such force. Nor would the use of excessive force by her in resisting a personal assault be a defence to her claim for damages; it may be taken into consideration by the jury upon the question of the amount of compensation to be given her but not as defence to the action.

That the jury, for a wrong like that complained of by the plaintiff, may go beyond mere compensatory damages, and may give vindictive damages by way of punishment. Verdict for plaintiff $50 damages.

Lebanon and Pine Grove Railroad.

We understand that measures are being taken to immediately build the Lebanon and Pinegrove Railroad, on the line of the Union Canal Feeder. The distance from Pinegrove to Lebanon is only 27 miles, and it is also proposed to extend the road *via* the Lebanon and Cornwall Railroad, to connect with the Reading, Lancaster and Columbia Railroad, a distance of 18 miles. By this route all the iron works in Lebanon and Lancaster Connties could be supplied with coal at a much cheaper rate than they are now receiving it *via* the Lebanon Valley Railroad and from the Susquehanna Region. The distance from Pinegrove to Lancaster by this route is only 63 miles, and to Lebanon only 27 miles.—*Pottsville Miners Journal.*

La Crosse and Milwaukee Railroad.

The Circuit Court of the United States have just held a special term at Milwaukee to dispose of the litigation connected with the Eastern division of this road, and substantial progress has been made toward a final sttlement of this protracted controversy. The practical result of all the decisions is, that the St. Paul Company will pay to the receiver on or before the 1st day of September next, in cash and coupons of the second mortgage, the sum of $126,849, which, deducted from the amount required to be paid by the Minnesota Company to prevent a sale, $571,130, leaves the sum of $444,289 to be paid by the Minnesota Company on or before the 27th day of September next, to prevent an order of sale, which sale will take place six months after granting the order if payment as above is not made.

The portion of road covered by this mortgage and affected by this litigation, is the line of the old La Crosse road, from Milwaukee to Portage, a distance of ninety-five miles. The mortgages on this line to F. A. Palmer and the city of Milwaukee, which are prior to the second mortgage, amount to the sum of $1,200,000; the second mortgage, $1,571,139; making together the sum of $2,771,139; which is undisputed. In addition to this amount, the following judgments were all rendered and docketed prior to the making of the Baines' mortgage, on the foreclosure of which the Minnesota Company was formed:

Chamberlin's judgment for	$729,680 72
Cleveland judgment, about	80,000 00
Mercantile Bank	38,000 00
Sebre Howard	20,000 00
Making about the sum of	$767,089 72

And with interest added on the Chamberlin judgment, over one million of dollars—all of which judgments are claimed to be liens on this property prior to the right of the Minnesota Company, and suits are now pending to enforce them.

The examination of these figures shows that the admitted mortgage liens on this property, prior to the Minnesota Company, are over $29,000 per mile, and the mortgage and judgment leans, prior to the right of that company, exceed $40,000 per mile.

With these facts before our readers, and the further fact that the securities of the Milwaukee and Prairie du Chien road, a through route, with through business and entirely free from litigation, are now selling at less than $20,000 per mile, we shall leave it for them to form their own opinion as to whether payment is likely to be made as required by the court to prevent a sale. We are informed that over eight-tenths of the second mortgage, and all of the judgments above-named, are owned or controlled by the Milwaukee and St. Paul Railway Company, of the directors thereof. And should a sale take place, it is not doubtful, under such circumstances, who will become the purchaser.—*Milwaukee Sentinel.*

Old Colony and Newport Railroad.

The annual meeting of this company was held in Boston on the 27th ult. From the report of the directors which was presented, we learn that the receipts during the year ending May 31, 1865, were: from passengers $693,188 99; from freight, mails and rent, $368,332 14—total, $1,061,521 13. Total expenses, $743,894 97. Net earnings, $317,626 16. Balance of income of last year, $127,082 45. Deducting dividends and U. S. tax there remains as income, May 31, 1865, $124,950 75.

The indebtedness of the company May 31, was $1,005,823 06. The increase over last year's indebtedness was caused mostly by purchase of land for change of location and enlargement of freight and passenger accommodation in Boston.

The President stated that the expenditures of the company the past year have been excessively large, owing to the high price of material and labor and extension of the road, &c., but that the receipts of the company since 1862 have nearly doubled. The number of passengers and the amount of tonnage has doubled since that time.

It was moved that a double track of ten miles in length be built the present year between South Braintree and Middleboro'. The motion was referred to the directors.

The following gentlemen were elected directors for the ensuing year: Alexander Holmes, of Kingston; Francis B. Hayes, Boston; George A. Kettell, Charlestown; Uriel Crocker, Boston; Benjamin Finch, Newport; Minot Tirrell, Weymouth; Oliver Ames, Easton.

☞ The new Ferry Boat, "Susquehanna," recently constructed for the Erie Railway Company is one of the largest and finest ever built. Its length is 208½ feet, and its width, over deck, 64 feet. The cabins are built with arches, and have all the later improvements; the woodwork is of ash, trimmed with black walnut; the boat is lighted with gas; the decks are unusually high, metallic life boats are carried on the promenade deck, and are easy of access; and the boat is finished throughout in a very neat manner. The engines are reported to be of six hundred to seven hundred horse power. They have been fully tried.

The Susquehanna will run with the ferry boat Pavonia, long known as "the train boat" on the Pavonia ferry, from Jersey City to Chambers street in this city.

☞ Eleven miles more of the McGregor Western railway was put in operation on the 1st inst. This road, as we learn, has all the business it is capable of doing, and promises to become one of the most important in Iowa. It has the right, under its charter, to extend across the State to the Missouri River, and has a land grant of 10 sections (6,400 acres) per mile to aid in its construction.

☞ A Pneumatic Railway is to be built under the Thames river, England, to connect two railway stations. Piers will be built up within caissons sunk below the bed of the river, till they reach within a few feet of the river bed. Upon these will be laid the iron tubes which form the passage way for the railway. These tubes will be laid upon the masonry in concrete, the carriages of the railway will be impelled by the atmosphere working directly upon them instead of a piston, the carriages having a closely fitting collar or frame work of the sectional area of the tunnel, which answers the same purpose as a piston.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway for the week ending July 22, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$48,948 00
Express, freight, mails and sundries	4,636 00
Freight and live stock	66,478 00
Total	$119,462 00
Corresponding week, 1864	106,914 00
Increase	$12,548 00

The earnings of the Marietta and Cincinnati Railroad for the third week in July, 1865, were:

	1865.	1864.
Passengers	$12,748 25	$8,532 02
Freight	10,858 25	10,042 67
Mail, express & telegraph	1,100 00	1,189 58
Total	$24,706 50	$19,764 27
Total this month to date	72,313 25	57,869 11
Total for the fiscal year commencing Jan. 1	$664,376 26	$523,638 49

The traffic of the Great Western Railroad for the week ending July 28, 1865, was as follows:

Passengers	$28,821 58
Freight and live stock	23,506 27
Mails and sundries	2,497 56
Total	$54,825 41
Corresponding week of 1864	43,893 13
Increase	$10,932 28

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending July 21, were:

	1865.	1864.
Passengers	$3,434 72	$2,449 34
Freight	11,940 41	8,853 41
Express	130 22	104 16
Mail	296 58	296 58
Total	$15,801 93	$11,703 49

Receipts from January 1 to July 21:

1865	$344,232 59
1864	306,565 96
Increase	$37,666 63

Mountain Railways.

Pending the completion of the tunnel of 7½ miles through Mont Cenis, and which—as more than 4½ miles remain to be pierced—will yet require seven or eight years, Messrs. Brassey have taken steps toward the construction of a railway over the mountain, to supply the break of 47 miles now existing between St. Michel and Susa in the line of communication between France and Italy. An experimental line has been already constructed on the French side, between Lanslebourg and the summit, a distance of a mile and a quarter. Capt. Tyler reports officially to the Board of Trade that this experimental line possesses a mean gradient of one in thirteen, and a maximum of one in twelve. It passes round a sharp corner, joining two of the zigzags of ascent on a curve with about two chains radius, and was purposely constructed on the most difficult portion of the route. Horizontal driving wheels act on a middle rail. The importance of these results to the future of railway construction in mountainous countries can, therefore, hardly be over-estimated. Capt. Tyler says the railway will be safer than the road.

ENGINEER'S OFFICE OF THE SCHOHARIE VALLEY R. R., SCHOHARIE, N. Y., July 21, 1865.

NOTICE TO CONTRACTORS.—Sealed proposals will be received by the undersigned until the 2d day of September next, for the Grading, Bridging, Masonry, &c., of the Schoharie Valley Railroad.

The Company reserve the right to accept or reject any proposal without regard to terms. Satisfactory references must accompany the bids, and competent security will be required for the fulfillment of the contract, the payment of laborers' wages, &c., &c.

The profile, plans and specifications of the work will be ready for inspection, at the above office, on and after the 26th day of August next.

PETER HOGAN, Chief Engineer.

By order of the Board.

S. L. MAHAM, Secretary.

Natural Lubricating Oil

FROM THE

HICKORY FARM OIL CO.'S

NEW WELL, NO. 2,

ON WEST HICKORY CREEK,

VENANGO COUNTY, PA.

This company are now receiving oil from the above well, of which they are exclusive owners, and are prepared to fill orders for delivery at this port or at the well.

The oil is of a specific gravity of 32 degrees Beaume, and has been pronounced, by all who have tested it, the best lubricator in the market.

Orders from railroad companies, jobbers and large manufacturers are solicited, and will receive prompt attention. Parties can at all times rely on a pure and uniform article.

Office of the Company, No. 92 Maiden Lane, New York. 3m-27

THE NEW YORK CENTRAL RAILROAD COMPANY, TREASURER'S OFFICE, Albany, July 21, 1865.

TWENTY-FOURTH SEMI-ANNUAL DIVIDEND. The Directors of this Company have declared a semi-annual Dividend of Three per Cent. on the capital stock thereof, free of the United States income tax, payable on the 21st day of August next.

Dividends in New York will be paid at the office of DUNCAN, SHERMAN & CO.; in Albany, at the Albany City Bank.

The transfer books will be closed at the close of business on MONDAY, the 31st day of July inst., and be reopened on the morning of THURSDAY, the 24th day of August next. JOHN V. L. PRUYN, Treasurer.

OFFICE OF THE ERIE RAILWAY COMPANY, No. 187 WEST ST., NEW YORK, July 26, 1865.

DIVIDEND.—The Directors of this Company have declared a Semi-annual Dividend from the earnings of the road for six months ending June 30, of THREE AND ONE-HALF PER CENT. on the Preferred Stock.

Also, a Semi-annual Dividend of FOUR PER CENT. on the Common Capital Stock.

Both payable, less the government tax, on MONDAY, the 21st day of August next, at the Treasurer's Office, Erie-place, to the registered holders of stock at the closing of the books.

The transfer books of both classes of stock will be closed on the afternoon of Saturday the 5th, and be reopened on Wednesday, the 23d day of August.

30-41 HORATIO N. OTIS, Secretary.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, July 11, 1865.

AT A MEETING of the Board of Directors of this Company, held this day, it was

Resolved, That a DIVIDEND of FIVE PER CENT. in cash, free of Government tax, be paid on the 1st day of August next, to the holders of the full paid shares registered on the 15th day of July, and that the transfer books be closed on the said 15th day of July, and opened on the 3d day of August.

Resolved, That in pursuance of the measure recommended by the Shareholders' Meeting, held May 31st, 1865, and in order that the lands sold may be represented by a corresponding issue of Capital Stock, in accordance with the policy heretofore pursued by the Company in the issue of Canceled Bonds Scrip, the outstanding shares of this Company be increased by the issue of one share for every ten now outstanding, and the same be distributed to the holders of shares registered on the Company's books, on the first day of August next, in the proportion of one share for every ten held by them.

Resolved, That where, in the distribution of such shares, a stockholder would be entitled to a fraction of a share, the Company will retain the right to such fractional part at par. THOMAS E. WALKER, Treasurer.

Car Covering or Roofing.

KINGMAN'S CEMENT WITH HEAVY CANVASS, used by many roads as a substitute for Car Duck. WILLIAMS & PAGE, Boston.

July 19th, 1865.

RICHMOND AND DANVILLE RAILROAD, SUPERINTENDENT'S OFFICE, Richmond, Va., July 12th, 1865.

NOTICE TO BRIDGE BUILDERS.—Proposals are invited by this Company for the rebuilding of 7 spans of their Bridge over James' River at Richmond. Spans 120 feet. Also for their Bridge of the Staunton River, 4 spans of 150 feet each, making an aggregate length in both Bridges of 1,440 feet, the masonry in both cases is uninjured, the original structures were on the Howe Truss plan, the Track Stringers sustained on the bottom chord. Proposals are invited for their rebuilding on the same plan, but proposals made for other plans will also be considered. Address the undersigned at Richmond, Va.

THOMAS DODAMEAD Superintendent.

J. B. JAMES'

Rosendale Cement Works,

MANUFACTURE a superior quality of ROSENDALE HYDRAULIC CEMENT. Address

J. B. JAMES,

29 Cedar Street, New York.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

The National Debt.--Condition of our Finances.

We have received an official statement from the Secretary of the Treasury, showing the actual condition of the Public Debt on the 31st of July. It is a document distinguished for conciseness, completeness, clearness and frankness; showing the hand of a person used to dollars and cents, and understanding how to make up his accounts. In this respect, Mr. McCulloch stands far in advance of any of his predecessors; and though some persons contend that a Secretary of the Treasury need not be an accountant if he is a statesman, yet as the financial security of the country is to be worked out by the proper application of its revenues to its debts and expenditures, and is no longer to be trusted to glittering generalities for its working, we may be glad that we have in the Treasury department one who knows the use of figures, and the value and peculiarities of money.

This statement puts to rest the unfounded and unfriendly rumors that our debt had already reached three or four thousand millions, and was likely to be five; that it had rapidly increased the last quarter, and that a new loan for a large amount would soon again become indispensable. On the contrary, it appears that the actual funded debt bearing interest in coin is but $1,108,662,-641 80; and in lawful money, $1,239,156,545 05—making a total of $2,397,719,186 85.

The interest on these sums in coin is $64,521,-837 50; and in lawful money, $74,740,630 78—making a total of $139,262,468 28.

This is the amount of interest the people will have to pay on their funded debt. But there is afloat a large amount of government paper currency known as legal tenders, which have passed for four years as money, and on which no interest has been paid or as yet is to be paid. And so perfect has been the confidence of the people of the loyal states in the permanence, strength and resources of the union that the enormous sum of $685,236,269 has been kept afloat, and in fact preferred to all other kinds of paper money; and its relations to gold have at times been so close as to make their final equality appear very near at hand, and the resumption of specie payments not so very difficult. Now we have always contended that these legal tenders should not be considered as a part of the final debt of the country; a very important fact, if such it can be considered; and that by a gradual reduction of this amount in circulation from the surplus of the revenue, they could be absorbed so largely as to bring them very near to par in gold, and when there, they could remain in use for years, without damage to the country, or even being practically a drain on the Treasury for redemption. This view of the subject is made more interesting by another consideration. These legal tenders cost the people no interest, but they act as money in all its uses, and if they were turned into gold to-day at the current rates, they would at these rates be worth in round numbers about *four hundred millions in gold*! In other words our legal tender currency is this day, practically, financially and commercially, doing the work of four hundred millions in specie, without any interest being charged upon their use! Here is a fact of a rather startling character. A nation that, in a great, bloody and expensive war, can, on its own credit, sustain a circulation worth and equivalent to a gold currency of four hundred millions, is certainly not in a state of impoverishment, and may be fairly considered as fully equal to the financial responsibility of the time whatever that may be. It shows resources, business, activity, international trade and exchange, production and consumption on a vast scale, when so much real money can be raised, circulated and kept afloat; and say what we may, it is a complete contradiction of many theories as to the character and uses of money hitherto adopted as infallible by political economists. If it be true, also, that our legal tenders, at the present rates of gold, are doing the work of four hundred millions of gold, and to that extent are actually in the possession of the people of this country at this moment, then we are practically the richest people on the face of the globe, even if we are merely considering the money in circulation issued by the Treasury, estimated at its market value in gold. We do not see any escape from these conclusions. Here are so many millions of legal tenders in circulation, their value in gold is, say, in round numbers less 40 per cent. discount, four hundred millions; consequently this is their specie value, and their universal, commercial, producing power at this time. Can any nation in in the old World show any such state of things under such or indeed any other circumstances. We do not see how it is possible under any tolerable financial management, that this country, with this enormous amount of money in specie value, should fail in getting right with regard to the national debt. This money exists, and is in active circulation every moment, not for show but for business purposes. It is enormous and potential.

There is another view of this subject worthy of consideration, and particularly applicable to this currency question. Every dollar the government has paid out has been so paid for value received either in service, or material of some kind. Much of the service has been useless, unproductive after it has been employed, and large amounts of material in war must necessarily be wasted and destroyed. *But the money for it has not been destroyed.* It has been used in some new form, and represents an addition to the cash means of the holder. It exists as capital somewhere, and is in constant

use. We have then existing in this form in the country, in all about twenty seven hundred millions of dollars, paid out by the Government for services and materials, and somebody has had this money, used it, laid it out or holds it now. It is not lost, for the evidence of its having been paid out in this way, appears from the official statements of the Treasury, and from our own observation. Is all this money sunk and lost forever, or is it not visible in a thousand remarkable forms throughout the Country. No, this money is not sunk; it is invested in a new guise; it has become a part of the real and personal creations of industry in its visible and tangible forms; while yet, strange to say, the evidences of its existence remain, and the scrips, and the legal tenders are, amidst all these changes, the very same pieces of paper they were at first. Amidst all this wondrous change of properties, values and interests, they are identically the same, and maintain their credit and power with wondrous stability. We may thus see at a glance that we are after all meeting our debt and taxation under very favorable circumstances; and that we have, all things considered, something to gain even from our anamolous condition. If we have a large paper currency, yet this converted into specie at the present rates, is an enormous sum even at its gold valuation, enough to base almost any financial policy upon, that the national exigency demands.

If we have incurred a large national debt in the holiest and justest of all causes for which men have even taken up arms, the money has not been lost. Somebody has got it after all, and it is somewhere to be seen and traced. It is in the Country, and able to respond when called upon.

As a conclusion to these remarks we may add the following: that leaving out of view the statistics of the argument, we may see that the country has received all the money that has been expended and it is still here, that our much abused legal tender currency after all if driven into the gold room, and sacrificed there to appease the theories of bullionists, would this day represent four hundred millions in gold, a pretty respectable sum, and an illustration of the floating wealth and resources of the people which no nation in Europe can pretend to equal, and which settles the question of our pecuniary facilities, for the present at least, whatever may occur in the future.

So that all we have to do is promptly to meet the interest on our debt, which we are more than able to do, thus keeping up our credit, and maintaining our honor; next, applying all immediate surplus to the cancellation of the unfunded debt, in the shape of legal tenders, in such proportions as may assimilate them most rapidly to par in gold, and give them the highest value in circulation. This debt will then disappear as our former public debts have disappeared, and by the future wealth, resources and population of the country, when these debts will at maturity be practically, no more felt than were the war debts of 1812 and 1815, when they came to be paid. What we want then is thorough system in the Treasury, of which we are sure we have it now nearly as perfect as possible, economy in public expenditure, and proper application of our surplus revenues, and the result will be a perfect financial success. There is no doubt on the subject whatever. The official statement of the Treasury shows we are in sight of l[illegible]and; and we have adduced some particular considerations to show the financial power ever[illegible] of our own system, in spite of its natural def[illegible]ects. Each citizen doing his best in his own sphere to uphold his country, its credit and [illegible]s industry, we come to the conclusion, that the Americans are equal to all the emergencies which have been or may be even imposed upon them, whether of freedom, war, or finance.

Michigan Central Railroad.

The earnings and expenses of this road for the year ending May 31, 1864 and 1865, have been as follows:

Earnings:	1864.	1865.
From passengers	$1,262,415 07	$1,771,813 60
" freight	2,073,274 71	2,233,529 47
" miscellaneous .	98,858 85	140,076 50
	$3,434,548 63	$4,145,419 57
Expenses, viz:		
Repairs of road.	$306,699 95	$476,964 91
" buildings.	247,895 61	273,667 24
" locomot's.	158,915 49	230,490 35
" cars.....	137,439 91	306,943 46
Locomotive service..	84,994 20	105,855 31
Train " ..	59,941 63	75,651 94
Station " ..	346,508 18	442,959 13
Fuel	161,178 10	245,452 28
Oil and waste	41,277 24	60,292 95
Stationery, etc.....	17,452 28	28,280 18
Local taxes	85,617 81	91,533 41
Telegraph.....	61,745 57	18,567 26
Miscellaneous	10,509 34	49,491 21
	$1,720,125 05	$2,406,149 63
Net earnings	$1,714,423 58	$1,739,269 94

Compared with the previous year, the gross earnings of 1864–'65 show an increase of $710,-870 94; with an increase in expenses of $686,024 58—making the increase in net earnings, $24,846 36.

The expenses of operating the road (not including taxes) were $2,314,616 22, or 55.8 per cent. of the gross earnings. In 1864 they were 47.6 per cent. In 1863, 40.4 per cent. In 1862, 45.1. In 1861, 51. In 1860, 53.7. In 1859, 53.4. In 1858, 59.6. In 1857, 64.6.

Deducting also the expenditure on new grain house and elevator at Detroit, leaves as the legitimate sum chargeable as operating expenses, $2,-207,442 48, or 53.2 per cent. of gross earnings.

The per centage of expenses would have shown more favorably had it not been the policy during the past year, as has been the rule always, to keep the track and other property of the company *fully up to the standard*, notwithstanding, the extraordinary present cost of so doing; as it is a fact patent to all prudent managers that a contrary course is not only more expensive in the long run, but immediately so in crippling the means of efficient working. The gradual diminution in cost of materials and labor, consequent upon the closing of the war, will result in making a decided change for the better in the expenses of the coming year.

The increase in the earnings of the past over those of the preceding year is equal to 20.69 per cent. The increase in expenses (less taxes) 41.61 per cent.

The earnings from passengers show an increase of $509,398 53, or 40.35 per cent, over the last year. The earnings from freight have increased $160,254 76, or 7.72 per cent. The increase in earnings from miscellaneous sources has been $41,217 65, or 41.69 per cent.

The mileage of passenger trains shows an increase of only 10 per cent; and the mileage of freight trains a decrease of 12 per cent. The tonnage handled shows a falling off of 10 per cent.

The gain in through westward freight is 30 per cent; while the falling off in through eastward freight is 23 per cent. The latter is accounted for principally by reason of the large southwestern army demands for the products of the west. It is estimated that at least 30 per cent. of the last wheat crop is still in the hands of the farmers.

The total number of tons of freight moved has been 485,275. Average number of tons carried per train mile, 113.49. Average distance freight is carried, 150.30 miles. Freight earnings per ton per mile, 3.06 cents. Tons carried one mile eastward, 43,248,111; do., westward, 29,689,208—total tons carried one mile, 72,937,319. Proportion of tonnage carried eastward, 59.3 per cent; do., westward, 40.7. Earnings of freight trains per mile run, $3.47.

The total number of passengers carried was 852,889, of which 745,349 were way, 98,268 through, and 9,272 emigrant. Of the way passengers, 357,456 went east, and 387,872 west. Of the through passengers, 47,826 went east, and 50,442 west. Average number of passengers per train mile, 105.79. Average number of miles traveled by each passenger, 80.12. Passenger earnings per passenger per mile, 2.59 cents. Passengers carried one mile, 68,338,876. Earnings of passenger trains per mile run, $2.74.

Income Account.

Balance from previous year		$1,002,894 06
Receipts from pass...	$1,770,746 38	
" freight..	2,209,556 87	
" miscel ..	140,909 72	
		4,121,212 97
Total.....		$5,124,107 03
Expenses (including local taxes) ..		$2,406,149 63
Payments towards sinking funds..		84,500 00
Interest and exchange.....		622,980 96
Dividend six per cent., and six per cent. extra, July 1, 1864.....		757,884 00
Dividend six per cent., Jan. 1, 1865.		378,942 00
U. S. Tax on dividends		69,985 30
Do., on passengers and receipts....		95,279 64
Balance to new account		708,385 50
Total.....		$5,124,107 03

The receipts, as stated above, are $24,206 60 less than the earnings—showing that amount outstanding at the close of the year.

The net receipts for the year, after payment of all charges, was $842,317 44—showing a decrease from the previous year of $114,804 09.

The bonded debt has been decreased during the year by the conversion of $175,500 to stock. The company has no floating debt.

The capital stock has been reduced $20 by the purchase of fractional scrip to that amount; and increased by conversion of bonds $175,500.

The funded debt now amounts to $7,565,488 89; capital stock, $6,491,386—total $14,056,874 89.

The facilities furnished passengers the past year have not varied materially from the two years previous. Three through trains each way have been run; and in addition to the Dexter train, 47 miles, it has been necessary to run a train a portion of the year, to Kalamazoo, 143 miles. The latter train at this time only runs to Marshall, 107

miles. All trains are still worked, as for some years past, under the telegraph system, which has been much improved by putting up an additional wire the whole length of the road. The company now own two through wires between Detroit and Chicago. The same confidence exists as to the great value of an efficiently worked telegraph line, not only in the direction of trains, but in the transaction of a multitude of miscellaneous business, connected with the different departments.

The equipment of the road consists of 97 locomotives; 79 1st class and 4 2d class passenger cars; 17 baggage cars; 1,303 freight cars; and 269 hand and rubble cars.

The number of miles run by locomotives with passenger trains is 645,974; with freight trains, 642,671; with working trains, 104,665; with training trains, 189,483—total, 1,582,793.

GENERAL ACCOUNT.

Vice-President.—R. B. FORBES.

Treasurer.—ISAAC LIVERMORE.

Superintendent.—R. N. RICE.

Auditor.—WILLIAM BOOTT.

Another "Great Western" Railway.

On Monday week last, the leading officers of the New York Central Railroad Company, with a number of Eastern capitalists, passed through Urbana for Dayton and Cincinnati, with a view to select a route for a through line West, connecting at Buffalo with the Central. We are informed that the result of this visit has been the selection of the Lake Shore, Cleveland and Toledo, Sandusky, Dayton and Cincinnati (from Clyde to Dayton,) and the new (Air) Line Roads (from Dayton and Cincinnati.) The latter is to be constructed under the auspices of the New York Central Company, and operations will be commenced soon. It will be several miles shorter than the Hamilton Road, reaching Cincinnati by tunnel through Walnut Hill. The Mad River Road will be relaid and brought out as good as new. This new route east, which will be known generally as the 'narrow gauge,' will be a direct one, and taken in a majority of the best cities in the State of Ohio and New York—Cincinnati, Dayton, Springfield, Urbana, Tiffin, Sandusky, Cleveland, Buffalo, Syracuse, Albany and New York.—*Urbana (Ohio) Union.*

☞ The Alexandria and Washington railroad has been turned over by the Government to the Orange and Alexandria Railroad Company, thus perfecting the line of communication between Washington and Richmond.

Baltimore and Ohio Railroad.

Now that "this cruel war is over," there will no doubt be among our readers hundreds of persons who will desire to visit those scenes in the East, particularly in Virginia, Maryland and Pennsylvania, which have been rendered historic on account of the momentious events of which they were the theatre. We propose in this article to indicate a few of these places and to point out the best manner of reaching them. It will be borne in mind by our readers that, from the commencement of this war till its close, the capture of Richmond was deemed an object of paramount importance by the Government, and that the war did, in fact, come to a termination immediately after the occupation of that city by the Federal forces. On the other hand, the defence of their capital was made a primary object on the part of the Confederates. It was defended by an admirable system of fortifications, but, above all, by its being rendered inacessible by water. Around its walls were gathered the flower of the Confederate army, and in the various operations, directly and indirectly with the defence of the city, Gen. Joseph E. Johnston, Gen. "Stonewall" Jackson, and Gen. Lee himself, displayed those remarkable powers of generalship, and that profound knowledge of the art of war, which enabled them, for the space of four years, with comparatively small armies at their command, to baffle and keep at bay the vastly superior forces of the Federal army. Among these operations, the most prominent took the form of invasion into the States of Pennsylvania and Maryland; and manœvers, either realor feigned, directed against the cities of Baltimore and Washington. The general object of these operations was to relieve Richmond, by making it necessary on the part of the Federal commanders to employ the whole force at their disposal for the defence of Washington, or at least for movements against the Confederate army in Maryland and Pennsylvania. These operations too, were carried on in every one of the four years of the war. Thus, in 1861, both before and after the battle of Manassas, the Confederates maintained a strong force on the Upper and Lower Potomac, and even within sight of the dome of the Capitol. In 1862, they defeated Pope's army near Culpeper, drove it to the shelter of the Washington forts, captured Harper's Ferry, but were defeated by Gen. McClellan at Antietam, in Maryland. In 1863 their operations against Gen. Hooker, after the battle of the Wilderness, were carried on quite near Washington. They captured Winchester, Martinsburg, Williamsport and Hagerstown, on the Upper Potomac, invaded Maryland and Pennsylvania, captured Chambersburg, made strong demonstrations towards both Baltimore and Harrisburg, but were defeated by Gen. Meade, at Gettysburg in Pennsylvania. In 1864, even while Grant's army was engaged in the siege of Richmond, the Confederates, with a small but well appointed army, laid seige to Washington, took posession of a point on the Baltimore and Ohio Railroad, between that city and Baltimore; actually attacked one of the forts defending Washington; tore up and destroyed several miles of the track of the Baltimore and Ohio Railroad between Harpers Ferry and Baltimore; moved towards the latter place and burned the house of the Governor of Maryland, within sight of the Monmumental city.

In all these operations, there was a frontier line defended by the Federal troops, and which it was the continued object of the Confederates to force. The Baltimore and Ohio Railroad constituted this frontier line. It extends entirely across the State of Virginia, from Baltimore and Washington, on the east, to Parkersburg and Wheeling on the west, a distance of about 400 miles. As long as this frontier line was held and successfully defended, invasions of either Maryland or Pennsylvania, or operations against Baltimore or Washington, became impracticable. But whenever the Confederates succeeded in forcing this line, and in capturing a few of the military posts upon it, the whole of Maryland and Pennsylvania became open to their incursions, and there was nothing to prevent them from marching either on Baltimore or Washington. The defence of this road therefore became, practically and really the defence of the frontier; large bodies of troops were stationed upon it, and battles and skirmishes took place at many points along the line; and owing to causes which it is the province of the historian to relate, parts of the road were frequently in the hands of the Confederates.

As a military road, the importance of this railroad to the Goverument was very great. Its proximity to the seat of war, and its peculiar geographical position, rendered it particularly valuable. During the war the enormous number of nearly two-and-a-half millions of troops have been transported upon it. Its destruction, therefore, was greatly desired by the Confederate Government, and the latter put forth many strong efforts to accomplish this end. These efforts were too often attended with success. In June and July 1861, a large portion of the track was destroyed between Harper's Ferry and Cumberland, and a number of valuable bridges burned. The road and bridges were rebuilt in the fall of that year, and it was used that winter, and a greater part of the year 1862. In September 1862, after the defeat of Pope and the capture of Harper's Ferry, a considerable portion of the track near Martinsburg, west of Harper's Ferry was destroyed. In May and June 1863, after the Battle of the Wilderness, the Confederates again had possession of the road, and destroyed many miles of the track. Finally, in the latter part of June and early part of July, 1864, the Confederates under Gen. Early had posession of a large portion of the road between Baltimore and Harper's Ferry, and destroyed the track for a space of several miles. But no matter how much damage was done to the track, and how many cars and locomotives were destroyed, or how many bridges were burned or blown up, the Confederates found to their mortification and chagrin that the road was always rebuilt and placed in running order in an incredibly short pace of time, as soon as, and indeed in some cases before, military protection was afforded to the railroad company. Therefore, when in July, 1864, the Confederates made their attack on Washington they refrained from damaging the double track between Washington and Baltimore, because, as General Early afterwards stated, their experience had demonstrated that the railroad company could rebuilt their track in less time than it would take them to destroy it. And indeed, at that very moment when they were thundering away at the gates of the capital, the railroad company, with a strong force of workmen, were busily at work near the Monocacy, building the railroad bridge there and relaying the track, which Early had destroyed only three days before.

The transportation over this road of the 200,000 soldiers from Washington, composing the armies which have recently been mustered out of the service, including 90,000 men in the Western regiments who were taken to Parkersburg on the Ohio river is the last of the great military services which it has rendered to the government. Of these troops, 85,000 embarked on board of steamboats at the latter point, and sailed down the Ohio river to Louisville; and by this water transportation between $200,000 and $300,000 was saved to the Government, being the difference between the cost of water transportation and transportation by railroad. The advantage of having one of the Western termini of the road at Parkersburg consists in the fact that that point is one hundred miles further down the river than Wheeling, and about 200 miles further down than Pittsburgh. By proceeding West to Parkersburg therefore, about one or two hundred miles of water transportation, as the case may be, is saved, while Parkersburg can be reached, from the East, almost as quickly as those points one hundred and two hundred miles above it.

Since the end of the war, the track and bridges along the whole line of the road have been put in perfect ordr, and the equipment has been increased by the addition of a large number of new locomotives and passenger cars. The latter are su-

perb specimens of railway carriages, and are fitted up with every modern convenience and luxury. The company anticipates a very large travel ever the road this summer (indeed it has already commenced.) and has made every preparation for the comfortable accomodation of the public. Two trains leave Wheeling and Parkersburg, daily, namely from Wheeling at 11 A. M. and 10 P. M., and from Parkersburg at 6:30 A. M.

The route from this city is nearly an air-line. by the Ohio and Mississippi Railroad to Cincinnati, and thence by the Marietta and Cincindati Railroad to Parkersburg, or by the Central Ohio Railroad to Wheeling or Bellaire. To say nothing of the historic interest of such a trip, those of our readers who have never taken this route to the East will be surprised and delighted at the superb scenery along the line of the Baltimore and Ohio Railroad at the marvels of engineering skill displayed in the construction of the road itself, its bridges, its tunnels, and its viaducts. Twelve miles south of Wheeling the traveler passes the great Indian mound, whose origin, purpose and history are yet involved in ymstery. The Broad Tree tunnel, 40 miles from Wheeling; passes under a great hill, which was originally crossed by the railroad on a zig-zag track with seven angles thus: VVVV. At Fairmount, 77 miles from Wheeling, the railroad crosses the Monongahela River on a beautiful suspension bridge, one thousand feet long; and one mile further on, there is an iron bridge 600 feet long, which was five times destroyed, and as often rebuit during the war. At Grafton 104 miles east of Parkersburg there is another handsome iron bridge over the Tygart's valley river, and also an excellent hotel. Here the mountain scenery begins to assume those views of alternate loveliness and grandeur, which continue until the traveller reaches Baltimore. Eighteen miles east of Grafton the traveller reaches the great Kingwood tunnel, nearly a mile long, and solidly arched with iron and stone. Nearly five years were occupied in the construction of this great work, and its cost amounted to a million of dollars.

At Tunnelton, 19 miles east of Grafton, the grand scenery of the Cheat river region begins, and it is at this part of the road also that some of the greatest feats of railway engineering have been achieved. Those who desire to understand the power of science in conquering nature by the means of iron and steam will do well to observe carefully the features of the road between the great tunnel and Piedmont and see how it has been made to pass over, under and around the Allegheny Mountains. To the unscientific eye it would appear impossible that a railroad could be built so as to cross the mountains in this region. But not so thought the engineer of the road, Benjamin Latrobe. The great Kingwood tunnel is only one of the monuments of his genius. Between Tunnelton and Rowelsburg there is a space of five miles, filled with a constant succession of marvels in railway work. The Tray run viaduct is one of these—a light and graceful structure, yet so firm in its welded-strength, that thousands of tons of merchandise pass over it daily without causing the least oscillation of its airy arches. This viaduct is entirely built of iron. It is 600 feet long; it rests upon a massive base of masonry as firm as the mountain itself, and it is 150 feet above the water in the little run beneath. For several miles, on this part of the line, the road runs along the steep mountain side, presenting a succession of the most delightful landscapes.

At Cranberry Summit, 137 miles east of Wheeling our travelers will nearly have reached the top of the Allegheny Mountains. Here, looking back to the westward, can be seen the grand panorama of the long, gradual sweep of the Alleghenies towards the Ohio river, up which, to the present surprising altitude, the traveller has climbed, without effort and almost unconsious of the ascent. At Oakland, 147 miles east of Wheeling, travellers will probably stop for a short time at the "Glades" Hotel. The "Glades" are the mountain meadows, a region on the high table land at the summit of the Alleghenies. At this height the air is extremely rarified and cool during the heats of summer. The landscape abounds in groves of the beautiful white oak, and in copious streams of the purest and clearest water kept full and fresh by the clouds that condense around the summits, and abounding with delicious trout. It pastures innumerable herds of sheep whose tenderness and flavor rival that of the deer which abound in the woods; wild turkeys and pheasants hide among its oaks, beeches, walnuts and magnolias; the groves of sugar maple trees resound with the songs of the larks, thrushes and mocking birds, while a profusion of wild flowers complete the attractions of this mountain paradise. It is no wonder that many families from Baltimore come to the "Glades Hotel" to spend a few weeks in the hot summer months.

At Altamont, 160 miles east of Parkersburg, the traveller finds himself at the surprising altitude of 2,700 feet above the city of Baltimore, and upon the extreme summit of the Alleghenies. It is here that the mountain streams divide, flowing in one direction towards the Ohio River, the Mississippi and the Gulf of Mexico, and in the other towards the Potomac river, the Chesapeake Bay and the Atlantic Ocean. Mr. Prescott Smith, the Master of transportion of the railroad, who is as poetical as he is practical, has made the beautiful suggestion that these waters, thus divided on the summit of the Alleghenies, unite again in the broad Atlantic, amid the turbid waves of the gulf-stream. Nor is this beautiful theory at all improbable, for the vast volume of water which the Mississippi pours into the gulf stream is, as is well known, carried, with all the velocity of that mysterious ocean current, northwards past the mouth of the Chesapeake Bay, where it receives the waters from the eastward-flowing streams.

From Altamont the grade of the road begins to decend, and at Piedmont, 206 miles west of Baltimore, the traveller reaches, as the name implies, the foot of the Allegheny Mountains. At Cumberland 178 mile west of Baltimore, and between that point and Harper's Ferry the traveler passes that part of the road which was the especial object of the attention of the Confederates during the war. At Sir John's run, 128 miles west of Baltimore, passengers who wish to visit the celebrated Berkley Springs are afforded an opportunity to do so. The hotel at the Springs is 2½ miles from the railroad, and passengers are conveyed to it in coaches. The water of these springs is widely celebrated for its remarkable medical properties, and enjoys a high and well-deserved popularity. The hotel is kept by Mr. Trego, late of the Eutaw House, Baltimore. It is elegantly fitted up, lighted with gas, and the table provided with every luxury of the season. The fresh mountain breezes, and the sublime beauty of the surrounding country will tempt many of our travellers to prolong their stay here.

At Martinsburg, 100 miles west of Baltimore, the traveller will find the scene of the most destructive labors of the Confederate troops. It was here, and near here, that 87 locomotives and 400 freight cars, belonging to the railroad company, were collected by the rebel troops under Jackson's personal direction, and burned or destroyed. The wrecks of this work of destruction may still be seen, at intervals, along the road. Those tourists who wish to see the battlefield of Antietam, will stop at Kearneysville Station, 92 miles west of Baltimore. A turnpike road, from this point to Sharpsburg, crosses the Potomac river at Shepardstown and takes the traveller to Antietam, 7 miles only from the railroad station. Kearneysville was also the scene of many cavalry fights, between Pleasanton, Averill, Custar and Merritt, on the one side, and Fitz Lee and Stuart on the other. It is worth mentioning, by the way, in connection with this part of the road, that it and the whole region around Martinsburg, including that town itself, was occupied alternately at least fifteen times during the war, first by the Federal and then by the rebel soldiers, and battles were almost continually taking place in its vicinity.

The boldness and grandeur of the mountain scenery at Harper's Ferry has now derived ten-fold attractions from its having been a scene of such highly important military opperations. Every traveller would wish to see the Maryland Heights, Bolivar Heights, and the fortifications that have been erected on them. This was the theatre of one of Stonewall Jackson's most famous exploits, when Harper's Ferry was captured by the Confederates in September 1862. At Monocacy, 59 miles from Baltimore, the traveller will pass the battle-ground where on the 9th of July, 1864, Gen. Lew. Wallace and the Federal forces were defeated by a largely superior Confederate army, and compelled to retreat to Baltimore. Subsequent developements have rendered probable that the gallant stand made at the Monocacy Bridge on that day, by Gen. Wallace, and the heavy loss he inflicted on the enemy, saved Washington from capture on the 12th.

Arriving in Baltimore, and refreshed there with the comforts of good Hotels and the luxuries of the season, our tourists can then proceed to Washington, 40 miles distant; and on their return to Baltimore can take the Chesapeake Bay Steamers for Fortress Monroe, Norfolk, Petersburg and Richmond.

We have thus indicated a route for a summer's tour which cannot fail to give a great deal of pleasure to those who take it. Such as wish to pass over the route rapidly, from St Louis to Baltimore and Washington, can reach the latter place in three days, and see most of the notable features as they pass. But to all who would spare the time we would recommend at least three stoppages *en route*, namely, at the Glades Hotel at Oakland, at Berkely Springs, and at Harper's Ferry. Through tickets, allowing the holder to stop over at any point he may desire, can be procured of the agent of the road in this city; and baggage will be checked through to any desired point. From Baltimore, the traveller can proceed by railroad to Gettysburg in Pennsylvania, five hours' ride, and see the battle-ground there, and the Soldier's National Cemetery.

The length of this article precludes even the briefest mention of many points of interest along the Baltimore and Ohio Railroad, of which we would otherwise gladly speak. They cannot, however, fail to be noticed by the observing traveller; and the scenes which this trip will bring before the eye of the tourist will retain a permanent place in his recollection, and will constitute some of the "pleasant memories" of one's lifetime.—*St. Louis Republican.*

HEMPFIELD RAILROAD BONDS.—The Supreme Court of West Virginia has rendered its decision in the case of the Ohio county bonds, issued in favor of the Hempfield railroad company. The validity of these bonds was questioned on the grounds that the Hempfield railroad company was not a Virginia company, as required by the section of the code under which the bonds were issued, and furthermore, that the agents of the county had gone beyond their authority. Under these circumstances the county authorities refused to pay the interest on these bonds, and the matter was brought before the supreme court for settlement. The court decided in favor of the bond-holders, and the county becomes responsible for principal and interest. The amount yet outstanding and which will have to to be provided for is about $78,000, with accured interest.—*Wheeling Intel.*

Internal Revenue Decision.

The Commissioner of Internal Revenue has made the following additional rulings:

Section 120 provides that there shall be levied and collected a duty of five per centum on all dividends in scrip or money thereafter declared due, and whenever the same shall be payable to stockholders, policy holders or depositors, as part of the earnings, income or gains of any bank, trust company, etc. And further provides that said banks, etc., shall pay said duty, and are hereby authorized to deduct and withhold from all payments made on account of any dividends or sums of money that may be due and payable as aforesaid the said duty of five per centum, and pay

the same to the Commissioner of Internal Revenue. Under this law it is clear that although the surplus from which the dividend is declared was acquired prior to the passage of the revenue law, yet if the same is divided after the law went into effect, it is taxable. The rule is that the tax must be withheld from the entire dividend whenever it becomes due and payable without regard to the time when the profits or earnings were acquired.

The National Debt.

The following is the detailed official statement of the public debt, just issued by Hon. HUGH McCULLOCH, Secretary of the Treasury:

DEBT BEARING INTEREST IN COIN.

Authorizing Acts.	Character of Issue.	Rate of Interest.	Amount Outstanding.	When Redeemable or Payable.	Interest.	When Payable.
January 28, 1847	Bonds	6 per cent.	$9,415,250 00	Payable after Dec. 31, 1867	$564,915 00	Jan. and July.
March 31, 1848	Bonds	6 per cent.	8,908,341 80	Payable after 20 years from July 1, 1848	534,500 50	Jan. and July.
June 14, 1858	Bonds	5 per cent.	20,000,000 00	Payable after 15 years from Jan. 1, 1859	1,000,000 00	Jan. and July.
June 22, 1860	Bonds	5 per cent.	7,022,000 00	Payable after 10 years from Jan. 1, 1861	351,100 00	Jan. and July.
Feb. 8, 1861	Bonds	6 per cent.	18,415,000 00	Payable after Dec. 31, 1880	1,194,900 00	Jan. and July.

American Railroad Journal.

Saturday, August 12, 1865.

Stock Exchange and Money Market.

The easy condition of the Treasury, the large balances on hand at its sub-office in this city, and especially in coin, have set the fault-finders at work, and particularly the dealers in gold. Such presses as are in their interest are greatly discontented with the secretary, for being master of the situation. They feel insecure with their programme, and are alarmed lest their expected gains will never be realised. The country, however, rejoices at the present condition of things, and begins to see its way out of its financial troubles. Retrenchment being the order of the day, and the revennes being large not only, but cheerfully paid, it seems to be plain, that we are sure to make both ends meet with something over for the future. This is the conviction of all those who are studying the question.

The tight money market, so confidently predicted for some time past, has failed to make its appearance. It is quite impossible that it can occur as long as so much paper money is afloat, which for our part we should like very much to see diminished in quantity. As long as we do not know from day to day, what a paper dollar is worth, so long we shall have fluctuations in prices of commodities, uncertainty in business, and looseness of morals in trade. We cannot deprecate too much the laxity which it has caused among dealers, who make their greatest gains by the new power they exercise over consumers, and which they do not hesitate to exercise. Complaints and combinations against extortions may be ever so numerous, but they will amount to nothing while our currency is without stability and changes in value every day.

Our attention has been again drawn to the curious nature of our foreign commerce. It presents some anomalies which we cannot comprehend. Looking over our late files of Liverpool papers, we find the exports to this country of a most singularly inconsistent character. Thus we find among the exported articles from Liverpool to the United States during the week ending the 17th of July last 62 hhds of tobacco. Surely it is carrying coals to Newcastle to bring tobacco in this form to this country; 200 bbls of pork, 186 tons of rice and 20 bales of East India cotton, when this article of our own growth is actually in excess of the demand and declining in price. We might mention other articles, which are produced here in large quantities which make up large portions of these foreign imports, all it seems to us entirely unnecessary, and for which we are called on to pay in gold. We sometimes wonder on what principle foreign commerce of this sort is conducted, and who it is that are engaged in flooding the country with articles it is competent to produce for itself. Certain it is, that anything which can be shipped, the very refuse of the markets seems readily to find its way to New York, and the old World fully to understand our capacity to consume, and our ability to pay, no matter what opinions it may entertain of our institutions. Every true patriot must regret that it is in the power of any classes of men, merchants so called or any other, to direct the consumption of this country in this extraordinary manner, particularly when there is so little reciprocity in the dealings of those nations who are deepest in the American trade, and who cannot build steamers fast enough for the lines they are projecting to ply to our ports. On the other hand we are literally doing nothing in the way of competition. It is said that more than a thousand American ships have changed their flags, and we do not hear of their coming back again. We have not a single line of steam mail packets on the Atlantic, and are not likely to have any, until the Government fulfills its half promise to use some of our surplus vessels in that service, as we have long contended it should do. If we are to have commerce and intercourse with other nations, we are of the opinion that we should have some interest in the carrying trade itself, and common sense tells us that at least we should carry our own letters, and not pay a million dollars annually to foreign companies for that work. Is there not some power in the American press, some statesmanship in our

rulers, some sagacity in our commercial classes to grasp this subject and make it understood; or are we all so much engrossed in hunting for office, and in politics and their petty personal details that we cannot see anything beyond them. Really it would sometimes seem as if details were all that engross the public attention, or control the policy of the country. Can any man doubt that if some 20 or 30 of our fastest government steamers, were to be formed into mail lines all over the Ocean, that it would thus at once give us advantages we have entirely lost, or that a better and more useful service for a part of our navy could not be found than this we propose. Commerce all on our side, and to our disadvantage is not what we want, but reciprocity at least in its forms, conduct and advantages.

We notice the last weekly statement of the associated Banks, shows some considerable changes as affect themselves, but have no more influence on the general current of business, than a pebble has on the waters when thrown into the bay of New York. Their deposits have decreased between eight and nine millions, so much the worse for their profits, and their specie between one and one and a-half millions. This too is of but the slightest consequence.

Foreign exchange is dull, and the rates show that it is not sold at a profit. It appears as if there was some rivalry existing between the English and German dealers, the latter having frequently come into the market on late occasions, and underselling the former at a considerable reduction. That exchange is constantly being sold under par is evident. Par is $4.86; and to get this the premium at 9⅛ per cent., must be added to the $4.44 the usual formal valuation of the pound sterling.

Thus	$4.44.44
9⅛ per cent	42 22
	$4.86.66

The present rate being full 1 per cent. and upwards less than this, the sellers of exchange find their profit if any, in the interest made on the transaction, or the necessities of borrowers, who will take exchange often in preference to paying high interest in the street. This mode of raising money has long been practised by needy operators. The truth is the German houses here and abroad, interested in American transactions, have always shown a superior breadth of comprehension, have more cosmopolitan views, understand us better, and have more confidence in and better judgment with regard to American transactions and securities, than any other class of foreigners resident among us, and their faith in us has been profitable to them. They have made a great deal of money by their early investments in our national stocks, while the French and English Bankers yielding to their prejudices, have had to come in at the eleventh hour to be satisfied with the gleanings of the field. The day is not distant when our securities will have a preference over all others, in all the Bourses of Europe. They are growing stronger every day, and the occasional temporary decline they meet with in the London Market, is no indication whatever of their real or final value. We suppose when the Atlantic Telegraph get fairly to work, if it ever does, the speculators at either end will combine at once to use it for their advantage, and temporarily to depress prices that they may have larger profits in the end, which after all, is the principle lying at the bottom of all investments in this as in other kinds of securities.

The demand for gold for exportation is sensibly diminished. The following table shows the specie exports from the port of New York to foreign ports for fourteen years, from January 1, to August 4, 1865, and for the corresponding period in the other years:

1865	$18,647,998	1858	$15,775,719
1864	31,189,561	1857	28,216,619
1863	25,843,450	1856	20,533,584
1862	36,419,511	1855	19,968,728
1861	3,261,458	1854	20,200,041
1860	29,115,284	1853	12,584,824
1859	44,396,190	1852	15,595,508

So that it is evident there is great falling off in the export of the present year, as compared with any since 1861, during the same period of time. The alarmists must contrive some new tables if they wish to create further apprehension in the public mind.

The sellers of gold are much embarrassed by the very strong position of the Treasury, in respect to the precious metals. It is certainly in the power of the Government, so large is its surplus, to break down the market at any time it thinks proper to do so, and if it can reduce the premium in this way, it is doing a real benefit to the country. If it were possible to get down the premium on gold to 5 or 10 per cent., and keep it there, we need not have any further anxiety about legal tenders. They would be worn out in the use before it would become necessary to fund them. Their present value in gold we have before this estimated at nearly four hundred millions, and if it is advisable that such an amount should continue in active circulation, why we would have it, that's all. The premium has continued pretty steady during the last week, but it has been upheld at much cost and anxiety.

In railway securities there is a steadiness but not buoyancy. States are firm, and there is some inquiry for North Carolina, showing that there is an expectation of a return to solvency in the reconstructed States.

Orders for foreign account were executed for the steamers of Wednesday to the extent of a million and a-half, notwithstanding the last reported decline in the London Market, to which it is evident the American holders are very wisely becoming indifferent. In the export list of the week we find also about 6,000 bales of cotton, of the value of $1,400,000. The total value of the exports for the week was $3,894,479. The customs duties continue to be very large, and leave the Treasury a heavy surplus to be disposed of from time to time for currency for which it has a legitimate necessity.

The balance in the Sub-Treasury on Tuesday, was $60,053,810.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Onio and Mississippi 1st mort., 75; Milwaukee and St. Paul 1st mort., 76; Joliet and Chicago R. R., 90; New York State 6s, 1873, 98; Central Am. Transit Co., 20; Brunswick Land Co., 13; Western Union Tel., 73; 9th National Bank, 104, Ocean Bank, 90; Bank of America, 136; Am. Ex. Eighth National Bank.

This institution, most conveniently located at 650 Broadway, notwithstanding the recent burglarous attempt on its assets, continues to pursue its successful career both as the friend of business men and the fiscal agent of the Government. Among its Directors we recognize the most successful and prosperous merchants of the city, and worthy of all confidence. The securities of this Bank are kept in one of Herring & Co.'s Best Burglar-proof Safes, placed within a Fire and Burglar-proof Vault of Valentine & Butler's celebrated manufacture, supported on a foundation of solid masonry. These, with the additional safeguard of a night watchman secure the Bank against loss by either fire or burglary.

U. S. Military Railroads.

The Assistant Quartermaster gives notice that there will be sold at Public Auction, to the highest bidder, the following Rolling Stock:

On Tuesday, Sept. 19, at the Portland Co.'s Shop, in Portland, Me., six (6) Locomotive Engines.

On Thursday, Sept. 21, at Hinkley & Williams' Shop, in Boston, Mass., four (4) Locomotive Engines.

On Monday, Sept. 25, at Kennett square, near Philadelphia, Pa., fifty (50) Box Freight Cars four feet and eight and a half inches gauge.

On Wednesday, Sept. 27, at Wilmington, Del., eighty four (84) Box Freight Cars, five foot gauge.

The above stock is all new, and of the very best quality.

The engines are five feet gauge, five feet drivers, and the cylinders sixteen by twenty-four inches. They can be changed to narrow gauge at a trifling expense.

Sales to commence at 10 A. M.

Terms—Cash in Government funds.

☞ Engineers are at work surveying and locating the West Virginia railroad, between Charleston and Ceredo, and it is proposed to commence work upon it in a few weeks. This road will be of immense advantage to that portion of the State, particularly the Kanawha Valley, and will, without doubt, become a good paying concern.

Imperial Mexican Railway.

Official information is given of the opening of this line for passenger and goods traffic from Vera Cruz to the Pass of Macho, where the ascent from the hills of Caliente to the healthy districts of the interior of the country commences. The directors, alive to the importance of bringing the unkertaking under the knowledge and into the favor of European travelers, announce that a special train will be despatched from Vera Cruz on each arrival of the steam-packet from Europe, so as to enable the passengers to reach the interior with the least possible delay. This is a prudent arrangement; and, although the special train may not probably pay its own expenses for some time to come, it will not fail to add materially to the well-being of the enterprise whenever it is opened throughout to Mexico.

We subjoin the chief stipulations of the concession under which this noble enterprise (300 miles in length) is being carried out:

"1. The exclusive privilege in perpetuity of the main line from Vera Cruz to Mexico, with a branch to Puebla.

"2. The exclusive right of constructing any branch lines desired within sixty miles from the main line.

"3. A State subvention of $6,000,000, in bonds charged on an additional 20 per cent. over and above the ordinary customs dues of the ports, which has been legally appropriated to the public works (Mejoras materiales) by ordinance 31st Jan., 1856, Art. 11., the said bonds being receivable as cash by the custom-houses to the extent of 20 per cent. of the duties, and being repayable by half-yearly redemptions at par during twenty-five years, with 5 per cent. interest.

"4. State subscription for shares to the amount of 15 per cent. of the ordinary customs receipts for five years, estimated to produce 800,000*l.* secured on the said customs dues. The shares, receivable at par at the custom-houses, and intended for the endowment of hospitals in Mexico, are inalienable by the State. The payment of both the said proportions of 20 additional and 15 per cent. of the ordinary customs dues in these bonds and shares respectively is made obligatory on importers for the period stated.

"5. Immunity from all rates and taxes during fifty years.

"6. Importation free of duty of all materials, machinery, and coals, both for the construction of the railway and for its use for thirty years.

"7. Exportation, duty-free, of specie to the same amount of value.

"8. Free grant of all Government lands required for the line, and of all mineral properties discovered in the construction.

"9. The privilege accorded to the company to fix its own tariffs of charges and rates, both for goods and passengers, without any limitation."

The remainder of the works, it should be added are being conducted under the superintendence of Mr. Jas. Samuel of Gt. George-st., London, and Mr. Talcott of the United States, the latter remaining in Mexico to personally superintend the details.

☞ An adjourned special meeting of the Boston, Hartford and Erie Railroad Company was held in Boston the 3d inst. President George M. Bartholemew presiding. Mr. Lyman Nichols as Chairman of the committee, submitted a report recommending that the company complete the line from Boston to Mechanicsville and Southbridge, and stating that the floating debt of the company, including the furnishing and equipments of the road, is $1,055,510. The report was adopted.

Welland Railway.

The receipts of this road for the year 1864 were £13,964 and the working expenses £12,766, which would have left a profit of £3,198, except for the depreciation the of currency. The number of the passengers carried during the year was 37,567, showing an increase of 6,211 as compared with those carried in the year 1863. The whole of the profit on working the traffic had been absorbed by the loss from depreciation in the currency. The rate of exchange was now much more favorable, and there was every reason to anticipate a busy season in the grain trade for the year 1865. The capital account showed that £359,564 had been expended.

Lexington and West Cambridge R. R.

The earnings of this road for the year ending July 31, 1865, were $1,072 26; ordinary expenditures $23,614 11; extraordinary expenditures, $11,232 65, making a total of $34,876 76. Aside from extraordinary expenditures, the net earnings of the company were $7,428 15. The following named gentlemen were chosen Directors for the ensuing year: Messrs. R D. Blinn, W. Tower, Samuel Butterfield, D. W. Muzzey and Wm. E Parmenter, and they were authorized to lease or sell the road if they should see fit—the same power as voted at former annual meetings. Subsequently. Mr. Blinn was elected President by the Directors,

Portage and Lake Superior Ship Canal.

The Portage Lake *Mining Gazette*, of July 20th. says that the construction of this long-talked of and important canal is a certainty, and that in three more weeks the work will have been commenced. As all are aware, next to the construction of a railway along the great mineral range, this is the most important work which has been projected in the Lake Superior country.

☞ The Cincinnati, Peru and Chicago Railway was sold on the 2d instant under a foreclosure of the first mortgage. The sale was made at Laporte, Indiana, by the United States Marshal, and the road was purchased by Wm. W. Niles, of this city, for himself and other bondholders. The road is now running for thirty miles, and it is intended to complete it to the Peru, and thus form a continuous line from Cincinnati to Chicago.

☞ The city railroad company of New Orleans have now about thirty-two miles of track in operation, upwards of a hundred cars, and some five hundred mules in use.

☞ The Hudson River Railroad Company has extended the track of its city road through Warren street to Broadway. The cars are now running on the extension.

☞ Arrangements are being made with the Louisville and Nashville Railroad Company to put the Memphis, Clarksville and Louisville road in operation. Orders have been received for the Nashville and Chattanooga and the Nashville and Northwestern Railroads.

☞ Another section of the Dubuque and Sioux City Railroad has been completed, and cars have commenced running to Parkersburg. The work on the road is rapidly progressing.

☞ The Mobile and Ohio railroad is completed from Columbus, Ky., to Trenton Tenn. Cars will be running through to Mobile in a few weeks.

☞ Work on the Chenango Canal extension has been commenced at Willow Point and also near Union.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway for the week ending July 29, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$48,181 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	65,253 00
Total	$117,470 00
Corresponding week, 1864	105,795 00
Increase	$11,675 00

The earnings of the Marietta and Cincinnati Railroad for the fourth week in July, 1865, were:

	1865.	1864.
Passengers	$19,673 20	$18,043 51
Freight	15,230 00	12,812 27
Mail, express & telegraph	1,435 47	808 63
Total	$36,338 67	$31,664 41
Total this month to date	108,651 92	89,533 52
Total for the fiscal year commencing Jan. 1	$653,108 18	$555,802 90

The traffic of the Great Western Railroad for the week ending August 4, 1865, was as follows:

Passengers	$33,957 25
Freight and live stock	21,540 50
Mails and sundries	2,376 98
Total	$57,874 73
Corresponding week of 1864	48,821 87
Increase	$9,052 85

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending July 31, were:

	1865.	1864.
Passengers	$4,311 02	$3,014 28
Freight	12,428 53	8,621 09
Express	260 22	104 16
Mail	296 58	296 58
Total	$17,296 35	$12,036 11

Receipts from January 1 to July 31:

1865	$361,528 94
864	318,602 07
Increase	$42,926 87

The earnings of the Chicago and Northwestern Railway for the fourth week in July, 1865, were $209,604 75
Corresponding week of previous year. 131,545 89

Increase 59.30 per cent $78,058 86

St. Stephen's Branch R. R.

A meeting was held at St. Stephen's, N. B., on he 17th ult., of all persons holding real estate in the lower district of the Parish, for the purpose of taking a vote on the assessment of property in accordance with the Act of Assembly passed June 8, relative to the issue of debentures by the St. Stephen's Branch Railway Company. The yeas represented $156,030, and the nays $58,340. The Act under which this meeting was held, provides that "if it shall appear to the presiding Justices that the affirmative votes represent two-thirds in value of the real Estate, they shall report the same to the Lieutenant Governor, who will cause it to be gazetted, whereupon the Act shall be ipso facto in full operation and effect." The Yea votes having represented $40,000 over and above the Nays, the announcement was of course received with much applause and three cheers were given for the Branch Railroad.

☞ The Postmaster-General has ordered the renewal of mail service on the Mobile and Ohio Railroad, from Mobile Ala., to Columbus Ky., including Macon, and other points.

Journal of Railroad Law.

AUTHORITY OF PRESIDENT TO CONTRACT FOR COMPANY.—RATIFICATION BY COMPANY.

The President of the Tioga Railroad Company was allowed for 3 years to purchase locomotives for the Company, giving bills for them in his own name as president of the Company, to run the locomotives upon the road which he managed in his discretion. Afterwards the Directors resumed the charge of the road and of the locomotives for some years, though they do not settle nor question the accounts rendered by the president of these transactions. One of these bills not being paid, action was brought against the company upon it. One of the questions among others to be decided was whether the acquiescence was such a ratification of the president's acts as to be evidence of his original authority to bind the corporation by bills given for locomotives. The Supreme Court of the state held that it was, and on appeal affirmed the judgment which was obtained.

The opinion of the later Court was prepared by SELDON J. The referee has found, as a fact that the draft upon which the first action was brought was executed by the defendant, and that finding includes an affirmation of the authority of Wilson, in the president of the company, to make the draft in its behalf. If there was any evidence proper to be considered by the Referee tending to sustain this finding, sufficient to justify the denial of the defendent's motion to dismiss the complaint, the finding cannot be disturbed on appeal to this court. I think there was not only some evidence to justify the conclusion of the referee, but do not see how he could have arrived at a different result.

It was within the power of the board of managers to clothe the president with authority to make the purchase of the locomotive, and to give the obligation of the company in payment for it. The language of the Charter is "the president and Managers shall conduct the business of said company," and there is nothing in the Charter, or any of its supplements, to restrain this extensive power, so far as relates to the present question. The purchase of locomotives was a part of the ligitimate business of the company, and it cannot be questioned that the president and manager could appoint an agent with full powers to make such purchases, whether the agent was one of their number or a stranger (Aug. & Ames on Corp. ch. 8 § 1 chap. 9 § 2.) and to execute bills or notes of the corporation in payment of bebts thus incurred. (Curtis *vs.* Leavitt 15. N. Y. 9, 66, 67.) "All acts within the powers of a corporation may be performed by any of its own selection." (Barnes *vs.* Ontario Bank 19. N. P. 158.) Mr. Wilson was clearly invested with power to make the bill. He was president of the company, not only de facto but de jure. He was properly elected in January 1839, and without any special provision in the Charter to that effect would have held over until another president was elected (change, 625; 10, Mod. 146; 9, Johns, 168) and the fourth section of the chapter expressly provides, that the officers elected by the stockholders, among, which is the president, "shall continue in office for one year, and until others are chosen." He had not removed to New York when he made the bill, and it is therefore unnecessary to consider what effect such removal had upon his powers or temure of office. By virtue of his office, if nothing further appeared in regard to his powers, I think he would not have been authorized to purchase the locomotive, or to execute the bill. These were duties which belonged to the board of managers, and could only be conferred upon the other officers or agents with their consent. (McCullough *vs.* Moss, 5 Denis, 575; Hoyt *vs*, Thompson, 1, Seld. 320.) The managers prior to the 2nd of April, 1838, appointed an executive committee, and by a resolution of that date invested the committee, so far as their act could do it, during the intervals between the meetings of the board with the full powers of the board to act for, and to bind the company.

That committee, in October 1839, authorized the president to purchase a locomotive and tender, and to give the notes of the company for them and also "to act in all the ordinary business of the company as fully as the committee" might do. It does not appear that these powers were ever recalled; and if neither the board of managers nor the committee were acting beyond the scope of their own authority, the president had the express warrant of the corporation for everything which he did. The managers might undoubtedly clothe a committee, in the interval between the sittings of the board with all their own authority to conduct the ordinary business of the company (Hoyt *vs.* Thompson's Executor 19, N. Y. 207, 216:) but it does not follow that the committee could delegate that power to one of their number; I doubt their authority to do so, as they had no express power of substitution; but it is unnecessary to pass upon that question, as there is another ground on which the power of the president to bind the company must be sustained. The board of managers, designedly as it must be presumed, relinquished to the president for a period of three years (embracing the time of all the transactions involved in the present actions) the exclusive management of the business of the corporation; allowing him at his own discretion, to employ and pay the workmen constructing the road; to purchase and lay the iron constituting the track; to borrow money in large and small sums, giving the notes or bills of the corporation therefor, as well as other securities; to purchase locomotives and cars, and to put them in use on the road, paying for them in like bills and notes; and when at the end of the three years, the managers again resumed the discharge of their appropriate duties, they took possession of the road and all the property thus procured by the president and continued to use such property for several years without question as to the manner in which it had been obtained. Under such circumstances, the acts of the assumed agent cannot be repudiated. The powers of the agent of a corporation are such as he is allowed by the directors or managers of the corporation to exercise within the limits of the Charter; and the silent acquiescence of the directors or managers may be as effectual to clothe the agent with power as an express letter of attorney. Judge Story says in Bank of United States *vs.* Dandridge (12, Wheat, 64,) "if officers of a corporation openly exercise a power which presupposes a delegated authority for the purpose and other corporate acts show that the corporation must have contemplated the legal existance of such authority, the acts of such officers shall be deemed rightful, and the delegated authority

will be presumed. This doctrine has often been confirmed (Melledge *vs.* The Boston Iron Co. 5 Cash 175: Bridenbecker *vs.* Lowell 32 Barb. 18 Perkins *vs.* Washington, Ins. Co., 4 Cow. 645, 659, 661, Hoyt *vs.* Thompson's executor, 17, N. Y. 208, 219; Aug. & Ames on corp., 3d. ed. 269;) and applied to the present case, shows that the authority of Wilson cannot now be denied.

But it is insisted that the bill purports on its face to be the bill of Wilson, and not of the defendant and does not therefore bind the defendant. The evidence shows that it was drawn for the debt of the company, by an agent authorized to draw it, and according to well settled rules the company is bound by it, if upon the whole instrument it can be collected that such was the intention. (Story on Agency, § 154: Rathbone *vs.* Budlong, 15 Johns, Many *vs.* Beekman Iron Co., Page 189, Safford *vs.* Wyckoff, 1 Hill, 11, S. C. 4, id. 442; Fuller *vs.* Hooper, 3 Gray, 334.) There was clearly sufficient upon the face of the bill to indicate an intention to bind the company. In this respect the case cannot be distinguished from those of Safford *vs.* Wyckoff, and Fuller *vs.* Hooper (supra). The defendant's counsel claims that the contract for building the locomotive was not binding on the company, and for that reason the president had no right to execute the bill on behalf of the company. Two grounds are relied upon to sustain the position: 1, That the contract was on its face the private contract of Wilson and Bostwick; and 2 that defendant had no power to make the contract jointly with the New York company, and that it could not therefore bind them. The first ground is answered by what is said in regard to to the bill. The evidence is equally as clear on the face of the contract as it is on the face of the bill, that it was made for the corporation. In regard to the other ground, I think the companies, if there were nothing special on the subject in their charters would have been authorized to make the arrangement which existed between them for a joint ownership of locomotives to run over both their roads. (4, Seld. 37, 14, Barb. 471, 24, id. 382; 29, id. 56, 57; 6, Gray 539. Redfield on Railways. pp. 281, 287 § § 135, 136,) but whether that could be so or not the supplement of the defendant's charter passed in 1835, providing for the connection of their road with the Chemung Canal or slackwater navigation would justify them in making that arrangement.

The defendant's counsel excepted to rulings of the referee, allowing the president of the company to testify that on various occasions both before and after the date of the bill in question he made drafts and promissory notes in the name of the company; that they were honored and that the amounts entered into the accounts of the company. I think the evidence admissable. The cases above referred to show that the limits of an agent's authority may be determined by the power which he is allowed to exercise, and that silent acquiescence of the principal may be equivalent to express assent. In other words that the authority may be shown by circumstances. The recognition by a corporation of acts on the part of the agent similar in character to those which may be in dispute tend strongly to establish the agent's authority. 15, Johns 541, Hill 501; 4 seld., 160.) It does not appear the board of managers had any direct agency in the payment of the bills or notes made by the president, and it is a fair presumption, from the manner in which all the business was done, that the payments were made by the president, without any communication at the time of the other officers or the managers of the company, and if nothing further appeared, such payment would have been circumstances of no importance; but the subsequent rendering of accounts to the Board of Managers containing entries of such payment unobjected to on the part of the board, affords a strong presumption of the ratification of these acts. At all events such evidence could not be rejected and even if its bearing should be regarded as slight or remote. It is insisted that evidence of the making of bills and notes subsequent to the date of the bill in suit, was specially objectionable; but I think the authority to make the bill might be shown by the approval of similar acts after as well as before the billl was drawn. The proof relates to a continuous series of acts embracing the time of the act in controversy, and was all of it competent as bearing on the authority to perform that act. The objection goes to the weight and not to the admissibility of the evidence; later acts might be less decisive than prior ones, but evidence of them could not properly be excluded.

Exceptions were also taken to testimony showing that the presidency of Mr. Wilson, his making of loans, purchasing property and giving negotiable paper for the company were the subjects of conversation at the meeting of the board of managers in February 1841. What took place before the Board of Managers when engaged in the businness of the company in regard to the doings of the president was undoubtedly admissible, as notice to the corporation of the powers which the officer was exercising. Notice to the Board was notice to the corporation (19 N. Y. 216.) It is however insisted that the evidence excepted to related to conversation, with individual members of the board which doubtless would have been inadmissible; but the case does not admit of that interpretation, especially as it appears that the referee had before the testimony was offered refused to hear evidence of such conversation.

These are all the objections which are made to the judgment upon the bill of exchange, and I think none of these are such as to require its reversal.

Interest and Dividends.

The Chicago and Alton Railroad Company will pay September 1, a dividend of 3½ per cent. on their preferred and common stock.

The Oswego and Syracuse Railroad Company their twenty-fourth semi-annual dividend of four per cent., free of tax, payable 21st inst.

A dividend of 3 per cent. on the stock of the Delaware Division Canal Company, clear of State and National tax, has been declared, payable on the 15th inst.

☞ The Ithaca and Tonawanda Railroad Company has been organized by the appointment of Ezra Cornell as President, William Andrews as Vice-President, L. L. Freeman as Secretary, and A. B. Cornell as Treasurer.

☞ The Fond du Lac *Commonwealth* urges the completion of the Sheboygan Railroad to Fond du Lac, to give an outlet to the products of the city.

Chicago and Northwestern Railroad.

The United States Circuit Court, Judges Davis and Treat, has refused the injunction prayed for by a portion of the stockholders in the Galena and Chicago Railway Company, to restrain the consolidation of that road with the Northwestern Railway Company and for the appointment of a receiver, &c. The Court, in refusing the injunction, declined to decide upon the merits of the case; but, nevertheless, the decision is a virtual refusal to set aside the consolidation. One of the strongest points made in the argument was, that the consolidation, which was made over a year ago, was of so gigantic a character, that to overturn and destroy it at this day was to disturb a system of railways and overthrow a series of financial and commercial operations affecting the property and business of thousands of people who, in no way connected with the consolidation itself, have in good faith acted upon its existence. The Court evidently felt the force of this consideration, and therefore refused an injunction, or any other proceedings calculated, however remotely, to disturb the immense interests involved and the vast works in operation by the consolidated companies. They virtually, if not in fact, decided, that the consolidation was to stand, but that the non-consenting stockholders should be made whole as to the value of their property on the day the consolidation took place. This reduces the question at issue to a mere pecuniary one, viz: How much the stockholders of the Galena road are equitably entitled to for their interest? The terms of the consolidation offered them a certain sum; they claimed a greater; the difference between the two valuations is possibly somewhere between fifty and eighty thousand dollars. The great point, however, in which the public are interested, is that decided by the Court—that the consolidation will not be disturbed or set aside. The amount which the non-consenting stockholders may justly claim is a matter affecting only themselves and the corporation; the public may dismiss their fears that the consolidation, which in its vast scheme includes so inextricably so many interests, will be broken. That point determined, the other questions involved are of mere personal interest.—*Chicago Republican.*

☞ Upon the East Tennessee and Virginia Railroad, regular passenger trains are now running from Knoxville to Jonesborough. Special trains convey passengers and freight to Carter's Depot, 12 miles further, which is the present terminus of the road.

☞ The Mad River Railroad people have closed their bargain with the Dayton Short Line (tunnel) by purchasing the right of way as far as Sharon, 12 miles from the city, including the uncollected subscription for $150,000. They pay $100,000 in the bonds and coupons of the company and $50,000 in cash. They get an uncollected subscription list of very nearly $100,000.

☞ The Adams Express Company have commenced running their expresses to Richmond, by the way of the Orange and Alexandria and Virginia Central railroads, on which roads they have appointed agents and reopened such of their old offices as were not destroyed during the war.

☞ The report of the Cleveland and Pittsburg Railroad Company for the year ending April 30, 1865, states the gross earnings at $2,104,098, and the expenses of all kinds at $1,269,318—leaving for interest and dividends $834,780. Held May 1 of undivided profits $440,883. The property is represented by share capital $4,690,600, and bonds $2,290,800.

☞ The six months' product of the Pewabic copper mine was 457 tons, and the product of the district 2,123 tons 650 lb., or nearly 400 tons more than for the same period last year.

Pittsburg and Connellsville Railroad.

The progress of this work has, for a number of years, been a subject of a great deal of interest to this portion of our State, and the people have been looking forward to its construction with many fond hopes. By the action of the Pennsylvania Central Railroad Company many impediments have been thrown in its way, and strenuous efforts have been made to divert the road from its original destination, and make it a tributary to that road. The Pennsylvania Legislature assisted the Pennsylvania Central Railroad by its action, and for a while they had it all their own, but now the tables have turned and Mr. Hughart, the gentlemanly and competent President of the Pittsburg and Connellsville Railroad Company, assures us that they expect to be at work this summer, unless prevented by a renewal of that harassing course of litigation which the Pennsylvania Central has so long practised toward them. They have recently had a decree in their favor from the United States Circuit Court, but it is not final, giving, in fact, the other party thirty days to answer and renew the contest. The decree, however, was so favorable in its tenor as to preclude the Pennsylvania Central from any hope of success against them upon the final trial. The Baltimore and Ohio Railroad is necessarily deeply interested in the completion of the road to this city, and are giving every aid in their power to insure its success. No doubts whatever are entertained in regard to its early construction to this point, and the Baltimore and Ohio Railroad Company are already preparing for the increase of business which it will throw into their hands. They are now surveying a route from Point of Rocks to Washington city, and will soon open up a short line to Washington, so that upon the completion of the two roads, this will be the most direct line from the National Capital to the west and Southwest.

In a very short time, perhaps next week, we will endeavor to give all items of interest connected with the present condition, prospects, &c., of the road, with some of its past history, all of which will be official.—*Cumberland Civilian.*

☞ The entire anthracite coal production this year from all sources, as far as reported, is 6,661,988 tons against 5,761,262 tons to corresponding time last year, showing a loss of 1,099,264 tons. Last year the government demand was active and most of the iron works of the country were in full blast. The demand on the part of the government is materially lessened, and many of our iron works, those great consumers of coal, have been pretty much at a stand still. The price of coal having fallen fully fifty per cent in price as compared with last year, the iron works are resuming operations and the price of coal is advancing. The prospect of the coal trade is decidedly good for the remainder of the year. We would advise all who can afford it to lay in their supplies of coal as rapidly as possible, as there is an upward tendency in the prices of both coal and freights to the East.—*Pottsville Miner's Journal, Aug. 5.*

☞ The late census shows that of Wisconsin cities, Fond du Lac ranks next in size to Milwaukee. Oshkosh next, then Madison and Janesville.

☞ The gross earnings of the Western Union Telegraph Company, from all sources for the six months ending June 30, 1865, were $1,497,686, against $967,041 for the corresponding period in 1864—an increase of $530,664.

THE

Norris Locomotive Works

PATENT CASES.

The undersigned has chosen, as his specialty, the ADVOCACY OF PATENT CASES. This has been done in the belief, that this branch of the law, (requiring scientific and mechanical, as well as legal knowledge,) demands careful special study; and in the belief that a practice as Patent Solicitor, since 1854, has given that practical knowledge of the details and principles of our Patent System, and of drawings, specifications, and machines, and their construction and operation, which is essential to the proper advocacy of a patent case. Having daily personal access to the officers, records, and models of the Patent-Office, he has peculiar facilities for preparing and arguing all kinds of patent cases before Congress, the Courts, and the Patent-Office.

Although his attention will be more especially devoted to contested patent cases, and preparing opinions, involving questions of patent law, he will continue to personally solicit American and Foreign Patents, for valuable inventions, in cases where it is desirable that the drawings, specifications, and claims should be prepared with professional care, so as to withstand litigation.

For pamphlets of information, &c., address,

JO C. CLAYTON, Att'y at Law,
Advocate in Patent Cases,

Offices: "Intelligencer Buildings," Washington, D. C.

Refer, by written permission, to Chief Justice of the Supreme Court, D. C., and Commissioner of Patents, who say:

"I think that you have done well to choose for a Specialty, the Advocacy of Patent Cases, and cheerfully grant permission to refer to me." 1t-31

Notice to Contractors.

THE BOARD OF PUBLIC WORKS of the City of Chicago will receive sealed proposals until and during the first day of September next, for the Excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock No. 2, a distance of about 26 miles.

Maps, Profiles, Specifications, &c., will be exhibited at the Office of the Board of Public Works in Chicago, on and after Wednesday, the 23d of August, until the day of letting. There will be some 2,000,000 cubic yards of earth excavation some of it quite hard, and embracing considerable detached rock, and about 500,000 cubic yards of Stratified Limestone.

It is believed that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring. The whole of the work must be done on or before the end of the third such season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work and drilling machines, pumping machinery and cranes for the rock.

The Board reserve the right to reject any or all bids, and no bid will be accepted unless the party proposing gives evidence satisfactory to the Board of Public Works that he is competent, reliable and responsible.

The bids will be directed to the Board of Public Works indorsed "Proposal for Excavating Illinois and Michigan Canal," and accompanied with the usual $200 bond, blanks for which will be furnished at this office.

Satisfactory security for the faithful performance of the work will be required of any party whose bid may be accepted.

Natural Lubricating Oil

FROM THE

HICKORY FARM OIL CO.'S

NEW WELL, NO. 2,

ON WEST HICKORY CREEK,

VENANGO COUNTY, PA.

This company are now receiving oil from the above well, of which they are exclusive owners, and are prepared to fill orders for delivery at this port or at the well.

The oil is of a specific gravity of 32 degrees Beaume, and has been pronounced, by all who have tested it, the best lubricator in the market.

Orders from railroad companies, jobbers and large manufacturers are solicited, and will receive prompt attention. Parties can at all times rely on a pure and uniform article.

(From the Quebec Chronicle.)

St. Margaret Copper Mining Company.

The mineral wealth of Canada would offer us an endless theme upon which to dilate, did the time and space at our disposal permit of our entering into the details concerning what is known to exist, but which we regret to say yet remains undeveloped. With the limited room at our disposal the most we can possibly do is to speak of the great mining district of Canada East in such general terms as cannot give the most distant idea of the richness of those auriferious and cuprifereous regions which form the water shed of the Chaudiere. It is a lamentable fact, but one which, in plain truth, we are bound to acknowledge, that not only the productive capabilities of the mines—if we may so call a ten or twenty foot hole with the ore brought up in a bucket with a rope to its handle—is wholly unknown, but such as have been dealt with have in ninety-nine cases out of a hundred been thoroughly abused; and the consequence at this hour is that millions of dollars' worth of ore lies within a few fathoms of the surface undisturbed by the pick of the miner, and without any *bona fide* effort being made to realize its value. Canada in herself is not, perhaps, in a condition to invest a large amount of capital in mining; unfortunately joint-stock companies are not in vogue amongst us, and the few men we have, who may be called capitalists, are prone rather to speculate in shares which have an established reputation upon the market, than the more lucrative, but less certain, profit of mining. Thus it comes to pass that when a valuable mining location is dealt with at all the five or six persons who have clubbed together to buy the land of the original proprietor hold only to job their interests, and it not unfrequently happens that after a little time the majority get tired of holding, or wanting their money for something else, sell out to a fellow-share-holder who eventually becomes the sole proprietor. We know of a dozen instances where this or something like it has occurred; and the almost certain result of that state of things is the destruction of all chances of the development of the property. Men who hold to sell at large profits are not those likely to become miners; and no matter how rich the holding, it is not the province or the disposition of such holders to work the mine themselves or to let others work it. Their policy is that of a dog in the manger, unless molified by exorbitant profits.

We give below, a report on the St. Margaret Copper and Gold Mines, which, as we understand, are now in the hands of an efficient and *bona fide* company, having its headquarters in New York. The mine belonging to this company is, as the report states, within a few miles of the well-known Harvey-Hill mine, which, though its acknowledged richness is proverbial, is now idle from a cause which falls within the category to which we have alluded. There is, indeed, little doubt that all the mines in this region are of a richness that is far from being duly estimated. The sad lack of capital and the still more-to-be-deplored want of mining enterprise amongst the people of Canada places our mineral lands in a most unfairly depreciating position. Could we once gain the confidence of the capitalists of England in the matter of the immense mineral wealth lying around the Chaudiere and its tributaries, the properties would have a value given them which, in comparison with that prevailing, would be fabulous. But whilst they are held as mere matters of stock or share jobbing, the country suffers and its resources remain undeveloped. We, therefore, hope that the St. Margaret Company will go heartily to work. Twenty-five thousand dollars, they say, is all that is required to enable them to proceed vigorously in the realization of their buried wealth. This is but a small sum for such a purpose, and we cannot conceive that if the company are serious in their intention to prosecute their undertaking that they will find any difficulty in placing their property well before the market. We know nothing of the particulars to which the report refers, but this we do know, that the district in which the St. Margaret mine lies contains some of the most promising locations on this continent. We confess to a very deep solicitude in obtaining for the resources of this region the fullest development, feeling a conscientious conviction that, at no distant time, it will verify all that has been predicted of it as a region abounding in mineral wealth, which only requires capital and enterprise to establish its reputation as one of the richest mineral regions of North America.

REPORT ON THE ST. MARGARET COPPER AND GOLD MINES.

To the Directors of the St. Margaret Mining Company of the City of New York.

GENTLEMEN:—In compliance with your instructions, we have visited the mines belonging to your Company, and beg most respectfully to submit to you the following report of our personal examination. We left Quebec about 3 o'clock P. M. on Monday the 24th, in a private carriage, crossing the St. Lawrence river by ferry to Point Levi, and from there proceeded over a well constructed road, a large portion of which is macadamized; the drive was a delightful one, passing many points of special interest to the tourist visiting this section of the country, arriving at St. Mary's in the Chaudiere valley, the scenery of which is sublime and unsurpassed. At this point we crossed the beautiful Chaudiere River, affording one of the most romantic and picturesque views in the world. To this place a telegraph is in course of construction, by a New York company, which will enable us to communicate with New York from the mining districts of Canada East. The company is known as the Delery Gold Mining Company of New York, who have recently purchased of Mr. Delery, a Seignior, an old resident of this place, a tract of land for which they pay $500,000 in gold, for immediate development, where there is said to be immense deposits of gold and copper. Proceeding on our journey, we shortly arrived at the St. Margaret mines, a location unsurpassed for min-

ing operations. After resting a while at the house of Captain R. Bennets, (which is one of the houses belonging to the Company,) where we were hospitably entertained, we at once visited, accompanied by him, the mines of this Company, and found upon examination, everything in excellent condition, reflecting great credit upon the ability and energy displayed by Captain Bennets in the prosecution of the works of the Company. At the assay office we were shown the ores now being taken out of the different shafts, and the gold quarts reef recently opened, specimens of which we sent to New York for inspection, being far superior to any we have ever seen in New York, belonging to this mine, and much richer in quality. Shaft No. 1 down 70 to 75 feet, the vein of which is 3 feet 8½ inches wide, the kind of ore at this depth is known as the Peacock, yielding as the Captain informed us, 80 per cent of pure copper. Shaft No. 2 is down from 50 to 60 feet, the vein of which is 3 feet 6½ inches wide, it has been decided to connect this shaft by a tunnel with No. 1 shaft, greatly facilitating the works; the kind of ore from this shaft is like No. 1 both in quality and percentage. Shaft No. 3 down from 25 to 30 feet, is nearly the same as now produced at the Great Harvey Hill Copper Mine in the same range of mountains, in a direct line within a few miles, and produces slate and copper from a stratified bed. We find there are six distinct lodges or veins of copper, tracings of which can be seen from the surface giving unmistakable evidence of the enormous deposits of copper, which, when properly developed, must yield a large revenue to this company. The gold quartz reef recently discovered at three different points we consider of the highest importance and of great value to the company, being a part of the quartz reef now producing gold in close proximity. No time will be lost in developing this important interest of the company. But there is nothing we have said that affords us greater pleasure than in mentioning the fact of the great supply of water, which we have, and which is so essential in mining operations of such magnitude as the St. Margaret Copper Mines can be made, the stream being a branch of a river crossing this property, which makes it invaluable to the company; also wood in abundance to supply the company for 50 years if necessary. Our facilities of communication with the mines is by the Grand Trunk R. R. from Quebec, which has a station about 15 miles from the mine, the balance is over a good road, enabling us to deliver the ore at a small expense, using our own teams for that purpose. After visiting the most successful copper mines in Canada East, upon which has been expended some (£30,000) thirty thousand pounds sterling, for the purpose of developing and perfecting machinery necessary to prosecute successfully its works, we are happy to inform the company that only ($25,000) twenty-five thousand dollars will be required by us to fully develope upon the most scientific principles and extensive scale, the St. Margaret Mines which will make it equal to the best paying mines now in operation, and enable the company to pay large and regular dividends at an early day. We therefore recommend an immediate appropriation of the sum required for a vigerous prosecution of the works. We have secured the valuable services of Captain Williams, of the Harvey Hill Mines, as consulting engineer, who is a well-known and experienced miner. We have also made an arrangement with a first-class hardware merchant to supply the mines with everything required for the use of the additional increase of miners we have employed. In conclusion, we must congratulate the company on having secured in fee simple, and paid for such a valuable mine, the results of which cannot fail to be highly productive and yield large returns upon the investment. All of which is respectfully submitted for your consideration.

By yours respectfully,

ALBERT H. NICOLAY, President.

HENRY KING,
General Superintendent.

Quebec, July 29th, 1865.

Little Miami and Columbus and Xenia R. R.

The gross earnings for the year ending November 30, 1864, of the Little Miami and Columbus and Xenia, including the Dayton, Xenia and Belpre, were as follows:

From passengers		$1,337,982 12
" freight		1,031,965 09
" mail and express		121,027 97
" rent of track and depots		63,337 46
		$2,554,312 62
Less amount paid to other companies under contracts for division of earnings, viz:		
Cin., Hamilton and Dayton Railroad Co	$107,695 95	
Cleveland, Columbus and Cincinnati R. R. Co	6,596 07	
Columbus and Indianapolis Central R. R.	9,466 57	
		123,758 59
Earnings after division		$2,430,554 03
Add amount received from C., H. & D. R. R. Co., being proportion of their mileage earnings for the year ending March 31, 1864		2,732 58
Total		$2,433,286 61
Working expenses, viz:		
Repairs of road	$296,899 94	
" bridges	17,264 97	
" depots, etc	20,481 48	
" locomotives	124,334 09	
" cars	145,676 23	
Passenger expenses	141,808 12	
Freight expenses	250,771 21	
Fuel	168,030 67	
Oil, tallow and waste	29,700 60	
Rents	5,241 32	
General expenses	65,410 78	
Loss and damage	43,420 39	
		1,309,039 80
Earnings less expenses		$1,124,246 81
Interest	$96,047 11	
Taxes	89,083 55	
Dayton and Xenia lease	10,153 87	
S., Mt. V. and P. interest	7,000 00	
		202,284 53
Net earnings		$921,962 28
Old surplus transferred back from the individual to the joint companies		869,366 68
Profits on sales of stocks and bonds		42,702 60
Interest and dividends on investments		18,591 25
		$1,852,622 81
Worthless accounts charged up		$25,653 45
Loss on Dayton and Western lease for year ending March 31, 1864		2,864 97
Stock dividend of 20 per cent. and U. S. Tax, declared Jan., 1864		817,605 47
Cash dividend of 5 per cent. and U. S. tax, declared May, 1864		248,558 57
Cash dividend of 5 per cent. and U. S. tax, Nov., 1864		253,791 39
Undivided surplus, Nov. 30, 1864		504,148 96
		$1,852,622 81

Heretofore the surplus of the joint company has been transferred to the individual companies at the close of each year. So much of that surplus as has not been used by the individual companies for account of the joint company, has been transferred back to the joint company, and will hereafter be retained on the joint books, subject to such disposition as may be made of it by the two boards of directors under the articles of agreement.

The earnings have required the full capacity of the whole equipment of the companies; and the necessities of business and the interest of the companies have demanded for some months, during the year, a concentration of nearly the whole equipment upon the line between Columbus and Cincinnati, thus diminishing the traffic upon the Dayton and Western Railroad, and thereby creating a more than corresponding increase to the earnings of the line between Columbus and Cincinnati.

The apparent deficit, therefore, of earnings to rent and expenses of the Dayton and Western, amounting to $19,361 83, is to be attributed to the exigencies of business upon the L. M. and C. and X. R. R.

Notwithstanding the greatly increased expense of labor and materials, and the unusual wear of track and machinery, it has been deemed the true interest of the company, and due to the public, to keep up and maintain the road bed, track and equipment in good order. They have been well maintained. 2,320 tons of new rails, 29,000 new ties, and 18,600 chairs and joint fastenings have been put down, and 2,900 iron rails repaired. The equipment, which is in good order, consists of 43 engines, 613 freight cars, 40 passenger cars, and 19 baggage, mail and express cars. Four of these engines, eight of the passenger cars, two of the baggage cars and fifty-nine of th e box cars, were built during the year.

The operating and management of the road has been embarrassed in various ways, by the demands of the government service for the military railroads and gunboats.

The street railroad connection at Cincinnati is being completed. The facilities for the receipt and delivery of warehoused freights along the line of the connection will add greatly to the accommodation of shippers and consignees, materially diminish the expense of handling, and naturally invite the establishment of warehouses, and transportation therefrom upon the lines of the companies. Practically it will be an extension of freight depot facilities penetrating into the city, and inducting private interest and enterprise to foster and accommodate the business of the roads.

In accordance with the requirements of the boards of directors and stockholders of the companies, proceedings have been had, by which the two companies will become the purchasers of the line between Xenia and Dayton and of the right of way and other property of the Dayton, Xenia and Belpre Railroad Company.

The perpetual lease of the Dayton and Western and Richmond and Miami, from Dayton to Richmond, approved by the stockholders, has been executed. The line direct from Columbus to Chicago *via* Richmond will be opened in a few weeks; and this, together with the direct line from Pittsburg to Columbus which will probably be open in July, will give to your lines an increased traffic, counterbalancing, probably, any diversion which may be anticipated, by the opening of the Atlantic and Great Western through to Cincinnati.

The measures in progress at the date of the last report of the boards, to open a line from Richmond to Indianapolis, were superseded by an arrangement and contract with the Columbus and Indianapolis Central Railway Company, which purports to take effect in May, 1864, but has not yet been formally executed, on account of modifications and additions requiring the approval of the stockholders of the Columbus and Indianapolis Company, which will doubtless be obtained.

The demands of the government for transportation of troops and munitions of war have been promptly met, frequently requiring the whole equipment of the roads, and interrupting our local business. It is due to the officers and employees of the companies that the Boards should state the fact that the military service has been performed with a promptness and energy which has elicited the commendation to the Chief of rail transportation of the United States.

The assets and liabilities of the joint company are as follows:

The equipment of the road consists of 43 locomotives; 40 passenger, 19 baggage, mail and express, 428 box, 21 box stock, 35 rack stock, 107 platform, 12 lime, and 10 gravel cars.

The number of miles run by locomotives has been: with passenger trains, 482,293; with freight trains, 588,111; with wood and construction trains, 47,432—total, 1,117,836; an increase over the previous year of 115,189.

The following statement exhibits a comparison of mileage and cost of repairs for eight years:

	Miles run.	Cost of Repairs.	Cost per M.
1857	666,546	$65,479 46	9.82 cents.
1858	637,835	59,031 92	9.25 "
1859	732,934	54,507 41	7.43 "
1860	796,187	60,778 92	7.64 "
1861	814,908	55,469 20	6.80 "
1862	846,882	67,395 35	7.95 "
1863	1,002,647	96,713 78	9.64 "
1864	1,117,836	120,426 58	10.77 "

The following is a comparative statement of the mileage and cost of repairs of passenger cars for the past and preceding years:

	Miles run.	Cost of Repairs.	Cost per M.
1863	1,959,501	$35,683 02	1.8 cents.
1864	2,641,189	63,854 49	2.4 "
Increase ..	681,688	$28,171 47	0.6 "

* The C. and Xenia Co. in paying stock dividend in January last, paid this much less than her proportion of Stock, as no dividend was declared on the stock owned by the L. M. and the Col. and Xenia Companies.

The mileage and cost of freight cars during the same time have been:

	Miles run.	Cost of Repairs.	Cost per M.
1863	6,729,166	$80,617 69	1.19 cents.
1864	6,765,660	79,799 37	1.17 "
Increase ..	35,494 Dec.	$818 32 Dec.	0.02 "

The actual working expenses of the road, 51.6 per cent. of the earnings, are an increase of 2 per cent. over those of last year.

The cost of repairs of road per mile run by locomotives and cars was 2.8 cents. In 1863 it was 2.35. In 1862, 2.01.

The cost of renewal and repair of iron rail, renewal of cross-ties and chairs, opening of ditches, renewal and repair of culverts, cattle guards and other masonry, repairing fences, surfacing track, etc., has been $300,176 13; against for last year $241,684 77—an increase of $58,491 36.

The following materials have been used in renewals during the year: 2,320 tons new rails; 18,598 new chairs and joint fastenings; 146,850 lbs. spike; 29,137 cross-ties; 2,900 iron rails repaired—the total cost of which has been, $153,294 42.

The increase in cost of repairs of bridges has been $13,932 49; in repairs and renewals of locomotives, $23,712 80.

There have been carried on the road during the year 773,024 passengers, exclusive of commutors; of whom 261,236 were through passengers, and 511,788 were local. Number of passengers carried one mile, 45,641,820, of whom 26,758,432 were through, and 18,883,388 local.

The tonnage carried during the year amounts to 176,289 through, and 190,081 way.

The earnings and expenses of the Dayton and Western Railroad, leased and operated by this company, are not included in this report.

The officers and directors of the Little Miami Railroad Company for 1865 are as follows:

President.—W. H. CLEMENT.

Directors.—Jos. C. Butler, Jos. Torrence, Nathaniel Wright, James Hicks, Jr., Larz. Anderson, W. H. Clement, Alphonso Taft, Chas. H. Kilgour, Henry Hanna, John Bacon, Abraham Hivling, Jos. R. Swan.

Secretary.—CHAS. H. KILGOUR.

Treasurer.—S. E. WRIGHT.

Auditor.—D. G. A. DAVENPORT.

Superintendent.—E. W. WOODWARD.

The officers and directors of the Columbus and Xenia Railroad Company for 1865, are as follows:

President.—Jos. R. SWAN.

Vice-President.—W. H. CLEMENT.

Directors.—Wm. Dennison, Jr., Robert Neil, D. W. Deshler, L. Goodale, Wm. B. Hubbard, Jos. R. Swan, Geo. M. Parsons, W. H. Clement, C. H. Kilgour, Henry Hanna, Abraham Hivling, Simon Gebhart.

Superintendent.—E. W. WOODWARD.

Secretary and Treasurer.—CYRUS FAY.

☞ The Directors of the Iowa Central Railroad Company have decided to make immediate surveys from Cedar Falls to the Missouri State line; to open stock and subscription books in each county through which the road is to pass; and to commence work as soon as the requisite amount of stock to insure the grading shall have been subscribed. The road is to pass through Albia, Eddyville, Oskaloosa, Toledo and Cedar Falls.

Railroads of Massachusetts.

A tabular statement of the Railroads in the State, their capital and cost, length, earnings and expenses, dividends, etc., for the year ending 30th November, 1864.

British Imports and Exports.---Our own Duty.

The commercial activity of the British Empire is enormous. The ninth report of the commissioners of customs shows an increase in 1864, of the most surprising character. The imports in that year, were 26 millions more than in 1863. Since 1859 goods of the value of £100,000,000 have been added to the aggregates of former years, during the same period or a mean of twenty millions a year, and for the same number of years to come, no falling off is anticipated. The return for the last six years is as follows:

1859	£179,182,335	1862	£225,716,976
1860	210,530,873	1863	248,919,020
1861	217,485,024	1864	274,863,924

The rates between the foreign and colonial imports is as 17 millions to 9, the return of the former being in 1864 £181,137,158, against £164,235,273 in 1863, and of the latter £92,726,766 in 1864, against £84,683,747 in 1863.

With foreign countries the largest increase is in the arrivals from Egypt, and the small country of Holland, in the latter case having increased from 8 to 11 millions, and in the former from 16 to 19 millions. The Dutch trade has enlarged principally from the alteration in the sugar duties, on Dutch refined sugar, and the Egyptian from the increased growth of cotton. The Russian imports have swelled two millions, and the foreign West Indies by the same amount. The increase in the imports from the Hanse towns, Belgium, Spain and Mexico has been a milion each. There has also been a slight increase in the receipts from Norway, Denmark, and Japan, and a falling off in those from Portugal, Italy and China.

The American imports have largely diminished, at least a million and a-half beyond those in 1863 as compared with 1862.

The trade with France is improving, and nearly in the same proportion as in 1863, and especially in the articles of butter, cotton, leather gloves, clover seed, silk manufactures, brandy and refined sugar. There is a decrease in raw silk.

India contributes more than half of the imports from the colonial dependencies, and Australia has sent values of three millions additional chiefly in wool. Hong Kong and the Bahamas have doubled their importations, the latter owing to their connection with blockade running, swelling their exports by £900,000. The other West India islands have also increased theirs, and so British Guiana and Honduras while Ceylon and British North America show a decline. Of the 14 articles usually selected as a test, their is in 1864 as compared with 1863 an increase in nine and a falling off in five. The former are cotton, flax, hemp, jute, spirits, unrefined sugar, timber and wood, tobacco, wine and wool. Those showing a decrease are coffee, tea, silk, corn, flour and provisions.

We attribute the flourishing condition of the British Foreign trade, among other things to the completeness of its Consular establishments which are conducted by accomplished men. Their reports are commercial curiosities showing great attention and observation on their part. The appointees are not mere political favorites, but are chosen for their abilities and experience. There is no reason whatever why our own Consular system should not be reformed altogether. Consuls are really more important agents than ministers. The latter act in a sphere quite beyond that of commerce, being devoted chiefly to the consideration and explanation of inter-national law, while the latter every hour are in contact with the material interests of their countrymen.

Another curious fact is that the imports into the British Empire, are all the time very much larger than the exports, as we have frequently shown by tables, and thus the balance of trade so called is heavily against it. Still it is progressing in wealth, and evidently stands at the head of commercial nations.

Commerce is in fact the one idea, and the sole policy of Great Britain. All its intercourse with other nations, and all its interior legislation are directed to this one object. The Government is a most expensive one even in time of peace. Its civil list is enormous of itself. The expenditures of the Government in all departments are large, the people are heavily taxed, and the utmost skill of the Chancellor of the Exchequer, is constantly employed in securing by imposts, excises and taxation, means to keep the Imperial machine in motion. It is not expected that the British national debt will ever be paid. This appears to be the conceded opinion of its economists, publicists, statesmen and legislators. So that all that can be done is to keep up the commerce and production of the Empire to their maximum, or there would be a break down.

On the contrary, while we regard commerce as the useful agent of civilization and industry, as the means of rewarding enterprise and skill, yet we also look at it as a source from which our national expenditure may be met and our debt again extinguished.

We may learn a good deal from the British system, and one thing especially, is the necessity of steam navigation on the Ocean, particularly as applied to the carrying of mails. There can be no commerce safely carried on without regular correspondence. That is the medium of all foreign contracts, and of punctual remittance, without which no foreign trade can long be conducted successfully. It is time that our Government appreciated this fact.

American Railroad Journal.

Saturday, August 19, 1865.

Stock Exchange and Money Market.

The city has been much excited the past week by very singular disclosures in Wall street. Defalcation in a Bank officer, and the failure of a Gold broker to make good his checks for a large amount, have naturally attracted much attention. Scarcely had the public been informed of these transactions, before it was further astounded by the report of still other fraudulent operations to the enormous extent of more than two millions, occasioned by the forgeries of gold checks by a member of one of the largest Banking houses in the city, whose credit and character have been unempeachable. It immediately suspended payment, and also another connected with it, whose losses are also large. The shock has been intense, and an uneasiness created the result of which is yet uncertain. It is the feeling of the public that the desire of acquiring wealth suddenly, lies at the bottom of these crimes against society.

Where money has been made so rapidly, and in such large sums, as the history of Wall street discloses, the temptation to take great immoral as well as other risks, seems too strong to be resisted by a certain class of even trusted men. No admonitions nor misgivings, or the dread of exposure can influence them, and they fall never to rise again.

We leave however, to the pulpit and to moralists the enforcement of the principles which alone form the basis of all correct business habits.

The last weekly averages of the Banks, show a considerable falling off in loans to the extent of $3,643,451, a decrease in specie of $762,912, in deposits of $2,509,489, and in legal tenders of $555,-545. Nevertheless they occupy a strong position, holding in specie $21,080,309, and legal tenders $43,006,428 on the 12th instant, and the circulation but $8,050,361. The Money Market is easy but the rate keeps up at 7 per cent. at which price it is not difficult to negotiate good loans. The transactions at the clearing house were somewhat less, the aggregate being on the 12th $463,483,-275 87, against $576,961,325 59 the previous week, and the balance to be adjusted finally being $19,374,246 68, against $21,707,926 63 the balance of the previous week.

The Railway Market on the whole is improving, the earnings being generally on the increase, and showing that their business has not fallen off on the return of peace, as many persons supposed it would. It is very apparent that travel as well as freight traffic is improving, it being found that at all the great places of resort, as well as the marts and centres of business the pressure is increasing, and not diminishing. In the South, the roads are being put once more into good condition; northern capital being freely used in their re-construction. The old staples of the South are found to exist in quantities larger than was supposed, and only require the restoration of the old facilities to come in very considerable quantities. At New Orleans and Newbern especially, we learn that cotton is coming forward quite rapidly.

From abroad we hear that while our Government securities have declined in England, they stand at nearly the same quotations on the continent, and orders to purchase in large amounts are constantly received in this city. The foreign market does not seem to control our own as much as was expected, The large supply of money whether of paper, or paper reduced to gold at present prices, is enough to make this country quite independent of foreign opinion.

Exchange has advanced slightly with an advance in gold, but not in such a degree as to make much difference in our own markets. The fact is that American business has for some time past been conducted on a very careful basis. Foreign credits have been but little asked or granted, and in this we have gained great security. Our merchants as a body are unquestionably in a very sound condition, and are able and ready for any emergency of a financial or commercial character. Indeed the whole country is practically safe, but would be sounder doubtless if our paper money more rapidly appreciated. We have some reason to believe that the Secretary of

the Treasury is anxious for this, and is doing all he can to arrive at this desirable end. We have faith in the man, and this appears to be a general feeling among our best informed cotemporaries.

A Boston paper has recently put forth some interesting opinions as to his financial position. It asserts that the public expenditures can be readily brought to 400 millions, and that this sum can be depended on as its receipts. We believe that this sum is too large, and that it will be found so.

A report that Mr. McCulloch was coming to this city to confer with its principal bankers in order to obtain more money, has been officially denied. On the contrary we believe that he is easy in his money transactions, and finds his income quite large enough to meet all the calls upon it. His balances continue heavy, the Sub-Treasurer in this city reporting on Tuesday $57,759,708 73, and there are no signs of its diminishing at present.

Governments continue quite steady, while State bonds are dull of sale without any material change. The gold market continues heavy, and holders under the anxiety we have already alluded to, have been relieving themselves by large sales. It is very evident that large speculations have been at the bottom of some of the late difficulties, and the ease with which money has been raised by fair means or foul, to sustain some of the operators, has tempted them beyond the bounds of honesty. The public have been all the time seriously injured by these speculations, in varying and unjust prices, consumers especially who have been taxed on the necessaries of life more than justice demanded. We shall hope that a sounder state of things is not far distant, and as we have frequently remarked by an improvement in our paper currency. While this is the sport of individuals controlling large credit and capital, with the banks and even the depositaries of the Government to back them, we can never be safe for a moment. It is also to be hoped that the losses some of our own institutions have recently sustained will teach them to confine themselves hereafter to a legitimate business.

The exports exclusive of specie from this port the week ending 15th August were $3,303,606.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Louisianna 6s, 68; New York State 6s, 1872, 98; New Jersey Central 1st mort., 1870, 102; Central Coal, 50; Central Am. Napa Valley (Cal.) Railroad.

A letter to the Sacramento *Union*, dated Napa City, July 11, 1865, says:

On the 3d instant the Chief Engineer and Secretary having filed their affidavit that four and one-tenth miles of the Napa Valley Railroad was fully completed, equipped and in running order, the county issued bonds to the company to the amount of $41,000, and received in exchange the proper cirtificate of stock. Yesterday in pursuance to previous announcement, the formal opening of the road took place. A large concourse of people, numbering many citizens of San Francisco, had gathered to witness this initiation of a road destined to run, ere many years, far into the Russian river country, and to be the outlet of the products of three counties—Sonoma, Lake and Napa. The President and Board of Directors had everything prepared for the most favorable reception of the friends of the enterprise. A bounteous repast was set at the Revere House, at which champagne flowed like water. Innumerable toasts were drank to the Napa Valley Railroad and all connected with it. Quite a number of pretty little speeches were made, among which I shall only mention that of Samuel Brannan, who summed up in a "nut shell" the advantages of the extension of this road to the head of the valley. His remarks showed a clear conception of all the advantages of the road to the county at large as well as the adjoining counties of Sonoma and Lake.

After doing ample justice to the collation, the company repaired to the cars, where there being but accomodation sufficient for a portion of the large concourse present, the San Francisco delegation were favored with the first ride; after which the cars continued to run to Suscol and back for the accommodation of all those who wanted a ride.

The engine employed on the road is what is known as the Pony engine, and is to be used only temporarily, until a larger and more powerful one can be procured. The schedule time between Suscol and Napa City will be about fifteen minutes. Passengers to and from the city will no longer have to endure a crowded and disagreeable ride of seven miles in a stage-coach. A Napa Valley Railroad, extending to the upper boundary of this county may now be regarded as a fixed fact, and we may look forward to its completion at no very distant day.

The road is not without its opponents as well as friends, but the great majority of the people appreciate and are interested in the advantages of a road connecting them speedily with market.

A new era has certainly dawned upon Napa City and Valley, one which I feel certain will add much to the wealth and prosperity of our county. The worst is over, the first section of our prospective

railroad is built, one link is completed, which fact will do away with many prejudices which we have heretofore had to contend with. When we extend this road up the valley, and tap that rich Russian river country, as we are bound to do, then we shall see the immense value this road will be to this city and county. As soon as this road is completed up the valley, it will be but a short time before we shall have double our present population, for wherever railroads go there is a steady stream of emigration follows. Napa county has a capacity for five times the present population. When the valley lands are exhausted, the hills adjacent are found by practical experience to produce fine crops of cereals, and some of the finest vineyards we have are on the hillside, where a few years ago it was thought nothing would grow. The great advantage this valley has over the other portions of the State is that crops never fail here. We have heartily enlisted in a railroad, and I am pleased to see it. While some other counties have been talking of roads, we have built a section of ours, and are determined to complete the whole road.

Export Duties are Constitutional.

BY A. B. JOHNSON.

"No tax or duty shall be laid on articles exported from any State." This constitutional mandate has always been assumed to interdict all export duties, and this assumption has been so long unchallenged, no occasion demanding an investigation, that much difficulty exists in removing our prepossessions, now that a want of revenue demands all the resources of the Union. Had the constitution said, no tax or duty shall be laid on articles exported, the prohibition would have been unequivocal; but the prohibition is limited to "articles exported from any State," which makes the prohibition equivocal. And when we examine the context of the constitution, we shall find reasons for believing that the prohibition was intended only to prevent congress from laying any tax or duty on the exports of one State into another, the prohibition being immediately followed by similar restrictions; as, "no preference shall be given by any regulation of Commerce on revenue, to the ports of one state over those of another; nor shall vessels bound to or from one state, be obliged to enter, clear or pay duties in another." And in this connexion, we must remember, that the grievance which more particularly urged the States to confederate together, was aggressive legislation by the States against each other; hence in giving Congress power to regulate external and internal commerce, the States sought only to guard against local inequalities and favoritisms.

All exports from the United States must necessarily be shipped from ports in some one of the States, hence no meaning existed for saying, no tax or duty shall be laid on articles exportedfrom any State; and we would accordingly interpret the prohibition as saying, no tax or duty shall be laid on any article, the growth or product of any State. We thus make the article intelligible, by making it wholly different from the original text, which can be more naturally interpreted by making it read, "no tax or duty shall be laid on articles exported from any State"—into any other State.

Duties on exports from the United States were expressly contemplated by the constitution, which says, "no state without the consent of Congress shall lay any duties on Imports or Exports, except what may be absolutely necessary for executing its inspection laws; and the net produce of all duties laid by any State on imports or exports shall be for the use of the Treasury of the United States &c." Indeed the power of Congress to collect duties on exports is given as fully as to collect duties on imports. Both are included in the same short section:—"Congress shall have power to lay and collect taxes, duties, imposts and excises;" and to this no limitation is added, except that "all duties, imposts and excises shall be uniform throughout the United States." The word duties and imposts are as applicable to exports as to imports. The sound of the word imposts, leads some persons to deem it synonymous with imports; but the word impost is derived from the word impose; and it means anything that is imposed, whether it be on exports or or imports. This general meaning of the word imposts, was understood by the framers of the constitution, they thus defining the word by saying,—"no State shall, without the consent of Congress, lay any Imposts or duties on imports or exports, without the consent of congress."

We may argue that if Congress can create an export duty, Congress may discriminate invidiously against the products of some of the States;—but not more than they can thus discriminate by import duties; as, for instance, by an import duty on coal, salt, iron, woollens &c.; hence no greater reason exists for a prohibition against export duties, than against import duties. Both, equally, may be perverted, and so indeed may all legislation; but we must bear the possible evil of legislation, for the sake of its certain good. To voluntarily relinquish the power to derive revenue from exports, and especially of the unique kind of some of our's, is to abandon a source of income which will be borne by foreign consumers, rather than by our own citizens; and for which abandonment no motive exists but obedience to a vague constitutional prohibition which is certainly susceptible of a different and more natural meaning.

Virginia Railroads.

Repairs to the damaged railroads in Virginia are rapidly approaching completion. The cars will run to Lynchburgh from Alexandria on Monday, and the Richmond and Acquia Creek roads will connect at Fredericksburgh in a few days, thus doing away with present staging of ten miles. Steps are being taken to reopen at once the Manassas Gap road to Front Royal and Strasburg. The unfinished Loudoun and Hampshire road will be pushed to completion at an early day.

The damages on the line of the Virginia Central Railroad have been repaired, and the trains are now running from Richmond to Jackson's river, which has been the terminus of the road for some five years. At the beginning of the war the railroad was completed to that point, and the grading on the route to Covington, in the county of Alleghany, was being rapidly finished. The work however, was suspended by the hostilities, but it is more than probable that the ten miles yet to be completed will be finished before the end of the year, and next summer we may be able to visit the White Sulphur Spring, of Greenbriar, by rail.

☞ W. H. McCafferty, Esq., Superintendent of the Orange and Alexandria Railroad has been made Superintendant of the Virginia and Tennessee railroad.

Bennington and Rutland Railroad.

A corporation with the name of Bennington and Rutland Railroad Company, has been formed by the persons holding a majority in amount of the principal of the bonds secured by the first mortgage upon the Western Vermont Railroad, and the articles of association filed in the office of the Secretary of State, and a copy filed and recorded in the offices of the clerks of each of the counties through which the said railroad passes, to wit: The Counties of Bennington and Rutland. The President of the Corporation is T. W. Park, of North Bennington, Vt.

Alexandria and Bloomfield R. R. Co. of Missouri and Iowa.

The following directors were elected at the annual meeting held in Alexandria, Missouri, on the 15th ult.:

Col. William Bishop, State Treasurer, Mo.; Hon. Erastus Sacket, S. L. Fowler, J. H. Crane, W. Buskirk, C. O. Sanford and W. F. Frazer, of Iowa; Henry Hill and E. P. Buell, Warsaw Ill.

At a meeting of Directors, E. P. Buell, of Warsaw was elected President; C. O. Sanford, Vice-President; and D. A. Day, Secretary.

The Road is all under contract to be completed in November next.

European Central Railway.

It is stated that an agreement has been conditionally signed between a combination of foreign capitalists and this railway for the transfer of the concession of the company on advantageous terms, and that in connection therewith application has been made to the Swiss Government for a further concession for an Alpine Pass railway, which will connect the lines of Northern and Southern Europe.

Railways in the Alps.

We learn from Florence that surveys for a projected line via the Swiss Alps are nearly completed. Consideration is being given to the merits of passages via the Lukmanier, the St. Gothard, or the Splugen. The choice is not yet made, but as the Italian Government must furnish a subvention it will probably solve the question.

☞ It is stated that the stock of the Buffalo and Washington City Railroad has all been taken. The track from Buffalo to Aurora will be laid by the 1st of January next, and the whole work will be prosecuted to completion as fast as possible.

☞ The track of the Rome and Oswego Railroad has been laid nearly to Pulaski, and the first locomotive will visit the latter place this week.

☞ Holders of bonds of the State of Tennessee are requested to send to the Comptroller of the State, at Nashville, the date and number of each bond, with the amount and character of such bond, and the name and residence of the holder.

☞ About four hundred laborers employed on the Union Pacific Railroad, in the vicinity of Omaha, have been discharged, the grading on the first section of one hundred miles being nearly completed.

☞ The Mobile papers state that the Mobile and Great Northern Railway will soon be running trains from Mobile to Montgomery.

☞ The survey of a railroad from Manchester to Keene has commenced.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the first week in August, 1865, were:

	1865.	1864.
Passengers	$12,595 70	$8,441 42
Freight	11,231 00	8,963 16
Mail, express & telegraph	1,200 00	1,125 58
Total	$25,026 70	$18,530 16
Total for the fiscal year commencing Jan. 1	$678,134 88	$573,833 06

The traffic of the Great Western Railroad for the week ending August 11, 1865, was as follows:

Passengers	$33,343 89
Freight and live stock	25,885 48
Mails and sundries	1,606 19
Total	$60,835 56
Corresponding week of 1864	47,722 14
Increase	$13,113 42

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending August 7, were:

	1865.	1864.
Passengers	$3,537 59	$2,498 08
Freight	9,049 54	6,482 14
Express	130 22	104 16
Mail	296 58	296 58
Total	$13,013 93	$9,380 96

Receipts from January 1 to August 7:

1865	$374,542 87
1864	327,983 03
Increase	$46,559 84

The earnings of the Chicago and Northwestern Railway for the first week in August, 1865, were $126,313 39
Corresponding week of previous year. 88,340 39
Increase 42.98 per cent $37,973 00

The earnings of the Michigan Central Railroad for the 1st week in August, 1865, were. $85,309 19
Corresponding week of previous year. 63,415 07
Increase $21,894 12

The Detroit and Milwaukee Railroad traffic for the 1st week in August, was $36,433 00
Corresponding week of previous year. 21,026 00
Increase $15,407 00

The earnings of the Chicago and Rock Island Railroad for the first week in August, 1865, were $61,131 00
Corresponding week of previous year. 47,166 00
Increase $13,965 00

The Michigan Southern road earned the 1st week in August, 1865 $81,827 00
Corresponding week of 1864 66,000 00
Increase $15,827 00

The earnings of the Chicago and Alton Railroad for the 1st week in August, 1865. $76,736 00
Corresponding week of previous year. 55,989 00
Increase $20,747 00

☞ The debt of the State of Kansas at the close of 1864 was $380,500. Since that time there have been issued $25,000 of seven per cent bonds, and $40,000 of six per cent bonds. The balance in the Treasury at the close of the previous year was $11,231, which, with the receipts during last year amounted to $373,765. The disbursements during the same period were $231,636; leaving a balance at the beginning of the present year of $42,129.

Journal of Railroad Law.

LIABILITY OF EMPLOYERS TO THEIR SERVANTS FOR THE NELIGENCE OF FELLOW SERVANTS.

Many decisions have been rendered upon the various questions in relation to the responsibility of masters for injuries occurring to their servants in the course of their employment, but the importance of the subject is so great, that a new case in point, when thought worthy of litigation and a formal judgment, is always deserving of notice.

Such is the recent case of Waller, admx., ag't. the South Eastern Railway Company of England.

The deceased, G. Waller, was a railway guard in the employment of the defendants at weekly wages, and it was his duty as such guard, to travel with and in the passenger trains worked by the defendants on the North Kent Railway, a line belonging to and worked by the defendants under the power of the act of Parliament relating to the South Eastern Railway Company.

In the course of such duty while he was traveling in a passenger train of the defendants carrying passengers for hire on the above line, between Stroud and Gravesend, on the 20th of March last, the train ran off the line and overturned the break van in which he was, whereby the said G. Waller was killed.

It was admitted by the parties that the accident happened through the decayed condition of the trenails which fastened the chairs to the sleepers on the defendant's railway and that it was the duty of the "gauger" of the platelayer, a servant of the defendant, to see to and keep in proper repair and condition the permanent way by renewing such trenails as were decayed; that the "gauger" was a person of competent skill and that through his neglect of duty the road became unsafe.

It was further admitted that G. Waller was killed by the train running off the line, through the decayed condition of the trenails; that none of the directors, or officers or servants of the company knew of such defects; but the above mentioned Gauger ought to have known it, and it was negligence in him not to know it.

Pollock, C. B., now said, I am of opinion that the verdict ought to be entered for the defendants. The question, in substance, is whether an action can be maintained by a servant of a railway company for injuries occasioned by the negligence of another servant of the Company. The plaintiff is the widow of a guard who, whilst in the employment of the defendants, was killed by a train running off the line, in consequence of the negligence of a servant of the company, whose duty it was to take care that the plates of the railway were so fixed as to be perfectly safe and secure.

I think it unnecessary to review the authorities.

The question resolves itself into this: whether the servant whose negligence caused the accident and the servant who was killed were at the time engaged in what may be called one common object. I think that the superintending the trains on their journey, and the taking care that the rails on which the carriage runs are firmly and securely fastened and bolted—constitute one common object, viz: that the passengers shall be conveyed in carriages which are safe and rails which are free from danger. Where, indeed, two trains belonging to the same company are traveling on different lines of rail which at a certain point intersect each other, or join a principal line, and in consequence of the negligence of the driver of one of the trains a collision ensues, by which the driver of the other train is injured, I own there seems to me less of what may be called an employment in one common object. No doubt the common object of the two servants is the driving their respective trains to their place of destination; but each of them has in particular a different object, one of them has one train under his control, the other another train. But in this case the common object of both servants was safe conveyance of the passengers in that particular train, it being the duty of the one to superintend the carriages, of the other to take care that the rails were in such a condition that the journey might be safely performed. Viewing the case with reference to observations of Lord Cramworth, in Bartonshill Coal Company *vs.* Reid, (3 Macq. 284,) that "when a workman contracts to do work of any particular sort, he knows, or ought to know, to what risk he is exposing himself." There can be no doubt that the guard of a railway train must anticipate, among other probable sources of danger on the journey, the neglect of a servant to oil the wheels of the carriages, the neglect of another to adjust the points, the neglect of another to take care that the rails are safely and securely fastened and bolted. I think that this case falls within the principle laid down for the first time in Priestly *vs.* Fowler, (3 M. & W. 1,) which is not in my opinion opposed to any authority which has arisen out of it.

Martin B.—I believe that it was in consequence of a doubt entertained by me that judgment was not given at the conclusion of the argument. I certainly did think it a matter worthy of consideration, and I think so still whether this case falls within the rule laid down by Lord Chelmsford, C. in the case of the Bartonshill Coal Company *vs.* McGuire (3 Macq., 307,) that "where servants are engaged in different departments of duty, an injury committed by one servant upon the other by carelessness or negligence in the course of his peculiar work, is not within the exception, and the master's liability attaches in that case in the same manner as if the servant stood in no such relation to him." Were I satisfied that Lord Chelmsford, when he speaks of servants engaged in different departments of duty, contemplated an engine driver or guard of a railway train as being a different service from that of a platelayer or other persons employed to take care of the line. I should be less willing to concur in this judgment; but I have carefully read the case of the Bartonshill Coal Company *vs.* Reid, and the Bartonshill Coal Company *vs.* McGuire, and also the judgment of the Supreme Court of Massachusetts in the case of Farrell *vs.* Boston and Worcester railway (4. Metcalf, 49,) whose observations are applicable to this case. Chief Justice Shaw commences his judgment thus: "This is an action of new impression in our courts, and involves a principle of great importance. It presents a case where two persons are in the service and employment of one company, whose business it is to construct and maintain a railroad and to employ their trains of cars to carry persons and merchandise for hire. They are appointed and employed by the same

company to perform separate duties and services all tending to the accomplishment of one and the same purpose, that of the safe and rapid transmission of the trains; and they are paid for their respective services according to the nature of their respective duties and the labor and skill required for their proper performance. The question is whether for damage sustained by one of the persons so employed, by means of the carelessness and negligence of another, the party injured has a remedy against the common employer." The Chief Justice then proceeded to discuss the subject with great ability, and the result is that he comes to the conclusion that the railway company are not liable. I yield to that opinion, and concur in the other members of the court.

Bramwell B. I am also of opinion that the verdict ought to be entered for the defendants for the reasons already so fully stated by the Lord Chief Baron and my brother Martin. I think the case falls within the principle laid down in Priestly *vs.* Fowler, and the subsequent authorities which have been cited. It is certainly governed by the criterion suggested by Lord Chelmsford, in the Bartonshill Coal Company *vs.* McGuire, and by Chief Justice Shaw in the judgment referred to by my brother Martin, and it is also within the criterion given by the Lord Chief Baron, which I consider a very good one, viz: were the servants at the time of the accident, engaged in one common object.

Judgment for defendant.

Union Pacific R. R.

The published official correspondence between General John A. Dix, president of the Union Pacific Railroad (main line,) on the one side, and President Johnson and Secretary Harlan on the other, concerning the proposed change of location of the line of the road west of Omaha excites considerable interest in western Iowa and Nebraska, and vigorous protests have gone to Washington from Omaha against the change.

In the absence of the maps referred to in the correspondence, it is necessary to state that the deviation from the original line commences about two miles southwest of Omaha. From the point of divergence it runs south and southeast, following the course of one of the small tributaries of the Missouri about six miles, then crossing a divide to another tributary, whose course it ascends to a point near the original crossing of the Elkhorn river.

The new location is about nine miles longer than the old. It is adopted for the purpose of avoiding difficult grades. The company deem the change so essential that they have already abandoned the work on the old line, a considerable portion of which was completed, and commenced operations on the other route in advance of obtaining the assent of the government.

Secretary Harlan holds that the President has the right to give his sanction to the change, and that no reason exists why it should not be made, provided a survey by an officer of the government shall sustain the representations of the company. For this purpose Lieutenant Colonel Simpson, of the corps of Topographical Engineers, has been detailed by the Secretary of War, and ordered to Omaha to make a survey of the new route, and report to the President.—*Chicago Tribune.*

☞ The Pacific Railroad bonds, amounting to $1,258,000, mentioned in the last official statement of the public debt, were issued to the Central Pacific Railroad of California, instead of the Union Pacific Railroad Company. The word "Union" was inserted in the statement by mistake, for the word "Central."

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st ult., inclusive, during the years 1864 and 1865, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1864	343,400	7,164,200	2,557,800	142,100
1865	282,500	2,958,900	3,595,900	159,500
Dec.	60,900	4,205,300	Inc 1,038,100	In. 17,400

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 901,150 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of July ult., in the years indicated:

	1863.	1864.	1865.
Canal opened—	May 1.	April 30.	May 1.
Flour, bbls	573,100	243,400	282,800
Wheat, bush	8,044,400	7,164,200	2,958,900
Corn, bush	10,716,800	2,557,800	3,595,900
Barley, bush	66,200	142,100	159,500
Oats, bush	3,870,600	3,128,400	4,386,800
Rye, bush	175,800	64,500	177,700
Malt, bush	.....	.....	249,000
Beef, bbls	9,500	5,400	7,190
Pork, bbls	223,700	47,700	14.050
Bacon, lbs	3,316,000	550,300	1,231,900
Butter, lbs	64,500	24,000	49,100
Lard, lbs	17,731,000	1,203,000	1,745,500
Cheese, lbs	361,200	46,000	824,500
Wool	26,000	23,200	151,900

Imperial Mexican Railway.

The Imperial Mexican Railway being open from Vera Cruz to Paso Del Macho, where the ascent from the Sierra Caliente to the healthy districts commences, the Company have arranged to dispatch a special train from Vera Cruz on the occasion of the arrival of each steam packet from Europe which will enable travellers to reach the interior of the country with the least possible delay.

This announcement, the effect of an official one by Mr. Roscoe, the secretary, is, it will be allowed, a very important one to parties having business with Mexico, or travelling there, and it is interesting to all who feel a pleasure in the welfare of others. The Imperial Mexican Railway Share-holder will of course be glad to hear of the arrangements already made for carrying on the traffic.

The line is opened from Vera Cruz to Paso Del Macho for the carriage of both passengers and goods.—*Herapath.*

Brooklyn Central and Jamaica R. R.

In pursuance of a judgment obtained by Ira Smith for $107,000 against the Brooklyn Central Railroad Company on the 29th of June last, that road has been sold for $106,000, subject to $300,000 mortgage, E. B. Litchfield, Esq., being the purchaser. This sale puts the road in new hands and relieves it permanently of certain embarrassments which could have been got rid of in no other way. It is proposed at once to put the road into good condition, and supply such increased facilities as are required by a greatly increasing business. This road is now under the direction and management of E. B. Litchfield, President, and D. J. Molly, Superintendent.

☞ A correspondent of the London *Railway Times* says: "It is stated that the American Government is engaged in negotiations to secure the payment on the Frankfort market of the obligations placed in Germany at the rate of 2 florins 30 kreutzers per dollar. If the negotiations prove successful, a further advance may be anticipated in Germany in the Federal—or, as I ought now more correctly to term them—the United States funds."

Chicago and Northwestern R. R.

The General Land Office at Washington has received from the Governor of Wisconsin a map noting the change of route of the Chicago and Northwestern railroad, authorized by Congress and approved April 25, 1862. As originally located, this road ran in a northwesterly direction from the town of Appleton, on the Fox river, to the State line between the States of Wisconsin and Michigan. As changed, the road follows along the river to the mouth at Green Bay, then up the shore of the lake, and striking the State line near the mouth of the Menonomee river. The above resolution futher provided that the State of Wisconsin should have the lands upon the line as originally located and that the even sections thus situated should be reduced to the ordinary minimum, and upon the river line each section should be increased to double the minimum price.

Mississippi and Wabash Railroad Co.

At the annual election of this Company, held at Warsaw Illinois on the 28th June, 1865, the following persons were elected Directors for the ensuing year:

Charles L. Frost, New York; E. P. Buell, Henry Hill, Warsaw Ills.; H. B. Ten Eyck, Keokuk, Iowa; John A. Cheneny, Carthage, Ills.; D. Gorchenor, La Harpe, Ills.; J. H. Smith, Bushnell, Ills.

At a subsequent meeting of the Directors, Charles L. Frost, of N. Y., was elected President E. P. Buell, Manager; and J. B. Dodge, of Warsaw, Secretary and Treasurer.

☞ A company was incorporated last year for the construction of a railroad from Lawrence City in Kansas, to Galvaston, Texas, and soon effected a tangible beginning of the enterprise by buying the lands of the Sac and Fox tribes of Indians; the purchase being permitted and duly approved by the general government. The lands comprise eight hundred thousand acres, and were secured at the low price of seventy-six cents per acre. They lie in a southwesterly direction from Lawrence, and, like most of the tracts that have been set apart in the West for Indian occupation, are of good arable quality. Active work, it is said, will be commenced on this road early next spring.

Interest and Dividends.

The Marietta and Cincinnati Railroad Company will pay, on demand, dividends of three per cent. in stock on their first and second preferred stock, at the office of the Farmer's Loan and Trust Company.

☞ It is reported that the Port Deposit Railroad Company are about contracting to complete the Junction and Breakwater Railroad to Lewes Del.

☞ The cars on the Albany and Susquehanna railroad run to Schenevus, Otsego county, and it is confidently believed the road will be opened as far as Oneonta by the first of September.

☞ A ship canal is about to be opened from Marquette Bay across the Portage, a little over two miles long, that will save 140 miles of the most dangerous navigation of Lake Superior. Judge Avery and Mr. Winslow are the proprietor of the work.

☞ The Trustees of the second mortgage of the Northern Railroad Company in the State of New York, notify all persons interested, that they have, in conformity with the decree of the supreme court of the State of New York, transferred and assigned the property lately in their possession, as said trustees, to the Ogdensburg and Lake Champlain railroad company. Holders of second mortgage bonds of the Northern railroad company of New York can obtain certificates of stock in the Ogdensburg and Lake Champlain railroad company, pursuant to the act of the Legislature and the decree of the Supreme Court of the State of New York, by surrendering the bonds they hold to John S. Eldridge, agent, at the office of H. A. Church, transfer agent of the Ogdensburg and Lake Champlain Railroad company, No. 60 State street in Boston, Masssacusetts.

☞ Secretary Harlan has made an important decision respecting the even or reserved sections along the line of the Union Pacific Railroad under grant by acts of Congress, to the effect that they must be treated as reserved sections, and that the price to be paid shall, in all cases, be $2 50 per acre, or such other minimum price as is now fixed by law, or may be fixed upon lands hereafter granted. The price of reserved sections is to be $2 50 per acre, unless changed by a price fixed, or to be fixed, by law, on granted sections. In this case, Congress has not fixed any price on granted sections until three years after the completion of the entire road; it consequently follows that the price named, $2 50 per acre, must now be paid for reserved sections under existing legislation.

☞ A gentleman traveling on the continent sends to the London *Times* a note regarding a plan adopted at Vesoul, a railroad station in France, which he recommends to the restaurants in British stations, and which might perhaps be copied with advantage in this country. No trains stop long at Vesoul, but "MM the travelers" are informed by plentiful advertisements that if they wish either to breakfast or dine they will find hot meals in baskets at the buffet. The meals are composed of three dishes, half a bottle of wine, bread and desert. The passengers leave the empty baskets and dishes half an hour later at the next station, and pay two francs fifty centimes, or about fifty cents in American currency, for their leisurely and comfortable repast.

☞ The Halifax Horse Railroad is to be commenced this fall. The Quebec one which has not been talked about so much as ours will be finished next week.—*Halifax Citizen.*

☞ The earnings of the M'Gregor Western Railway Co. for July were (on 40 miles) $27,697-24. Twenty-five new cars will be immediately placed upon the road to accommodate the rapidly increasing business.

☞ The Petersburg *Express* of the 12th inst., says "the first through train on the Petersburg Railroad since the 6th of August, 1864, came into Petersburg on Friday evening. The railroad connection between Petersburg, Raleigh, Wilmington and points further south is now completed."

☞ A railroad, with a locomotive engine and tender, is in operation on the Bund, at Nagasaki, Japan, and excites a great deal of attention among the Japanese, who come from far and near to see it.

BENJ. H. LATROBE & C. H. LATROBE,
CIVIL ENGINEERS,
HAVE opened an office in Baltimore, in the Law Buildings, St. Paul street front, and may be consulted or employed in the Location and Construction of Railways and other Roads and their incidental works throughout the United States. Also, the survey of Estates, Water Powers, &c., and will receive a limited number of Pupils for instruction in their Profession. 3m-33

NORRIS BROTHERS,
LANCASTER, PA.

Notice to Contractors.
THE BOARD OF PUBLIC WORKS of the City of Chicago will receive sealed proposals until and during the first day of September next, for the Excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock No. 2, a distance of about 26 miles.
Maps, Profiles, Specifications, &c., will be exhibited at the Office of the Board of Public Works in Chicago, on and after Wednesday, the 23d of August, until the day of letting. There will be some 2,000,000 cubic yards of earth excavation some of it quite hard, and embracing considerable detached rock, and about 600,000 cubic yards of Stratified Limestone.
It is believed that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring. The whole of the work must be done on or before the end of the third such season of the suspension of navigation.
A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work and drilling machines, pumping machinery and cranes for the rock.
The Board reserve the right to reject any or all bids, and no bid will be accepted unless the party proposing gives evidence satisfactory to the Board of Public Works that he is competent, reliable and responsible.
The bids will be directed to the Board of Public Works indorsed "Proposal for Excavating Illinois and Michigan Canal," and accompanied with the usual $200 bond, blanks for which will be furnished at this office.
Satisfactory security for the faithful performance of the work will be required of any party whose bid may be accepted.
J. G. GINDELE,
FRED. LETZ,
O. J. ROSE,
WM. GODDING,

New York, Saturday, August 26, 1865.

The Measure of Damages in Actions against Railroad Companies as Carriers.

The extent to which railroad companies, and other common carriers, are liable to consignors and consignees of freight, is a question of no small moment, and by no means free from difficulty. There are valuable treatises in existence upon the subject, but they are not written with a view to popular usefulness, and some later decisions have served to establish the rules of damages upon clearer principles than were formerly recognised. These recent cases we purpose to review, in a form adapted to general use.

GENERAL PRINCIPLES.

The true principle which should, as we conceive, govern the award of damages in all cases of breach of contract, is, to allow to the injured party such amount as will compensate him for all the loss or harm proximately caused thereby, falling under either of the following heads:

1. Such as the party in fault had notice, at the time of entering into the contract or at any time before the breach of the contract, and while it was yet in his power to perform his duties under it, would be likely to result from such breach; or,

2, Such as, in the natural course of things, would be likely to result from such a breach of contract.

Hadley *vs.* Baxendale (9 Exchequer, 341,) is well known among lawyers as the leading case upon this rule. There the plaintiffs, who were owners of a flour mill, sent a broken iron shaft to an office of the defendants (who are among the largest carriers in England), for transportation to a machine shop, where a new shaft was to be made upon the same pattern. The defendants' clerk was informed that the mill was stopped, and that the shaft must be delivered immediately, for which purpose he was requested to make a special entry to hasten the delivery. The delivery of the shaft was unreasonably delayed, and the working of the mill was stopped thereby for several days. It was held that, upon these facts, the loss of profits on the working of the mill could not be taken into account in assessing damages, for want of a sufficiently clear intimation to the defendants that the mill must stand still until the shaft returned. And the court declared the rule of damages in the following terms. "Where two parties have made a contract which one of them has broken, the damages which the other party ought to receive in respect of such breach of contract should be such as may fairly and reasonably be considered either as arising naturally, *i. e.* according to the usual course of things, from such breach of contract itself, or such as may reasonably be supposed to have been in the contemplation of both parties at the time they made the contract, as the probable result of the breach of it.

Griffin *vs.* Colver (16 N. Y. 489) is the leading case in this state upon the rule. Judge Selden, who delivered the opinion of the Court of Appeals in that case, repudiated the theory of Domat and Sedgwick, both able writers, that the law does not aim at giving full compensation for an injury, but seeks merely to divide the loss. He also denied that profits were never recoverable as damages, holding that they were excluded only when uncertain and vague. He said "the broad general rule in such cases is, that the party injured is entitled to recover all his damages, including gains prevented as well as losses sustained; and this rule is subject to but two conditions: The damages must be such as may fairly be supposed to have entered into the contemplation of the parties when they made the contract, that is, must be such as might naturally be expected to follow its violation; and they must be certain, both in their nature and in respect to the cause from which they proceed. The familiar rules on the subject are all subordinate to these. For instance: that the damages must flow directly and naturally from the breach of contract, is a mere mode of expressing the first; and that they must be not the remote but proximate consequence of such breach and must not be speculative or contingent, are different modifications of the last."
